(B) FISCAL YEAR WITHOUT CONCURRENT RESOLUTION ON THE BUDGET.—Not later than October 1 of any fiscal year for which a concurrent resolution on the budget has not been adopted, the Directors shall (i) estimate the level of Federal revenues and budget outlays for such fiscal year, (ii) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (iii) estimate the rate of real economic growth that will occur during such fiscal year, and, if either such Director determines that the amount of the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year, shall jointly report to the President and the Congress, identifying the amount of such excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the amounts and percentages by which spending should be reduced or revenues increased, or both, to eliminate such excess. Any disagreement between the Directors on the amounts to be set forth shall be resolved in the manner set forth in the last sentence of subparagraph (A). In addition, each Director may submit alternatives to the President and to the Congress.

(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war is in effect.

(b) Presidential Submission.—

(1) Contents.—

(A) Upon receipt of any report from the Directors under subsection (a) identifying an amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Congressional Budget and Impoundment Control Act of 1974, the President shall submit a joint resolution which will, if enacted, reduce such excess. Such joint res-

olution shall contain revenue increasing or spending reduction recommendations, or both. Such spending reduction recommendations may be accomplished only by a uniform percentage reduction with respect to each program, project or activity, but reductions in benefits under Title II of the Social Security Act, in existing formal contractual obligations, and in revenue-producing programs (if a spending reduction would be more than offset by lost receipts produced by such spending program) shall not be included in the joint resolution submitted.

(B) Such joint resolution shall identify—

(i) the total amount and the percentage by which relatively controllable spending programs are to be reduced;

(ii) the total amount of budget authority and percentage reduction with respect to each such relatively controllable expenditure which is required;

(iii) the account, department or establishment of the Government to which each amount of budget authority specified under subdivision (ii) would be available for obligation (but for such joint resolution), and the specific project or governmental functions involved; and

(iv) full supporting details with respect to each action taken under subdivision (i) or (ii) of this section shall be provided along with the submission of the joint resolution.

(2) DATE OF SUBMISSION.—The President shall submit such joint resolution and full supporting details required in paragraph (1) not later than 14 days after the transmittal of the report of the Directors.

(3) SUSPENSION.—This subsection shall not apply to any fiscal year for which a declaration of war is in effect.

For subsection (c) beginning on line 3, page 30 continuing through line 21 on page 34, substitute the following new subsection.

(c) CONGRESSIONAL ACTION.—

(1) DEFINITION.—For the purposes of this section, the term "day" shall mean any calendar day on which either House of the Congress is in session.

(2) INTRODUCTION.—A joint resolution under subsection (b) shall be introduced (by request) by the majority leader of each House of the Congress on the day on which it is submitted and shall be referred on such day to the appropriate committee or committees of each such House. Such resolution shall be referred to the House Committee on Ways and Means and to the Senate Finance Committee whether or not such resolution recommends revenue increases. If such resolution recommends revenue increases. If such resolution contains provisions under the jurisdiction of more than one committee, the Parliamentarian of each House shall refer the resolution to the appropriate committees of jurisdiction.

(3) COMMITTEE CONSIDERATION AND REPORTING.—A joint resolution referred pursuant to paragraph (s) shall be reported within 10 days of referral to the Committee on the Budget of each House.

(A) Each such committee may modify in whole or in part any provision within its jurisdiction referred to it, may report alternative savings in a similar amount or may report a substitute. Any modifications, alternatives or substitutes reported must be within the jurisdiction of the reporting committee as defined by the rules of each House. No matters not directly related to reducing excess deficits shall be included in such modifications, alternatives or substitutes.

(B) If a committee fails to report within 10 days, such committee shall be immediately discharged from further consideration of the joint resolution and the joint resolution shall be considered as if favorably reported to the Budget Committee.

(C) The Budget Committee, upon receipt of all recommendations from the committees, or in the case of discharge of the President's recommendations, shall report to its House the joint resolution carrying out all such recommendations within 3 days.

(i) In the event that two committees report differing recommendations on the same subject matter within their respective jurisdictions, the Budget Committee shall, if unable to reconcile the conflict, report a substitute for said provisions. Such substitute shall be within the scope of the two recommendations reported to it.

(ii) In the event that any committee reports any measure described in the last sentence of subparagraph (A) to the Budget Committee, the Budget Committee shall strike such matter from the resolution it reports and shall report which provisions have been so stricken.

(iii) When reported, such joint resolution shall be immediately placed on the appropriate legislative calendar for further consideration.

(4) PROCEDURES.—

(A) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under the above subsection and conference reports thereon.

(5) TIME LIMIT FOR CONGRESSIONAL ACTION.—For the fiscal year beginning October 1, 1985, if the joint resolution has been timely submitted by the President, and the Congress fails to complete action on it by midnight on December 31, 1985, then the President's recommendations with respect to spending reductions shall become effective immediately. For the fiscal year beginning October 1, 1986 through the fiscal year beginning October 1, 1988, if the President has timely submitted a joint resolution and the Congress fails to act by midnight on November 30, 1986, then the President's recommendations with respect to spending reductions shall become effective immediately.

SEC. 5. EXERCISE OF RULEMAKING POWERS.

The provisions of Sections 1 through 4 are enacted by the Congress—

(a) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and (b) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

BOREN (AND EXON) AMENDMENT NOS. 732 AND 733

(Ordered to lie on the table.)

Mr. BOREN (for himself and Mr. EXON) submitted two amendments intended to be proposed by them to the joint resolution (H.J. Res. 372), supra; as follows:

AMENDMENT No. 732

At the appropriate place in the joint resolution, insert a new section as follows:

SEC. . Notwithstanding any other provision of law, when the President, using the authorities under the Balanced Budget and Emergency Deficit Control Act of 1985, issues an order that modifies or suspends the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage the amount of increase under each such provision, the President shall also issue an order that would reduce, by the same uniform percentage, any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act: *Provided*, That any reduction in the increase of benefits payable under the old-age, survivors, and disability insurance program shall be computed in such a manner as to assure that the increase that would otherwise have been applicable is not reduced by more than 3 percentage points.

AMENDMENT No. 733

At the appropriate place in the joint resolution, insert the following new section:

SEC. . ALTERNATIVE MINIMUM TAX ON CORPORATIONS.

(a) IN GENERAL.—Section 56 of the Internal Revenue Code of 1954 (relating to additional corporate minimum tax) is amended to read as follows:

"SEC. 56 ALTERNATIVE MINIMUM TAX ON CORPORATIONS.

"(a) TAX IMPOSED.—

"(1) IN GENERAL.—A tax is hereby imposed on each corporation in an amount equal to the sum of—

"(A) 15 percent of so much of the corporate alternative minimum taxable income of the taxpayer for the taxable year as exceeds $100,000, but does such tax is greater than the amount of the adjusted regular tax for such year.

"(3) Tax to be in lieu of regular tax.—For purposes of this title, the tax imposed by this section shall be in lieu of the regular tax.

"(b) CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME.—For purposes of this title, the term 'corporate alternative minimum taxable income' means the taxable income (determined without regard to the deducation allowed by section 172) of the taxpayer for the taxable year—

"(1) reduced by the corporate alternative minimum tax net operating loss deduction provided by subsection (d), and

"(2) increased by an amount equal to the corporate alternative minimum tax preference items.

"(c) CORPORATE ALTERNATIVE MINIMUM TAX PREFERENCE ITEMS.—For purposes of this section, the corporate alternative minimum tax preferences items are:

"(1) CERTAIN ITEMS OF TAX PREFERENCE.—The sum of the amounts determined under the following provisions of section 57(a):

"(A) Paragraph (2) (relating to accelerated depreciation of real property).

"(B) Paragraph (5) (relating to mining exploration and development costs).

"(C) Paragraph (7) (relating to reserves for losses on bad debts of financial institutions).

"(D) Paragraph (8) (relating to depletion).

"(E) Paragraph (11) (relating to intangible drilling costs).

"(2) ACCELERATED COST RECOVERY REDUCTION; AMORTIZATION OF POLLUTION CONTROL FACILITIES.—

"(A) IN GENERAL.—With respect to each recovery property and each certified pollution control facility for which an election is in effect under section 169, the amount (if any) by which the deduction allowed under section 168(a) or 169, respectively, for the taxable year exceeds the deduction which would have been allowable for the taxable year had the property been depreciated using the straight-line method (without regard to salvage value) and a recovery period determined in accordance with the following table:

"In the case of:	The recovery period is:
3-year property	5 years
5-year property	8 years
10-year property	15 years
15-year property	22 years
18-year property and low-income housing	18 years.

"(B) SUBPARAGRAPH (A) INAPPLICABLE WHERE LONGER RECOVERY PERIODS APPLY.—If, pursuant to section 168(b)(3) or 168(f)(2), the recovery period for any property is longer than the recovery period for such property set forth in subparagraph (A), subparagraph (A) shall not apply to such property.

"(C) CONVENTIONS.—

"(i) IN GENERAL.—In the case of property other than 18-year real property and low-income housing, subparagraph (A) shall be applied by using a half-year convention.

"(ii) 18-year real property and low-income housing.—In the case of 18-year real property and low-income housing, subparagraph (A) shall be applied by using the conventions under sections 168(b)(2)(B) and 168(b)(4)(B).

"(D) DEFINITIONS.—For purposes of this paragraph, the terms '3-year property', '5-year property', '10-year property', '15-year public utility property', '18-year real property', 'low-income housing', and 'recovery property', have the same meanings given such terms by section 168.

"(3) RESEARCH AND EXPERIMENTAL EXPENDITURES.—The excess (if any) of—

"(A) the amount allowed as a deduction under section 174(a) for the taxable year, over

"(B) the amount which would have been allowable as a deduction for such taxable year with respect to research and experimental expenditures paid or incurred during such taxable year if such expenditures had been capitalized and amortized ratably over the 2-year period beginning with the taxable year in which such expenditures were made.

"(4) ITEMS WHICH ARE MORE ACCURATELY TAKEN INTO ACCOUNT TO REFLECT ECONOMIC GAIN OR LOSS.—

"(A) CONSTRUCTION PERIOD CARRYING CHARGES.—The amount allowable as a deduction for the taxable year for construction period carrying charges (as defined in section 312(n)(1)) paid or incurred during such taxable year.

"(B) TRADE NAME AND TRADEMARK EXPENDITURES.—The amount allowable as a deduction for the taxable year under section 177.

"(C) CIRCULATION EXPENDITURES.—The amount allowable as a deduction for the taxable year under section 173.

"(D) COMPLETED CONTRACT METHOD OF ACCOUNTING.—In the case of a taxpayer who uses the completed contract method of accounting, the excess (if any) of—

"(i) the taxable income of such taxpayer for the taxable year if such taxpayer used the percentage of completion method of accounting, over

"(ii) the taxable income of such taxpayer for such taxable year.

"(5) CERTAIN INTEREST EXPENSE.—That portion of the interest expense of the taxpayer for the taxable year which bears the same ratio to the total interest expense allowable as a deduction for the taxable year (determined without regard to this paragraph) as—

"(A) the interest income of the taxpayer which is exempt from taxes for such taxable year, bears to

"(B) the gross income of the taxpayer for such taxable year.

For purposes of this subparagraph, all members of an affiliated group (as defined in section 1504(a) without regard to section 1504(b)) shall be treated as 1 corporation.

"(6) SPECIAL LIFE INSURANCE COMPANY DEDUCTION.—The amount allowable as a deduction for the taxable year under subsection (a) of section 806.

"(7) CERTAIN SHIPPING INCOME.—With respect to any construction reserve fund or capital construction fund established by the taxpayer under sections 511 and 607 of the Merchant Marine Act (46 U.S.C. 1161, 1177), 50 percent of the net increase for such taxable year in the income and capital gain accounts under such funds.

"(d) CORPORATE ALTERNATIVE MINIMUM TAX NET OPERATING LOSS DEDUCTION.—For purposes of this section the term 'corporate alternative minimum tax net operating loss deduction' means the net operating loss deduction under section 172 for the taxable year for purposes of the regular tax, except that in determining the amount of such deduction—

"(1) in the case of taxable years beginning after September 30, 1986, section 172(b)(2) shall be applied by substituting 'corporate alternative minimum taxable income' for 'taxable income' each place it appears, and

"(2) the net operating loss (within the meaning of section 172(c)) for any loss year shall be reduced by the amount of corporate alternative minimum tax preference items arising in such year.

"(e) ELECTION TO MAKE ADJUSTMENTS FOR REGULAR TAX PURPOSES.—

"(1) IN GENERAL.—The taxpayer may elect for any taxable year to have any adjustment required by subsection (b)(2) with respect to any corporate alternative minimum tax preference item arising in such year apply also to such item for regular tax purposes. The treatment of any item with respect to which an election has been made under the preceding sentence shall (for all later years and for purposes of both the regular tax and this section) be consistent with its treatment for the year in which it arises.

"(2) TIME FOR MAKING ELECTION.—Any election under paragraph (1) with respect to any item shall be made not later than the due date (with extensions) for filing the return under this chapter for the taxable year in which such time arose.

"(3) REVOCATION ONLY WITH CONSENT.—Any election under paragraph (1) may be made only in the manner provided by regulations, and may be revoked only with the consent of the Secretary.

"(f) SPECIAL RULES RELATING TO CREDITS.—For purposes of this section—

"(1) CREDITS NOT ALLOWABLE.—For purposes of determining any credit allowable under subpart A, B, or D of part IV of this subchapter (other than the foreign tax credit allowed under section 27(a)), the tax imposed by this section shall not be treated as a tax imposed by this chapter.

"(2) FOREIGN TAX CREDIT ALLOWED AGAINST ALTERNATIVE MINIMUM TAX.—

"(A) DETERMINATION OF FOREIGN TAX CREDIT.—The total amount of the foreign tax credit which may be taken against the tax imposed by subsection (a) shall be determined under subpart A of part III of subchapter N (section 901 and following).

"(B) INCREASE IN AMOUNT OF FOREIGN TAXES TAKEN INTO ACCOUNT.—For purposes of the determination under subparagraph (A), the amount of the taxes paid or accrued to foreign countries or possessions of the United States during the taxable year shall be increased by an amount equal to the lesser of—

"(i) the foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year, or

"(ii) the tax imposed by subsection (a).

"(C) SECTION 904(a) LIMITATION.—For purposes of the determination provided by subparagraph (A), the limitation of section 904(a) shall be equal the same proportion of the sum of the tax imposed by subsection (a) against which such credit is taken and the regular tax as—

"(1) the taxpayer's corporate alternative minimum taxable income from sources without the United States (but not in excess of the taxpayer's entire corporate alternative minimum taxable income), bears to

"(ii) the taxpayer's entire corporate alternate minimum taxable income.

For purposes of this subparagraph, the amount of the limitation of section 904(a) shall not exceed the tax imposed by subsection (a).

"(D) DEFINITION OF CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME FROM SOURCES WITHOUT THE UNITED STATES.—For purposes of subparagraph (C), the term 'corporate alternative minimum taxable income from sources without the United States' means taxable income from sources without the United States, adjusted as provided in paragraphs (1) and (2) of subsection (b) (taking into account in such adjustment only items described in such paragraphs which are properly attributable to items of gross income from sources without the United States).

"(E) SPECIAL RULE FOR APPLYING SECTION 904(c).—In determining the amount of foreign taxes paid or accrued during the taxable year which may be deemed to be paid or accrued in a preceding or succeeding taxable year under section 904(c)—

"(i) the limitation of section 904(a) shall be increased by the amount of the limitation determined under subparagraph (C), and

"(ii) any increase under subparagraph (B) shall be taken into account.

"(3) CARRYOVER AND CARRYBACK OF CERTAIN CREDITS.—In the case of any taxable year for which a tax is imposed by this section, for purposes of determining the amount of any carryforward or carryback to any other taxable year of any credit allowable under section 30 or 38, the amount of the credit under section 30(g) or 38(c) (as the case may be) shall be deemed to be—

"(A) the amount of such credit allowable for such taxable year (determined without regard to this paragraph), reduced (but not below zero) by

"(B) the amount of the tax imposed by this section for the taxable year, reduced by in the case of the limitation under section 38(c), the amount of such tax taken into account under this subparagraph with respect to limitations under section 30(g).

"(g) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) REGULAR TAX.—The term 'regular tax' means the taxes imposed by this chapter for the taxable year (computed without regard to this section and without regard to the taxes imposed by sections 47(a), 531, and 541).

"(2) ADJUSTED REGULAR TAX.—The term 'adjusted regular tax' means, for any taxable year—

"(A) the regular tax, reduced by

"(B) the sum of the credits allowable under subparts A, B, and D of part IV of this subchapter, except the credit allowable under section 27(a).

For purposes of this paragraph, the credits allowable under subparts A, B, and D of part IV shall be computed as if the credit allowable under section 27(a) were also allowable.

"(3) TAXABLE YEAR IN WHICH ITEM ARISES.—In the case of any amount which is taken into account for regular tax purposes in more than 1 taxable year, such amount shall be treated as an item arising in the first such taxable year.

"(4) APPLICATION WITH SECTION 291.—The determination of the amount of any corporate alternative minimum tax preference item shall be made after the application of section 291.".

(b) REVENUES DURING FISCAL YEAR 1987 TAKEN INTO ACCOUNT FIRST IN DETERMINING REVENUE SHORTFALL.—Notwithstanding any other provision of this Act, the increase in Federal revenues during the fiscal year beginning October 1, 1986, by reason of the amendment made by subsection (a) shall be used to reduce any shortfall in the Federal budget before any action required under this Act to reduce such deficit.

(c) ESTIMATED TAX.—Sections 6154(c)(1) and 6651(f)(1) of the Internal Revenue Code of 1954 (defining tax) are each amended by inserting ", 56," after "section 11".

(d) CONFORMING AMENDMENTS.—

(1) Section 26 of the Internal Revenue Code of 1954 (relating to definition of tax liability) is amended—

(A) by striking out subparagraph (A) of subsection (b)(2) and by redesignating subparagraphs (B) through (H) of subsection (b)(2) as subparagraphs (A) through (G), respectively, and

(B) in subsection (c)—

(i) by inserting "(1)" before "For" and by adding at the end thereof the following new paragraph:

"(2) For treatment of tax imposed by section 56 as tax not imposed by this chapter, see section 56(e).", and

(ii) by striking out the heading and inserting in lieu thereof:

"(c) SPECIAL RULES FOR MINIMUM TAXES.—".

(2) Section 57 of such Code (relating to items of tax preference) is amended—

(A) by striking out the last sentence of subsection (a),

(B) by striking out paragraph (9) of subsection (a) and inserting in lieu thereof:

"(9) CAPITAL GAINS OF TAXPAYERS OTHER THAN CORPORATIONS.—In the case of a taxpayer other than a corporation, an amount equal to the net capital gain deduction for the taxable year, determined under section 1202.", and

(C) by striking out subsections (b) and (e).

(3) Section 58 of such Code (relating to rules for application) is amended—

(A) by striking out "$10,000" in subsection (b) and inserting in lieu thereof "$100,000" (or $1,000,000)",

(B) by striking out "respective regular tax deductions (within the meaning of section 56(c))" and inserting in lieu thereof "respective corporate alternative minimum taxable incomes (within the meaning of section 56(b))", and

(C) by striking out subsection (d).

(4) Section 58 of such Code is amended by striking out subsection (f) (relating to regulated investment companies, etc.).

(5) Subsection (g) of section 58 of such Code (relating to tax preferences to foreign sources) is amended to read as follows:

"(g) TAX PREFERENCES ATTRIBUTABLE TO FOREIGN SOURCES.—For purposes of section 56, the corporate alternative minimum tax items set forth in section 56(c) which are attributable to sources within any foreign country or possession of the United States shall be taken into account only to the extent that such items reduce the tax imposed by this chapter (other than the tax imposed by section 56) on income derived from sources within the United States. For purposes of the preceding sentence, the corporate alternative minimum tax items shall be treated as reducing the tax imposed by this chapter before other items.".

(6) Subsection (a) of section 882 of such code is amended to read as follows:

"(1) IN GENERAL.—A foreign corporation engaged in a trade or business within the United States during the taxable year shall be taxable as provided in section 11, 56, or 1201(a) on its taxable income which is effectively connected with the conduct of a trade or business within the United States.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after September 30, 1986.

Mr. BOREN. Mr. President, I am proud to be a cosponsor of the Gramm proposal. I strongly support it and hope to have a chance to vote for it as soon as possible if it is passed. I plan to offer two amendments to strengthen the proposal by making it fairer and more effective.

One amendment would include Social Security COLA's in the across-the-board reduction in spending increases that are required under the deficit reduction mechanism. These COLA's could not, however, be reduced by more than 3 percent.

The second would impose a minimum, corporate tax on corporations with large profits which now avoid paying any taxes. Funds from the minimum corporate tax would be applied to deficit reduction first in order to reduce the cuts required by the Gramm proposal in other programs.

My proposal includes the text of a minimum corporate tax which would go into effect on October 1, 1986. It would raise approximately $4 billion per year in revenue. Beginning 1986, this $4 billion raised each year would be applied first to meet the required deficit reduction targets. If the tax itself is not sufficient to meet the estimated shortfall, then the across-the-board mechanism of the Gramm proposal would apply.

How can we ask for across-the-board sacrifices from other Americans when it has been reported that four of the Nation's largest corporations had over $10 billion in profits and paid no taxes? In fact, they received tax rebates of $600 million.

Once we have made sure that these tax avoiders have paid their fair share, then it is proper to ask all Americans to make an across-the-board sacrifice.

In that regard, I will also propose that automatic Social Security increases should not be exempt from the general sacrifice required of all others. How can we honestly say that we have a shared sacrifice by all Americans if we leave out approximately 20 percent of the budget?

I believe that such an exemption insults the patriotism of millions of our senior citizens. While it would be unfair to single them out for sacrifices not required of others, I believe that a vast majority of our senior citizens want to do their part to help balance the budget as long as all other Americans also join in the effort. I do not know any group of Americans who care about their country more than they do.

AGRICULTURAL FOOD, TRADE, AND CONSERVATION ACT

GRASSLEY AMENDMENT NO. 734

(Ordered to lie on the table.)

Mr. GRASSLEY submitted an amendment intended to be proposed by him to the bill (S. 1714) to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes; as follows:

On page 7, after the item relating to section 1718, insert the following new item:

Sec. 1718. Loan moratorium.

On page 377, between lines 20 and 21, insert the following new section:

LOAN MORATORIUM

Sec. 1719. (a) As used in this section:

(1) The term "circumstances beyond the control of the borrower" includes—

(A) a reduction of the income of a borrower occurring as a result of—

(i) the unemployment, illness, or injury of the borrower;

(ii) the death of a member of the family of the borrower; or

(iii) the occurrence of a natural disaster, crop or livestock disease, insect damage, or adverse conditions in the farm economy (such as high interest rates, declining farm equity, or high cost of production relative to the market price for farm products); and

(B) the occurence of unplanned, essential farm and home operating expenses as a result of—

(i) the illness or injury of the borrower;

(ii) the death of a member of the family of the borrower; or

(iii) the cost of repair, or uninsured loss, of property used to secure a loan made by an institution.

(2) The term "institution" means an institution of the Farm Credit System estab-

lished under the Farm Credit Act of 1971 (12 U.S.C. 2001 et seq.).

(3) The term "Secretary" means the Secretary of Agriculture.

(b) During the period described in subsection (d), an institution may not—

(1) take any action as the result of a default of an eligible borrower described in subsection (c) on an outstanding loan made by such institution; or

(2) consolidate or merge with another institution.

(c) To be eligible to receive assistance under subsection (b)(1), a borrower of a loan must demonstrate to the satisfaction of the Secretary that, due to circumstances beyond the control of the borrower, the borrower is temporarily unable to continue making payments of principal and interest due on such loan without unduly impairing the standard of living of the borrower.

(d) This section shall apply during the period beginning on the date of enactment of this Act and ending on the date Congress enacts a law that provides financial assistance to institutions.

● Mr. GRASSLEY. Mr. President, today I am submitting an amendment that would impose a temporary moratorium on foreclosures, consolidations, and mergers by institutions of the farm credit system. I am also introducing S. 1738, legislation to provide U.S. Government guarantees of bonds sold by the farm credit system.

The belief is shared by many of us who have closely examined the activities of the farm credit system—and certainly by many borrowers, other creditors, and economists—that the so-called financial assistance package that has been implemented for the Omaha district of the farm credit system will have disastrous consequences for the Midwest economy and will unnecessarily harm family farms and businesses throughout the region. Reports of plans for mass liquidations, foreclosures, and efforts to weaken farmer control of the system have been circulating with greater frequency during the last few weeks.

On September 6, I held a hearing on the farm credit system to discuss these reports and the activities and plans of the system. Unfortunately, nothing was offered to allay these concerns.

Most would agree that the Midwest farm economies, particularly Iowa's, are the most hard hit and fragile. Further disruptions along the line planned cannot be allowed. Many believe that such action could cause our entire Midwest farm economy to collapse.

In September, farm credit system officials finally admitted that they need Government assistance. So now Congress and the administration is considering a number of proposals to provide this assistance. I have introduced several proposals myself, and am presently working on a bipartisan effort with Senator BOSCHWITZ. I am concerned about the financial condition of the farm credit system and am very willing and eager to work hard for solutions.

But I would also like some assurances that Midwest farm credit system borrowers, those who are on the cutting edge of this financial crisis and who are in most need of help, will benefit greatly from our efforts. I am not about, and I know I speak for a number of my Senate colleagues, to blindly push for a farm credit system bailout while our own people are decimated by severe, counterproductive liquidation and foreclosure policies.

The big squeeze is being forced upon the Omaha district by the rest of the farm credit system in hopes of minimizing the troubles and discomfort for the rest of the system. The system has offered something that looks less like an assistance package and much more like a mass execution. In fact, if you scrutinize carefully the system's plans for the Omaha district, it appears as if the system may either break even or possibly even make money at the ultimate, long-term expense of the Omaha district.

Last week, a number of my Senate colleagues representing the Omaha district sent a letter to Governor Wilkinson of the Farm Credit Administration asking that the system voluntarily adopt a policy that places a moratorium on all liquidations, foreclosures, interest rate hikes, and any other measures that will increase the credit burden of farmers or that will generally harm the farm economy of the Omaha district. We asked that this moratorium be left in place at least 90 days so that an appropriate Government plan could be implemented. We asked for a full explanation of the economic and legal reasons if our request would not be honored.

Last night, we just received our response. It was not satisfactory, and I am writing for a further explanation. Although not told directly, we have to assume that the farm credit system is unwilling to cooperate with this request.

The letter failed to respond to our concerns that present plans and activities are counterproductive and possibly devastating. During my hearing in September, farm credit system officials admitted that their policies were not working, but that they were going ahead anyway. Congress ought to know why.

The response we received stated that a moratorium would erode the confidence of the bond market. I am getting tired of this old, worn out excuse. The farm credit system has used this excuse for everything they have wanted to do during that last 2 years and for everything they don't want to do. This is a shallow excuse. The cat has been out of the bag ever since September when the farm credit system officials publicly announced they needed Government assistance.

The aim of a moratorium is simply to stabilize a deteriorating farm economy while Congress works out an assistance plan. I can't imagine why that would cause a scare in the bond market. If anything, it should improve confidence in the system. After all, if present policies are counterproductive, why should bond markets exhibit any confidence?

The response we received also warned that the system's servicing expenses and costs in carrying noninincome producing assets would increase and force increased credit burdens upon sound borrowers. This excuse, too, is baseless. Liquidations and foreclosures are costly. If the Government assistance package can minimize the number of liquidations, then it makes sense to hold off until the package is implemented. Second, this is only a temporary moratorium. With such soft farm equipment and land markets in the Midwest, the farm cedit system is not assured of a quick return on foreclosures.

The intention is not for the solid borrowers to have to pick up the additional credit burdens, although I might add that systemwide, there should be a more equitable sharing of the burdens facing troubled districts. But the idea is that the Government assistance package picks up much of the unbearable credit problems.

Since the farm credit system appears unwilling to cooperate with this request, I am introducing legislation requiring the necessary action. I am also introducing a bill S. 1738 that would guarantee farm credit system bonds and am prepared to combine the two if this will alleviate the concerns about the reaction of the bond markets.

I hope my colleagues representing other parts of the country can support this legislation. Some have suggested to me that regional or parochial interests might cause some to resist this temporary reprieve. In fact, I learned today that some districts of the farm credit system are attempting to use up their reserves quickly so that they won't have to give it to help the Omaha district or the system as a whole. I hope my colleagues understand the self-defeating nature of this attitude and action and are willing to work together on this major problem.●

ADDITIONAL STATEMENTS

NATIONAL CHILDREN'S WEEK

● Mr. QUAYLE. Mr. President, I am pleased that the week of October 6 through October 12, 1985, is designated as "National Children's Week."

While recognizing many important causes through commemorative resolutions, we sometimes overlook what is often closest to our hearts. "National Children's Week" seeks to focus our

hearts and our energies on our children—our own, if we have them—on the children of the less fortunate, on the children without families, or those who may be in need. Children growing up today face many emotional and physical dangers—from a wrenching divorce to lack of adequate nourishment to experimentation with drugs. We hope every child is given the benefit of a strong family unit, and good guidance through childhood, but unfortunately these days, that does not always occur. When a child is set loose, without a caring family or wise restrictions, the result is often juvenile delinquency or drug abuse in later years. It is the hope that National Children's Week will help children by focusing attention on the need for strong family support in childhood and on how the community can help families and children.

The first National Children's Week was celebrated in 1981 by concerned citizens and child advocacy groups in several States including Indiana and Georgia, which have been very active in publicizing the celebration. Since 1981, more and more States are sponsoring Children's Week activities and focusing attention on some of the problems facing children and youth.

During Children's Week, advocacy groups, parents, community organizations, and the business community conduct numerous events to heighten public awareness and increase volunteer participation in children's and youth projects. Activities focus on the inadequacy of infant health care, youth alcohol and drug abuse, child abuse, juvenile justice, and assistance for disadvantaged and handicapped children.

One example of a group that helps kids is the Jameson Camp, headquartered in Indianapolis. Jameson Camp takes youngsters who have disabilities or behaviorial problems and puts them in an environment where they learn self-respect and compassion for each other. Often the children arrive malnourished, from families who know little about good nutrition. They are taught about good health, good nutrition, and how to take care of themselves. They participate in sports and activities and learn new skills which increase their self-esteem and motivation. The camp is filled with dedicated staff and counselors, who see each child as an individual with unlimited potential, just waiting to be discovered. Each child receives special care, and most of the children flower and grow as a result of the individualized attention. Such dedication and commitment is what "National Children's Week" is all about. It is fitting that Jameson Camp will be celebrating its 50th anniversary during the week we honor our children.

Our children are our future and our most dear resource. If we can help them and their families with support, encouragement, and caring, we will be building a stronger Nation. "National Children's Week" is a celebration of our future and a recognition of the many fine individuals, groups, and community organizations that have committed their lives and their hearts to helping all of our children live a happy and healthy life.●

HUNGER AND HOMELESSNESS

● Mr. KERRY. Mr. President, I would like to commend the National Institute for Self-Help, which is holding its second annual conference on hunger and homelessness. Distinguished speakers from private voluntary organizations that care for the hungry and the homeless, the business community, the U.S. Departments of Health and Human Services and Agriculture, and Members of Congress will present their recommendations for alleviating problems of hunger and homelessness.

Martha's Table, an affiliate of the National Institute for Self-Help, is a nonprofit soup kitchen for children. It acts as a true role model as to how private volunteer organizations can work to fight hunger and homelessness nationwide.

In particular, Dr. Veronica Maz, founder of Martha's Table, is to be commended for her diligence and unfailing commitment in trying to alleviate the hunger problem in the Washington, DC, area. Martha's Table sends out a food wagon daily to provide dinner for approximatly 100 destitute and homeless individuals. Without Dr. Maz's leadership and recruitment of volunteers, these people would remain hungry.

It is the combination of private funds and Federal emergency food and shelter FEMA money that has made such assistance possible for those who most need it. The private/public partnership is the means through which headway on this crucial issue can be made.

Homelessness can be attributed to a variety of social failures including persistent poverty, scarcity of low-income housing, alcohol and drug abuse, cutbacks in care for the mentally ill, spiraling inflation and the ongoing attempts by the present administration to make major cuts in Federal human service programs.

Because of the numerous factors relating to this situtation, I overwhelmingly applaud the enduring commitment of those who are working to solve problems of hunger and homelessness in our Nation.●

DOUGLAS HERZOG, CHAIRMAN OF NATIONAL NETWORK CF RUNAWAY AND YOUTH SERVICES

● Mr. BURDICK. Mr. President, it gives me great pleasure to announce that one of North Dakota's finest citizens, Mr. Douglas Herzog, has been named board chairman of the National Network of Runaway and Youth Services.

The National Network is a nonprofit organization that is made up of more than 700 community, State and multi-State agencies that serve runaway, homeless and other troubled youth and their families.

Mr. Herzog has represented the needs and interests of the Nation's youth in his 6 years of involvement with the National Network. He is the executive director of the Mountain Plains Youth Services Coalition in Bismarck, ND, where he lives with his wife Karen and three children. His prior experience includes administering the office on children and youth for the State of South Dakota, serving as a delegate to the U.N. Conference on Rural Youth, and participating in the USICA Exchange Program in West Germany.

Mr. Herzog received a master of science degree in counseling, guidance and personnel from North Dakota State University in 1975, following undergraduate work at Jamestown College in Jamestown, ND.

He has worked hard to serve runaway and homeless youth and their families. I know that my colleagues join me in congratulating Mr. Herzog as he begins his new responsibilities.●

MICHIGAN INVENTION WILL SAVE LIVES

● Mr. RIEGLE. Mr. President, I have recently learned that the Federal Communications Commission has approved the Rashid radar warning system for use in trucks and automobiles. The device is a transmitter and receiver system mounted in the front of a vehicle and designed to assist in the prevention of head-on collisions.

Almost 55 percent of all fatal accidents are frontal collisions. We are all familiar with tragic accidents that occur during heavy fog conditions. Frequently these accidents result in chain-reaction collisions, with numerous injuries or deaths, and tremendous loss of property. In fact, it was just these conditions which led George Rashid of Mount Clemons, MI, to visualize and later develop this device.

Mr. President, I ask that an article which appeared in the Washington Post about this matter be printed in the RECORD, and I would like to extend my best wishes for success to this family owned, Michigan company.

The article follows:

[From the Washington Post, Aug. 5, 1985]

ANTICOLLISION VEHICLE RADAR IS APPROVED

(By Nell Henderson)

Driving home one night through dense fog, George Rashid pulled over to the side of the road and decided that if airplanes use radar, automobiles can too.

More than 30 years later, his sons said yesterday that they have received government approval for their late father's invention—a radar device designed to warn car and truck drivers of possible front-end collisions.

The Rashid Radar Collision Warning System uses radar to detect an object in the path of a vehicle and a microprocessor to determine whether a collision is imminent. If an automobile is closing in on a slower or stationary object, the system flashes a series of warning lights and sounds a siren until the driver hits the brakes.

The Federal Communications Commission has approved the system for use after three years of testing that covered more than a million miles, said Jack Rashid, vice president for marketing of Vehicle Radar Safety Systems Inc., the family-owned company that developed the system.

The Rashid family hopes the invention will "contribute to safety on the nation's highways," he said.

About 55 percent of all people killed while driving or riding in a motor vehicle lose their lives in front-end collisions, according to the National Highway Traffic Safety Administration. In 1984, about 11,500 car occupants died in front-end collisions, and about 14,500 died in front-end collisions while riding in a car, truck, motorcycle or other motor vehicle, a NHTSA spokesman said.

Vehicle Radar also sees the warning system as the first step toward a radar brake system, which would both detect an imminent collision and activate the brakes. The company, based in Mount Clemens, Mich., has already developed a radar brake system but has not yet applied for FCC approval. The company will wait to see how the warning system does first, said Penny Farthing, company counsel.

The company had no estimates of potential sales, but said it believes it is ahead of any competition because it has a patented system with FCC approval, Rashid said.

The three-part warning system consists of a radar antenna, an electronic signal processor and a dash-board monitor.

The microwave radar antenna, when installed, looks like a third headlight above the front bumper of the car and acts as both a radar emitter and receiver. It sends out a narrow beam signal directly in front of the car, which bounces back to the antenna after hitting a slower moving vehicle or stationary object, as high or higher than the antenna. The beam misses objects to the side of the car, as well as road signs and overpasses, Rashid said.

When the radar beam bounces back, the signal processor analyzes it to determine the speed and distance of the object, compared with the speed of the car using the radar system. The processor, a small box weighing less than five pounds, instantly evaluates the information to determine if a crash is possible.

The processor may then send a variety of signals to a small monitor placed on the dashboard. A green light indicates that the radar system is on. A yellow light alerts the driver that a slower or stationary object lies ahead. A red warning light and alarm sound tells a driver to cut speed, and another red light and shriller alarm says to hit the brakes.

The system is only activated at speeds above 10 miles per hour, to avoid triggering the warnings when driving in bumper-to-bumper traffic or in a garage, said Charles Rashid, vice president of engineering.

It does, however, trigger radar detecting devices used by some motorists to warn them of police radar surveillance, Jack Rashid said.

A SALUTE TO BARBARA J. EASTERLING, CWA'S NEWEST OFFICER

● Mr. METZENBUAM. Mr. President, at its 47th annual convention in July, the Communications Workers of America broke new ground when delegates elected Barbara J. Easterling, from Akron, OH, to serve as the union's first female national officer.

I am especially pleased that CWA's newest executive vice president has been a member of a CWA local in Akron, OH, for more than 30 years.

Barbara Easterling left a significant imprint on public affairs in Ohio during her formative career years there. In 1971, Governor John Gilligan appointed her to serve as chief of the Ohio Industrial Relations Labor Division. Ms. Easterling also was the first woman elected to serve as vice president of the Ohio AFL-CIO.

Ms. Easterling is symbolic of a new generation of trade union leaders. She is an excellent manager and motivator and a strong believer in quality of worklife programs.

Mr. President, as she begins her new duties here in Washington, I want to congratulate Barbara and her family. In addition, I want to commend the members of the CWA for recognizing her talent.

She has proven she is among the best and brightest in Ohio and now will have an opportunity to demonstrate her skills on a national level.

She has always proven herself able to meet the challenge. I wish her continued success in her latest endeavor.

EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM

● Mr. ROTH. Mr. President, S. 1544, the legislation I am sponsoring along with Senator MOYNIHAN and nine other members of the Finance Committee has been reported out of the Finance Committee as part of the budget reconciliation package and will soon be considered on the floor. This legislation would extend the current trade adjustment assistance program until a new improved program goes into effect.

This new program would directly address the two key problems with the existing program: Inadequate funding and insufficient adjustment efforts by individuals. The new program would be funded by a small users fee—capped at 1 percent, but likely to be about one-tenth of 1 percent—on imports. Under the new program all benefits now available to workers would continue. But workers would now have to agree to retraining in order to receive the extended unemployment compensation. They would receive a $4,000 tax-free voucher to cover the cost of the retraining program.

I ask to include several items in the RECORD that relate to this legislation, first is a letter I received from the National Retail Merchants Association endorsing this bill, second is a copy of an editorial by myself and Senator MOYNIHAN which appeared in Monday's Journal of Commerce and finally additional background on the rationale for this legislation is provided in a reprint on my opening statement for the hearing on this legislation which was held on September 17.

I am very pleased that this legislation is receiving such broad support—from the labor unions as well as the retailers, from Democrats and Republicans. And from Members with a wide variety of views on trade.

The material follows:

NATIONAL RETAIL MERCHANTS ASSOCIATION,
Washington, DC, September 30, 1985.

Hon. WILLIAM V. ROTH, Jr.,
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR ROTH: I am writing on behalf of the National Retail Merchants Association ("NRMA") to renew our support for the trade adjustment and worker retraining program originally contained in your bills—S. 1544 and Title II of S. 234.

NRMA believes that your worker retraining proposals are a positive step toward shifting the focus of the U.S. trade debate from protectionism to the adjustment difficulties of workers in industries facing import competition. We are delighted that the Senate Finance Committee has unanimously supported your approach, and we stand ready to help you and the committee in seeking quick passage of the worker adjustment program adopted by the Committee. The retraining program contained in your bills and endorsed by the Senate Finance committee is, we believe, a marked improvement over the existing trade adjustment assistance program because of its focus on retraining, rather than simple unemployment assistance. Moreover, we wish to thank you for including an amendment to your original draft of the bill that caps the "small uniform duty" at one percent. We believe this is a significant improvement to the original proposal.

Of course, we still support the remaining provisions of the Trade Expansion Act, and we hope that they, too, will receive a full hearing before the Senate.

By way of background, NRMA is composed of 3,700 companies representing approximately 45,000 leading chain, department and specialty stores in the United States, and an additional 1,000 retail firms in 50 nations abroad. Member firms have current annual sales in excess of $150 billion and employ nearly 3 million workers.

If you have any questions about NRMA or its views on this matter, please do not hesitate to contact me or Ms. Robin W. Lanier,

NRMA Senior Legislative Representative, at 202/223-8250.

Sincerely,

JAMES R. WILLIAMS,
President.

[From The Journal of Commerce, September 30, 1985]

EXTENSION, REFORMS URGED FOR TRADE ADJUSTMENT AID

(By Sen. William Roth and Sen. Daniel Patrick Moynihan)

For anyone who needs further evidence of the contradictions in American trade policy, Sept. 30 should prove quite instructive.

This is the date currently set for a formal meeting of members of the General Agreement on Tariffs and Trade—a meeting strongly urged by the United States—to prepare for a new round of talks aimed at expanding international trade by further reducing trade barriers.

It is also the expiration date for the Trade Adjustment Assistance program—the only federal program specifically intended to help workers who lose their jobs as a result of increased foreign competition.

For decades, adherence to the GATT has helped bring the fruits of free trade—a wider variety of goods and services at lower cost to American consumers. While the benefits of an open trade policy are widespread, there are costs. These costs are focused on the working men and women of America who are adversely affected by import competition.

TAA is for these workers. TAA represents a commitment first made to the American worker two decades ago at the time of the "Kennedy Round" GATT negoitations to reduce tariffs.

TAA was not an embellishment of those talks; it was in a very real sense a condition for them. Just as it was for the Tokyo Round of trade negotiations in the 1970s.

TAA provides extended unemployment benefits (Trade Readjustment Allowances) to help workers pay their bills; retraining benefits to assist displaced workers qualify for new jobs in different sectors of the economy; and job search and relocation benefits to ease the transition.

In the past 10 years, nearly 1.5 million American workers have received benefits under this program.

Yet, ironically, at a time when we are experiencing a "trade shock"—with consequences as momentous as those we felt from the two "oil shocks" in the 1970s—the TAA program is scheduled to expire at the end of this month.

From Jan. 1, 1981 until June 30 of this year, the United States imported $346 billion more in goods and services than it exported. Our 1984 trade deficit of $123 billion was more than triple the 1981 trade deficit.

And the situation continues to deteriorate: the trade deficit for the first six months of 1985 is greater than the entire deficit for 1983.

These numbers are cause for real concern. There is a rough rule of thumb used by the International Trade Commission and the Department of Commerce that for every $1 billion increase in the trade deficit, 25,000 new job opportunities are lost to foreigners.

This means that since 1981 the trade deficit has cost more than 2.3 million job opportunities for Americans.

The need for a program to help workers hurt by imports has never been greater, and last week the Senate Finance Committee recognized such by unanimously approving our legislation, the TAA Reform and Extension Act of 1985. But this initial victory, while significant, guarantees neither passage by the Congress nor signature by President Reagan.

Support for TAA has been uncertain because money is tight and because many claim that the program has not facilitated adjustment by individuals to import competition.

Our legislation would extend the existing program until a new improved program goes into effect—not more than three years after enactment.

The new program directly addresses the two key problems in the existing program: inadequate funding and insufficient adjustment efforts by individuals.

The new program would be funded by a small (maximum 1 percent) fee on all imports. In effect, it would be a user fee—those who benefit from trade would pay for the costs of trade.

It would be a small price to pay for keeping trade open and expanding—and, in fact, the president would attempt to obtain GATT agreement for the fee on that basis.

Under the new program all benefits now available to workers would continue. But workers would now have to agree to retraining in order to receive a Trade Readjustment Allowance. And they would receive a $4,000 tax-free voucher to cover the cost of the retraining program.

Our intention is to require that a worker actually begin the adjustment process by entering any one of a variety of training programs and at the same time improve program administration to ensure that a variety of programs will be available (e.g. offered by state agencies, vocational schools, community colleges, unions or on-the-job training).

A trade adjustment assistance program is not the answer to all our trade problems. The overvalued dollar, unfair foreign trade practices, foreign markets closed to U.S. exports, the lack of a Department of International Trade and lagging American competitiveness, all demand attention—and each of us has introduced legislation to address these problems.

But trade adjustment assistance can, and should, be a complementary effort designed to help American workers adjust to tough, yet fair, foreign competition.

SENATOR BILL ROTH—NEWS RELEASE

WASHINGTON.—The following is the opening statement by Senator William V. Roth, Jr., R-Del., before the Senate Finance Committee regarding his legislation, S. 1544, the Trade Adjustment Assistance Extension and Reform Act of 1985:

"It is not often that a piece of trade legislation is cosponsored by so many members of this committee. I'm pleased to say that we now have 11 members of the Finance Committee cosponsoring S. 1544. Trade adjustment assistance, however, is a bipartisan issue that has unified members. In addition, I am delighted to learn that the Administration is now reevaluating its position in this issue.

"Why is support emerging from all quarters for the extension and reform of this valuable program? Our country is experiencing a trade shock, unprecedented in the history of our country. It is a shock not just because of the magnitude of our global trade deficit ($123 in 1984 and higher this year) but more specifically because imports are now hurting the full range of American businesses—from textiles to semiconductors.

"These economic factors have brought with them two clear political realities: First, the call for protectionist measures is louder and more intense than at any recent period and second, the need for help for individuals hurt by imports is greater than ever.

"This raises the question that is the central focus of this hearing: Is this the time to let the Trade Adjustment Assistance program expire? Because, indeed, it will expire on September 30 unless the Congress acts to prevent it.

"I certainly think the answer to this question is a resounding no, for three reasons.

"First, this is no time to renge on the commitment the Congress made to help workers put out of work by trade expansion in the 1962 and again in the 1974 trade acts. Now is the time to deliver on our commitments—not cast them aside.

"Second, failure to seriously address the adjustment issue and failure to help those hurt by trade can only fan the fires of protectionism, making it even more difficult to define a responsible trade policy for the 80's, and 90's.

"Third, and most obvious, this is no time to let trade adjustment assistance expire because we will leave many people in the lurch.

"Make no mistake, the Job Training Partnership Act is no substitute for the Trade Adjustment Assistance program, as some might suggest. TAA is the only program that provides workers not only with training, job search and job relocation help, but also with additional unemployment compensation.

"Still, support for trade adjustment assistance had been floundering. Why? Because of the costs, because the current program does not have a good record in promoting adjustment and because some have been concerned that we should not have an assistance program for a specific category of workers—those displaced because of imports.

"On this last point, let me make two comments. Today it is estimated that 70 to 80 percent of U.S. production faces import competition, so most dislocated workers would have an opportunity to qualify for this program. Second, to some degree this question is irrelevant. We have a special legal and outstanding commitment to trade-impacted workers.

"The issues of money and adjustment are the focus of the reforms in my bill, S. 1544. Adjustment would be encouraged because participation in retraining would be a requirement for receipt of additional unemployment compensation. Workers would receive a new benefit, a $4,000 voucher to be used to finance this retraining. Funding would be handled through a small adjustment fee on imports.

"This legislation is not a substitute for a fair and effective trade policy. But is it the bottom line for the U.S. worker and it cannot wait for the broader debate on trade. I would propose that we call a short truce in the greater trade debate and move this legislation to the floor before September 30th."

TRADE ADJUSTMENT ASSISTANCE REFORM AND EXTENSION ACT OF 1985—FUNDS A REVISED TAA PROGRAM THROUGH A SMALL FEE ON IMPORTS

Directs the President to obtain GATT approval as soon as possible for countries to be able to impose a small uniform duty on all imports to fund adjustment programs.

Instructs the President to apply such a duty (up to 1% ad valorem) on all imports as soon as the GATT approves.

Requires the President, after one year, to impose a small duty on all imports even without GATT approval, unless: (1) the President certifies to Congress that negotiations are in progress and there is a high probability of their successful conclusion within a year; and (2) Congress agrees and approves fast track legislation suspending the imposition of the fee for one year.

Creates a trust fund for trade adjustment expenditures into which are deposited receipts from the duty.

REFORMS THE TAA PROGRAM TO EMPHASIZE WORKER RETRAINING.

Requires that a worker agree to retraining in order to receive a Trade Readjustment Allowance [TRA].

Provides $4,000 tax-free vouchers for retraining.

Gives workers a wider choice of training programs, including training by private firms.

Limits adjustment assistance for firms to the provision of technical assistance—a program with demonstrated results (loans and loan guarantees will no longer be provided).

EXTENDS THE EXISTING TAA PROGRAM UNTIL THE REVISED PROGRAM IS IN EFFECT (ONE YEAR AFTER THE DUTY IS APPLIED)

PIMA COUNTY, AZ, VICTIM WITNESS ADVOCATE PROGRAM

● Mr. DECONCINI. Mr. President, this month is the 10th anniversary of the creation of the Victim Witness Advocate Program in Pima County, AZ. This program, initially established through a Federal grant during my tenure as Pima County attorney, has for the last 7 years been funded by local sources. This program has been a model for such programs all across the Nation. Those of us in Tucson and Pima County are very proud of our Victim Witness Advocate Program.

Within months of its formation, the program hired four full-time staff members and began training and certifying volunteers to handle crisis counseling followups and social service referrals. Working relationships were established with law enforcement agencies in the Tucson area, and by 1977, a mobile crisis unit began responding to law enforcement requests to help victims on weekend evenings.

In 1978, transition was made from Federal to local funding. Two additional advocates were hired and by the end of the year, the crisis unit was operating 7 nights a week. Law enforcement referrals of crisis situations averaged 135 per month. Utilizing the skills of both staff members and volunteers, services were now available 24 hours of every day.

Neighborhood mediation centers were established in 1979, focusing on small claims disputes and peace bond requests. Working relationships were initiated with social service agencies, and Victim Witness began to accept criminal misdemeanor referrals from the city prosecutor's office.

By 1982, although the paid staff had increased only to nine, volunteers enabled the program to respond to more than 4,300 calls, triple the number handled in 1978. Based on an annual operating budget of under $250,000, the cost of the program was less than 50 cents per year for each Pima County resident.

During 1984, Victim Witness handled nearly 4,800 referrals. Crime victims—homicides, sex crimes, assaults, robberies, and burglaries—accounted for 46 percent of the referrals, domestic and neighborhood dispute calls 35 percent, death notifications 6 percent, and mental health and public welfare 13 percent. In addition, Victim Witness made more than 5,000 contacts relating to criminal justice case information and restitution matters.

Each year, Victim Witness staff members and volunteers provide hundreds of hours of training to law enforcement agencies and community organizations. Staff members also serve as board members, counselors and consultants to many organizations in Arizona.

The Tucson program has been nationally recognized and has received media coverage from ABC World News, Hour Magazine, Nice People, the McNeil-Lehrer Report, the Wall Street Journal, the Associated Press, Life Magazine, and Reader's Digest. A 2-hour, made-for-TV movie based on the mobile crisis unit has been aired twice by CBS and Home Box Office featured Victim Witness volunteers in a 1-hour 1984 special on how crime victims fight back.

These achievements continue to be made possible through a small, dedicated staff, and as a result of more than 13,000 hours of time donated annually by nearly 50 active volunteers.●

RECESS UNTIL 10 A.M. TOMORROW

Mr. RUDMAN. I would inquire of the Democratic leader whether he has any other business he wishes to transact since the majority leader had to leave, and asked if I would close.

Mr. BYRD. Mr. President, the distinguished acting leader is very courteous. I have nothing else on this side.

Mr. RUDMAN. I thank the Democratic leader. I see no one else in the Chamber seeking recognition.

Therefore, under those circumstances, and in accordance with the previous order, I move that the Senate stand in recess until 10 a.m. on Saturday, October 5.

The motion was agreed to; and, at 6:57 p.m., the Senate recessed until tomorrow, Saturday, October 5, 1985, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate October 4, 1985:

DEPARTMENT OF STATE

Joseph Ghougassian, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the State of Qatar.

U.S. INSTITUTE OF PEACE

W. Scott Thompson, of New Hampshire, to be a member of the board of directors of the U.S. Institute of Peace for a term of 4 years expiring January 19, 1989, new position.

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform duties indicated with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall the following officers be appointed in a grade higher than that indicated:

MEDICAL CORPS

To be colonel

Sharp, John R., xxx-xx-xxxx

To be lieutenant colonel

Kirby Edward E., xxx-xx-xxxx
Smalley, James R., xxx-xx-xxxx

To be major

Jacobi, Jay P., xxx-xx-xxxx
Selvaraj, Ananda, xxx-xx-xxxx

To be captain

Rigilano, John C., xxx-xx-xxxx

DENTAL CORPS

To be lieutenant colonel

Adams, Louis W., III, xxx-xx-xxxx

To be major

Eye, Kenneth R., xxx-xx-xxxx
Hastings, Paul F., xxx-xx-xxxx
Montgomery, Carlton L., xxx-xx-xxxx
Morrison, Stephen R., xxx-xx-xxxx
Pemble, Charles W., III, xxx-xx-xxxx
Suber, Leitzsey Y., xxx-xx-xxxx
Vaughan, James J., xxx-xx-xxxx
Wilcher, Derrick, K., xxx-xx-xxxx
Wofford, David T., xxx-xx-xxxx
Wright, Edward F., xxx-xx-xxxx

To be captain

Bauman, Geoffrey R., xxx-xx-xxxx
Diaz, Ricardo, xxx-xx-xxxx
Frank, Barry H., xxx-xx-xxxx
Gamm, David J., xxx-xx-xxxx
Grimm, Robert M., xxx-xx-xxxx
Perry, Nancy G., xxx-xx-xxxx
Salmon, Brad E., xxx-xx-xxxx
White, Robert P., xxx-xx-xxxx

The following inidividuals for appointment as Reserve of the Air Force, in the grade indicated, under the provisions of section 593, title 10, United States Code with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated:

MEDICAL CORPS

To be lieutenant colonel

Blydenburgh, Joseph M., xxx-xx-xxxx
Butler, Henry E., III, xxx-xx-xxxx
Garami, George T., xxx-xx-xxxx
Heagy, William C., xxx-xx-xxxx
Hobler, Kirtland E., xxx-xx-xxxx
Hornick, Frederick W., xxx-xx-xxxx
Kenney, James M., xxx-xx-xxxx

Mumford, David, xxx-xx-xxxx
Mustafa, Syed G., xxx-xx-xxxx
Proctor, Robert F., xxx-xx-xxxx
Stenseth, Jon H., xxx-xx-xxxx
Tan, Benjamin S., xxx-xx-xxxx

The following individual for appointment as Reserve of the Air Force (ANGUS), in the grade indicated under the provisions of sections 593 and 8351, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform duties as indicated:

MEDICAL CORPS

To be lieutenant colonel

Vondrell, John J., xxx-xx-xxxx

The following Air Force officer for appointment as permanent professor, U.S. Air Force Academy, under the provisions of section 9333(b), title 10, United States Code:

Smith, Michael L., xxx-xx-xxxx

The following Air Force officer for appointment as permanent professor, U.S. Air Force Academy, under the provisions of section 9333(b), title 10, United States Code:

Smith, Michael L., xxx-xx-xxxx

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Mitchell J. Catoe, xxx-xx-xxxx
Maj. Luis R. Colon, xxx-xx-xxxx
Maj. Gerrit C. Cormany, xxx-xx-xxxx
Maj. John M. Delang, xxx-xx-xxxx
Maj. Howard W. Fitzpatrick, Jr., xxx-xx-xxxx

Maj. Ronald M. Force, xxx-xx-xxxx
Maj. Daniel J. Gibson, xxx-xx-xxxx
Maj. Frederick B. Guerrina, xxx-xx-xxxx
Maj. John S. Hoffman, xxx-xx-xxxx
Maj. Robert LeCouve, xxx-xx-xxxx
Maj. Michael A. Lorenz, xxx-xx-xxxx
Maj. Lars N. Lundin, xxx-xx-xxxx
Maj. Joseph I. Mensching, xxx-xx-xxxx

IN THE AIR FORCE

The following persons for Reserve of the Air Force appointment, in grade indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated:

MEDICAL CORPS

To be lieutenant colonel

Olsen, Armin B., xxx-xx-xxxx
Sebesta, Donald G., xxx-xx-xxxx
Solver, Edward A., xxx-xx-xxxx

The following officer for Reserve of the Air Force (non-EAD) promotion in the grade indicated, under the provisions of sections 593, 8362 and 8371, title 10, United States Code.

LINE

To be Colonel

Hatcher, Walter T., III, xxx-xx-xxxx

CONFIRMATIONS

Executive nominations confirmed by the Senate October 4, 1985:

INTERNATIONAL BANKS

James A. Baker III, of Texas, to be U.S. Governor of the International Monetary Fund for a term of 5 years; U.S. Governor of the International Bank for Reconstruction and Development for a term of 5 years; U.S. Governor of the Inter-American Development Bank for a term of 5 years; U.S. Governor of the African Development Bank for a term of 5 years; U.S. Governor of the Asian Development Bank; and U.S. Governor of the African Development Fund.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Anthony J. Calio, of Maryland, to be Administrator of the National Oceanic and Atmospheric Administration.

EXECUTIVE OFFICE OF THE PRESIDENT

James C. Miller III, of the District of Columbia, to be Director of the Office of Management and Budget.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

SENATE—*Saturday, October 5, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable SLADE GORTON, a Senator from the State of Washington.

Mr. GORTON. The invocation will be offered by the Reverend Richard C. Halverson, Jr., pastor of the Chesterbrook Presbyterian Church, Falls Church, VA.

PRAYER

The Reverend Richard C. Halverson, Jr., pastor, Chesterbrook Presbyterian Church, Falls Church, VA, offered the following prayer:

Let us pray. Father in Heaven, in these most trying days we ask that the peace of God will rule in the hearts of our national leadership. On this day, when many families are accustomed to being together, we pray for the children of those working in the Senate.

Bless our infants in their most impressionable years. Be with our youth who must cope with emerging adulthood amidst the peer pressure and questions of identity. Protect our students who are away from home. And honor our children's children, the strength of future generations.

O God, give us grace when we must be away from our children. And help us to realize the great importance for our investment in them now.

We ask this of our Heavenly Father, Who, for the sake of redeeming mankind, underwent the most severe form of separation from the Son in Whom He has now placed all that He has. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, October 5, 1985.

To the Senate:

Under the Provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable SLADE GORTON, a Senator from the State of Washington, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. GORTON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, both leaders have 10 minutes each. I would ask that the 10 minutes of the distinguished minority leader be reserved and that the time I not use be reserved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOLE. Following that, the distinguished Senator from Wisconsin [Mr. PROXMIRE] has a special order for not to exceed 15 minutes, followed by routine morning business not to extend beyond the hour of 10:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

DEBT LIMIT AMENDMENTS

Then the Senate will resume consideration of House Joint Resolution 372, the debt limit extension, probably more importantly the Gramm-Rudman-Hollings amendment, which has been the subject of the discussion so far.

Again, I would hope that we could have some debate on the amendment. I do not see a need for keeping the Senate here if no one wishes to discuss the amendment. They may point out what they perceive to be the shortcomings of the amendment or, on the other side, the strengths of the amendment. In any event, those who have indicated they have not had time to carefully study the amendment now have another good opportunity.

One of the distinguished principal sponsors, Senator RUDMAN, will be here throughout, and I assume that Senator HOLLINGS and Senator GRAMM will be available, too, if needed.

There certainly is a legitimate need to discuss any amendment. This proposal is a rather sharp departure from present law. I hope we could do that today so that on tomorrow if cloture is invoked—though we may do it on Monday—that we can move to final disposition of the amendment and any other amendments that may be offered to the debt ceiling extension. Then we can avoid those problems which have been pointed out by the Treasury Department that will occur next week.

I think there may be some who want to delay this in an effort to help its demise. But I do believe there is strong bipartisan support for the concept.

Mr. President, there are Members on both sides seeking information about this proposal, so this is a good opportunity. I hope we can end up with a nearly unanimous or bipartisan vote.

I detected from the debate yesterday there is considerable support on each side for the Gramm-Rudman-Hollings amendment, and there is some opposition on each side. We have some on this side who will probably not vote for it, and I assume there are some on the other side.

But the important thing is that we will have an opportunity, at least for a while, to debate the amendment.

I will say to my colleagues on both sides of the aisle if no one shows up, there is not much need for the rest of us to stay here.

Mr. LONG. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. LONG. I want to say to the distinguished leader that I hope very much we will have debate today of the caliber that we had yesterday. I thought that was a very fine and informative debate.

As one who is thinking of voting for the amendment, or at least leaning in that direction at the moment, if I had to call it, I would say that the proponents of the amendment won the debate yesterday. I think they made the better arguments on the whole, although there were some very good arguments on the other side.

I do believe we might be able to improve the amendment as we hear all details. I also want to ask some questions as we go along today. This involves some problems that I think we ought to be careful of. I am satisfied that this is such a far-reaching step that it would serve us well to have the best input that everyone can offer in both Chambers. Even a blind hog finds an acorn now and then, sometimes in a source you might never expect. So some people might have a way of improving this amendment in a way that we did not anticipate. If so, so much the better.

I am very pleased, as the ranking member of the Finance Committee on this side, to say that this type of thing I believe has been too long in coming forth. The people of this country do not favor $2 trillion of national debt. The sooner we get on the glidepath to

a balanced budget, the better off we are going to be.

I personally think that we Democrats would do well to let the public know that we are also concerned with fiscal responsibility and we also want to control spending. If need be, we will vote for taxes in order to be fiscally responsible to this great country of ours.

So I hope the Senator will recognize that most of those engaged in this debate legitimately share the principal objective of the Senator.

Mr. DOLE. I am glad the Senator made that point. I meant to do that yesterday evening before we recessed.

Mr. President, I can understand the need for discussion of this amendment. I pointed that out to the distinguished Senator from Colorado, who is just as concerned as the rest of us about where we are headed as far as the deficit is concerned.

Mr. President, that is why Senator RUDMAN is here, with others.

I will yield the floor and hope we can start the debate right now.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the distinguished Democratic leader is recognized.

DEBT LIMIT AMENDMENTS

Mr. BYRD. Mr. President, I wish the distinguished majority leader would consider my suggestion of yesterday. I am sure he has considered it some, but I wish he would consider it further.

We Democrats are not interested in bringing about the demise, to use the words of the distinguished majority leader, of an effective effort to bring this budget deficit under control.

The problem with voting on the pending amendment simply lies in the fact that we did not see that amendment until yesterday around 1 o'clock, 1:30, 2 p.m. It is not an amendment that just contains one or two lines. I finished reading the modified amendment this morning about 4 o'clock—and it is not just a matter only of reading the amendment. One has to go back to the references, whether it be chapter 31 of the United States Code, or whether it be section 380 of the Budget Impoundment Act. To get a clear understanding of the amendment, one has to track the references, and that is a time-consuming effort.

What I want and what I am sure others on this side want, and I hope some on the majority leader's side, is time. I do not think we should have to legislate with a cocked gun at our temples.

This measure could have been brought up in the Senate earlier. I offered to the distinguished majority leader—I had not been asked to waive the 3-day rule at all—but on Wednesday of this week, I offered to waive the third day of the 3-day rule so we could get on to the debt limit. But it was not called up until Thursday.

It was reported to the Senate on Thursday, September 26—a week ago this past Thursday—but not called up for action until this past Thursday. If the Gramm amendment were a two-sentence amendment, perhaps it would not be so difficult. It consists of about 40 pages and gives some additional authority to the President. It may be possible, if both sides got together, to work out over a period of 10 or 15 days a bipartisan approach to this matter. But as it is, here we are going to come in on Sunday, the Sabbath, to try to invoke cloture.

That does not have to be done. We could just extend this debt limit for 10 days or 15 at the end of which it has to come back on us. We are not going to be demising anything. It would be back.

In the meantime, as I said yesterday to the distinguished majority leader, we on this side would be glad to sit down and try to work out an agreement to provide for a date and a time certain for votes on the Chiles-Byrd amendment, the Johnston amendment, and the amendment offered by the distinguished Senator who is on the floor [Mr. RUDMAN], and other amendments.

In the meantime, we could have a short extension of the debt ceiling so that the Government does not stop operating, nobody gets hurt, nobody's checks are stopped.

I understand, by the way, that the Social Security checks have already gone out. Social Security would not be affected by this amendment anyway. We have not had any hearings on this amendment; yet, it is a major change in the budgetary process.

Perhaps the process needs a change, but we also need some time to understand the measure and know where we are going. There is absolutely no reason why we have to come in on Sunday and invoke cloture on a matter which was called up only the day before yesterday.

Mr. HART. Mr. President, will the leader yield for a comment?

Mr. BYRD. Yes, Mr. President.

Mr. HART. Some of us are here on Saturday to hold a hearing. I happen to disagree with the Senator from Louisiana; I did not think it was a good debate yesterday. The Senate is in here today to hear this measure. That is what we have. I want a debate. I do not want to hear long-winded speeches and throwing our arms in the air and talk about getting religion. Let us hold a hearing in the Senate today. Let us have the sponsors answer some questions.

There have not been any hearings.

I know I heard the majority leader say he does not want anybody to read this measure and he does not want opposition to form to it. But in my time here, I have learned that the stronger a measure is, the stronger it is going to become under the intense light of scrutiny and the weaker it is, the weaker it is going to become. The sponsors of this measure should not want to rush this measure through. If it is a strong measure, it will hold up under scrutiny; if it is a weak measure, it will not. That is all we are doing, sitting as a Committee of the Whole and working through the normal process.

But the leader is exactly right. We could have gone through the normal process and still done this the right way.

Mr. BYRD. Mr. President, I thank the Senator for his comment. I know of no Senator on this side of the aisle who is more eager to reduce the Federal budget deficit than the distinguished Senator from Colorado. But let us have a little time. I would hope there could be a committee hearing. The Senator is right: We have a Committee of the Whole here, as it were. But if a standing committee could conduct some hearings and have witnesses in—and this need not extend beyond 10 or 15 days—and let us understand the effects of the amendment, we could go about this thing in an expedited but orderly way. In the meantime, nobody gets hurt.

We extend the debt limit 10 days or 15 days. This Sunday session is a joke. We have had Sunday sessions before, true, and there are occasional times when it is absolutely necessary. But this is not necessary. We could act today to extend the debt limit, or on Monday. The House is in session, I guess, on Monday, and we could extend that time limit and, in the meantime, have the committee look at it and, I hope, adopt an approach that would result in an appropriate, effective, and fair reduction of the budget deficit.

I make this request of the distinguished majority leader: I hope that he will favorably consider my proposal.

Mr. DOLE. Mr. President, let me indicate for the RECORD that we are willing to consider all proposals, but I would want to do that in concert with my colleagues on both sides of the aisle who believe we ought to do it now. We have already demonstrated for the whole year that we are not going to reduce the deficit in this body. We are going to talk about it, make speeches.

We finally squeaked a bill through by one vote on deficit reduction after months of haggling and it was not very bipartisan, as I look back on it. This is an opportunity that I do not

believe the American people will forgive us if we let slip by.

Having said that, I do not quarrel about the need for debate. I see now another principal sponsor on the floor and I think they are prepared to go into detail about their amendment. If there are questions, I do not know of any better expert on the budget than some of those we have on the Senate. They have been on the Budget Committee, they understand the budget process. What we are doing is amending the budget process. I do not know that we need outside witnesses. We have the distinguished Senator from South Carolina who has been a member of the Budget Committee for a long time.

We have other members. The Presiding Officer is a member of the Budget Committee. The distinguished Senator from Texas is a student of the budget process, as is the distinguished Senator from New Hampshire. So we have all kinds of experts in this body, and I think they have our confidence. At least many of us on both sides of the aisle have confidence in their statements and their leadership. So we will listen to any procedural proposal, but there is no short debt limit extension before now. There is not any vehicle here to extend the debt ceiling for 5 days or 10 days. The only vehicle we have is one that is pending. That was passed by virtue of the House budget resolution sent over here. It is a 1-year extension, to which we have an amendment pending. So there is not an extension of 5 days, 10 days, or 15 days from the House side. At this point I am going to yield the floor and hope we can start the debate after Senator PROXMIRE's special order. I am prepared to let it go as long as Members are willing to debate it.

RECOGNITION OF SENATOR PROXMIRE

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

EDITORIAL OPINION ON THE GRAMM RUDMAN HOLLINGS AMENDMENT

Mr. PROXMIRE. Mr. President, I am going to speak briefly on several matters not related to the issue before us, but before I do I want to read into the RECORD two editorials from two of the outstanding, most highly respected newspapers in the country, the New York Times and the Washington Post, on this issue. The editorial by the New York Times particularly demonstrates why this is such a controversial proposal. As I have said before, I intend to vote for this amendment, I expect to vote for it, but I think the minority leader is 100-percent correct; we should know what we are doing and I do not think we know that now. We should certainly be in a position to meet the objections posed by the New York Times which, as we all know, is a highly responsible and highly intelligent organ of opinion. Let me read it. It is as follows:

[From the New York Times, Oct. 4, 1985]

THE BALANCED BALONEY ACT OF 1985

Frustrated by the failure to reduce the breathtaking Federal deficit, Congress and the President are ready to fasten onto a fantasy. Dreamed up by Senators Rudman of New Hampshire and Gramm of Texas, both Republicans, it promises to balance the budget by 1991. The idea is appealing but this approach is perilously unbalanced.

Congress's frustration is easy to understand. This year, again, it has struggled to cut one program after another only to wind up with yet another huge deficit. The plan responds handsomely to the prevailing mood of desperation.

Here is how it's supposed to work: The deficit for fiscal 1986 is assumed to be $180 billion. Deficits in following years would be reduced to zero in equal yearly steps. If the President and Congress failed to agree on how to achieve the goals, the bill would require across-the-board spending cuts—with important exceptions.

The first flaw is the starting point. The official estimate for this year's deficit is low, maybe $20 billion too low. Second, aiming at zero is arbitrary, perhaps dangerously so. Big cuts in the deficit are essential. But perfect balance isn't necessary by a given date. Forcing its achievement could, depending on economic conditions, start a recession or stifle a healthy recovery.

Third, the approach is unbalanced and unfair. The trigger mechanism would affect only spending, and not all of that. It would not cut interest on the debt of Social Security and would leave vague leeway for increases in other "uncontrollable" costs. No tax increases are involved and no controls would apply to rising "tax expenditures"—revenues lost to deductions and exemptions that add to deficits just as spending does.

The final flaw concerns credibility. Congress may solemnly demonstrate its firm resolve with legislation—but everyone knows Congress can act even faster in the opposite direction. The 95th Congress passed a law requiring a balanced budget by 1981. The 96th repealed it.

Senators Rudman and Gramm, now joined by Senator Hollings, give their scheme the title "Balanced Budget and Emergency Deficit Control Act of 1985." Beware. The only way to balance the budget and control the deficit is to cut spending equitably, which neither the President nor Congress seems able to do; or raise taxes, which the President refuses to do; or both. No wonder everyone's rushing to embrace this choice bit of balanced baloney.

That is a strong conclusion, Mr. President, but that comes from the New York Times which, as I say, is a thoughtful newspaper and its editorials are not usually given to exaggeration. They feel strongly on it and I think we should, as I say, go into this in some detail.

Now let me read the other editorial from the Washington Post:

[From the Washington Post, Oct. 4, 1985]

FORCING THE DEFICIT DOWN

The problem all year in cutting the deficit has been that major players have wanted to exempt from the process large chunks of the budget. The president will not hear of a tax increase and has tried to protect the defense build-up. The Democrats and the president have both put Social Security off limits. Defense and Social Security, together with interest on the debt, are two-thirds of the budget. The remaining third includes such weighty items as Medicare, the farm programs, all the federal welfare programs, unemployment compensation and all federal aid to state and local governments. The entire burden of deficit reduction is too much to be borne by this third alone.

Just this week the acting director of the Office of Management and Budget warned the Cabinet that the deficit in the fiscal year now begun is likely to be not the roughly $180 billion last officially forecast, but again about $200 billion. That is not a manageable figure; its effects will be to prop up interest rates and the dollar and further squeeze both interest-sensitive and trade-sensitive industries. Yet the Senate, in connection with the debt ceiling bill, has resumed the exemption game. The bill would lift the debt ceiling—the limit on debt the Treasury can have outstanding at any given time—to more than $2 trillion.

Sens. Warren Rudman and Phil Gramm had drawn up a compensating amendment to stiffen the congressional budget process at the same time and reduce the deficit in equal stages to zero over the next five years. If Congress failed to meet the deficit target in any year, the amendment would empower the president to make the necessary cuts, but under a formula. Half would come from entitlements, the semiautomatic spending programs, including Social Security, in which benefits go out pretty much to all who qualify and apply. But entitlements could only be cut to the extent that inflation was raising their costs that year. The rest of the deficit reduction would come in equal cuts across the board from so-called discretionary spending, more than half of which is for defense. The idea was to force Congress to act and to legislate in advance a more or less even spread of spending cuts if it did not.

But Messrs. Rudman and Gramm then moved to plump up their proposal by exempting Social Security. One quick effect of this would be to put more pressure on other entitlements, including food stamps and other programs for the poor. Social Security, which goes to people in all income brackets, would not be cut; programs for just those in the lower brackets would be. A second effect would be to put more pressure on the defense budget than some of the sponsors may realize. This is the wrong way to adjust the amendment.

The ranking Democrat on the Senate Budget Committee, Lawton Chiles, would adjust it a different way. His proposal is to have a third of the burden borne by a tax increase, a third by defense and a third by domestic programs, except those for the poor. In many ways that is fairer—but Mr. Chiles, too, would exempt Social Security.

The Rudman-Gramm proposal is not an ideal device. On the contrary, it is a clumsy way to legislate and, if not an abdication, at least an evasion of responsibility. The system ought to be able to produce better than prefabricated budget cuts. But apparently it cannot, and the question now is

what kind of forcing mechanism to adopt. Our sense is the broader the better. The president and Congress have spent most of the year narrowing the target instead, and it hasn't worked.

THE STRUGGLE TO STOP THE ARMS RACE MUST GO ON

Mr. PROXMIRE. Mr. President, for 3½ years this Senator has been making speeches daily on the floor of the Senate pleading with my colleagues to support an end to the nuclear arms race. What is the purpose? Assume that Members of the Senate were persuaded to act to stop the arms race. What could we do about it? This Senator has not called for the Congress to use its absolute power over Federal appropriations to stop Federal spending on nuclear arms. Why not? Because such action, if politically possible, which it is not, would be a serious mistake. Neither this Senator nor any other Senator or Congressman favors a unilateral cessation of nuclear weapons funding by the United States. This Senator does very strongly favor negotiating a mutual, and it must be mutual, agreement with the Soviet Union for both superpowers to stop the current feverish nuclear weapons buildup. It absolutely must be a two-way street. What does that mean? It means the assurance that both sides will abide by the treaty must be certain and clear. We must know beyond reasonable doubt that the Soviet Union cannot cheat on the treaty—cannot surreptitiously continue to test, produce, and deploy nuclear weapons without the knowledge of this country and without opportunity for prompt recourse by the United States.

So this Senator has been pleading for a mutual, fully verifiable, comprehensive agreement with the Soviet Union for both superpowers to stop their nuclear buildup. But, again, what good does the plea in the Senate of the United States do? Even if every single Member of the U.S. Senate and the House agreed wholeheartedly, what could the Congress do? Action depends not on congressional funding, it depends on Presidential—I repeat, Presidential—negotiations. The President and only the President can negotiate with the Soviet Union. Only he can initiate and sustain such negotiations. Only the President can decide whether or not to seek an agreement and whether or not to accept such an agreement. As a matter of power and authority, the Congress has no real voice whatsoever. None. Oh, yes, the Senate technically is required to ratify or reject any treaty the President may sign with the Soviet Union to stop or slow the arms race. Ah, but the opportunity for any Senate action depends entirely on the President. If the President does not like the agreement, he simply directs his negotiators to reject it, and he refuses to sign it. But suppose the President supports the treaty. Can it become the effective policy of the country without Senate approval? The answer is: Yes. That is why SALT II is in fact the settled policy of the country today. It was signed by President Carter. President Carter recognized that the Senate might refuse to ratify it. So he did not submit it for Senate ratification. He simply announced that we would abide by it. President Reagan ever since he took office nearly 5 years ago could have announced that the country would not recognize the SALT II Treaty. He and he alone decided we should abide by it. So we do.

Is the SALT II Treaty alone in this respect? No, indeed. In 1974, President Nixon signed the Threshold Test Ban Treaty limiting underground nuclear weapons tests to 150 kilotons. This was another crucial arms control treaty. Has the Senate ratified it? No. Is it the policy of our country to abide by it? Yes, indeed. Who says so? The President. Does that make it effective? It sure does. It is every bit as effective as if the Senate unanimously ratified it.

So what fragment of power is left to the Congress in this most critical of international concerns—arms control in our dangerous nuclear world? The answer: practically none. So why preach the kind of sermons this Senator delivers every day: an end to the arms race, a nuclear freeze, when President Reagan represents the only game in town, the boss, the whole show, the absolute monarch? Aren't these daily speeches pleading for an end to the nuclear arms an act of supreme futility?

The answer to that one is not easy, Mr. President. The answer is that yes, President Reagan will be in office until January 20, 1989. But America will be faced with the nuclear arms race either until we end it by a mutual, verifiable treaty or we die in a holocaust. This is the toughest of times to keep a struggle for arms control alive. We face an administration that has the strongest, most emphatic and consistent record of opposition to ending the arms race since the dawn of the nuclear age 40 years ago. As long as Ronald Reagan is President, an arms control agreement ending the arms race is dead. That is a fact. Let's face it. That means we must persist for at least the next 3 years and 4 months with the full knowledge that success and an end to the arms race cannot come at least until that time has elapsed. This is exactly the time when the strong convictions of the American people, so powerfully and overwhelmingly expressed in statewide referenda that we must end the arms race could literaly die of discouragement. A voice raised day after day in the Senate striving to keep the hope and prayer of comprehensive arms control alive may seem forlorn and futile. But the cause is the most important on Earth. It is literally the choice between life and death. And this Senator intends to play his part, however limited it may be, to keep that cause alive through these speeches, for as long as it takes.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that the Reagan administration's tax cuts have significantly increased business expenditures for new plant and equipment.

For 5 years we have listened to supply-side wizards berate the Carter administration's tax policy while proudly proclaiming that Mr. Reagan's tax cuts would significantly increase capital spending. Heavy supply-side tax reductions, they argued, would create new jobs, enhance the competitiveness of basic industries, spur production, and stimulate new investment.

Finally, Mr. President, the Department of Commerce sets the record straight, proving again that Reaganomics is more fiction than fact.

According to the Department of Commerce, real growth in annual expenditures for new plant and equipment during the first Reagan administration was a whopping 58-percent lower than during the Carter administration.

When President Carter entered office, real—that is allowing for inflation—annual expenditures for new plant and equipment totaled $130 billion in 1976. By the time President Carter left the White House in 1980, real annual expenditures had grown to more than $171 billion, an increase of over 31 percent. How did capital spending fare under the first Reagan administration? Not nearly as well. Expenditures grew to just $193 billion in 1984, a paltry 12 percent-increase during Reagan's first 4 years.

Ironically, in the 1985 Economic Report of the President, President Reagan bristles with pride because real capital spending rose 15 percent from 1983 to 1984, one of the largest single increases in postwar history. The report thanks President Reagan's tax cuts for the healthy increase. Well, I say, "no thanks." Real expenditures rose 15 percent in 1984 because businesses resumed investing after the 1982-83 Reagan recession during which investment actually dropped 4 percent. Mr. Reagan is always saying America is back. In this case he is right. America's capital spending is back, back to where it started before he took office.

It is a myth, plain and simple, that tax cuts by themselves significantly increased capital spending. It is no myth, however, that tax cuts increased

the deficits. Four and a half years after entering office the Reagan administration has doubled the national debt, adding nearly $1 trillion in debt.

Mr. President, businesses invest in new plant and equipment when demand for their products increases or when plant and equipment become obsolete, not merely when their taxes are lowered. The only significant increase we get from large tax cuts is large corporate profits and massive Federal deficits. When will the supply-side wizards stop supplying us with this myth?

THE DEATH OF HEINRICH BOELL

Mr. PROXMIRE. Mr. President, the legacy of the Holocaust is one that must be remembered so that genocide is not repeated but it is also important that the German people move ahead. The recent death of Heinrich Boell, the German Nobel Prize winner for literature in 1972, marks the loss of a postwar German hero. Mr. Boell was a symbol of German progress after the demoralizing reign of Hitler.

Boell bridged the gap between those Germans who had experienced the inevitable guilt after the war, and those younger Germans who had experienced the guilt of their forefathers, but not of the war itself. Boell's long and illustrious writing career was characterized by a certain reverence for life, a quality common to his more than 40 novels, short stories, and radio plays.

Boell was more of an activist than an observer and was, thus, not content merely to write about society's problems. Among his activities was providing refuge for prominent Soviet dissidents, including Alexander Solzhenitsyn.

Boell served as president of Poets, Playwrights, Essayists, and Novelists, known by its acronym PEN, an organization dedicated to defending literary freedom around the world. Boell spoke out on behalf of writers who were harassed and banned by hostile Governments in Greece, the Soviet Union and East Germany.

Boell's passing in many ways marks the passing of an era, for he more than any other person embodied the spirit of postwar Germany and provided insights into its complexities. He was the conscience of postwar Germany—a man who had learned that World War II's violations of humanity must never occur again.

Although Boell had been a soldier in World War II and noted that many Germans had been victimized by the war, he did not excuse them, or himself, for having participated. In the years after the war he explored the questions of German guilt and responsibility in his novels.

The new generation of Germans was an important target for Boell. The new generation is struggling with its own guilt and is attempting to define a new German identity. Boell was the elder statesman of the peace movement in Germany, lending it legitimacy while carefully advocating a new patriotism. Boell defined this patriotism in rather narrow terms saying "Patriotism means simply coming to the consciousness of a common German right to live."

Boell's role in the peace movement symbolized his commitment to making Germany active again. Boell spoke at the October 1981 demonstration against deployment of the Pershing missiles in Western Europe saying:

> The politicians have the choice to make us into apathetic cynics. They can, if they choose, have a paralyzed population on this planet, paralyzed by a pestilence of weapons and by the staggering number of weapons arsenals. We do not want to be paralyzed.

Boell was also extremely critical of the paranoia about security which he felt was gripping West Germany and undermining basic rights to freedom of political expression. Boell's insistence on the maintenance of civil liberties posed a serious problem for Government officials whose primary concerns were the security of the nation and the stability of the Government.

In Germany, reactions to Boell were mixed. The left embraced Boell and looked to his works and political activism for inspiration while the right denounced him.

Boell's passing is a reminder of the generation of Germans who remember the war and have lived with the collective guilt of a nation. Mr. President, the legacy of Boell is a mandate to continue the struggle against war and to fight for basic human freedom.

Let us remember Mr. Boell's example and stress that genocide can never be allowed to happen again. Ratification of the Genocide Convention would echo Boell's message that genocide can neither be forgotten or tolerated. I urge the Senate to act now on the Genocide Convention, action which it has pledged to take during the 99th Congress.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond 10:30 a.m., with statements therein limited to 5 minutes each.

CONCLUSION OF MORNING BUSINESS

The acting president pro tempore. If there is no further morning business, morning business is closed.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The acting president pro tempore. The Senate will now resume consideration of House Joint Resolution 372, which will be stated by title.

The assistant legislative clerk read as follows:

> A joint resolution (H. J. Res. 372) increasing the statutory limit on the public debt.

The Senate resumed consideration of the joint resolution.

Pending:

(1) Dole amendment No. 729, to provide for a balanced budget and emergency deficit control.

(2) Dole modified amendment No. 730 (to amendment No. 729), of a perfecting nature.

DOLE AMENDMENT NO. 730—(THE GRAMM-RUDMAN-HOLLINGS AMENDMENT)

Mr. RUDMAN. Does someone have the floor at this time?

The PRESIDING OFFICER. The Senator from New Hampshire has the floor.

Mr. RUDMAN. I thank the Chair. I will hold it very briefly. I know the Senator from Colorado has a number of questions.

Mr. President, it seems to me that when all is cut away from the subtantive part of the debate on this issue, there are really only two areas that seem to be in question.

One issue is, how is the budget process changed? I must say that although it does take some cross-referencing, the amendment pending is really rather clear.

I also point out that, while the Democratic leader pointed out that a new amendment was sent to the desk yesterday, the changes made were only technical and conforming, and a comparison of the two will show that.

Mr. President, the second issue raised by the Senator from Colorado and others relates to whether or not we are giving the President some power that he does not now have. That is a very legitimate question. It is something that should be discussed to everybody's satisfaction. But, for the record—because I do not know how many of our colleagues are here—I hope that each Member of the Senate, himself or herself, not relying on staff, will take 15 minutes of their time, and I hope the media does the same, and turn to pages 21 and 22 of the pending amendment, which describe how the method works, and then turn to page 31 of the pending amendment, which defines the terms. After reading those two sections, I believe that everyone will come to the conclusion that what the President does is ministerial, and that he has no discretion. The pending amendment sets the parameters for his action.

I make this further offer: I believe the Senator from Louisiana made a statement with which I agree completely. If, in fact, after looking at

those two sections, which are the pertinent provisions, anyone here makes a reasonable case that the drafters have made some error in not delimiting the President in a very strict way, particularly in light of the Supreme Court case involving former President Nixon and the impoundment issue—if anyone believes we have missed that mark by so much as a hair, then I believe we should change it and improve it.

We all have very eloquent and bright staffs. There are many legislative lawyers working for the Senate. I would like them all, between now and Monday, to read those two pages; and if anyone believes that there is any kind of gap whatsoever, then I think we should change it. I know that Senator HOLLINGS and Senator GRAMM agree with that. I do not think it needs changing, but we should look at it.

Mr. LONG. Mr. President, will the Senator yield?

Mr. RUDMAN. I yield.

Mr. LONG. Mr. President, it seems to me that in view of the significance of this act and its importance should it become law, we should have it before us in printed form, rather than typewritten, as it appears at the moment.

If the Senator will permit, I ask unanimous consent that the Gramm amendment be printed and that a copy be placed on the desk of each Senator.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LONG. Mr. President, I also urge the Senator that by the time we get back here, at least by Monday—because I do not think cloture will be invoked on tomorrow—he and his cosponsors make available to us some type of document in which would be printed the sections of existing law they would amend, with the amendment in italics or underlined, so that we could see how this amendment changes existing law.

For example, when one reads the amendment, it says, "Strike certain sections," "Strike this language and insert the following language." In order to understand it, you really need to have available the statute that is being amended, which I think, for the most part, is the Budget Act. With that information available, we can better look at the problem.

I want to get this matter straight with the Senator, because I think it is important. As the Washington Post editorial pointed out—and Mr. PROXMIRE read that correctly into the RECORD a few moments ago—the broader the fiscal responsibility can be spread, the more successful the amendment is likely to be.

As one who serves on the tax writing committee, it especially impresses this Senator that, sooner or later, taxes will have to be part of the answer. I should like to ask the Senator this question about how this amendment would work if we faced an excess deficit that had to be reduced.

In the event that Congress should pass a measure that, let us say, would achieve one-third of the result with taxes and two-thirds of it with spending, would that satisfy the requirements of the Gramm amendment?

Mr. RUDMAN. I will be pleased to answer the question, and I will yield the floor very soon to the Senator from Colorado, who has been waiting patiently for recognition.

Let me say first that I agree totally with the Senator from Louisiana that what we should have for Monday is the new statute printed up, with underlying sections where there are changes. As one who in his career has drafted and read many statutes, I agree that it is hard to go from the original to the amendment. That will be done this weekend.

The second point I want to make before answering the question is that the Washington Post said that Social Security should be included. It was included in the original proposal, and we were told overwhelmingly in this body that there would be a move to strike it and it would carry by a vote of about 80 to 20. I would like to have Social Security included, because I agree with the sentiments expressed by the Senator from Oklahoma yesterday; but if it were included, this measure would die.

As to the specific question asked by the Senator from Louisiana, under the procedure with respect to the time the sequester order goes into effect, the President must then notify Congress, first, of the effects of the sequester, line by line, which would be a computer printout, and, second, what he believes the alternatives should be, if any. Those alternatives could include a different kind of cutting or could include a revenue measure, as the Senator form Louisiana correctly points out.

Congress then has the opportunity to adopt what the President has done or, what is much more likely—because, if people want to face it truly, this is an action-forcing mechanism—Congress will come back with what it wishes to do.

Let us, for hypothesis, assume that Congress says there was a $8 billion shortfall which the President has sequestered—$4 billion against discretionary, $4 billion against entitlements—and we do not want to do that. We want all those to remain at the original levels. We want $8 billion in revenue. Congress passes a revenue bill for $8 billion and the President signs it.

The question of the Senator from Louisiana was, under those circumstances, what happens to the sequester order? The answer is that it is vitiated.

Mr. LONG. I happen to think that the amendment would be better with Social Security in it, even though I was one who voted against any Social Security cuts when the budget measure was before us.

My feeling about it is that if we were in the situation of needing a big cut, it would be best for it to be so Draconian in nature that Congress would be absolutely compelled to pass something reflecting the best judgment of Congress as to how to meet the problem.

If you are trying to pass a tax bill—and this Senator has had to do that type of thing in his 36 years here—you will find it much easier to do so if you can say that if we fail to pass this tax bill, those dear, old people are going to have their Social Security checks cut, and the only way you can assure them that they will get their full cost-of-living increase is to vote for this tax, and the only way you can assure the Government retirees that they will get their full retirement and cost of living is to vote for the tax. It has been the experience of this Senator that you can always pass a Social Security bill, even with a big tax if you can show people that this was necessary in order to provide adequately for the Social Security beneficiaries and others.

That is why this Senator thinks, even though I do not want to cut Social Security, that if such a cut is one of the things that happens if Congress does not act, Congress will be absolutely forced to either reduce other things or else to vote for a revenue measure.

Mr. RUDMAN. Let me say to the Senator from Louisiana that the Senator from Oklahoma told us yesterday that, once this amendment is acted on and hopefully adopted, the first amendment he will offer will be precisely that amendment. Obviously what the Senator from Louisiana is saying is the more you raise the stakes the more you force responsibile action, and I agree with that completely.

The guiding philosophy behind this particular amendment, the Gramm-Hollings-Rudman amendment, is simply that what happens now is that we face the hard choices. But we are unable to make the hard choices. So we appreciate all the money, but we find no way of raising the money. So we do not cut the programs. We do not raise taxes. And here we are at a $2 trillion national debt.

I might say in response to something else said here this morning, the reason why this has spread like a firestorm through this city is not because of the great brilliance of the drafters of this amendment. I would like to say that, but, of course, it is not so. The reason this has spread like a firestorm and why the public is now paying attention to it is that all of a sudden people are saying, "Good Lord, they are talking about raising the debt to $2 trillion." And there is something dramatic

about that. It is as dramatic as the case of the man who climbs the twin towers in New York and the entire country rivets its attention on that event, or the tragic events in Mexico where the entire world rivets its attention on the plight of a young boy who may be saved this morning. People get their attention riveted by very interesting events. And the sponsors of this assumed that when the Senate was confronted the $2 trillion figure we would suddenly be riveted on it. The American public would be riveted on it.

To those who would like to delay this for a few weeks, I must say that once that riveting is gone we will have lost the opportunity to make a responsible change.

So I agree with everything the Senator from Louisiana has said this morning, as I most often do.

Mr. LONG. May I say to the Senator it is not likely that this matter is going to lose public attention or public interest as long as we are holding up to them this $2 trillion figure. I happen to believe that it will be necessary in the consideration of this measure to pass some short extender for perhaps a week, or whatever, to give Congress time to adequately debate and discuss the various aspects of this proposal.

But I am fully convinced in my mind that the more the public understands what we are talking about here, the stronger the public is going to be for it because the people do not think we should go $2 trillion in debt; and they think that, if we do have to have that much debt, we at least should have some firm provisions in the law to stop this debt from doubling again. Otherwise, we would be just taking this Nation down a path which leads eventually to something very bad for this country. Some economists seem to think you can go into debt indefinitely by enormous amounts of money and nothing very bad is going to happen.

I do not think the American people feel that way. I do not, and I know that the Senator does not feel that way.

Something very bad will happen to this country at some point. I do not want to find out what it will be. I would rather get our fiscal house in order.

So I think the Senator is sponsoring a very worthy amendment. If it has any imperfections we should discuss it and try to correct it. But the purpose I believe is completely correct, that there should be restraints on spending and a requirement that Congress be fiscally responsible for the future.

Mr. RUDMAN. I thank the Senator from Louisiana.

Let me say that I look forward in the coming days, and I hope they are fairly limited, that the Senator from Louisiana with his experience and wisdom, which is almost unparalleled, along with the Senator from Mississippi who sits here this morning, that their collective wisdom can contribute to improving this amendment. None of us want to know what will happen if the economy finally collapses because of what we have been doing with irresponsible spending for so many years.

I hope that we will have a good dialog here this morning, that the floor of the Senate will be what it should be, a place to discuss ideas in an atmosphere of deliberation and coolness, and hopefully something will come out of this that will be good for the American people.

I yield the floor.

Mr. SYMMS. Mr. President, will the Senator yield for a question?

Mr. RUDMAN. I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, I want to ask one question.

The distinguished chairman of the Finance Committee and I had a colloquy on this the other day. Oftentimes people come in here and say that now we have already spent the money and we now have to borrow the money to pay the bills. But in fact, what we are talking about doing is extending the debt limit to cover Fiscal Year 1986's projected deficit.

Is that not correct?

Mr. RUDMAN. The Senator is quite correct. There has been some misunderstanding in the public press about what this increase in the debt limit is for. This is not for past bills. This is to allow the Government to start paying the bills that we are going to be accumulating for all of our fiscal year 1986 budget decisions.

Mr. SYMMS. If the Senator will yield further, this is why I totally concur in what the Senator from Louisiana said about what the American people think about this because I hold numerous town meetings in my State, and I can assure my colleagues people in my State and around the country wish we could go on a cash basis with the Federal budget, do like they have done into their households, do like they have done in the lumber companies. Everywhere I go in my State, people are getting 5-percent, 10-percent reductions in their pay so that the lumber company can stay in business. The miners are taking less pay. The farmers are under a very restricted budget by the bank or by the Farmers' Home Administration, or who ever is financing them.

They look at the Federal Government and wonder why do not the rest of you go on a cash basis.

I totally concur with the Senator from Colorado, in what he said on the floor yesterday. There would be no crisis of any great proportion if we did not raise the debt ceiling. I mean if you want to compare it with what happened in Mexico City, it is not a crisis. We have to restrict the salaries and wages and maybe the days the people work for the Federal Government. We might have to have massive holdbacks. But the end of the world would not be here. People would still go to work the next morning. We would still have the great productive capacity in our economy.

I just think the Senators from New Hampshire, Texas, and South Carolina deserve the commendation of all of the Senate, and they have my commendation, and I will support their amendment.

But I am one of those people in the Senate who would like to see Congress not raise the debt ceiling and let the Chief Executive officer of the country do what the President is supposed to do and take command of the financial problems of this country and act as Chief Executive officer and do what the head of every major corporation would do or small business or housewife, who runs the family budget would do, and decide what the priorities are of the Federal Government and establish some priorities and run this country on a cash basis because it is $200 billion we are asking to raise. And I say to the Senator in my question—we are asking to raise $200 billion, but last month the Government ran a $3 billion surplus. So it will not be $200 billion every month. And this bunk the people say we will not be able to mail the checks out is pure hogwash.

Mr. RUDMAN. I believe the answer to the question is yes.

I yield the floor.

Mr. HART. Mr. President, we are considering legislation to raise the statutory limit on the debt ceiling bill. The reason I mention that fact is that it seems to have been lost in the debate which is now almost exclusively devoted to a rewrite of the Budget Act if not the Constitution itself on the Senate floor.

It is instructive, Mr. President, to consider the length of time put into the bill for the act we are now considering substantially rewriting. The Budget Act was first introduced by Senator Ervin on April 11, 1973. It was introduced in the House of Representatives 7 days later. In November 1973 the House of Representatives and Senate committees report on that bill. There were hearings held between the spring and fall, 6 or 8 months. There was floor action in the Senate in March 1974, almost a year after the bill was first introduced. There was a conference committee between the House of Representatives and Senate in April 1974 and a conference report filed June 1974.

The conference report was accepted by the House of Representatives and Senate on June 21, 1974 and the Budget Act became public law July 12, 1974. That is 15 months after the

measure was first introduced in the Senate.

We are proposing to substantially rewrite that in the space of 72 hours. If that is thoughtful legislation then I will eat your hat.

Now, Mr. President, the reason we are doing this is that back in 1981 a few of us tried to sound a warning and the warning was not heard. If you questioned anyone's sobriety in voting for debt-ceiling increases before many of us said wait until Reaganomics comes along, then you would be questioning your sanity.

Well, most people did not listen. It all sounded terrific. We were going to cut people's taxes, we were going to increase spending—not decrease it, increase it—and we were going to pay for the difference by a growing economy. That is Reaganomics, I think fairly stated in a nutshell.

Many of the President's strongest supporters then are the ones who are complaining the loudest about the deficits now.

This year we are increasing the debt ceiling not to $1 trillion, not $1.5 trillion, now we are increasing the debt ceiling above $2 trillion.

The national debt has doubled during the 5 years of Ronald Reagan's term in office.

Mr. President, why are these deficits so big? Receipts are inadequate to the grossly inflated tax cuts demanded by the President. Expenditures have ballooned, not simply because Congress cannot control itself in spending for school lunch programs and guaranteed student loans—indeed, we have cut all of those programs and everyone here knows it.

Now that Mr. Stockman is wearing civilian clothes, even he admits that discretionary spending was cut about 15 percent in the President's first term. Is this the big spending Congress that everybody talks about that cannot control itself? Discretionary spending cut 15 percent in the first Reagan term.

Mr. President, why has this debt increased? First of all, there is a difference between spending on individual programs and the kind of spending that Congress has been engaged in for the last 5 years. There is a difference between program spending and policy. This deficit has not gone up on a gradual incline. The Senator from South Carolina knows that.

This deficit was going up $20 billion, $30 billion, $40 billion, $50 billion under Jimmy Carter; $180 billion in 24 months. Is that a Congress that cannot control spending? It certainly is, but it "ain't" the same kind of spending we were talking about in the late 1970's. It was a change in policy, not just a direct line increase in spending on programs that got out of hand. It was a change in policy. That is what brought us here today. We might as well face up to that. And some of the people who are sponsoring this measure were the loudest advocates of that change in policy.

If you combine the tax cuts with the huge increases approved for defense, you are left with huge deficits. And, as deficits increased, interest payments on the national debt have consumed progressively larger portions of our annual budget. And that, in a nutshell, is where we are.

Many of us warned our colleagues, Mr. President, but they did not listen. They were sure big tax cuts, spending reductions, and an unprecedented defense buildup would yield a balanced budget not in 1985 or 1986 or 1987, but 1984. In 1984 were going to balance the budget. Does anyone remember that? Well, the numbers did not add up in 1981 and they do not add up now. That is why this particular vote, Mr. President, on the debt limit is obviously so painful for the people who believed in it and voted for Reaganomics.

Mr. President, I admire the tenacity of our colleague from Texas, Senator GRAMM, the author of this pending amendment. Five years ago, as a Member of the House of Representatives, Mr. GRAMM won national attention as one of the chief architects of the President's economic program. Remember Gramm-Latta? It was an audacious proposal. It was then-Representative Gramm who helped the President win a series of legislative victories on budget, on taxes, on defense. Congress did approve the vast majority of what the President requested. We did approve what the President requested and he has the Senator from Texas and others to thank.

Mr. President, does it not strike anyone as ironic that the junior Senator from Texas is now telling us that the budget process has failed? The policies failed, Mr. President, not the budget process. The policies failed. If you change the basic fiscal policies of this country and it does not work, what are you doing back in here saying the process failed? What are we supposed to do? Stop ourselves before we kill again? I mean, you cannot have it both ways. Why does not anybody say that? You cannot have it both ways. You cannot cut taxes, increase defense spending, and balance the Federal budget. It cannot be done.

Now, why come back here and lash Congress? Instead, let us lash ourselves for agreeing to do what the President told us to do. That is what we did wrong. We changed the fiscal policy of this country and it did not work.

All right, now, we are back here saying, "Stop us before we kill ourselves." Well, let us find out about that. Are we going to work worse mischief on the process of government in this country by trying to undo the damage that was started in 1981? That is the question we ought to be asking ourselves.

The majority leader was in here last night asking for a vote on this measure at 5 o'clock on Friday. Why is it that the majority leader of the U.S. Senate is demanding a vote on this measure at 5 o'clock on Friday when, as the Senator from Louisiana properly points out, the amendment is not even printed and on our desks? What laws are we amending? Did anyone know that yesterday afternoon at 4 when the majority leader wanted us to vote on this measure?

The Senator from Louisiana, in his wisdom—that is why we like to have seniority around here—has to say Saturday morning, "Why don't we have a printout that shows what existing laws are going to be amended here?"

Senator GRAMM was saying yesterday, "We are on the 2-yard line; let's score"; you know, like we are playing some kind of game here. This is the future of this country.

Now, the majority leader does not like this extended debate, does not like a Saturday and a Sunday session. We do not need the Sunday session. Everybody knows that. It is just showmanship.

But why can we not find out what we are doing here? That is not a filibuster.

I can remember days, months, and years of people on the other side of the aisle saying, "Wait a minute. Wait a minute. Let's find out what is going on here." It seems to me that is basic conservative politics. "Wait a minute." That is what conservatism says. "Wait a minute."

Now, why, all of the sudden are so-called conservative people saying, "Get it through," as if the American people do not have the strength of their convictions, or any of us elected by those people, to follow up on a serious matter next week after Monday. I just do not believe that. I do not believe it about us and I do not believe it about the American people. I certainly think we have the right to see the amendment and find out, at the very least, what laws it amends.

Mr. LONG. Does the Senator want me to answer the guestion?

Mr. HART. Yes.

Mr. LONG. I should think it is just the usual tendency of people, when they think they have the votes for their proposition to say, "Let's vote. We have the votes. Let's vote."

Of course, for those who do not necessarily agree with a proposal for which the other side has the votes, it makes all the sense in the world that they want to discuss it for a while or want to debate it. Of course, the one good thing about debate, it usually exposes the weaknesses of an issue and also its good points.

Mr. HART. Or the strengths.

Mr. LONG. Yes. It happens here many, many times, and it may happen this time, that as you debate a matter people can see the good points and bad points, and the points that are not good are compromised or eliminated so that the measure is improved.

So I personally say to the Senator that, in my judgment, it is a mistake to push for a cloture vote on Sunday; really ridiculous, to tell you the truth. But that is the way the leader wants to do that.

I think it is important that we have an opportunity to vote on the measure, but it is not necessary to vote on it on Sunday. In fact, I think if you take a week of debate and then vote on it, no harm is done.

Mr. HART. I thank the Senator.

Among the questions that I think need to be answered—we have been talking here about across-the-board cuts. My understanding is they are not across-the-board cuts; that enormous amounts of this budget are left out of these so-called across-the-board cuts. Certainly, as has been perfectly revealed here, the chance of closing that deficit gap by raising revenues is eliminated. So is this really truth in budgeting? We are talking about this iron discipline on the Congress and this iron discipline on the President and we take half or two-thirds of the budget out. And we also take the most iron discipline out of asking people to pay for what they are buying. If we were really serious about iron discipline, let us put revenues in it.

Why not? Why not put revenues in it? Are we really serious about discipline or are we not? May I ask the Senator from Louisiana who was the last President to ask the Congress for an increase in military spending and a tax increase to pay for it? It was Harry Truman, in 1950; the last President.

Mr. LONG. The last time we had a balanced budget, Lyndon Johnson was President. And he asked for revenues. And the Senator from Delaware, Mr. Williams, on this Senate floor joined in sponsoring an amendment also authored by Mr. Smathers. The proposal was that we both raise revenue and cut spending. It was done about half and half. So the tax increase plus the spending cut gave us a balanced budget. That was no small tax increase. That was a 10-percent surtax. After you computed your income tax, whatever you owed, you added 10 percent to it. With that plus the spending cut, we balanced the budget.

Mr. HART. If people really do think that the Russians are coming, are 30 feet tall, they are outspending us in every category, and that they represent a genuine threat to this Nation's security, why not tell the American people that and enforce it by saying we are going to have to pay for it? We are going to have to pay for catching up. The way we pay for it is through taxes. David Stockman did not believe that you are going to pay for that military buildup by cutting school lunch programs. He said so. In his most candid behind-the-scenes moment he said so. He said so because he was an intelligent man, not always as honest as he ought to have been, but he was intelligent. He could look at numbers. Boy, could he look at numbers. He knew there was no way you were going to pay for that military buildup with taxes going down by cutting school lunch programs. He knew it. He was one of the few people who said it. He did not say it as openly as he should have but he knew it.

Well, why not put revenues in here? We are hearing these lectures about what a serious problem this is. This is a serious problem. It is a catastrophic problem, and yet we start out by putting things off the table. We put Social Security off, we put revenues off, and we put a lot of other things off.

We put a third to the half of the defense budget off. Talk about cutting 50 percent of these cuts from defense do you know where it is going to come from? If I am wrong here, I hope the sponsors will correct me. It is going to come from pay of the military personnel, and it is going to come from oprations and maintenance of our conventional forces. Where else could it come from?

Mr. PROXMIRE. Will the Senator from Colorado yield on that issue?

Mr. HART. I yield.

Mr. PROXMIRE. I ask the Senator from Colorado because I do not know anybody in the Senate who has been more concerned or responsible on this particular point he is making right now on providing that we have a strong military force, particularly in the area of readiness, military pay, and so forth that are essential as the Senator points out. Is it not true that the amendment excludes Social Security, excludes interest on the national debt, and therefore concentrates on a relatively small proportion of the budget for cuts? If this is distributed—and I understand it also requires an equal percentage of reductions—if it does that for the Defense Department and we do it on outlays, you have to hit readiness, ammunition, and so forth because procurement is over a long period. You have to take a whale of a lot of cuts in authorization before you get to the outlay, and a cut in procurement that would really mean a difference. So is it not obvious and clear that what is going to happen here? It is very ironic because there are no three Senators who are more strongly in favor of a strong defense that I know of than Senator HOLLINGS and Senator RUDMAN and Senator GRAMM. But this is going to be the consequences, is that not right, that you are going to have to cut the very heart out of that aspect of defense?

Mr. HART. As far as I am able to tell, the answer is correct because the controllable pot from which these massive cuts must be made is about $78 billion in discretionary domestic spending—if I am wrong I hope I will be corrected—and about $176 billion in current year defense outlays.

The sponsors are using this elusive word "sequester." We are talking about impoundments. Let us call things what they are—impoundments. I see no other way.

First of all, a lot of people define a strong defense as anything that is steel and concrete. It is not human beings, it is not grease, oil, and ammunition necessarily, or flying time for pilots. It is hardware. And the reason is that an MX missile, B-1 bomber, or an F-18 aircraft is more dramatic, sexy and voting for operations and maintenance and the grungy upkeep of the conventional forces is not something you can go home, beat your breast about, and say you are for a strong defense. That is exactly where it is going to come from. Even before this measure was introduced the Secretary of Defense has said because we cannot get what we want for fiscal 1986 we are going to take the cuts, what they perceive to be cuts, the reduced growth of spending out of the conventional forces and out of OMB because we are going to keep spending every dime we want on nuclear weapons.

Mr. SYMMS. Will the Senator yield on that point?

Mr. HART. I yield for a question.

Mr. SYMMS. I thank the Senator ver much.

Does not the Senator think it is possible with 2.1 million people in uniform and 1 million civilians working at the Defense Department that we might get rid of, say, 10 or 20 percent of those civilians and save hundreds of millions of dollars?

Mr. HART. In answer to the Senator's question, does the Senator know what has happened to employment in the Pentagon under this administration?

Mr. SYMMS. It has gone up.

Mr. HART. It has gone up 100,000 in the last 5 years, and you are asking for an increase next year of 18,650 people.

Mr. SYMMS. This Senator thinks we have too many civilians in the Defense Department.

Mr. HART. I hope the Senator will communicate that to the Secretary of Defense.

Mr. RUDMAN. Will the Senator yield for a comment?

Mr. HART. Yes, I will.

Mr. RUDMAN. I believe I detected a question at one point there.

Mr. HART. It is a question.

Mr. RUDMAN. The question followed a statement, and the Senator

from Colorado asked to be informed if he was wrong in his statement about procurement. The Senator from Colorado is totally wrong. As we get into this discussion, as we get into specific questions on specific points, I hope we can answer the Senator from Colorado's full concern.

Let me say to the Senator that I share his concern and my votes in the Defense Appropriations Subcommittee so indicate. Readiness is extraordinarily important. Procurement bears its fair share—its equal share—and in the words of this amendment, its proportionate share of all reductions in this plan.

Mr. HART. The Senator then should correct the record because the sponsors of this measure said $109 billion of multiyear procurement contracts were excluded by this amendment. Is that correct or is it not?

Mr. RUDMAN. The first year there is approximately between $90 and $110 billion of outlays from prior year contractual commitments in defense.

I might point out that is precisely why we adjusted the first year kick-in point from $121.9 billion which is in the congressional budget resolution, what we told the American people the deficit would be we pushed the number up to 180. We did that because of that very problem—because we did not want to impinge unfairly on readiness and other programs. The deficit targets get more stringent in the outyears and almost everything is covered.

Mr. HART. What is it? What are the dollar amounts in those years?

Mr. RUDMAN. We do not know what the budget authority would be in future years. I can tell you if you want to look at this year's budget resolution.

Mr. HART. This operates for multiyears. This is not a 1-year measure we are debating here. How much in dollar terms is effective in the next 3 or 4 years by this measure—in dollar terms?

Mr. RUDMAN. I can only tell the Senator that, if he can tell me what the Congress will appropriate in each of those accounts in the next 5 years. I do not know.

Mr. HART. We are talking about the amounts of money in long-term procurement contracts that are stretched out over several years. The Senator says that will not be affected. $109 billion is not affected in 1987. But they will begin to be affected every year thereafter. I want to know how much every year.

Mr. RUDMAN. We will have the answer to that momentarily because we hit budget authority in each year, including the first year. The only thing that the sequester order cannot operate against is obviously multiyear contracts already executed. But budget authority in fiscal years 1986, 1987, 1988, 1989, 1990, and 1991 is in fact affected proportionately identically to everything else.

Mr. HART. We were going to vote on this at 5 o'clock yesterday. Now we do not even know what percentage of the defense budget is going to be available in 1986, 1987, 1988, 1989, and 1990.

Mr. RUDMAN. We will know in half an hour.

Mr. HART. There is already one benefit from a Saturday session.

Mr. SYMMS. Will the Senator yield for another question? I want to go back on this question to my good friend from Colorado when he made some statements about the Gramm-Latta proposal, and the failure to balance the Federal budget. Will the Senator not agree with me that what the Senator from Texas said yesterday was that when the Gramm-Latta proposal passed, inflation was much higher than it is today, unemployment was much higher, interest rates were much higher, we have had a positive effect in that but we failed to balance the budget? That is what the Senator from Texas said.

The Senator was on the Budget Committee when the distinguished Senator from South Carolina, this Senator, the Senator from Washington, and others who are on the Budget Committee made the plea in the Budget Committee to add to the so-called Gramm-Latta proposal because that is essentially what we were passing in the Budget Committee.

We made the plea, let us take the 85 percent of the CPI as the wage index and use that as the COLA adjustment on all the adjusted programs and we will bring about a balanced budget. The Senator will recall the Senator from South Carolina made a very articulate argument on that. This Senator happens to agree with him.

Do you believe that had we done that with the Gramm-Latta proposal we would not be in this mess that we are in today?

Mr. HART. No, I do not. I do not think the numbers add up. I do not think we can reduce the deficit by $200 billion from entitlement programs. If anybody can figure how we can do that, I would be glad to hear them.

(Mr. HECHT assumed the chair.)

Mr. SYMMS. I agree there was a big failure on this proposal on balancing the budget. I agree with the Senator's charge that we did not balance the budget. But I think the Senator is overlooking some of the things that did happen.

The authors of this amendment are admitting that the big failure of the whole proposal is that we have not yet balanced the budget and they are offering us a way to make the Congress make the decision and make those hard choices.

I thought we were going to make the hard choices in the Budget Committee in March or April of 1981. The Senate did not choose to do so. So we put if off. We put if off and put if off.

Here we are. Whether it is 5 o'clock yesterday, 5 o'clock today, 5 o'clock tomorrow, or 5 o'clock Monday, this Senator is ready to vote for some way to force the responsibility on this Congress to make those choices.

Mr. HART. I appreciate that. The question is, does the Senator know what hard choices we are making? Everybody says we have to make hard choices as if that solves the problem. Let us find out what hard choices we have to make, instead of doing what we did in 1981 and buying a pig in a poke.

Let us look at what happened because there was a little rush in 1981 and we ought to benefit by our mistakes.

The reason there is some concern, not resistance, about the approach being used here is that it seems to be fixed in a calculated pattern which was established in 1981. That was we are going to run these deficits up so high draconian measures have to be taken, which were not necessary in times when we had $20 billion and $30 billion deficits. Those draconian measures were going to be essentially to reverse the fundamental policies of this country established in the 1930's under Franklin Roosevelt and in the 1960's under Lyndon Johnson.

I have nothing against a debate which says the Great Society was wrong, the Federal Government should not be doing these things, or even for that matter that the New Deal was wrong, that the Federal Government should not have been doing all of those things under Roosevelt. Let us have that debate; let us have it in the open. But let us not go through the back door as some in this administration have sought to do, dramatically cutting taxes, dramatically increasing spending, dramatically increasing the deficits on purpose, and then come into the U.S. Senate in 72 hours and say we are now dramatically going to alter the structure of the Federal Government in the United States for our own priority purposes.

If people want to fundamentally reorder the priorities of this Nation, they are entitled to make that argument. That is what politics is all about. But let us do it out front; let us do it out in the open. Let us do it in the public domain in which the sponsors say, "We do not think the Federal Government ought to be in the nutrition programs, period. We do not think the Federal Government ought to be in the housing programs, period. We do not think the Federal Government ought to be in transportation programs, period. We fundamentally

do not like the role of Government in our society in the last 50 years and we want to change it."

That is fine as a legitimate point of view. But as one American I do not like people who sneak in the back door. I do not like people who plot in 1981 and 1982 to break the back of the Federal Government with a sneak attack. I smell a rat. This is the tail of the rat.

We are going to run those deficits up so high and put this country into such a wringer that we are going to break the back of the Federal Government on the domestic side.

I will tell you whose back is going to be broken in the process, too. It will be the soldiers, the sailors, the marines.

I would like to ask the sponsors of this measure whether or not, if this measure passes, training time for pilots will go down or up in 1986, 1987, and 1988.

I would like to know whether the steaming time for our ships is going up or down in 1986, 1987, and 1988.

I would like to know whether ammunition stocks for training purposes will go up or down in 1986, 1987, and 1988.

I would like to know whether housing for our military forces will be improved or reduced in 1986, 1987, and 1988.

Do any of the sponsors wish to answer?

Mr. RUDMAN. Of course, the last part of the question was rhetorical.

Mr. HART. No, it is not.

Mr. RUDMAN. We do not know what the appropriations will be in 1986, 1987, and 1988. We do not know what the growth will be. We do not know what the sequestered amount will be, if any. So I cannot answer the hypothetical question.

Let me answer the specific question that the Senator from Colorado asked. He might be a little surprised.

There are two areas that are already excluded from this because they are subject to prior contract, excluded by operations of law.

In the military area, it is not the $109 billion figure that the Senator from Colorado and I both thought was the figure a few moments ago. The actual figure reported by OMB which could not be subject to any sequester order at this time of $92 billion. That is the first answer.

The Senator might be interested in knowing that there was an additional $76 billion covering the rest of the civilian side of the budget that falls into the same category. So it cannot be touched in any way by the order.

Let me point out that the Secretary of Defense and the President have within their power the power to terminate some of those contracts at whatever expense might be incurred.

That is the first part.

The second part has to do with what would happen to procurement and RDT&E, for fiscal 1986.

As the Senator well knows, being on the Armed Services Committee, we do not have a bill yet. But going by the requests, which we understand are a little high than what the actual appropriation will be, the figure for procurement for 1986 is about $105 billion and for RDT&E it is $39 billion. And those two figures add to about $145 billion.

Under this proposal, CBO and OMB made the finding that we were over the target.

Let us assume we were over the target by who knows how much. The estimates now are fairly small because we adjusted the first year targets upward. Let us assume $5 billion.

Here is the answer the Senator was asking for. That would mean there would have to be a reduction from those accounts by my calculations of approximately three-quarters of 1 percent against those accounts as well as against every other account, including the items the Senator mentioned, ammunition, housing, clothing, allowances, and so forth.

And, I might add, everything else, including congressional staffs, operations of the Capitol and operations of the rest of the Government.

That is the best answer I can give this morning.

Mr. HART. Mr. President, first of all, if the Senator will bear with me, the only $92 billion figure I can find in terms of long-term procurement is a 1985 figure. We are talking about 1986. That is $109 billion. If I am wrong, I hope the Senator will correct me.

Mr. RUDMAN. The Budget Committee has advised me that the outlay figure has now been revised to $92 billion. I also thought it was $109 billion as the Senator from Colorado did. But I am informed by the best source we have here this morning that that figure is $92 billion.

Mr. HART. The reason I thought that is that it is printed in the budget document now.

Mr. RUDMAN. That has since been updated. As the Senator well knows, outlays are a bit of a shifting target. The fact of the matter is the essence of the Senator's question was, how does it affect certain things. I think I have answered that question.

Mr. HART. I am beginning to think that the whole proposal is a shifting target.

Mr. HOLLINGS. If the Senator will yield, he understands as well as any of us from his service on the Armed Services Committee about target figures. Does he remember the $4 billion the Secretary of Defense found?

Mr. HART. Yes, Mr. President.

Mr. HOLLINGS. Invariably, they overestimated the inflation rate. They candidly came up this year—they usually hide it from us. But in that instance, referring to these things on contracts, overestimates of inflation rates, outlay votes and things like that—the $109 billion is not a fixed one. For instance, the inflation overestimate was $4 billion. The OMB figure right now is not $109 billion but has been adjusted to $92 billion.

Mr. HART. I do not want to quibble about $17 billion, or whatever it is.

Mr. HOLLINGS. We are not quibbling about it. I am trying to give an accurate figure. The Senator is saying we are trying to get shifty.

Mr. HART. No, Mr. President, I am not.

Mr. HOLLINGS. I rather resist that idea.

Mr. HART. Mr. President, the sponsors are now conceding that this is a rather fluid document.

Mr. RUDMAN. If the Senator will yield, I do not think that is accurate. The Senator is saying it is a shifting target. He should know that, in this city, nobody ever knows what numbers mean anything. That is true of the Federal budget, it is true of the Federal deficit.

Let me put to the Senator from Colorado that 60 days ago, this body voted for a resolution in which we said the deficit would be $171.9. We are now told 60 days later that it is going to be closer to $195 billion. I do not think the sponsors of this amendment are particularly dealing with shifting targets. I believe the enormity of this deficit problem is such that I frankly do not think anybody understands how big it is.

Mr. HART. Given that fact of life, Mr. President, does that mean we throw every attempt to know what we are doing out the window? I think not.

Let us press on.

Does any of the sponsors wish to respond to the question, which was not a rhetorical question but a very specific question, whether under the measure, those categories of defense spending I mentioned would go up or down or stay static?

Mr. RUDMAN. Mr. President, I shall attempt to answer that question in a very direct and forthright manner.

If the Senator from Colorado would like to look at this amendment, if he has a copy of it, on page 22 of that document is something called a Presidential order. That sets forth the methodology contained herein. However, it references OMB circular BPS070N/A entitled "Controllability of Budget Outlays Published August 27, 1985." That document is several hundred pages long and contains every line in the entire Federal budget. It, obviously, includes each of the items that the Senator from Colorado has mentioned.

In the event that the deficit targets set by this amendment were not to be met, half would go against discretion-

ary programs, of which the major portion, of course, is defense; half would go against the entitlement programs exclusive of Social Security. Thus, whatever the sequester order is, which is mathematically computed—not by the President but by CBO and OMB, with no discretion whatsoever for the President to make any shifts—then the entire reduction comes across the board, obviously, including those items that the Senator from Colorado has captioned.

Mr. HART. Well, back to the original question. Before that happens, before this automatic process sets in of so-called across-the-board cuts, both the President, in submission of his budget, and the Congress, in drafting its own budget, exercises some discretion. If somewhere between $92 and $109 billion are excluded, at least the first year, and an undetermined amount thereafter, in that first discretionary round both at the White House and here, I would like some evidence that the pressure will not be placed more on what can be called the operation and maintenance for our conventional forces than on the procurement of nuclear and nonnuclear hardware. That is what I am seeking.

Mr. RUDMAN. If the Senator will yield, I can respond to that briefly.

Mr. HART. I will, but let me make this one point, because the Senator referred to the OMB.

The Gramm amendment cuts in one section of that amendment what is called relatively controllable expenditures. If anyone knows what that means, let me know. That is defined, as the Senator says, in the OMB document called Controllability of Outlays No. BP50701A. What is this document? It is a 400-page computer printout. Yesterday, my staff tried to obtain a copy of it and the OMB refused because they were too busy to make a copy. And that is what we are cutting.

I am glad the Senator from South Carolina has one. I do not.

I yield to the Senator from Illinois.

Mr. RUDMAN. Mr. President, will the Senator from Illinois yield so I could respond to that question, just for 30 seconds?

Mr. DIXON. Surely.

Mr. RUDMAN. I want to put out to the Senator from Colorado that in order for any of us to try to understand where those numbers might end up in the areas he is concerned about, obviously that would depend entirely on the priorities set by the Armed Services Committees of both Houses and the Appropriations Committees of both Houses in setting those accounts. In anticipation of this problem, we could prioritize ourselves to a higher level so that even with a sequester order, they would be higher than the previous year. That is something we cannot tell standing here now. But my guess is that is precisely what would happen. One of the more subtle automatic forcing mechanisms in this amendment is designed to force that kind of action by the committees.

Mr. HART. Mr. President, though I yield to the Senator from Illinois, I do not yield the floor.

Mr. DIXON. I thank the Senator from Colorado. Will he yield so I may ask the Senator from New Hampshire some questions?

Mr. HART. Yes, Mr. President.

Mr. DIXON. Mr. President, I ask the Senator from New Hampshire, is amendment No. 730, the 37-page document on these desks, the amendment we are now dealing with? There have been several changes. I know.

Mr. RUDMAN. The Senator is correct. The only difference between these and previous days were some technical changes. This modification is technically correct.

Mr. DIXON. I thank the Senator. If I could walk through a couple of things I would like to clarify them with my friend from New Hampshire.

On page 21, if I understand that amendment correctly, the amendment deals with the process we use to make these highly technical determinations.

It indicates that it will be the Directors—in essence, the Director of OMB and the Director of CBO—who will make certain identified determinations. Is that correct?

Mr. RUDMAN. That is correct, Mr. President.

Mr. DIXON. Those two worthy gentlemen do the following: First, they estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year.

Second, they determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, which is defined later.

Third, they estimate the rate of real economic growth that will occur during such fiscal year.

Then we go on through the process and later it says, if they cannot agree, as I understand it, they split the difference.

Mr. RUDMAN. They take the midpoint.

Mr. DIXON. Between the estimates.

Mr. RUDMAN. We do that for obvious reasons, namely whom they work for.

Mr. DIXON. I am just trying to identify the process. They try to agree upon these three significant features in arriving at the decisionmaking process. And when they are apart, as I understand it, the difference between the two becomes the arrived at figure. This is essentially a simplification of what this says.

Mr. RUDMAN. Yes. And I might say briefly to my friend from Illinois, if he will look at the past history, under both Republican and Democratic administration and the Congress, he will find that the differences, although substantial, when split would come to a figure which is very, very real and would work.

Mr. DIXON. I do not have any particular problem with that. You have to do it some way. I understand that.

Then let me take the next step. Then, as I understand this, you have the numbers for the 5 years, and the first time that our friends, the two Directors, make this determination would be November 1 of this year——

Mr. RUDMAN. That is correct. And October 1 thereafter.

Mr. DIXON [continuing]. And then thereafter on the beginning of the fiscal year, on October 1 of the 4 succeeding years. Am I right that far?

Mr. RUDMAN. October 1, the first day of the new fiscal year.

Mr. DIXON. All right. Now, the first question I would like to have answered is that: I presume that there can be substantial errors in these matters, or that circumstances can alter cases. As an example, quite clearly the rate of economic growth could be dramatically affected, either upward or downward, in the course of a fiscal year. I would presume that to be the case.

Mr. RUDMAN. Let me say to the Senator from Illinois that that is what I thought when we started drafting this about 6 weeks ago, but I find, to my surprise, that the one thing which tends to be fairly accurate is when they look through the next 12 months, by both CBO—indeed, remarkably by a number of economic outputs. They can be off some, but not in any gross amounts. The trouble comes when you start estimating 3-year figures——

Mr. PROXMIRE. May I interrupt at this point?

Mr. RUDMAN [continuing]. There may be errors but——

Mr. PROXMIRE. They are terrible. They are terrible. They missed it by 100 percent last year, missed it consistently a year ahead. They cannot predict 1 year in the future.

I beg the Senator's pardon for interrupting.

Mr. DIXON. Mr. President, I thank my friends for their help, but I was going to pursue that as well. It is so apparent to all of us that they are not worth a doggone at making these estimates. All you have to do is read the newspaper pretty regularly and find out that they miss it by miles all the time. And so let me, if I may, pursue that point now. Let me say to my friend from New Hampshire, I am generally favorable to the concept he has. I am not trying to shoot down his ship. I just want to ask some questions. The first question I want to ask is how do you repair error? Here you have a process where these two Direc-

tors meet, either on November 1 in the first year or on October 1 of the 4 succeeding years, as I read pages 21 and 22, and they make these very artful determinations. And if they cannot make an artful determination, they use the old justice-of-the-peace system, may I say to my friend from South Carolina, and they split the difference.

Well, that is all right with this Senator; I was a justice of the peace in the beginning. But what I am trying to figure is what do they do about error here, may I ask my friend from New Hampshire? Because my friend from Wisconsin I think is entirely correct; they miss this by hundreds of miles all the time. Just a couple of weeks ago they were saying how happy they were about the turnup right now in the indicators in the last several months. So I am trying to find out from my friend from New Hampshire if we get into about June or July, having made some massive errors in October, what do we do then?

(Mr. McCLURE assumed the chair.)

Mr. RUDMAN. First, let me say to my friend from Wisconsin that there is a difference between predicting 12 months ahead and predicting the following year. What the Senator from Wisconsin reacted to was the fact that when they predict from a year out another 12 months, they are quite, quite bad.

We will put the information together. There is no sense in debating it. I do not have it here. But I believe CBO and OMB, when estimating October 1 for October, November, December, January, the error rate for that 12 month period has been far better than when they forecast for 12 months ahead for the following 12 months.

Mr. PROXMIRE. I hope the Senator will give us the evidence on that, because I disagree with him wholeheartedly. In 1985, they estimated 4-percent growth and it was 2-percent growth—100 percent wrong.

Mr. DIXON. May I say to my friend from New Hampshire——

Mr. RUDMAN. I will answer the question.

Mr. DIXON. I understand what my friend from Louisiana and others have said about the fact that we have to refer back to a good deal of other statutory language to get the final answer but in reading the 37 pages, which I have done since getting here at 10 this morning, fairly carefully, I cannot find how you correct the error. That is all I am asking now. When you make the determination at the beginning of the fiscal year and the two Directors sign off on the three criteria, or they split the difference—and I can live with that—what happens 5 or 6 months later if they made a profoundly serious error?

Mr. RUDMAN. Let me answer it in this way, and as clearly as I can. If the error was made in projecting that the deficits were much higher than they actually were—let us assume that the CBO and OMB agreed on a figure, let us say, of $10 billion missing the mark. Let us assume that instead of hitting it by 10, it looked like it was going to only be 5 and we found that out, to use the Senator's figure, in March or April.

Mr. DIXON. All right.

Mr. RUDMAN. Both the Congress and the President at that time would have the opportunity to correct that, as we do now, with a supplemental, in a variety of ways. This does not change the basic right of Congress to act in its normal way during the year.

That handles one aspect. Now let me take the other side of it, to which the answer is less satisfactory. Let us assume that CBO and OMB said that we are going to miss the target by $10 billion. The sequester order goes into effect or the Congress has other solutions, but at any rate we solve the problem. Then we find out, come June or July or, to use the Senator's example, March or April, that really it is $20 billion. Frankly, there is nothing we can do about that. We have enough trouble getting people to go along with one sequester order, let alone two.

Mr. HART. Will the Senator from Illinois yield just to make two points, one that he is himself making?

I quote the Senator from Texas in the debate from Thursday. We are not talking about missing the target by $10 billion or $20 billion. Listen to this, folks. This is the Senator from Texas reviewing the history of 1981: "In the beginning of August," the Senator from Texas says, "we were looking at about a $60 billion deficit depending on how you figured it." That is what the Senator is talking about.

Mr. DIXON. Yes.

Mr. HART. "When the midyear review came out—not a year later or 2 years or whatever. I presume in July it came out—"and it was clear how deep the recession was, in a 2-week period"—in a 2-week period—"the deficit jumped from $60 billion to $140 billion." In 2 weeks.

The second fact is OMB and CBO differ wildly on these estimates. How do the sponsors resolve that? Split the difference. Now, OMB has been cooking its books for 5 years. We have all known that. So what you are doing is reducing OMB's margin of error by 50 percent, which is a help, given their track record. But that is the way you resolve that. You have a political estimating operation up the street which cooks its books regularly, and you have the CBO trying to be honest. And so how do you resolve that difference? Split it. And we are not talking about $5 billion or $10 billion here, folks. We are talking about a deficit that jumped $80 billion in 2 weeks.

Mr. DIXON. I would like to adopt that language that my friend from Colorado has just given to the Senator from New Hampshire and make it part of my question then. What do you do with that kind of an error?

Mr. RUDMAN. Well, in the first place, I have to say to the Senator from Colorado, I agree with him that if we improve OMB by 50 percent, that is not bad, as they say in New Hampshire, for Government work.

Let me simply say we keep them more honest. We know OMB tends to work for the President and CBO, it seems to me from looking at it historically, has been more accurate. But I believe when these representations mean something, when they are firing real bullets, then that is a whole different ball game. I think this puts a discipline into the process.

To answer the question asked by the Senator from Illinois, I would point out that we have within this measure a very important process to forecast what we do in the event of recession.

Mr. DIXON. I am going to get to that in a minute.

Mr. RUDMAN. The situation the Senator from Colorado talks about was in the midst of a recession, and, of course, we have a substantial waiver provision for this act in the event of a recession.

Mr. DIXON. I am going to pursue that in a moment, but I guess the end of my first question to my friend from New Hampshire is: Should not this rather elaborate suggestion reform have more flexibility in reviewing the process at least of the Directors through the course of the year so that the Congress can make more meaningful revisitations of the problem?

My examination of it suggests that is a matter that is lacking in what has been suggested in this 37-page amendment.

Mr. RUDMAN. Let me just reply in this way: If there was a way to have what the Senator from Illinois is talking about, which would be, as business do, an accruing updating of this self-adjusting system, I would find that very interesting.

When you consider the difficulties we have in Congress in getting things adopted, I have serious problems basing things on rolling estimates and having the President put into effect rolling sequester orders.

I believe that we have come up with a mechanism which is fair and reasonable.

I also point out, with all due respect to my friend from Wisconsin, that when the CBO and OMB certify on November 1, which then will be 1 month into the fiscal year, after certifying for numbers on the rate of growth and on the deficits, and the Directors of those two Agencies know that what they sent forth to Congress

and the President will be acted on in a real and significant way, and not simply used for speeches on the Sunday-morning television programs, I think we may put some truth in reporting into the system, which I am not sure we have now.

Mr. DIXON. As indicated by the distinguished Senator from Wisconsin, I would like to see the evidence on that; because I confess that my inpression over the years has been exactly contrary to the statements of the Senator from New Hampshire regarding their ability to estimate very reliably on those questions.

Mr. HOLLINGS. Mr. President, I might answer that, if the distinguished Senator will yield.

Of course, No. 1, we are trying to pattern this thing so it is error-free, in the sense that we provide an allowance for estimates that are relatively insignificant—thus the 5 percent over target figure. Does the Senator see what I am saying?

If a problem comes up after the deficit fix in the full, Congress will be back in session in January, February, and throughout the year and it will be in our hands. The Congress is in session and the Appropriations and Budget Committees can do their work. We can pass a reconciliation bill. In October, November, and December, we can come back in session and take care of problems. If there were an error in cutting back too much, we could immediately come back and fix it. That is what the Budget Committee and Congress are in session for.

We tried our level best to aim this amendment down the middle, so that it would not be triggered unnecessarily, so that it would not have to be used precipitiously.

Mr. DIXON. But as I read that—and I may be in error on that—I keep getting the impression, I say to the Senator from South Carolina, that the President finally triggers these things.

Mr. HOLLINGS. A deficit that exceeds the target would trigger it.

Mr. DIXON. This is what concerns me in connection with the response of the Senator from New Hampshire; because, after all these things are done, the bill says that the President then transmits to both Houses his directions on these things.

Mr. HOLLINGS. On behalf of us, and we set down how he is to do it.

Mr. DIXON. I am not trying to be argumentative. What happens if some of these really dramatic things occur and we have a President who says, "I am not going to respond to that at all"?

What is the right of Congress then, in respect to that?

Mr. HOLLINGS. Send him to Ireland.

Mr. HART. Is this an important point?

One fundamental change in this amendment, as I understand it—and I hope the sponsors will correct me if I am wrong—is that you change the way you calculate a recession, from two successive quarters to four. Is that correct? So that to trigger the kind of releases that a recession brings about requires four successive quarters of downturn, not two, which is the standard calculation.

Before you can rely on the extraordinary remedies of going back and recalculating and restimulating the economy, you have to be on a downturn for four successive quarters. Is that correct?

Mr. RUDMAN. We define recessions by negative real growth in the GNP for the year.

Mr. HOLLINGS. I have tried to determine that, and we can let the CBO and OMB come and tell us when they predict one.

Their estimate is made at the beginning of the year and even though they estimate that we are in good shape right now, next year we could have a recession. Or, if it looks bleak for this time next year, they can estimate, even though we think it is going to be pretty bleak, no recession. But it is the estimation they make, without any particular measure. It is not four quarters. They can estimate right now, on November 1, that we are going to have a recession next year. They have had no quarters of negative growth.

Mr. HART. We are talking about a situation where we are in a recession.

Mr. HOLLINGS. Then it comes back to Congress.

Mr. HART. When? When it comes back to Congress—whatever that means—what conditions have to apply? Do we have to have had four successive downturns? Leave estimates aside.

Mr. HOLLINGS. That is the only thing to trigger whether it comes back to Congress or whether the President acts, whether or not there is a recession, and it is based on the estimation made by OMB and CBO of the fiscal outlook.

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. HART. Mr. President, if I may correct the Chair, I yielded to the Senator to ask a question. I did not yield the floor. I think the RECORD will reflect that. That was the understanding.

Mr. DIXON. Mr. President, will the Senator from Colorado yield to me again, in order to pursue the question about who initiates this?

Mr. HART. I yield.

Mr. DIXON. I refer to pages 22 and 25, I say to the Senator from New Hampshire. I read from line 18 on page 22: "the President shall issue an order that." This follows all the determinations that are made by the two directors on pages 21 and 22.

Then, on page 25, line 15, "the President shall issue the order required to be issued."

Here is what concerns me about this. I want the Senator to know that I am sympathetic to this legislation. I want to vote for the legislation. But my colleagues who advocate it keep telling me that we in Congress have the power to do remedial things that are necessary; but each time I look for the triggering device, the President issues the order.

When you get down to the question of recession, I presume that is what you are talking about with respect to real economic growth, beginning on line 20 of page 25.

With respect to wars, you have no problem. In wars, you simply make a finding on page 22, lines 6 through 8:

EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

That is fine. What I am really concerned about, I say to the Senator from New Hampshire and the Senator from South Carolina, is that I have not been here very long, only 5 years; but while I have been here times got pretty tough in my State, dramatically tough, and we reversed a lot of things around here and had the power to do so.

I am wondering whether Congress has been left with that initiative, as I look at these pages in the heart of the bill, from page 20 to about page 26.

Mr. RUDMAN. I will be happy to answer the question. I am delighted that the Senator from Illinois has asked the question, because it is probably the most important question that can be asked and the simplest to answer.

I think the Senator should probably have started on page 21, and I will get to that in a moment.

There is a vast world of difference. One need only read the Nixon impoundment case in the U.S. Supreme Court as to the difference between a ministerial duty by the President and a discretionary act by the President. The Senate is forever mandating the President to perform ministerial duties.

We order him to certify all sorts of things to us. Now what he puts in them is up to him, but he must certify, and that is a ministerial act on his part.

We have given the President of the United States not one iota of power in this statute; what power we give him is totally nondiscretionary.

I know my good friend, Senator MITCHELL from Maine, a very distinguished former jurist from the State of Maine, has had cases like this before him involving other things, and I am going to go through this if I can and then answer questions.

Mr. MITCHELL. Mr. President, will the Senator permit me to answer a question merely on that very limited point?

Mr. RUDMAN. Sure.

The PRESIDING OFFICER. The Senator from Colorado has the floor. Does he yield for a question?

Mr. MITCHELL. Will the Senator yield so that I may answer one question on that limited point?

Mr. HART. I yield to the Senator for that purpose.

Mr. MITCHELL. Mr. President, I have read this with care and I commend the Senator for his effort. I have a series of questions I will ask later. But the Senator's response to Senator DIXON triggered this.

Included in this is a mechanism for an affirmative proposal for the President.

Mr. RUDMAN. Absolutely.

Mr. MITCHELL. There are no specific standards by which the action by the President is to be mandated, and I ask the Senator whether use of that alternative proposal comports with the Senator's description of the delegation of responsibilities the President has, being ministerial in nature? It seems to me reading this that the President has absolutely total discretion as to what he may include in the alternative order.

Mr. RUDMAN. Mr. President has all the discretion the Constitution gives him to put anything in his alternative proposal that he wishes and Congress has obviously the constitutional authority to put anything it wishes in its alternative proposal, which is the next paragraph from the one the Senator read. Of course, neither have the force of law until adopted by Congress and signed by the President.

Let me come back to the question of the Senator from Illinois.

The key to this entire debate is found on page 21. It really is in conjunction with the book which Senator HART, I hope, will get. That is public record and, it seems to me, identifies where these cuts come from. It is the so-called line-item manual of the U.S. Government.

But here is what happens on page 21, if the Senator from Illinois will look at page 21 with me.

Mr. DIXON. I am looking at it.

Mr. RUDMAN. On page 21 after all of this happens and the determination is made, and the determination is made that in fact there is an overage over the target, then about line 13, last two words, it reads as follows: "The director" referring to those two directors jointly, "shall report to the President and to the Congress on October 1 of such fiscal year."

Then on line 18, "identifying the amount of any excess, stating whether such excess is statistically significant," which means was it within the error rate that we set in here, 7 percent the first year and then 5 percent, and then the single most important line in this proposal and a total refutation to anyone who says the President has more power, and it is this: "specifying the estimated rate of real economic growth for such fiscal year and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate such excess."

In other words, the President receives from these directors not only a certification as to the amount that the deficit exceeded the target, which this year is $180 billion, but in addition to that he is told in order to reduce it, "You, Mr. President, must apply a factor of 0.13422 percent," and now let us now turn to page 31 so everyone understands this process, "(g) the term relatively controllable expenditures means budget outlays that are classified as relatively controllable outlays in the Office of Management and Budget controllability of budget outlays report," which is available to everyone who wishes.

So to sum up to the Senator from Illinois, and the Senator from Colorado in fact has the floor, if anyone can stand on the floor of this body who has been to law school for more than a day and a half and say that this statute vests in the President anything more than a total ministerial function, then they are reading different books than I read. As a matter of fact, the Senator from Colorado asked last night a very good question. Why the President? As a matter of fact, the President because he is under the Constitution the Chief Executive officer of the country and in fact can enforce what he is supposed to do, but the practical matter is that it could be done by a computer; as a matter of fact it could be done by the Treasurer of the United States, by the Comptroller of the United States, so long as they had the statutory authority to enforce it.

That is the best explanation I can give the Senator from Illinois.

Mr. HART. Mr. President, I wonder if the Senator from New Hampshire or the Senator from Illinois would answer what I think is the reverse of the question asked by the Senator from Illinois, and that is what happens in a recession.

Mr. DIXON. That is exactly the question I am getting to.

Mr. HOLLINGS. It comes back to Congress. He presents his plan and we can go from there.

Mr. HART. Let me hypothesize the situation. We have gone through all this process that the amendment proposes. Let us say Congress did not meet the target and we go into this automatic triggering and the President performs this ministerial function and things are cut, and that is the budget we are operating under. All right.

Now we go through a quarter under that budget—we are not talking about projections or anything—we under that budget go through a quarter downturn and go through another quarter downturn. We go through two quarters of downturns, which is what the economists say is a recession.

I want to know what happens then under this measure, and then I want to hypothesize something else. We go through a third quarter of downturn and a fourth quarter of downturn.

The reason I ask that question is traditionally since Roosevelt and Keynesian economics we have used Government spending or tax cuts to restart a stagnant or declining economy.

What effect on either of those two situations does this amendment have?

Mr. DIXON. That is exactly what I would like to know.

Mr. HART. I do not think the Senator from New Hampshire answered that.

Mr. RUDMAN. Mr. President, let me try to answer briefly. I am really looking for an opportunity to allow my friend from South Carolina to answer some of these questions. Let me just answer this one since I answered before.

The certification made by the Director of OMB and CBO in the beginning of the year in fact would have to be a certification forecasting zero growth for the coming year. It is not a quarter by quarter growth. They have to forecast zero growth for the coming fiscal year.

Mr. DIXON. We are talking about making a mistake in the beginning of the year in the prediction.

Mr. HART. Forget about prediction. We are talking about the real world.

Mr. DIXON. Yes. We are talking about a mistake.

Mr. RUDMAN. I answered the question asked by the Senator from Colorado. There is some feeling, and I believe it is sincere, that somehow we are adopting a Magna Carta that it is going to be outside of this building engraved in granite.

The Senator from Colorado knows perfectly well if we adopt this and everything looks rosey with 4-percent growth next year, so we make the adjustments, and all of a sudden come January there is a flood, a pestilence, disease, and the country goes into a minus 5-percent recession, that this Congress will walk in here on Monday morning and simply waiver the provisions of the statute because there is a national emergency. The Senator from Colorado, the Senator from South Carolina, and the Senator from Illinois and I all know that is precisely what would happen, but it would take extraordinary circumstances to make it happen.

What we are trying to prevent is the lack of discipline in which we let that happen in good times, and that is the only answer I can give to the question.

Mr. HOLLINGS. Mr. President, if I could try to answer, it is for Congress. We just passed the budget, as the Senator indicates, so let us say, for that first quarter there is a mistake in the estimate in that it shows no recession and right thereafter there comes than the second quarter with negative growth, the third quarter with negative growth, and the fourth quarter with negative growth, and all three of those quarters we are here and do what we please.

Mr. DIXON. That is right.

Mr. HOLLINGS. Now we finally join the other side that do not want ministerial duty by way of it. They want Congress to do this. As the distinguished Senator from Colorado stated in his opening remarks, why cannot Congress do these things?

I am back to the Senator's answer and the Senator's suggestion. Then we will be in session in that second quarter with the mistake made and we will be here in January and we have a Budget Committee in session. We can put it in a reconciliation bill. We can have the hearings that they want to have around here. We can do all of those delightful things that everyone suggested should be done, and I hope we will do them.

We cannot make an ironclad process that goes all the way through the year and disregards Congress and disregard the economy. But we can only measure at the beginning of the year for truth in budgeting. That is all we are doing.

Mr. HART. If that situation were to occur, does this amendment as a substitute have to be repealed?

Mr. HOLLINGS. It could be amended. You do not have to repeal the entire statute. But Congress could take its action right then and there.

Mr. HART. It would require amending this statute?

Mr. HOLLINGS. If it amounted to an amendment, yes. There is nothing wrong with that.

We can all see what the situation was, as the Senator described, two quarters of negative growth. We would all be racing each other to fix it and it would be tough to get ahead of the President. He would be ahead of us in amending the statute. We would be playing catch-up ball.

Mr. DIXON. Mr. President, if my friend from Colorado will yield so that I may ask him what he thinks of this.

The point I hoped I was making and perhaps we are beginning to make now is that this is not a very flexible suggested solution to the problem in exactly the type of hypothetical case my friend from Colorado is giving to us now. If we get into the depths of a pretty serious depression——

Mr. HOLLINGS. What do we have other than Congress suggesting that it be enacted?

Mr. DIXON. I would like to have it suggested in this legislation itself some type of way to respond to the mistakes made at the beginning of the fiscal year by the two directors.

Mr. HOLLINGS. I am not being facetious when I say if the OMB and the Director of the CBO have made a mistake, let us have the Congress look at and correct that mistake in January when they come in session and the Budget Committee starts hearings and in quorum the Congress starts acting for the good and welfare of the United States of America. What better amendment is there than that?

Mr. RUDMAN. Will the Senator yield for 30 seconds?

Mr. HOLLINGS. Yes; the Senator from Colorado has the floor.

Mr. RUDMAN. I might have misunderstood my friend from South Carolina in answer to the question. You would not have to repeal this act at all, with the underlying enforcement on page 35, line 23.

Mr. DIXON. Wait a minute, now. Let me find it.

(Mr. SYMMS assumed the chair.)

Mr. RUDMAN. The section is entitled "Waiver and Amendments." You will find by joint resolution, which is the discipline that we have tried to put in this, but you can be reasonably well assured, it seems to me, with the kind of events the Senator from Illinois is concerned about that affect all of our States, that are nonpartisan in nature—recessions do not pick on any particular segment of society other than on the very poor, but they impinge across the country.

This Congress, by joint resolution, could act. And the underlying discipline of the measure would still be in effect.

Mr. DIXON. Is my friend from New Hampshire suggesting that by the provisions at the bottom of page 35 and top of page 36, the passage of a resolution by the two Houses concerning the subject matter, speaking in specific terms and so forth, would alter and amend previous action taken?

Mr. RUDMAN. That is true.

Mr. HOLLINGS. So it would be an amendment.

Mr. HART. Will the Senator from either South Carolina or New Hampshire respond to this situation, pursuing the same line of questioning? Let us suppose that we have gone through this process once again. We are under the budget produced by this amendment and there is what the Senator from South Carolina is calling negative growth—a terrible, terrible phrase. There is a recession in one quarter, second quarter.

Now, the Congressional Budget Office says that all the standard indicators for what a recession is, rise of unemployment and all the other factors, decline in GNP and the rest, have been met and we are in a recession. The OMB Director says, "No, no, no. You are absolutely wrong. The figures are wrong. We estimated we had one quarter of economic downturn. Now we are coming out that in the second quarter"—and we have seen, as the Senator from South Carolina has seen, how the economists quarrel about these things. It is not as scientific as all of us would hope.

In other words, I am hypothesizing the situation where one part of this Government says we are continuing to decline, we are continuing to fall off, and the other part of the Government, which we are trying to harness in tandem, OMB, says, "Oh, no, no. You have got your figures all wrong. It is not a recession." And the President has impounded all of this money. And let us say we want to cut taxes. Let us say we want to increase the deficit to stimulate the economy, pursuing standard Keynesian economics. The President says, "No, you don't. I have impounded this money. If you try to spend more money to restart this economy, I am going to veto that bill and then you have got to override that by a two-thirds vote in both Houses." Is that true or not true?

Mr. HOLLINGS. That is, generally speaking, I say to the Senator, true, in the sense that right now, without this act, that is exactly what would happen.

Mr. HART. What about with the act?

Mr. HOLLINGS. Let us assume that no budget, or whatever this long title is we have for it, a balanced budget and deficit reduction, let us assume that is not the case, but what we have is real life today.

Namely, let us assume OMB and CBO misjudged it. We are in a terrible recession. If the President resists on this, we are back in the three readings in the House, three readings in the Senate, or a joint resolution, as the distinguished Senator from New Hampshire has pointed out. And with that joint resolution we try to amend the act or, right now, without an act, we would be, assumedly, as you try to say, in a catch-22 situation where the President does not believe it, but we do believe it. And the light of truth would come out and we would see who would prevail. But we would have to pass all of those things.

Mr. SARBANES. Will the Senator yield for a question?

Mr. HOLLINGS. Yes.

Mr. SARBANES. As I understand it in this proposal, though, you require two consecutive quarters of negative growth before you will allow a waiver to apply.

Mr. HOLLINGS. No, we had that a little bit earlier. Just an estimation of

those two Directors, which was earlier pointed out on page 25.

Mr. DIXON. Negative real economic growth, line 19.

Mr. HOLLINGS. Yes, but the estimation comes earlier on.

Mr. DIXON. That is on page 21.

Mr. HOLLINGS. I say to the distinguished Senator from Maryland, you see it begins with the OMB and the Director of the Congressional Budget Office there on lines 2 and 3 and down at lines picking up at 18 identifying the amount of excess, "stating whether such excess statistically is significant," and then, on line 20, "specifying the estimated rate or real growth for such fiscal year." That is what they mean.

Mr. SARBANES. Is it the Senator's position that unless the economy is actually in a negative growth, we do not need to worry about a downturn?

Mr. HOLLINGS. I worry about a downturn now.

Mr. SARBANES. I understand that.

Mr. HOLLINGS. Please let me answer the question. Wait a minute. I cannot answer and listen at the same time.

That is exactly why we are introducing this particular procedure, because I happen to be worried, yes, about that downturn next year.

Now, the OMB and the CBO, I have asked and counseled with both, and they will not be estimating a recession for next year. So none of this, assumedly, would take place for 1986.

Mr. SARBANES. I would like to repeat my question and hopefully the Senator will not slide off of it this time.

Is it the Senator's position that unless there is negative growth, unless the economy has reached the condition of negative growth, that there is no reason to worry about a downturn?

Mr. HOLLINGS. No. There is a reason to worry about a downturn. You call it sliding, I call it answering. There is a reason for a downturn.

You are trying to say that there must be a downturn before there is an estimation of a downturn. I am saying, without an actual downturn, there could be an estimation of a downturn or with an estimation of a downturn there could be an estimation of an upturn.

It is the estimation made, not the actual fact at the moment that the estimation is made.

Mr. SARBANES. Then, what is the relevance, given that response, of the provisions on page 25 with respect to positive real economic growth and negative real economic growth?

Mr. HOLLINGS. Positive real economic growth is set forth in that. That is the estimation we have just read on page 21. The significance of that is the President issues the order when you do not have a recession on estimated downturn, whereby if there is an estimated downturn, rather then the President issuing the order, he submits his alternative plan to the Congress.

Mr. SARBANES. That is exactly my point. Your definition of an estimated downturn is related to the question of positive or negative real economic growth. The question I am putting to the Senator, which I put to him earlier, is whether you are concerned about a downturn in a situation in which you have not actually reached negative economic growth, or do you want the economy on its back?

Mr. HOLLINGS. I say, yes, I am estimating it right this minute. If you ask me about my concern, I am telling you for the third time, yes, I am. But I am saying, in the same breath, they are not. Both OMB and CBO for next year will estimate that there will not be negative growth or a downturn or, as you try to describe it, zero, or, fourth, recession. They are not estimating a recession for 1986 in either body.

But, yes, I am concerned.

Mr. SARBANES. Let us accept the estimate. If the estimate is for 0.01 percent growth, and let us assume you agree with that estimate, then the President shall issue the order.

Mr. HOLLINGS. Right.

Mr. SARBANES. That is right?

Mr. HOLLINGS. Right.

Mr. SARBANES. Now, what I am asking the Senator is whether, the way he analyzes things, you must actually go into negative economic growth, actually go into negative economic growth, before you are prepared to try to do something about saving the economy from going into that condition?

Mr. HOLLINGS. No. The answer is "No."

Mr. HART. This is what your bill does.

Mr. HOLLINGS. The answer is the estimation. You do not have to have actual negative growth. But if the estimate is one with growth going on, there is nothing we can do about it taken at that amount. But you have to look at both bodies in considering generally speaking responsibility—certainly CBO.

Mr. HART. May I say to the Senator——

Mr. SARBANES. I will close.

The PRESIDING OFFICER. The Senator from Colorado has the floor.

Mr. SARBANES. Will the Senator yield for one final point? You can have an estimate that everyone would agree that there is going to be economic growth of 0.01 percent in the next quarter which would require this proposal to be applied because it says "shall."

Mr. HOLLINGS. Next year. These estimates are for the year.

Mr. SARBANES. The follow-on for that is since the economy is moving downward, you do not move to try to check that downward trend because you have a mechanistic formula in here. What you helped to do is kick the economy into a recession. That is exactly what you are doing. This arbitrary line that you have set right at the line of negative and positive economic growth, you can have positive economic growth of such a small percentage that in fact the economy is on a downward trend. Instead of trying to do something about that, you are going to allow it to deteriorate, which means when you do come to do something about it, you are going to have to do a lot more than you would have had to do if you had applied yourself earlier.

Mr. HOLLINGS. You are not looking at the full picture because we will have had 6 months of economic experience since the OMB/CBO projection of January/February which the budget resolution was based on and a snapshot of the forthcoming fiscal year at the beginning of that year in October. Now, if I can answer the Senator from Colorado very briefly, of course, there are those with that New York Times editorial that believe that had we not had these big overruns of $200 billion more in spending than what we had in revenues—namely, $200 billion deficits—there would have been a recession. I have heard good competent Senators speak to the point that without the $200 billion, overspending each year for the last 3 years, we would have had a world recession. We ought to give the good government award to all of us here for having overrun these spending amounts and created the deficits. I take an entirely different view. I do not think we are triggering anything. I think, yes, talking in the extreme, you can have that estimation for the first quarter but the Congress is here in January. We have all the committees meeting and everything else of that kind. The President, and all of us are good politicians. And we would be moving. We would not be caught up in a statute that straitjacketed us into nonsense. We can amend it as they say on page 35 by the joint resolution or just your Budget Committee can report it out or three readings in the House and Senate. We are not going to trigger anything with this one. We are going to try to trigger truth in budget.

Mr. HART. May I respond to the Senator from Maryland? As he entered the Chamber we were in a debate which is even more complicated than the one he has restimulated. We are talking about estimates here. There are two horses pulling this estimate cart. One is CBO and the other is OMB. So you have a situation, I say to the Senator from Maryland, where one of those horses says we are in a recession—all the indicators indicate

that—and the other horse which works for the President says, "No, we are not in a recession, no, no, no; we interpret these data differently, and we are not in a recession at all." Then finally, even if you got both horses pulling the cart in the same direction, you have to amend the law to restart the economy. It does not change policy—amend the law. That is the difference. The Senator from Colorado did not intend to manage this debate.

Mr. PROXMIRE. Will the Senator yield for one question?

Mr. HART. I want to ask a question and yield the floor.

I yield.

Mr. PROXMIRE. I would like to ask my good friend from Colorado if it is not true that both OMB and CBO have not predicted any of the recessions we have had in the last 10 years? They both missed the 1973-75 recession. They both missed the 1981 recession. They both missed the inflation that occurred in 1979. The record is very clear that the economists cannot predict it. The fact is what the Senator from Maryland is pointing out we actually have to be in a recession before we will begin to think about taking action is correct because these agencies of Government never tell you our policy is going to push us into a recession. They never do it. They never have.

Mr. HART. That is true. Further, we have to be in a recession where two agencies of the Government agree we are in a recession. There is a powerful influence on one of them not to say that. It is called put out optimistic news.

I would like to ask the sponsors of the measure one question and, then back off and let others get involved here. It is a mathematical question. You may not be able to answer it.

Mr. HOLLINGS. By the way, the matter of economic growth is a mathematical question. That is how they would estimate, Senator. The CBO can estimate 0.6 growth and the OMB could estimate 0.7 negative growth. That would be 0.1. So you would have a negative growth and you would be in a recession by that little 0.1, a tie, between two horses pulling. It is a mathematical question.

Mr. HART. The question is not estimates. The question is fact. We are not talking about projections of the future. We are talking about a situation at the present time or in the first quarter of 1987. Forget about estimates. The estimates—the Senator from Wisconsin is totally right—are uniformly wrong. Forget about the word "estimate." We are talking about agreement as to a state of affairs. Are we or are we not in a recession? One agency is going to say yes. Another one is going to say no.

Mr. HOLLINGS. By an arithmetic amount.

Mr. HART. Whatever. Can I ask the Senator from South Carolina this question: as to what is on the table for cuts and what is not because I must say I am totally confused on this controllable, relatively controllable OMB document that we cannot—I say to the Senator from New Hampshire—get our hands on. To say it is available to everybody is nonsense. The OMB would not make it available. They say they do not have time.

Mr. HOLLINGS. That is wrong.

Mr. HART. The question is this: the Senator from Colorado believes the amount in Social Security taken off this by the amendment is $203 billion; that interest on the debt is $137 billion; that other entitlement programs exempted one way or another under one or more of these categories is $184 billion; that DOD multiyear procurement is somewhere between $92 and $109 billion depending on whose numbers you are using; and, that civilian multiyear procurements are in the range of $78 billion. What I would like are some confirmations, not whether they are specifically in dollar terms, but generally whether those calculations are correct and whether therefore that the amendment exempts from cuts at least in 1986—or whatever year it is going to apply, 1986 or 1987—about $700 billion.

Mr. HOLLINGS. I think the staff might have it. Let me answer generally. That is the best I can do. I am confident my colleague from New Hampshire could do better with the staff having the actual figures there. Senator, if you refer immediately on that last point to that page in the budget book, 9-44, where you had outlays from prior-year contracts and obligations, national defense, 109.2—right there. You are right. Civilian programs, prior-year contracts, 78.0. Let's get rid of the 109 figure because it has been reduced to the figure of $92 billion. But we have never talked about the civilian programs. There is $78 billion in civilian programs—not just defense programs—that are under contract. You and I know the constitutional prohibition against the impairment of the obligation of the contract.

Other entitlements are included. Interest is not. I do not know how you include interest. You have to pay it. I do not know where the New York Times is coming from; it says this did not cut the interest costs. The overall scheme is exactly that: to cut the interest costs; namely, to reduce the deficit. We do not have to borrow. We reduce the deficit. That is how we reduce the interest costs. Otherwise, it is compulsion. You must do it. You are right. Social Security has been taken over in the sense that it is a trust fund.

Mr. HART. I am not asking for the reasons. I am just asking for the numbers.

Mr. HOLLINGS. That is right. Those are the general answers. It amounts to about $550 billion. With respect to the COLA's, the COLA's amount—I can remember that figure—was $16 billion. When you take the Social Security off, you take off 7 of the 16 and you can only go after—other than entitlement—$9 billion. I remember that figure.

Mr. HART. I refer to this document called the budget, fiscal year 1986 and I see a line on page 944 in dark type called relatively controllable outlays, $746 billion. I underestimated that on purpose. I came up with the figure of $700 billion.

Can the sponsors give us their best estimate as to how much money in the next year's budget would not be affected by this amendment?

Mr. RUDMAN. I will be happy to answer. It is an excellent question. It is the one we do have the answer for. But in order to answer the question in a very complex matter, I have to kind of lay a small framework for it.

There are two areas we are talking about here, as the Senator from Colorado knows. One is budget authority and the other is outlays.

This proposal deals with authority.

Mr. HART. Right.

Mr. RUDMAN. What is exempt is Social Security. That is about $200 billion; interest, which is about $140 or $150 billion. We do not know at this point. Contract obligations, the program base of entitlements is about $200 billion.

On prior-year contract obligations, there is a figure of $160 billion, which, as we discussed, is $90-some billion military and $76 billion, I believe, civilian. That is out of a total of approximately $1 trillion in budget authority in this year's budget resolution.

Let me simply complete the answer in this way for the Senator from Colorado. The reason that we amended this proposal, where in the first year the target was $170 billion and the 5-percent error rate, and changed it to $180 billion and a 7-percent error rate is for the very problem that exists, I am sure, in the thinking of the Senator from Colorado which prompts this question. That is how much would impinge on the rest of the base.

So what we did to take care of that problem was to raise both the trigger to $180 billion and the error rate to 7 percent the first year. According to CBO and OMB figures as we understand them, that means that the impact on the rest of the first year would be less. In years 2, 3, 4, and 5, the only real exemptions are Social Security, interest, and program base entitlements.

Mr. HART. I do not want all of that processing stuff. We have heard it 18 times. I want one simple figure. How much money in next year's budget is

excluded from consideration for cuts by this amendment?

Mr. RUDMAN. The first year would be about $600 billion.

Mr. HART. The numbers that the Senator read off total about $750 billion.

Mr. RUDMAN. I believe it is $650 billion.

Mr. HART. Let us go back through it. This is important.

Mr. RUDMAN. The Senator from Colorado is correct. It is $700 billion. I could not read the writing of my staff.

Mr. HART. That is for the first year?

Mr. RUDMAN. The first year budget authority. That is correct. We recognized that and built it into the first year's figure.

Mr. HART. So how much budget authority is left in the first year for these cuts?

Mr. RUDMAN. If you will spare me a moment, I will figure it precisely.

Mr. SARBANES. Will the Senator yield for a moment?

Mr. HART. I yield.

Mr. SARBANES. I simply want to add one final point on this question of economic growth and the fact that you have to be in a negative economic growth before this provides any effort to address the declining economy. That is, I do not think the Senator from South Carolina and others proposing this fully appreciate how rapidly the economy can deteriorate.

In 1980, in 6 months, we went from 6.3 percent unemployment to 7.8 percent. That was a 25-percent increase in unemployment in a 6-month period.

From 1981 to 1982, in a 15-month period, from July 1981 to November 1982, we went from 7.2 percent unemployment to 10.7 percent unemployment.

In other words, from just over 7 percent unemployment to almost 11 percent unemployment, an increase of 50 percent in unemployment in this country.

I only make that point to stress the fact that this arbitrary division on the points of positive growth and negative growth does not begin to respond to the necessity when the economy is moving on a downward trend and the necessity to try to check that. Otherwise, you are going to draw us into very steep declines in the tremendous increases in unemployment.

I thank the Senator.

Mr. RUDMAN. The budget authority figure is $200 billion for Social Security, $140 billion for interest, $200 billion for program base. That is $540 billion budget authority that would be exempt. Obviously, the contractual obligations—

Mr. HART. Would the Senator repeat that?

Mr. RUDMAN. The program base are the entitlements that we do not touch at all.

Mr. HART. How about military functions?

Mr. RUDMAN. That is in outlays. But all we are dealing with now is budget authority. Contractual commitments are from the previous year's budget authority and is covered only minimally in this year.

Mr. HART. But there is a number in every budget, budget authority in the current fiscal year, for military procurement.

Mr. RUDMAN. That number for this year is the number we already discussed. It is $160 billion. But I must point out to the Senator from Colorado that the way this system works the real figure in terms of what we are looking at hereafter in $540 billion. That is a very important distinction.

Mr. HART. I repeat my question: How much money in the first fiscal year, budget year, after this amendment passes is not available for cuts?

Mr. RUDMAN. In budget authority?

Mr. HART. In budget authority.

Mr. RUDMAN. $540 billion.

Mr. HART. How much is available in budget authority?

Mr. RUDMAN. $540 billion in budget authority is not available.

Mr. HART. The Senator is not answering the question.

Mr. RUDMAN. I am answering it as truthfully and honestly as I can. I do not think the Senator from Colorado understands the answer but I have answered the question.

Mr. HART. I am on the Armed Services Committee and I do understand. You are not including budget authority in the fiscal year for multiyear contracts. The question is, how much budget authority is left in the first year under this amendment for cuts required by this amendment?

Mr. RUDMAN. The contract obligations are $160 billion for this year. That is outlays. I do not know what that is in budget authority. I cannot mix apples and oranges. That is a figure we have been furnished by all the authorities and which is an outlay figure. How much that is in budget authority I do not know.

Mr. HART. Does the Senator from South Carolina have an answer?

Mr. HOLLINGS. Well, I can try to answer. If you reduce the budget authority for entitlements and interest it amounts to about $540 billion. The budget authority is $1.070 trillion. So it would leave about $530 billion, about half.

Mr. HART. What about multiyear procurement for military and civilian?

Mr. HOLLINGS. On that basis, in 1986 we have about $300 billion. Of that new budget authority there is roughly $160 billion in outlays. That is split about 50-50 between pay and investment.

Mr. HART. So the answer is in fiscal 1986 if this amendment passes—it would apply first to 1987?

Mr. HOLLINGS. No; it would apply to 1986.

Mr. HART. The amount of money not available for the first year cuts is at least $695 billion?

Mr. HOLLINGS. No. I said about half. I said not available was $540 billion. That is included in that amount.

Mr. HART. No. You do not include multiyear procurement.

Mr. McCLURE. Will the Senator yield at that point?

Mr. HART. Yes.

Mr. McCLURE. It is not easy to give an answer in the terms the Senator is asking. The outlays that occur under multiyear contracts is not all current budget authorities. Much of that is in past years. Therefore, when you are talking about the $300 billion that is in this year's budget authority, you cannot charge all of that $300 billion with all of the contractual obligations. Much of that multiyear contract outlay will occur under budget authorities charged to prior years and not charged to fiscal 1986.

Mr. MITCHELL. But if the Senator will yield, the Senator from New Hampshire——

Mr. HART. What is to be charged to fiscal 1986? That is all I want to know.

Mr. MITCHELL. The Senator from New Hampshire answered the question. He said on defense $126 billion, on $72 billion for a total of $198 billion. That is not in the $540 billion, so the total is $710 billion that is exempt and $460 billion that is subject to the sequester order. Those are the figures that emerged from all of this discussion. The budget authority for fiscal 1986 is $1.070 trillion. Of that, $710 billion is exempt from the sequester order according to the figures given by the Senator from New Hampshire and $360 billion is subject to the sequester order. That is the answer, according to the Senator from New Hampshire.

Mr. McCLURE. The answer is incorrect.

Mr. MITCHELL. I am taking that answer from the figures the Senator from New Hampshire gave.

Mr. McCLURE. Those are not the figures he gave.

Mr. MITCHELL. He certainly did.

Mr. HART. What is the answer, Mr. President?

Mr. McCLURE. I am trying to answer.

Out of the contractual authority which would be taken off limits from the cuts—the Senator asked a very good question and it is legitimate. Of that $150 billion and $160 billion in both civilian and military contracts, that would not be subject to the cut, a small portion of it—and I do not have the exact number—a small portion of that would be out of new budget authority.

Mr. RUDMAN. That is correct, and that was the answer I tried to give. I

thank the Senator from Idaho for giving that more lucid answer.

Mr. McCLURE. But most of it, and I do not know the number—we can probably get it—would be attributable to budget authority charged against prior years. So a portion of the $160 billion would be out of the $300 billion new budget authority; a portion of it would not.

Mr. HART. So the answer is we do not know.

Mr. McCLURE. That is correct.

Mr. MITCHELL. The answer to the question is that the amount available then, according to this statement, which is not consistent with what was said earlier, but assuming this is correct, is that the amount available subject to the sequester order would range from a low of $360 billion to a high of $530 billion.

Mr. McCLURE. That is correct.

Mr. MITCHELL. That is, it would be a range of $170 billion, assuming the answer the Senator from Idaho is giving is correct, that would be subject to the sequester order. The amount that would be exempt from the sequester order in the first year would then range from a high of $710 billion to a low of $540 billion.

Mr. HART. Mr. President, I wonder if we could all agree to put all this——

Mr. RUDMAN. If the Senator will yield, looking at these numbers and attempting in a five-sided debate to get these numbers down, let me try to give the bottom line I think he is looking for, and I will stand on the answer, what is left to apply a sequester order to. That is what the Senator from Colorado is getting at. What is left in fiscal 1986 is $500 billion in budget authority and $300 billion in budget outlays. I believe those figures are correct.

Mr. HART. And how much must be cut under this amount?

Mr. RUDMAN. I did not hear the question.

Mr. HART. How much must be cut in the first year?

Mr. RUDMAN. It is our belief that with the trigger raised to 180 and the 7-percent adjustment factor, it could well be zero.

Mr. HART. What is the maximum in the worst case that might have to be cut?

Mr. RUDMAN. I cannot give the Senator from Colorado a worst case scenario. It would be almost im· ossible.

Mr. HART. No; I do not mean impounded. How much under this measure would Congress be required to cut from the budget to meet the balanced budget? Is it $40 billion?

Mr. MITCHELL. If I may interject, Mr. President, it cannot be answered because it is the excess over the maximum deficit amount specified in the bill after the application of the 7-percent figure.

Mr. RUDMAN. In which year, I ask the Senator from Colorado. The first year?

Mr. HART. That is correct.

Mr. RUDMAN. Let me explain to the Senator from Colorado that because this process—we have been talking about the back end of the process. It also has a front end, which puts restraints on the President and on the Congress in terms of budget resolutions we can adopt. We did not have that discipline this year. Because of that, we had to adjust the trigger for the first year upward to avoid deep cuts under this amendment. So it is our present view—the Senator from South Carolina is free to disagree, but I do not think he will—that by raising the figure from $170 to $180 billion, we can probably live with this year's budget resolution without this happening, and if it does happen, it will only be above our target by a very small amount. However, let me say to the Senator from Colorado that the discipline imposed in the second year is quite severe in terms of what we would have to do.

Mr. HART. How much?

Mr. RUDMAN. If we are going by our present discussions, I would expect that in order not to result in a sequester order, we would have to find a combination of reductions in spending. Or if the majority of Congress found we needed more revenue, we are talking probably $36 billion in fiscal 1987.

Mr. HART. So $36 billion out of $300 billion—what was the figure the Senator gave?

Mr. MITCHELL. A range of $360 to $530 billion.

Mr. HART. So a 10-percent cut is what we are talking about in what he calls the second year. A 10-percent cut in all that is available to be cut.

Mr. RUDMAN. That is incorrect, because the figures we were speaking about—the Senator from Maine, the Senator from Colorado, and the Senator from New Hampshire—the $500 billion and the $300 billion were the first year, fiscal 1986. Now the Senator is talking fiscal 1987 and that is a different ball game. We have to give new numbers for that, because obviously, there has been quite a change in fiscal 1987 because we do not have the same kind of contractual problem we had in fiscal 1986. In addition, Congress can adjust entitlements, raise revenues, or anything else, to meet the targets.

Mr. HART. Then, as I understand, the iron discipline in this amendment is not going to force us to do anything in the first year, and the second year it gets tough.

Mr. RUDMAN. If the Senator from Colorado will vote for it, I would be glad to offer a very much tougher amendment for this year. I just do not think we have the votes for it.

Mr. HART. What happened to the iron discipline?

Mr. RUDMAN. If the Senator does not think there is enough discipline in this proposal, I suggest he look at the real facts of the fiscal years 1987, 1988, and 1989. That is real discipline, either to pay for it or not to have it. Whether that results, as my friend said, in higher taxes or more spending cuts or changing of national priorities, I do not know. What I do know is it will force a discipline into this Congress and into this administration and succeeding administrations that is totally lacking. All we do now is make phony estimates and we pour it all into the deficit. The Senator from Colorado knows that and I know that and everybody sitting here knows that.

Mr. HART. So what we have now, Mr. President, as I understand it from the rhetoric I have been hearing, is that there are no cuts in the first year because we have already figured out a way to take care of that. Then the base is going to dramatically broaden through all these multiyear contracts for military procurement and civilian procurement.

So the amount of cuts in any individual program will go dramatically down because we are not going to be cutting $36 billion from $360 billion, we are going to be cutting maybe $36 billion from $500 billion and $600 billion.

In summary, Mr. President, we are considering legislation to raise the statutory limit on the debt ceiling. That fact seems to have been lost in a debate which has been devoted almost exclusively to a rewrite of the Budget Act, if not the Constitution itself, on the Senate floor.

Back in 1981, as a member of the Senate Budget Committee, few of us tried to sound a warning. If you questioned your sobriety voting for debt ceiling increases before, wait until Reaganomics comes along—you'll be questioning your sanity. Well, people didn't listen. And many of the President's strongest supporters then are the ones who are complaining the loudest about deficits now. This year, we are increasing the debt ceiling not to a trillion; not to a trillion and a half. Now, we're increasing the debt ceiling above $2 trillion. The national debt has doubled during Ronald Reagan's term in office.

Why are deficits so big? Receipts are inadequate, due to the grossly inflated tax cuts demanded by the President. Expenditures have ballooned. Is it because we enacted big increases in social spending. Of course not. Now that Mr. Stockman is wearing civilian clothes, even he admits that discretionary spending was cut about 15 percent in the President's first term.

Why has the debt increased? We've managed to spend an additional $1 trillion on the Pentagon for weapons too many of which don't work. Combine the tax cuts with the huge in-

creases approved for defense, and you're left with huge deficits. As deficits increased, interest payments on the national debt have consumed progressively larger portions of our annual budgets.

We warned our colleagues, Mr. President, but they didn't listen. They were sure that big tax cuts, spending reductions, and an unprecedented defense buildup would yield a balanced budget by 1984. Well, the numbers didn't add up in 1981, and they don't add up now. And that's why this particular vote on the debt limit is obviously so painful for the people who believed in, and voted for, Reaganomics.

Mr. President, I admire the tenacity of our colleague from Texas [Mr. GRAMM], the author of the pending amendment. Five years ago, as a second-term Member of the House, Mr. GRAMM won national attention as one of the chief architects of the President's economic program. It was an audacious proposal. It was Senator GRAMM who helped the President win a series of legislative victories—on budget, on taxes, and on defense. This Congress did approve the vast majority of what the President requested. And he has Mr. GRAMM to thank.

Mr. President, does it not strike anyone as ironic that the junior Senator from Texas is now telling us that the budget process is a failure? I would say to my colleague, the process has not failed; the policies failed. The budget process did not produce $200 billion deficits; Reaganomics did.

We do need swift and strong action on the budget deficit. On that issue, there is no disagreement. I am convinced that we could adopt sound and sensible policies to accomplish that goal. If President Reagan were willing to sit down with members of the House and Senate Budget Committees, we could hammer out an agreement in an afternoon's time. But that would require leadership. That would require compromise. Those are values which have been utterly lacking in this administration. And all of us know why.

Mr. President, the issue for Ronald Reagan has never been a balanced budget. The issue is one of priorities. The original chapter of Reaganomics was devoted to terminating a variety of human investment programs which the President historically opposed. We cut those programs, but we did not end them.

And so the junior Senator from Texas comes before us with what could be the final chapter of Reaganomics. His amendment takes from Congress its constitutional power to determine spending priorities and vests them with the President. It is drafted specifically to shield defense from spending reductions. It is crafted cleverly to make revenue increases nearly impossible to enact. This debate is not about balancing the budget, Mr. President, this debate is about enshrining Ronald Reagan's spending priorities as the law of the land.

After establishing five successive deficit reduction targets the Gramm amendment begins by taking three-quarters of all Federal spending off the table. Interest payments, by law, are exempted. Social Security is ruled off limits. Defense procurement—that is, spending on most big-ticket weapons systems—is spared.

With major weapons systems off limits, what's left? Programs such as military retirement, black lung payments, farm price supports, and domestic, discretionary spending programs—everything from mass transit, to health care research, to money for FBI agents to combat terrorism.

Under the Gramm amendment, there are two ways to cut spending to meet his deficit reduction targets. The President can unilaterally halt Federal spending programs. Or, the Congress can go through a second budget process and send legislation to the President enacting cuts to meet the targets the Gramm amendment specifies.

Under the first option, the Gramm amendment resurrects the ability of the executive branch to impound spending authorized and appropriated by Congress. Such authority was of dubious constitutional validity when it was tried by President Nixon, and it suffers from the same defect today.

Under the second option, the Congress could consider legislation to cut controllable defense spending. But that would mean cutting soldiers' salaries, and accounts devoted to operations, maintenance, and readiness. That won't happen, nor should it happen.

Congress could also consider raising revenue. We could enact a minimum tax on corporations and wealthy individuals. But the President has already told us that he would veto a general tax increase. Even if the Congress passed a bill ensuring that big corporations and wealthy individuals would pay their fair share, the President would "wield his veto pen." Thus, to enact revenue increases, Congress would have to override the President's veto—a two-thirds vote in the House and the Senate—and that won't happen.

Realistically, we are left with one choice: cutting what remains of controllable discretionary domestic spending. This category contains $78 billion in spending for science, rural health programs, education, economic development, research, export promotion.

These are the programs which will be cut under the Gramm amendment. These are the programs which have already sustained massive cuts these last five years. The President wants them terminated, and he doesn't care how the job gets done.

But we're supposed to care, Mr. President. We're obligated to understand how this process would work, what it's effect would be, and whether it is consistent with the Constitution. That's our job.

The more I examine this proposal, the worse it seems to be. It is biased toward further domestic cuts and against defense cuts. It is biased against tax increases. It defies traditional rules of public finance during recessions. It invests in the President—and in two bureaucracies—powers to set spending priorities properly within the authority granted to Congress by the Constitution.

These are assumptions, Mr. President, I have been able to make after seeing the proposal for 1 day's time. There have been no committee hearings. No administration witnesses. No outside experts. No committee markups. No committee reports. No consideration by the House of Representatives. All of the institutional checks and balances which have governed the lawmaking processes of the Republic have been circumvented to bring this bill to the floor in haste. The process is nothing short of astonishing.

During debate yesterday, I asked my senior colleagues whether a change of the magnitude contemplated by this legislation was ever considered under similar procedures. The senior Senator from Wisconsin, our colleague, Mr. PROXMIRE, forcefully answered no. His was a chilling and telling response.

Mr. President, several times during the debate yesterday I asked a question to which I received no satisfactory answer: why are we rushing this bill through? We could have voted to extend the debt ceiling 24-hours ago. We could have averted a potential shut-down of the Government. We could have afforded ourselves a few days to study in detail the significant changes proposed in congressional budgeting by the Gramm amendment.

But it is now clear that the proponents aren't interested in passing a good bill. They are not interested in refining and improving this bill. They simply want it to pass—without hearings, without witnesses, without study, and without reflection. It is an abominable way to legislate.

Since we are abandoning the regular procedures, it is my hope that some of the proponents will be willing to respond to questions posed by the Senator from Colorado.

Mr. RUDMAN, Mr. MITCHELL, and Mr. MELCHER addressed the Chair.

Mr. HOLLINGS. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Has the Senator from Colorado yielded the floor yet?

Mr. HART. I will after the Senator from South Carolina has finished his comment.

Mr. HOLLINGS. It appears that some of the confusion has been on the new budget authority for fiscal year 1986. We were all looking at an outlay figure in the budget book. But 050, national defense, that $200 billion was one of the differences I had with my colleagues because I felt that was all new BA. So that would be sequestered. When you get down to Social Security, 650, that is not sequested. That would amount to $207 billion. You get to the area of the net interest and it is not subject to the cut, $142.30 billion. Again with the different functions of medical insurance, function 570, veterans' benefits, function 700, and others, there is a basic entitlement amount in there of about $200 billion that is the best estimate I can get.

So you take the $207 billion in Social Security, $142 billion in net interest and $200 billion in basic entitlements, and you have $549 billion that will not be sequestered. This leaves $521 billion that we can sequester. That would be my best answer.

Mr. HART. Except the answer does not include multiyear military contracts.

Mr. HOLLINGS. This is all budget authority. If you as the President were faced with an order under this particular statute to cut back 2 percent or 1 percent or whatever it may be you have $521 billion to work with.

If you get to defense, your answer is $302.5 billion.

(Mr. McCLURE assumed the chair.)

Mr. HART. So you cannot cancel the MX missile?

Mr. HOLLINGS. We are not canceling the MX, but we can certainly stop the new budget authority. That is the new budget authority for the year 1986.

Mr. HART. I wish the Senator had not answered my question because——

Mr. HOLLINGS. The Senator does not like that answer?

Mr. HART. No. It does not make sense.

Mr. HOLLINGS. It does make sense.

Mr. HART. What is this $109 billion?

Mr. HOLLINGS. That $109 billion is outlays. That is the point I am trying to make. As the Senator knows, we have new budget authority in 1986 and that is what we are talking about.

Mr. HART. How much old budget authority for multiyear procurement is in the $302 billion?

Mr. HOLLINGS. It is not old budget authority at all. All of that is new budget authority. You can stop it all just like the President stopped Divad. That is old budget authority. He can stop all of that. But we are talking about new budget authority.

Now, admittedly, he can stop an aircraft carrier that has not been completed. That would be a rather senseless cut, or sequester as they call it around here. But this is new budget authority to be expended in 1986. All of it can be cut.

Mr. HART. The Senator's amendment does not prevent the President from interfering with existing multiyear procurement contracts?

Mr. HOLLINGS. No, it does not. He stopped the Divad. He said he was not going to ask for more money.

Mr. HART. I am talking about under the Senator's amendment.

Mr. HOLLINGS. Under the Senator's amendment it does not change the present law.

Mr. HART. Unlike what Senator GRAMM and Senator BOREN and others said yesterday for the RECORD, there is now somewhere between $92 billion and $109 billion that the President cannot touch under this amendment?

Mr. HOLLINGS. Is the Senator talking about defense overall?

Mr. HART. Yes.

Mr. HOLLINGS. Overall?

Mr. HART. I am talking about the amount of money in the defense budget for multiyear weapons procurement that we were told yesterday could not be touched under this amendment.

Mr. HOLLINGS. Not multiyear. I am talking about acting under the 1986 budget, and you have budget authority of $302.5 billion. The President can touch every dime of it.

Mr. HART. Then the Senator does not agree with his cosponsors.

Mr. HOLLINGS. I agree with my cosponsors. You are talking about a different subject than I am. You are discussing outlays from prior-year budget authority. I am talking about new budget authority in fiscal year 1986. I have checked with the Budget Committee, and they said the President can stop it at any time. It might be senseless to stop it but he can do it.

There is other money set aside, as the Senator and I know. I can turn to another page. In fact, the last figure he and I were talking about in the Budget Committee was to take care of unobligated balances of $52 billion. That's it—unobligated balances. And we all argued on the floor that the Defense Department should not be carrying around all of these funds. That takes care of what the Senator is talking about. It is all committed to those contracts, but this is new budget authority.

Mr. SARBANES. Will the Senator yield?

Mr. MELCHER. Will the Senator yield?

Mr. HART. I am going to yield the floor. I just submit that the sponsors could not agree on what can and cannot be cut based on the CONGRESSIONAL RECORD, Mr. President. There is sharp disagreement between the principal cosponsors of this amendment as to what the President can and cannot cut. There is disagreement, it seems to me, or at least confusion on the question of what authority the Congress and the President have in a situation of recession.

Mr. MELCHER. Will the Senator from Colorado yield for a question on that?

Mr. HART. There are disagreements on the estimates. There is disagreement on what is on the table and what is off the table, and we were supposed to have voted for this at 5 o'clock yesterday.

I yield to the Senator from——

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Colorado has the floor. Does he yield the floor?

Mr. HART. Yes.

The PRESIDING OFFICER. The Senator from Maine has been waiting since 12:02 to get recognition.

Mr. RUDMAN. Will the Senator from Maine yield for 10 seconds?

The PRESIDING OFFICER. The Senator from Maine has been recognized. The Senator has the floor.

Mr. MITCHELL. Yes, I yield.

Mr. RUDMAN. Mr. President, I say to my friend from Colorado that on Monday we will insert in the RECORD a clear statement of what we are talking about in terms of budget authority versus outlay. I do think that Senator HOLLINGS and I agree completely. I do not believe that we have adequately communicated our answer to the Senator, and we will do that.

I also want to thank the Senator from Colorado for asking a series of questions this morning which have truly enabled us to explain some portions of the bill that I believe were not fully understood by many of the Members. And I would certainly express the same thing to my friend from Illinois. Certainly from our dialog I think people by reading the RECORD will understand what powers the President has and what powers the President does not have.

I thank my friend from Colorado.

Mr. MITCHELL. Mr. President, I wish to ask a few questions of the Senator from New Hampshire as one of the principal authors of this amendment. And I say to the Senator I commend him for the effort he has made in this area and for his explanations this morning to the series of questions which have been asked. It has been a very informative discussion, and I personally have learned a great deal about the amendment. I do have a few other questions which are genuinely informational in nature.

First, having read this document now a couple of times, I want to see if my understanding is correct, and so I pose a series of questions regarding the basic operation of the mechanism created by this amendment.

As I understand it—and I will refer to the pages in the document rather

than the section numbers because I think it is easier for reference—on page 10, the amendment specifies for each fiscal year commencing October 1, 1985, running through the fiscal year commencing October 1, 1990, what is defined as a maximum deficit amount; that is, a specific figure which is $180 billion in the fiscal year beginning October 1, 1985, and then declining in equal installments until it reaches zero in 1990; is that correct?

Mr. RUDMAN. The Senator is absolutely correct.

Mr. MITCHELL. Then, if the Senator could move now to page 21, the amendment would require the Directors of the Office of Management and Budget and the Director of the Congressional Budget Office to issue a report November 1 of this year and in each succeeding year covered by the amendment October 1; is that correct?

Mr. RUDMAN. Yes. And I will point that November 1 is because we are getting started with this late this year, but October 1, of course, happens to be the beginning day of the new fiscal year.

Mr. MITCHELL. Right. And in that report the Directors are required to estimate revenues and outlays for the following fiscal year to determine whether the deficit for that fiscal year, based upon that estimate, will exceed the maximum deficit amount for that fiscal year as previously specified on page 10 of this document and whether it is significant, and then estimate the real economic growth that will occur during the fiscal year. That is what I would call the informational part of their report; is that correct?

Mr. RUDMAN. That is correct. And I say to my friend from Maine, in light of the other discussions we have that information in a more accurate form, I would like to know about it. There is a saying about economists that they are never in doubt but always wrong, and I am not sure that is not true. But we are using the best figures we have available in the Congress.

Mr. MITCHELL. In addition, in that report the Directors, if the amount of the estimated deficit exceeds the maximum deficit permissible as previously described by a statistically significant amount, are required to specify the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during that fiscal year to eliminate any such excess?

Mr. RUDMAN. That is correct.

Mr. MITCHELL. That is correct. Now, each is supposed to be reduced by one-half of the amount necessary to eliminate what I would call the excess deficit. And as I understand it, what you are doing is taking all entitlements, the base of which you have described as about $200 billion being exempt, and saying that the amount of increase otherwise, to the amount necessary to reach one-half of the extent to which the estimated deficit exceeds the maximum deficit allowable; is that correct?

Mr. RUDMAN. That is correct. The Senator from Maine might be interested on that one point that we are told that that figure would be about $9 billion, maybe a little less, with a 4-percent inflation rate. So the reduction on that half, before you reach the program base of zero, would be between $8 billion and $10 billion.

Mr. MITCHELL. It is correct, as the Senator has said several times, that this amendment grants no authority to anyone to reduce the entitlement base. It merely deals with the amount of increase that would otherwise occur by law unless interrupted by this process.

Mr. RUDMAN. The Senator from Maine is correct.

Mr. MITCHELL. The second half of the reduction of the excess deficit, as I gather from reading this, would come from what has been described as an across-the-board reduction of those items that are referred to as relatively controllable expenditures. Is that correct?

Mr. RUDMAN. That is correct, and we have referenced that definition to an OMB publication, so that everybody can see clearly that, in fact, everything is in there except those things that we say are not.

Mr. MITCHELL. The document then goes on to say, as I understand it, that if the reduction amount to be gained in the first half of the process that is affecting the increase in entitlements is insufficient to reach one-half of the excess deficit, the balance may be made up by going above one-half in the across-the-board reductions on the relatively controllable expenditures.

Mr. RUDMAN. Let me see if I state this precisely. If it turned out that my $9 billion figure was precise in terms of the automatic increases and the excess deficit as defined was $18 billion, then 9 would come from the first half and 9 from the second. If it happened to be 20, then 9 would still come from the first half and 11 would come from the second, discretionary, half. The Senator is correct.

Mr. MITCHELL. On that second portion of the reduction—that is, the relatively controllable expenditures—there are some items within the budget that would be excluded from the operation of that. The Senator has referred to that as a sequester order that this amendment would require the President to issue, incorporating the information received from the Director's report about which we are now talking.

The Senator has identified for the first fiscal year, I believe, four categories which would be exempt from any such order. The Senator has identified the entitlements base, which has been estimated to be approximately $200 billion in the first fiscal year; Social Security, which he has estimated to be approximately $200 billion in the first fiscal year; interest on the national debt, which he has estimated to be $140 billion ,n the first year; and some portion of multiyear contracts, both defense and nondefense, the aggregate total of which is $170 billion, but the portion of which would be attributable to budget authority in the first fiscal year is not known at this moment. Is that correct?

Mr. RUDMAN. As I would expect, my friend from Maine is precisely correct.

Mr. MITCHELL. My question to the Senator is this: Is there any other portion of the budget that would be exempted from the operation of the sequester order and the effect of across-the-board reductions that are called for in this amendment?

Mr. RUDMAN. The answer to that is, "No."

Mr. MITCHELL. So that every other part of the Federal budget would be subject to this reduction?

Mr. RUDMAN. That is correct.

Of course, as a former Federal judge from the State of Maine, the Senator knows well that I would condition that by saying that judicial and Presidential salaries are exempt, under the separation of powers doctrine.

Mr. MITCHELL. I thank the Senator for that.

With respect to multiyear contracts, I understand that a determination is now in the process of being made to ascertain the precise amount that would be exempt from reduction or that actually would be counted under the budget authority for fiscal year 1986. I did not quite understand the Senator's suggesting that that exempted portion would be totally inapplicable for the following years. Are there not contracts in existence which run beyond the immediate fiscal year?

Mr. RUDMAN. If I said "totally," I stand corrected. It would be more inapplicable in the second year because, being aware of this procedure, the civilian and defense sides would adjust their practices to give them flexibility. The Senator is correct. There certainly are always multiyear operations—for example, in GSA multiyear leases.

(Mr. EVANS assumed the chair.)

Mr. MITCHELL. So the exempt portions in each of the five years that are affected by this amendment would be the four categories that have been described previously, with the likely result that the one category of multiyear contracts, the amount involved, would go down from that 5-year period.

Mr. RUDMAN. That is correct.

Mr. MITCHELL. But we do not yet know what the amount is in either the

first year or any of the succeeding years, except that common sense tells us that the amount will go down each year.

Mr. RUDMAN. The Senator is correct.

Mr. MITCHELL. So, as we described earlier, the amount of reduction necessary by the sequester order would apply to the remaining portion of the Federal budget, which, in the fiscal year 1986, would be in a range of $360 billion to $530 billion.

Mr. RUDMAN. The Senator is correct.

Mr. MITCHELL. And we hope that by Monday that figure will be identified, so that a more precise figure will be involved.

Mr. RUDMAN. We will do that, as well as what the Senator from Louisiana wanted, and that is to take all these changes and plug them back into the original Budget Act, so that you can see the original text as it is adjusted.

Mr. MITCHELL. As I understand the amendment and the Senator's remarks, up to this point the President has no discretion whatsoever under this amendment—that if he determines that the way to proceed is to adopt the principal mechanism established under this amendment rather than the alternative proposal to which I will come in a moment, he merely, in effect, transmits to Congress in a sequester order the same information that previously has been reported by the Directors of the two offices to both the President and Congress. Is that correct?

Mr. RUDMAN. The Senator is correct. The President, in that circumstance, performs a ministerial function. He simply is acting as the Chief Executive officer of the country, and he does what the law says he is supposed to do, which he does in many other things. He has no discretion at all.

Mr. MITCHELL. Under the provision contained on page 27, the reductions contained in any such sequester order become effective immediately upon issuance by the President?

Mr. RUDMAN. That is correct.

Mr. MITCHELL. And that applies to both the first portion, which operates against the otherwise automatic increase in entitlement, and the so-called across-the-board reductions in those portions of the budget that are remaining after exemption.

Mr. RUDMAN. That is correct. There is the same treatment for both halves.

Mr. MITCHELL. At page 26 of the proposal is a section describing what is listed as alternative proposals. Under this provision, the President may, during a 30-day period, submit to each House of Congress a joint resolution which will accomplish the desired reductions in the excess deficit by a method other than that which would be accomplished by the sequester orders we have just been describing.

Mr. RUDMAN. The Senator is correct.

I am sure the Senator recognizes that not only did we wish to put that in there, but even had we not put that in there, the President would have the constitutional right to submit his own plan. We could not order him, in a rigid way, to not submit alternatives under his power under the Constitution. The Senator is correct.

Mr. MITCHELL. As I understand this, it being entitled an alternative proposal, this would be done only if the President determines to proceed in this way and not in the manner first prescribed in the statute—that is, these are alternative proposals, as opposed to the issuance of two proposals by the President?

Mr. RUDMAN. I do not believe that the Senator is correct in that, or I misunderstood him.

Mr. MITCHELL. It is my question. I do not know the answer.

Mr. RUDMAN. The procedure called for in this sequester order, in the amounts specified by the two Directors, goes into effect, and then the President may or may not send up to Congress an alternative way to get to the same result.

But they are not mutually exclusive.

Mr. MITCHELL. That really is my question.

Mr. RUDMAN. All right.

Mr. MITCHELL. Tnen it is not an alternative proposal in the sense it is a substitute for the prior action. It is offered as an addition to the prior action.

Mr. RUDMAN. No; I would have to say that is incorrect. What the alternative, is anything the President wants it to be.

Let me give an example. Assuming that we had to cut, we will make it $10 billion, $5 billion from each half, and the then sitting President said, "I do not want to do that. I would rather eliminate this program or that program and save most of it that way and have the sequester order be only half of what it is."

He could certainly submit that so long as whatever he submits eliminates the $10 billion.

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. MITCHELL. I yield.

Mr. McCLURE. Is the question here the alternative? Does that stay the sequestering while we look at it?

Mr. MITCHELL. No.

Mr. RUDMAN. It does not stay the sequestering. The sequestering order goes into effect and the President sends up an alternative if he wishes.

No. The language is clear. The sequester order goes into effect at the time the President makes it.

Mr. McCLURE. Even though he sends up an alternative proposal, it is one that might or might not be agreed to by Congress, but the sequestering, the ministerial portion has already happened and is in place.

Mr. RUDMAN. That is an automatic function.

Mr. MITCHELL. That is my question. In other words, the first mechanism described in the amendment and what is the principal mechanism will occur by operation of law regardless of whether or not the President decides to take any action under the alternative proposal.

Mr. RUDMAN. The Senator is correct.

Mr. MITCHELL. If I may follow up, regarding the Senator's last point, the amount of reductions contained in that Presidential order described at the beginning of page 22 in the amendment are those previously specified by the Directors in their reports to the President and Congress.

Mr. RUDMAN. That is correct.

Mr. MITCHELL. There is no discretion on this point.

Mr. RUDMAN. None, and as a matter of fact, in the alternative, the alternative has the limitation that it must save at least as much money as is submitted by the two Directors. Obviously, the President could say, "I would like to save more." But whatever he comes up with, whether it would be a cutting mechanism or revenue mechanism, it must come up to at least the number needed under the certification.

Mr. MITCHELL. I appreciate that because the Senator responded to my question on whether or not the alternative and the principal mechanism are mutually exclusive, and they are not.

After issuing the Presidential order, which under this amendment must be issued and must contain the precise reductions in both categories that are retained in the report to the President and Congress by the Directors, the President then may in addition thereto propose to Congress in the form of a joint resolution an alternative proposal. Is that correct?

Mr. RUDMAN. As well as what the Senator is going to come to next, Congress can, whether the President proposes an alternative or not, upon certification, present their alternative to the President.

Mr. MITCHELL. That was my next point, and I wanted to merely understand that. So the initial Presidential order would then be effective immediately and would remain in effect unless and until it was superseded by a resolution initiated either by the President under the alternative proposal mechanism or by Congress on its own authority and initiative.

Mr. RUDMAN. And adopted in the full constitutional form and signed by the President, obviously.

Mr. MITCHELL. Yes. That is my next point—adopted in the full process and signed by the President. So any mechanism alternative to the Presidential order would require a majority vote in Congress and the President's signature for enactment. Is that correct?

Mr. RUDMAN. That is absolutely correct, and that is the automatic enforcing methodology of this whole statute which is it does force action because if we do not like the President's action, then we have to go back with action of own. If he does like what the statute forces us to do, he comes up with an alternative. But the bottom line is something has to happen.

Mr. MITCHELL. And the something that has to happen is either the Presidential order which goes into effect by operation of law and must be issued by the President under the circumstances contained here or an alternative resolution, as I said, initiated either by the President and then approved by Congress and signed by the President, or initiated by Congress and signed by the President.

Mr. RUDMAN. Absolutely.

Mr. MITCHELL. So if the resolution comes to the President, he then has the choice of signing it or vetoing it, depending upon whether he thinks in the form he receives it is superior or inferior to the Presidential order which will already have been in effect. Is that correct?

Mr. RUDMAN. That is correct.

Mr. MITCHELL. So in effect, in order to change the Presidental order, there would have to be a resolution acceptable to the President or with sufficient support in Congress to override a Presidential veto.

Mr. RUDMAN. Which, of course, is true of any legislation we wish to pass.

Mr. MITCHELL. That is correct. I thank the Senator.

Mr. RUDMAN. May I go on with one thing if I could?

Mr. MITCHELL. I had one other question. But go ahead.

Mr. RUDMAN. Why does the Senator from Maine not ask the question? I would like to answer it and then maybe just sum up on one point.

Mr. MITCHELL. Did the Senator want me to proceed?

Mr. RUDMAN. I yield for another question.

Mr. MITCHELL. Yes. I am sorry. I thought the Senator was going to go ahead and respond.

Does the Senator, and other sponsors of the legislation, have some estimate, taking the OMB document, which was earlier referred to, and based upon the sponsors' current view or estimate of the financial situation and what is likely to be contained in a report, because we are now talking about a report that will be issued less than 30 days from now, of the figures that would be in that report and the likely content of a Presidential order to be issued based upon that report?

Mr. RUDMAN. I assume the Senator from Maine is referring to this year. Is that correct?

Mr. MITCHELL. That is correct.

Mr. RUDMAN. Fiscal year 1986, which started a few days ago?

Mr. MITCHELL. Yes.

Mr. RUDMAN. The adjustment of the number in the first year, the Senator from Maine is aware of, to $180 billion from $170 billion, and the 7-percent adjustment factor that is I believe referred to as statistically correct, that will bring it to about $194 billion. It is the thought of those who estimate those things that that is about where the deficit is going to be. Thus, it would seem that it is conceivable that no action might be necessary this year.

But let me point out if it went to $197 billion or $198 billion, then action would be required. Of course, it reverts not to the base plus 7 percent. It goes back to the $180 billion.

Mr. MITCHELL. That is right.

Mr. RUDMAN. And the reason we have done that and we did not do that originally but in talking to people in OMB, in the White House, in this body, to staff, it was felt that this is, as many of us described it, a rather tough self-enforcing mechanism but because it has a lot of discipline in the front end, which is the budget process, we have already done that—I mean we passed our budget resolution, and so it would be almost unfair to have the system start working in full unless both halves of the system could operate.

Let me say one other thing to my friend from Maine, and I must say I have enjoyed this colloquy here this morning and this afternoon. We have been here since 10 a.m. this morning talking about this with Senators.

The Senator from Maine has really asked a number of questions which are going to be excellent for helping to fill up this record because this is really not a terribly complicated piece of legislation. People would like to make it complicated. Some people would. It is not. The Senator from Maine has asked all the right questions and anyone listening to the colloquy would understand what this does.

Let me say to my friend from Maine—and I speak only for myself; I do not speak for my cosponsors at all—I am of the opinion that unless we have a minor amount of deficit this year or over the amount, in which case a sequester order will happen, that, looking at the numbers as I see them as we get to the second year of this, that the mechanism that is called for in this will never be adopted precisely as we have laid it out because once the American people have elevated to a level of real consciousness that, in order to keep certain programs, as the Senator from Louisiana said, you are going to have to cut other things or raise taxes or whatever, there will be, for the first time, an honest debate around here and we will meet the priorities. And if 51 Senators think we ought to have taxes, we will have taxes. If 51 Senators think we ought to have less defense, we will have less defense. The system will work.

I believe this is a mechanism which forces political compromise. There has been no political compromise in this body since I have been here; no compromise between the Congress, in many cases, and the President, not what I call compromise.

What we have done is we have adjusted numbers, such as this year where we said we have a $170 billion deficit on this floor 7 weeks ago. Now we know it is $194 billion, at least. We fixed up the numbers nicely and walked away from here giving everybody what they wanted except one thing, and that is to give the American people, our children, and grandchildren a chance to look into the future with some hope of economic security, which is really what we are talking about.

It is no coincidence, I say to my friend from Maine, that all of this discussion has happened on this measure. I know Senators on the side of the aisle of the Senator from Maine are every bit as concerned as Senators on this side of the aisle about these deficits. We may have different views of how we are supposed to solve it, but there is no monopoly on patriotism or belief for integrity in this Chamber on either side of the aisle. We are all concerned about it.

The reason this is being debated today, was yesterday and will be next week is because, all of a sudden, the American people are saying, "$2 trillion." The people in Portland, ME, and Springfield, IL, and in Manchester, NH, are saying, "Wait a minute. What are those people doing down there? $2 trillion." And that is why we have tried to come up with this mechanism which, it seems to me, will force action.

I say to my friend from Maine, I doubt if the things that are set out here will ever happen. We will not have a $40 billion overage, followed by automatic cuts. That is not going to happen. There will be too much outcry in the country.

Then we will say, "Fine, you want it, you pay for it." That is really the philosophy, I guess, behind what we are trying to do.

Mr. MITCHELL. Mr. President, I have one other question, and then a comment of my own.

At page 22, the Presidential order is described, the contents and so forth. I notice that, although there are limiting dates throughout, I do not see one here with respect to the Presidential order. Is there a date by which, following the receipt of the Director's report, the President must issue the order as prescribed here?

Mr. RUDMAN. I believe there is a date. It is 14 days after receipt of the report. I know that is contained in here. It is on page 25, line 18.

Mr. MITCHELL. Page 25, line 18. That is in the section defining real economic growth or setting the circumstances under which the order shall be issued. I thank the Senator.

May I ask the Senator a question which has nothing to do with the details of this but which perhaps goes to the overall question? This, as the Senator has described very forcefully, is a forcing mechanism to attempt to create a process by which we will address in a serious way the serious problems of the deficit. One of the objections to it, as the Senator knows, and one of the reasons why an alternative has been proposed is that the forcing mechanism tends to deal with the deficit solely through the means of reductions in spending. And there is no provision in here for the alternative of increasing revenues to the Government unless the President, in the alternative proposal section, or the Congress on its own initiative adopts a resolution calling for revenues. That is not prohibited here. But the mechanism that goes into operation by automatic force of law is, as the Senator knows and has described many times, limited to reductions in spending by the two principal means described and after certain areas have been exempt.

As one of the authors, did the Senator consider including, as part of that forcing mechanism, as part of the automatic operation, some provision that a portion of the total of the amount necessary to reduce the excess deficit down to the maximum deficit permitted by this amendment would come from revenues, and did he make a conscious judgment not to include that because he feels that is not an appropriate mechanism for reducing the deficit or for other reasons? That is a broader question.

Mr. RUDMAN. That is a broad question, but it is an excellent question. I must say that in this half hour with the Senator from Maine, we have really had a chance to talk about some things that are important.

Let me say on the record that there is no question in my mind that may be a real possibility, that in fact at some point if everyone in America wants everything that is called a Government program and no one wants to give up any of their own particular programs—you know what a special interest is. That is somebody else's interest. Yours is a national interest.

The fact of the matter is, of course, that may be one of the ways we eventually face this deficit.

Why did we not put it in? Was it a conscious decision? It was absolutely a conscious decision not to put it in, and I am going to tell the Senator from Maine why.

Whereas we can write a statute that is self-enforcing, that actually will work by taking money already appropriated and saying: "Here is the sure way to pull that deficit down. But, by the way, folks, if you don't like it, you can have an alternative. The President can have an alternative."

I know my friend from Maine will grasp immediately what I am talking about; that I do not know how you write in a statute, other than in some commendatory or laudatory way, with any chance of any part of it being adopted, a tax. I do not know how you do that. Because if we were to write this as I understand my friend from Florida has written it, that one-third will be from a tax, I believe a minimum corporate tax—which, I might point out, is something I offered on the budget resolution that was adopted by this Chamber. I am for that. But I do not know how you put that into this kind of amendment in light of two things: No. 1, under the Constitution, as we all know, revenue-raising measures have to originate in the House of Representatives. That is No. 1.

Let us assume that is a minor constitutional problem and we can get by that. I am not sure it is, but let us assume it is.

Well, here is the second point. Let us assume everything happens. We take the one-third from the spending, we take the other third from defense, how do we get the last third? In order to get the last third, we have to have a bill passed by the Senate, first passed by the House, and signed by the President.

So what we came to was the conclusion that if we are serious about reducing these deficits and reducing all of them in 6 years, the only thing we can do is do what we can do. In other words, the short answer is, I do not know how the Congress can mandate taxes in a deficit reduction procedure. We can do that in a budget resolution. But even if we do that, it is still required for the House to originate it and pass it, the Senate to pass it, and the President to sign it. And, if he vetoes it, to overcome that by a two-thirds vote.

I guess the short answer to the Senator from Maine is, I agree with him. It is a real possibility that that may be a place this Congress will have to go into in the next several years. But I did not think it was appropriate to put it in here because that third, in my view, was a loser.

Mr. MITCHELL. If I understand what the Senator is saying, he does not have any substantive objection to it, but he does not see an appropriate method by which it can be incorporated into this process.

Mr. RUDMAN. And guarantee that we will reduce the deficits. I guess that is what I am saying.

I have voted, as the Senator from Maine knows, I voted for the budget resolution amendment on the minimum corporate tax, as I believe the Senator from Maine did. This is a forcing mechanism. I believe that the forcing mechanism will certainly have revenue as one of the items we will discuss next year. There is not much doubt about that in my mind.

Mr. McCLURE. Will the Senator yield?

Mr. MITCHELL. I yield to the Senator from Idaho, and then I say to my friend from Illinois, I will be finished and I will yield.

Mr. DIXON. I want to clarify one question.

Mr. McCLURE. I thank the Senator for yielding.

I wanted to respond on that because I think that is really what was behind an earlier discussion we had on the floor as Senator HART led through the discussion of how much is subject to being cut, and how much is not subject to being cut. To illustrate, under the structure of this, if there were a massive deficit that had to be adjusted through the sequestering process, it would have a very severe impact on the remainder of the budget that was not put off limits by definition in this. I think from the Senator's point of view—I hate to characterize the Senator's point of view—but I think it was probably on the basis the Senator is now addressing that there is nothing in here on the revenue side, and there ought to be something to force an increase in the revenues because you cannot get there from here by cutting expenditures only. I thank the Senator for yielding so I can make that point.

Second, I indicate there are two other things that come to play in that process. One is maybe it will force us to remove some of the exemptions from sequestering, that you broaden the base that can be cut if all we do is cut, do not raise taxes, and we cut the expenditures—we might have to do it more across-the-board than this proposal permits. That is a legitimate debate. I would guess the original cosponsors of this bill in drafting the bill went through those discussions. I know I did with them, both in the original form and as it was modified because that was one of the questions. Can you really get it done if you leave Social Security out? Not just is it fair, and that is a separate question, but can you really do it? Can you really

get it done if you leave the entitlements out? It is a good question, not just whether it is fair, but can you do it? Both of them are good questions.

The second question is assuming that you have made the decision not to broaden the base, and indeed you have a massive deficit, then you have to make the assumption that—not in 1986 but in the 1987 fiscal year where there is more likely to occur, it is farther away and, therefore, more uncertainty—the Congress has failed to respond appropriately in the budget process next year. Remember, there will be that massive deficit, the massive failure to meet the goal, the target, only in two circumstances: one is the Congress has failed utterly to exercise its responsibility. I suggest that there is a pretty persuasive evidence that the Congress as a whole has had great difficulty in meeting its responsibility over the last several years.

Mr. MITCHELL. I would simply ask the Senator to amend that to include the Congress and the President.

Mr. McCLURE. In composite the Government has failed. I happen to believe it is mostly Congress because I have been here during several different Presidents and they have tried to in various ways to get Congress to do various things, and the Congress has not done it. There is only one continuity through all of that, and that is the Congress. There is only one continuity through all of that, and that is the failure to get the job done. So I put those two continuities together. I find Congress more at fault than I do Presidents Johnson, Nixon, Ford, Carter, or Reagan because the budget deficit has grown during all of that period of time based on actions taken by the Congress. So you have to assume that we have not done our job collectively, or that we have made a very bad estimating error. There we get back to the question the Senator from Illinois was discussing earlier with respect to flexibility. How do you adjust during the year for the second series of errors? We did not intend that to miss the target. We just missed the target. How do we adjust for that? Let me suggest, first, that the first estimate is made at the beginning of the fiscal year. It will be some time before you can determine whether we missed the target. It will probably be after the first calendar year.

Mr. MITCHELL. May I interrupt to say to the Senator respectfully I had to wait a very long time to get the floor. I thought I was yielding for a question or comment. I do not mind the Senator making statements. If it is going to be lengthy, I would prefer the Senator wait until I yield the floor. I had to wait a long time to get on.

Mr. McCLURE. I understand that. The Senator has been waiting. It is in response to the discussion that was just taking place as to whether or not revenues were required. And I think it is an excellent question. But we also during this period of time this morning were looking at whether or not the adjustments are necessary, and should involve revenues as for example the flexibility of the response. I do not mean to abuse the Senator's time at all. I will withhold any further comment with respect to the flexibility until the Senator had yielded the floor, and I can gain the floor on my own right. But with respect to revenues, let us not ignore the other argument that comes along with that revenue question; that is, whether increasing the rate of taxation increases revenues or decreases revenues. I am not one of those who believe you can infinitely reduce the rate of taxation and thereby infinitely increase revenues. That is obviously impossible. But at some point you do cross that line.

Similarly, I believe that the other side, the assumption that you can simply increase revenues by increasing the rate of taxation is also fallacious. There is a point at which increasing the rate of taxation stifles economic growth and people start investing less and working less. So we might indeed find the point somewhere where we have chosen one side of that strategy or the other, and revenues have not responded in the way we thought they would. And, therefore, there has to be a recognition that the policy failed. I do not know how we will resolve that question either in terms of flexibility or in terms of the provisions in this Act. But I suggest a real debate about economic policy that gets couched in political terms and position as well. I do not know how you can write in this act something that deals with that kind of a very fundamental difference of opinion as to what the appropriate action should be.

I thank the Senator for yielding.

Mr. MITCHELL. I thank the Senator. I would like to make a brief comment, and I will yield the floor. First, I again thank the Senator from New Hampshire for his very lucid and forthright responses to the questions I have raised.

The part about this that troubles me, frankly, Senator, is that according to the figures you have stated here, the sponsors of this expect now that first report to be issued by the Directors less than 30 days hence, were this to be enacted prior to that, would project a deficit of $194 billion which means that no action would occur under this amendment during the immediate fiscal year. But if that is the case, of course, then it is clear that absent some major action by Congress with respect to next year's budget resolution—which as I know has the Senator's intent that the provisions of this amendment go into effect—and even assuming a projected deficit in that year of $194 billion, the reduction would be a $50 billion reduction because as the Senator quite correctly pointed out, the amount by which the deficit must be reduced is the excess over the maximum amount stated in the bill, that the estimate equals; that is, an estimated deficit of $194 billion for the next fiscal year will exceed the maximum deficit amount required under this bill of $144 billion by $50 billion. Since we have already established that large portions of the budget are exempt, the precise amount we do not know yet, but we will know by Monday at least for the coming year, it seems clear that the major wrenching effect—if there is one, and if that is the way to describe it—will in fact occur in the period involving the budget in the fiscal year commencing October 1, 1986. The remaining years go down by equivalents of $36 billion and presumably if it operates the first year, then you will not have that large an amount in any succeeding year.

You are going to be required to cut $50 billion out of an aggregate that will be somewhere in the range of $500 to $600 million at the most, possibly less if the figures we use that we get on Monday are that way—in other words, if you are talking about something in the range of possibly or potentially a 10- to 15-percent cut in those areas.

As the Senator knows, the amount available for reduction from the first part of this mechanism, that is, the reduction or even the elimination of the automatic increases in entitlements, which he has pointed out will yield $9 billion in current projections for the first year, is therefore highly unlikely to yield anything like half of that $50 billion in the second year.

So we are talking about somewhere between $41 billion down from the rest of the budget that is subject to the operation of this amendment in that second year.

Very major and dramatic effects, I think, could be felt in defense or some aspects of the defense budget or in other areas.

The Senator from Idaho commented on increasing the rate of tax. Of course, that is one mechanism for increased revenue. I do not disagree with anything he said about the effect of rates up or down on economic activity and, therefore, revenue.

But I think it ought to be pointed out and made very clear that there are other mechanisms, other means, by which revenues can be increased to this Government beyond a broad-based tax increase in the form of a personal or corporate income tax rate increase. Indeed, that is very unlikely.

One of the problems we have is that the President is so adamantly wedded to ideology and campaign promises of

no tax increases that we have had, for example, in the last couple of weeks in the Finance Committee 4 days of markups, most of which were consumed with the fight over whether we will permit the cigarette tax to go from 16 cents to 8 cents or whether it would stay at 16 cents.

The President, and all of his executive branch employees, including the Treasury Department, vigorously opposed that.

Mr. RUDMAN. Will the Senator yield for a brief question?

Mr. MITCHELL. Yes.

Mr. RUDMAN. Would the Senator not think that that kind of action might be taken a little bit more seriously under this mechanism?

Mr. MITCHELL. If I thought that was the case, I think I would be more likely to support this.

What I am getting at is this: Here is the President at a time of $200 billion deficits calling for extraordinary measures, such as here. Here is the President lobbying vigorously the Members of the Senate Finance Committee to reduce the cigarette tax from 16 cents a pack to 8 cents a pack, affecting the deficit by $5 billion over the 3 years in question, and not to change the then current law which would have permitted it to go down but rather to extend it, wholly apart from social policy questions with respect to cigarette smoking.

It was, in my judgment, an incredible display in view of the deficit problem that we face.

We finally adopted a complicated compromise which permits the tax to continue and then, according to press reports, it went into effect only when the President reversed himself at the last minute in response to a call from Senator HELMS and signed the bill permitting that to go into effect.

Then we have the possibility the Senator has alluded to of an effective alternative minimum corporate tax and an effective alternative minimum tax on individuals. There are many means by which revenue can be increased without the kind of broad-based rate increase.

What I am concerned about is that this mechanism will make even more difficult what is already an extremely difficult goal to achieve. That is increasing in any way the revenues to the Government, wholly apart from the broad-based tax rate increase to which the Senator from Idaho alluded. In other words, just having a cigarette tax, having an effective minimum corporate tax.

The President might think it is a tax increase to impose a tax on someone who is not paying any taxes, and I suppose it is for that person. It you are making $1 million a year, as many thousands of American are, if you are making more than $250,000 a year, as hundreds of thousands of Americans are, and paying not 1 cent in Federal taxes—not 1 cent—to President Reagan it may be a tax increase to ask those people to pay some taxes.

Or if you are one of 65 of the largests 250 corporations in America which, in the period 1981 to 1985, earned billions and billions and billions of dollars in profits and paid no or virtually no taxes, to them and to President Reagan perhaps it might be a tax increase to say to them, "Join the rest of us Americans and pay something in taxes."

To them it may be a tax increase. To President Reagan it might be a tax increase. But I dare say to the overwhelming majority of Americans it is not a tax increase; it is simply fairness to say that everybody ought to pay their fair share of taxes. At the very least, I do not think it is an imposition to say to an individual who has an income of $250,000 a year—I believe the figure is there were 230,000 of them last year who did not pay 1 cent in Federal taxes—and I think it is fair enough to say to say to them, "How about paying something?"

The problem I have, and I am really struggling with this because I agree this is a crisis, I think the Senator is making it impossible even to do that under these circumstances. I hope that is not correct. I know that is not his intention, him, individually, the Senator from New Hampshire. I am certain about that with all the other sponsors. I am just saying that I feel we have a serious problem. This is a serious attempt to deal with it. But it is an attempt to deal with it in a way that in my judgment will make it inconceivable—I do not argue this—that we achieve the objective.

Mr. RUDMAN. If the Senator will yield, I ask the Senator from Maine, I found what he said very interesting. I guess we listen to tunes and hear different things. What I thought I just heard was probably a better argument for the adoption of this amendment than probably I could make myself. I say that because when you really highlight it, as the Senator from Maine did, and look at the horrible choices out there in fiscal 1987, and they are coming, you see that is, I guess, where the Senator from Maine and the Senator from New Hampshire, although we are neighbors in northern New England, tend to separate.

The Senator from Maine believes that we will somehow, at that point, act responsibly. I say that without an action-forcing mechanism that drives home to the people what the Senator from Maine correctly pointed out and to institutions that will be impacted by this increasing deficit, we will not have the kind of correction which we need. If the Senator from Maine is talking about taxing those who do not pay taxes, he will get no disagreement on that from me or a lot of other folks. I want to say to the Senator from Maine that we may agree on the facts, we may agree on what the plan does. I happen to think that as we stand here on Monday, or Wednesday, or maybe Friday at 2 o'clock in the morning, we will raise our hands and all say "yea" to raising the debt ceiling to $2 trillion. That may be proof positive.

I do not know what it takes to get the kind of action the Senator from Maine and the Senator from New Hampshire want.

Mr. DIXON. Will the Senator yield?

Mr. MITCHELL. If I could just say this, then I shall yield. The problem with that, I say to the Senator from New Hampshire, is the mechanism he described, which he proposes here, it seems to me—at least I am concerned; I have not made a decision on it; I am genuinely undecided—is going to make it more difficult to achieve the objective for the reasons I have stated.

We are now in a situation where some at least have argued—it has been argued on this floor—that the principal reason for the deficit was the massive tax cut of 1981. We now have the President traveling all over the United States campaigning for his tax reform program, which he now increasingly describes as a tax cut. If you read the President's statement, he says to American audiences, "I want to cut your taxes."

We had the experience in the last election where a very popular President traveled around the country into congressional districts and said to voters in certain districts, "I want to cut your taxes, and here is your Congressman; he wants to increase your taxes. Is this the kind of guy you want representing you in the Congress?"

So we now have a political situation in this country where, of course, no Member of Congress is going to get up and say "Let us raise taxes." because unless and until the President agrees to sign such a bill, the Members of Congress know that it cannot be accomplished and why risk—why risk—anyone's political future or, at the very least, intensify political criticism? Because it is well known that the American people—and they are no different from anybody else on Earth—want lower taxes.

Mr. RUDMAN. Will the Senator yield for one moment? This is the last time I will ask him to yield.

Mr. MITCHELL. Nevery say never.

Mr. RUDMAN. On this day.

I can only respond to that last 15 minutes of excellent debate, and it was excellent, by simply quoting a friend of mine and I guess of his, the well-known columnist, George Will, who commented that the American people have a great deal which we enjoy; we get a dollar's worth of value from our Government for every 72 cents that we pay.

What I am saying to the Senator from Maine is that it is not just a problem with Congress. We do not like to say this, but I am going to say it; it is not just a problem with the President. The American people do not want any of their programs cut. But at the same time, if you read the polls, they do not want to pay higher taxes.

What I am saying to the Senator is let us all make choices, including the people we represent. I have gone back to New Hampshire and said to the people of New Hampshire, you cannot have it both ways. I am saying the only way to highlight this is to have a forcing mechanism that finally points out that unless you pay for it, I say to the Senator from Maine, you are not going to get it.

Mr. MITCHELL. I say to the Senator I do not disagree with what he said, but the problem is he is doing it in a way that makes one element in the solution which is currently extremely difficult to achieve virtually impossible to achieve. He is institutionalizing this in a way that makes it unlikely in the extreme that anyone is going to propose or deal with the problem of revenues. So that even the three simple mechanisms I have described here—the cigarette tax, the corporate minimum tax, the individual minimum tax—will not be possible if we proceed down this line—if we are just going to go through a forcing mechanism that forces a partial solution to the problem and causes some drastic changes.

I hope the Senator will consider that. I know it is too late for him to make that change in here. Perhaps it cannot be done and I know the Senator from Idaho is anxious to deal with that aspect of it. I shall review that very carefully, but I just want to say to the Senator from New Hampshire, that is the part of it that is troubling me. Given the current political situation, given the President's approach to an implementation of his policy—which he is certainly entitled to have, but which I happen to regard as irresponsible in the extreme given the current fiscal situation with which we are dealing—this may make it much more difficult to deal with the problem in what I think is the most responsible fashion.

I think instead of saying, We are going to cut some of these programs by 10 percent and not have a cigarette tax and not have an effective alternative minimum tax and not have an effective minimum tax on individuals, what we should be saying is maybe we ought to cut the programs 5 percent and let us ask those American individuals who are paying no taxes, who are making billions in profits, who are earning income in the millions, to pay something in taxes to contribute to the solution of this problem.

I thank the Senator for his responses. I yield the floor.

Mr. MELCHER, Mr. DIXON, and Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, I thank the Senator from Maine. I think he has presented his arguments forcefully and I think it is a legitimate part of the debate.

I do not think the people of this country think they are taxes too little. They believe that our Government spends too much. If I were persuaded that the Senator from Maine is right, that it makes it almost inevitable under this proposal that we cut spending and not raise taxes, I would be enthusiastically for the proposal. Unfortunately, I think the Senator from New Hampshire is correct, that once we get into this process and begin to address the deficit in a meaningful way, the people who want to increase taxes will have a very great opportunity to attempt to persuade the American public that our Government taxes them too little and does not spend too much.

I, obviously, take the other side of that case. I believe the American public—certainly my constituents in Idaho—believe that the Government spends too much, not too little, and if there were to be adjustments made, they would much rather the Government got out of their way and out of their pocketbook rather than helping them more and taxing them more. But that is a legitimate debate.

I believe that this process set up in this particular bill will force us to address this issue and resolve it. I may lose in that debate, but I think it is more important that we solve the deficit problem than it is that I win the debate. I think it is more important for us to address the growth of the national debt than to endlessly bicker over the question of whether or not the President is irresponsible in saying we ought to cut spending or whether the people who are in favor of taxes simply want to have a more burdensome Government.

We shall go through that. We cannot avoid that kind of rhetoric in the debate. I know it will be there. But let us get to the point where we get past that debate and come to a resolution of the deficit problem. That is what this is all about.

I agree with the Senator from New Hampshire. I do not know any way, unless we are going to simply delegate to the President how taxes should be increased. I think that is constitutionally impermissible and unwise in the extreme.

I do not know how we would do that, get a tax increase imbedded in this kind of resolution, unless we went across the board and somehow attempted to meet that by saying every tax and excise and every other source of revenue for the Federal Government shall be increased by a proportional percentage. I doubt very much whether that kind of proposal would indeed get any kind of agreement on the floor of the Senate or the House of Representatives, let alone downtown at the other end of Pennsylvania Avenue. So I think even though we might talk about it, it is unlikely in the extreme that we shall find that formula, no matter how long we talk. I think we ought to pass this and get on with what we can do to address that budget and create the conditions under which the political process in the country will force us to look at the deficit as the overriding question that we must address.

Mr. DIXON. Will my friend from Idaho yield for a question?

Mr. McCLURE. I am happy to yield.

Mr. DIXON. I appreciate very much my friend's comments. I want to say that we talked privately over here a while ago. I think that this discussion today has been an exceedingly useful one for those of us who have participated. In my time here, I think it is one of the better discussions I have heard on the floor of the Senate.

My friend was here a while ago when the Senator from Maine and the manager, the Senator from New Hampshire, walked through the provisions of this bill. That was very useful, I am sure, to all of us over here. There is one thing I have a little problem about. I wonder if my friend from Idaho, who was going to talk about flexibility before, might help me with this part.

Let us take the year after next when on October 1 the two directors make their certification of the amount of the deficit. I am not using this year because there is a suggestion that nothing will happen this year anyway, that the budget deficit will be within the constraints suggested for this year beginning November 1. So let us take next year and let us discuss in terms of a reasonaable figure of $20 billion as the amount that is certified as the amount of deficit, and let us take the figure of $9 billion for the entitlements and then $11 billion to be cut from the other programs for the $20 billion. All of this is done. The President certifies in accordance with all this or, if he does not, the Congress acts, but in any event it is done with accordance with what is suggested in this bill.

Now, here is the thing I am not clear upon, may I say to my friend from Idaho. Let us assume for the purpose of this hypothetical situation that the guesstimates are very, very wrong and that when we come into, let us say, May of the next calendar year there is a tremendous recession in the country of great magnitude and now it is the

consensus of those in the Congress who have discussed the whole problem that we need a jobs program of some kind—whether the Senator would philosophically agree with that or not, is not important to the hypothetical—and that the cost of it will be $6 billion.

Now, the $6 billion, of course, would add to the deficit, this is clear. I am not quite able to fully understand what we do at that point in time having had all the other certifications and everything. Could the Senator clarify that for me?

Mr. McCLURE. I appreciate the Senator raising the question again because I had indicated earlier I wanted to talk about that issue.

Mr. DIXON. Yes.

Mr. McCLURE. Let me walk through a little bit and then point to some past history. First we set aside in the Senator's hypothetical fiscal 1986 and we look at fiscal 1987. During the remainder of fiscal 1986 Congress wrestles with and passes a budget that is supposed to meet the guidelines set forth in this particular enactment, and that has been approved and put in place and we think it is doing the job. On October 1, 1986, under this bill, OMB and CBO would make an estimate as to whether or not what we had done in the preceding months, if we get it done before October 1, really meets it. I suggest that it is not likely that we would be so far off that on October 1 they are going to find us $20 billion out, but they might. But assume that they did and they order certain changes to take place, certain changes are ordered pursuant to this act, and we wait then to see what actually happens. We would not know before sometime in January whether those actions were correct or not. We would wait at least a quarter, I suspect, wait for the first quarterly report to come in after January 1, to even get an update.

Now, the Senator from Colorado earlier used the terminology of "two successive quarters showing massive downturn necessary to describe or redefine a recession." Now, that is not embedded in any statute. It is not even ancient folklore, but it is modern economic lore.

Mr. DIXON. But assuming that takes place.

Mr. McCLURE. Well, that would be sometime late in spring.

Mr. DIXON. Right.

Mr. McCLURE. Probably not into May or June. And if you wait until two quarters after the first quarter you are into the third quarter before that is evident. We have already started to act on the 1988 budget. We are on the budget resolution. We are beginning to adopt the congressional actions that will look forward to the fiscal year 1988. If it is such a traumatic experience, such a massive change that everybody sees it and everybody agrees that something has to be done, Congress will act very quickly. Congress will act very quickly. If it is less than that kind of a situation, Congress is very likely to bicker among ourselves or between the Senate and the House or between the legislative branch and the executive branch as to what the appropriate response will be and time will run us past October 1 of that year before we even come to any agreement on the solution.

Whether you like it or not——

Mr. DIXON. Well, but what matters——

Mr. McCLURE [continuing]. This process does not make it worse but it does not avoid the time delay that is inherent in trying to get 100 men and women here and 435 men and women over there and however many people are involved in the executive branch to come to a conclusion on what changes should be made.

Mr. DIXON. May I ask my friend from Idaho, if we have done the things provided in this bill, if the two directors certify that there is a $20 billion deficit——

Mr. McCLURE. And that certification is on October 1.

Mr. DIXON. Of 1986.

Mr. McCLURE. Right.

Mr. DIXON. And they certify $9 billion out of the entitlements, $11 billion out of the discretionary is where you find it, the President certifies how to spread the $11 billion across and the $9 billion is acknowledged by him to be correct under the entire entitlements. We find our $20 billion. Fine. Now, when we get the problem in May and we say, "Hey, we need a $6 billion job program," and that increases the deficit by $6 billion, can we pass a bill and do that?

Mr. McCLURE. Congress can do that, absolutely.

Mr. DIXON. By majority vote?

Mr. McCLURE. Congress can do it by the voting procedure set forth in this bill and it would also have to be approved by the President of the United States.

Mr. DIXON. Of course it would. But then the Senator's statement is that notwithstanding this bill—I want to be sure I understand this, and I hope my friend from Wisconsin, who had this conversation with me, is listening as well—notwithstanding all of the provisions of this act and the 37 pages here involved and notwithstanding the certification by the directors and notwithstanding the certification by the President and acquiescence by the Congress, that if an emergency in respect to a recession or depression, or however you want to characterize it, occurs and we need a $6 billion jobs program—and everybody here knows that that adds to deficit, listen to me, knows that it will add to the deficit by the incremental amount of $6 billion—we can still pass a bill and add that much to the deficit?

Mr. McCLURE. The Senator is correct.

Now, Mr. President, I would say that that is, obviously, one of the deficiencies in the act.

Mr. DIXON. In other words, people might say we are irresponsible in doing it. That is an arguable thing.

Mr. McCLURE. That is right.

Mr. DIXON. But clearly we could do it, we could respond.

Mr. McCLURE. I am not trying to say whether we should or not. I am just trying to respond to the question the Senator poses. The answer, in my judgment, is yes.

Mr. DIXON. The Senator is satisfied that is correct?

Mr. McCLURE. Of course.

Mr. DIXON. I know he has been a contributor to the bill and so forth. I want to be clear in my own mind that the Senator is confident.

Mr. McCLURE. But let me point out that also requires the assent of the President of the United States.

Mr. DIXON. I understand.

Mr. McCLURE. Because it is later legislation which must be passed in both bodies and signed by the President.

Mr. DIXON. Of Course.

Mr. McCLURE. If the President vetoed it, we would be back into the question of overriding the veto or not.

Mr. PROXMIRE. Will the Senator yield on this?

Mr. McCLURE. But I want to point out that while you look at that as an addition on the side of flexibility, as indeed it is, it is also a deficiency in the act that anything that Congress passes Congress can undo.

Mr. DIXON. That is right.

Mr. McCLURE. I have to add to that that anything the Congress and the President put into law, the Congress and the President can undo.

Now, that simply is a way of leading into the other statement that it seems to me absolutely imperative, that when we pass this, as I devoutly hope we will, we not abandon the fight to pass a constitutional amendment requiring a balanced budget and setting forth the limitations and procedures. I think the debate we are having today, that we had yesterday and will have tomorrow and the days that follow until this is resolved, all of that debate is and will be very appropriate to the consideration of the constitutional amendment which I believe we will have a chance to vote on yet this year. The Judiciary Committee is prepared to bring that proposal to the floor, I am told, and I hope they will. I hope we will have that debate and the people who are looking at that issue will look back at the RECORD of this debate to sharpen and to focus their perceptions with respect to the

strengths and weaknesses of a constitutional amendment, which I also hope will be passed. But we should not wait for the constitutional amendment to be passed to solve this problem and take no legislative action in the meantime.

I want to point to one bit of history with respect to flexibility—the political context of the decisions.

In 1980, we had reached an absolute crisis point in this country. Interest rates were above 20 percent, the inflation rate over 13 percent, jobless rates were double digit, and all those things were getting worse.

In the midst of that, we had an election and we changed the administration and we changed the majority in the Senate, probably as a result of that economic crisis that peaked in 1980. It was not caused all in Jimmy Carter's years—he just happened to be on watch while it was happening—any more than the $2 trillion of debt was caused by Ronald Reagan. He happens to be in the White House while those things set in force in years past are being realized now.

In 1981 Congress, with a new majority here and a new President downtown, tried to look at the 1981 fiscal year budget and start making some changes for the 1982 fiscal year that would correct those conditions that had brought about that crisis in this country.

We passed a number of fiscal restraint measures during 1981. We passed a tax bill in 1981 to deal with that fiscal economic crisis in this country.

1982 was really the President's first chance, this new President, to try to affect the budget, because the one he operated under during 1981 was the one that was in place before he got here.

In 1982, we tried again to make some further fiscal adjustments in this country—with indifferent success, I might add. The big adjustments have taken place in the new legislation of 1981.

In 1982, we tamped down Federal spending because it was contributing to a deficit that had caused all those problems before.

That is history, I believe, and an accurate rendition of what happened during 1981 and 1982. But in spite of that, because of the accumulated problems that had beset this country, because of the high unemployment rates that persisted, because of the recession that lasted far more than just two quarters, we looked at a jobs bill in 1982; and in early 1983 we passed a jobs bill, even though it added to the deficit which we believed had caused the problem.

So, politically, Congress did act in exactly the way the Senator has described, but it took that long. I do not believe that the inflexibility of this act is so great as to prohibit us from acting over a similar timeframe, because by the time you get around to recognizing the difficulty, you are already working on the next fiscal year and setting in place the next round of actions under this bill.

The question of flexibility also gets into how often you can constructively change programs without adversely affecting people who make decisions based upon programs. You cannot fine-tune on a weekly or monthly basis. There has to be some tuning in a course of time, but we would be in a chaotic situation if we attempted in every quarter to change the kinds of program payouts we are dealing with here. We would be reprogramming the computers constantly, and the country would be in a tremendous mess trying to adjust to so many things in such a period of time.

I think that is also true, perhaps even more true, if I were to have my way in this bill, and we did not exempt anything except the contractual authorities, which we could not change as a matter of constitutional principle.

I would not exempt Social Security from the COLA adjustment that this bill does—personally, not because I have anything against old people in this country. That is obviously not the case. But because I believe that they are entitled to be treated fairly, the same as everyone else, but not necessarily better than everyone else, and I think they accept that.

If that were true, the Social Security Administration tells us that it takes them from 30 to 45 days to program the computers by which the checks are mailed out.

Mr. PROXMIRE. Mr. President, I fully disagree with the Senator's interpretation of the hypothetical proposed by the Senator from Illinois. I have great respect for him, because I know the Senator has studied this carefully, and he is a very intelligent Senator.

As I understand it, the whole purpose of this bill is to prevent exactly what the Senator from Illinois is talking about—that is, a $6 billion new job program, except under very special conditions. There has to be a finding and a recommendation by the CBO and the OMB that they estimate negative real growth. They have to get that. It has to be certified.

Then, what the Senator proposes could be done. In order for them to certify that, you are likely to get into a situation where you have it for a quarter or two before this kind of recommendation.

So I think it is iffy whether the proposition of the Senator from Illinois would be true.

There are specific provisions already. The President can suspend, in part or in whole, the requirements of this section, provided you get these recommendations from those two agencies.

Mr. McCLURE. Let me suggest that you cannot see the forest because you are in the trees. You are looking at individual provisions in this bill and ignoring what is obviously fact.

We can set up procedural hurdles that have to be gone over, and this bill attempts to do that. But any enactment of the Congress of the United States supersedes earlier law.

Mr. PROXMIRE. Then, this has no effect at all.

Mr. McCLURE. It has some effect.

Mr. PROXMIRE. There is no discipline in the bill at all.

Mr. McCLURE. It has some effect.

Mr. PROXMIRE. What?

Mr. McCLURE. I do not mean to understate its effect, and I do not think we should overstate it. It has the effect of setting up some procedural hurdles that have to be crossed, and it sets up the fact that Congress and the Executive would have to agree.

Mr. PROXMIRE. You have to have negative economic growth.

Mr. McCLURE. That is not correct. The Senator know that our rules as well as the law of the land say that you cannot appropriate anything that has not been authorized. Is that not correct? Absolutely bottom line: you cannot appropriate anything that has not been authorized.

Mr. PROXMIRE. We do it all the time.

Mr. McCLURE. We do it all the time. Why? Because there has to be sufficient authorization.

Mr. PROXMIRE. Then, this has no meaning at all.

Mr. McCLURE. It has some meaning.

Mr. PROXMIRE. We could come along today, under present circumstances, and the Senate and the House could pass a job bill of $6 billion, and that is it. $144 billion is the maximum set forth here for the deficit. You say, "Don't pay any attention to that. We're going to have a $6 billion job program, even though it makes it $150 billion."

Mr. McCLURE. It was pointed out here yesterday in debate on the floor that there is aleady a law of the land, which is on the books, that requires us to have a balanced budget.

Mr. DIXON. But we do not have one.

Mr. PROXMIRE. There is no discipline.

Mr. DIXON. It has a lot of discipline. I think the Senator from Idaho is correct, that notwithstanding what this bill says, they can certify that there is going to be 4 percent real growth; the Directors certify the whole thing; they certify a $20 billion deficit; the President sends down a certification, and everything falls into place. But in 6 months, those of us in

the U.S. Senate see a recession out there and want to pass a $6 billion job bill. I do not think anything in this bill prevents us from doing that—the Senator from Idaho is correct—except public outrage against it.

Mr. McCLURE. And a couple of other things.

Mr. PROXMIRE. There is no restraint.

It is the procedures that have to be followed, which you either have to follow or waive, just as the Budget Act waiver requirement does not prevent us from ignoring the Budget Act but makes it more difficult for us to do and, second, you have to give both Houses of Congress the agreement on appropriate action and you have to get the President of the United States to agree. It requires affirmative action to whatever actions might be prohibited by this act.

Mr. PROXMIRE. what has just been disclosed shows that the proposal, it seems to me, has no force and negative economic growth is a complete redundancy. It does not mean anything.

Mr. McCLURE. It may well not have any force.

Mr. PROXMIRE. It has not any force.

Mr. McCLURE. It has some.

Mr. PROXMIRE. We can come along and pass anything we want to, as far as farm legislation is concerned, as far as jobs legislation is concerned, as far as legal services, whatever we wish. There is no restriction at all and the $144 billion limit that we have in fiscal 1987 means nothing.

Mr. McCLURE. I say to the Senator can you characterize this as being too toothless, and some have, but it has more teeth in it than any other proposal we have before us today or any other law now on the books. It may not be perfect. I do not think the sponsors of it claim that it is perfect, but it moves us in the direction of a process that yields some fiscal responsibility further than we are now.

I do believe that the Senator from Illinois may well be correct, but the greatest discipline on our actions will be an outraged public, and they should be outraged. They should be outraged at a process where we passed $1 trillion of debt in 1981 and we are now being asked to raise that limit to over $2 trillion. They should be outraged at the action we took earlier this year on the budget resolution that predictably will increase the deficit $3 trillion in 5 more years. That is what the public should be outraged about. They should be telling us to do something about it, and I believe with due respect to my friend from Wisconsin, they would rather we take this action than take none. They would rather us at least try to do something about it than to say: "Oh, too bad, nothing we can do about that. You will just have to accept another trillion dollars in debt in another 5 years."

They expect more of us than that. They are entitled to more from us than that.

Mr. President, I might before moving off, suggest some here in the Chamber in this debate and yesterday and today and probably in the succeeding day or two are going to say again what they have been saying several times in the past. The 1981 act tax cuts were a mistake. I do not believe that is true. I believe if we had not had the 1981 tax cuts we would not have seen the degree of economic recovery we have today.

So before we so casually throw that action into the ash can, let us at least get into the debate about how we are going about keeping the economy alive and growing, how we get men and women back to work when they have been unemployed, what it is to make a capitalist system work properly when there is interaction between the public sector and the private sector.

Let us not so casually decide that Keynes was all wrong and what is perhaps more important that our application of Keynesian theory is always right in which we prime the pump when it is down but we do not pay off the deficit when economic activities are up.

We have never really tried Lord Keynes' total hypothesis. We only tried the more comfortable side of it spending our way out of recession and toward prosperity and I think on the basis of past performance that has proven to have been erroneous.

Mr. President, I would like to digress momentarily from the issue we are now debating, to discuss an issue that could and should come before us in this session of Congress. The reason I do so is precisely because of the debate we are having on the deficit reduction plan offered by Senators GRAMM and RUDMAN.

The issue I refer to is allowing the American people full and complete access to our deliberations through broadcast coverage of the Senate.

I spent a good deal of time on the floor of the Senate yesterday afternoon, listening to insightful, well-informed debate on what I believe is the most serious problem confronting this country: the Federal deficit. Recognizing the gravity and the impact of the measure now before us, Members from both sides of the aisle have come to the floor to debate the merits of the Gramm-Rudman proposal, and the consequences it would have on congressional budget policy.

It is debate as it should be, Mr. President, as our founders intended it to be.

Like many of my colleagues, I spent time during the August congressional recess meeting with constituents in my State. And a question I faced at almost every stop and almost universally the first question I got was: "What are you going to do about the Federal deficit?" I am confident that my colleagues faced the same question in their travels as well.

So just over 1 month later, we are gathered here to address that very question that our constituents asked of us: "What are you going to do about the deficit?" But they cannot be party to our actions, they cannot listen to our arguments, because we as a body have continued to prevent the American public from seeing and hearing our actions through broadcast coverage.

All 50 States now allow broadcast coverage of at least one house of their legislature. The House of Representatives has allowed full broadcast coverage of their debate since 1979. Yet on an issue of this importance to the American public, we continue to bar them, through the eyes and ears of television and radio, from hearing our deliberations on this matter.

Those of us who are students of the history of the Senate may recall that the Senate conducted its business behind closed doors for the first 5 years of its existence. Public resentment and suspicion over Senate secrecy, however, mounted with each passing year.

The National Gazette, a leading newspaper of the day, put the matter succinctly in an editorial written in 1792. The Gazette said, "Upright intentions and upright conduct are not afraid or ashamed of publicity."

Two years later, the Senate finally acquiesced and added a public gallery to its chamber in Philadelphia.

Public access. The people's right to know. Full and open debate. These are ideas to which we are all committed. Why is it, then, that we still object to lifting that last veil of secrecy from our debate by allowing broadcast coverage?

We are engaged in upright conduct with upright intentions, Mr. President, as the National Gazette stated in 1792. We need not be afraid of public accountability for our actions, especially on a matter of this importance. It is high time that we complete the process begun by our predecessors 191 years ago and allow the public full and open access to our debates through televised coverage.

It is very tempting, Mr. President, to move at this point to offer a measure allowing experimental televised coverage of Senate proceedings, simply for the reason of allowing the American people to be party to this debate. The matter does have precedent. Television was permitted in this Chamber in 1974 to cover the swearing-in of Vice President Nelson Rockefeller. In 1977, radio broadcast was authorized for our debate on the Panama Canal treaties.

However, I will withhold from taking such action, despite my strong belief that full public access to this debate would be enormously beneficial to the people who we represent.

As we continue our discussion of the Gramm-Rudman proposal, Mr. President, I would urge my colleagues to take a moment and think about how the American people would benefit from being a party to this debate. Because it is debate of the kind that we are engaged in today, Mr. President, that is the most compelling reason to allow broadcast coverage of our proceedings.

I would have been absolutely delighted had the American public been able to hear DAVE BOREN yesterday afternoon, not just what the press chooses to put out on the national wire, not just what he may cover in his newsletter to people of Oklahoma, but all people in the United States having the opportunity to hear that expression of concern about the future of this country. I wish the people of this country could hear Senator HOLLINGS as he explains the provisions of this bill. I wish they had the opportunity to hear Senator GRAMM as he went through it yesterday.

I wish the American public could see and hear the exchange that has taken place here today on the details of this legislation and what it means to their future and the future of their children. The American public is entitled to that.

Once more, Mr. President, we need to have their understanding of the issue. We need to have an informed public that will allow us to take the kind of action that is necessary on this particular measure.

It is easy to say, "I could make a bet," because there is not any way of proving the answer. But I strongly believe that if the American public had heard the debate yesterday, had been able to see and listen to the debate today, were able to watch the proceedings of this Chamber tomorrow, we would have thousands of telegrams and phone calls in our offices on Monday saying, "Get on with the business of this country. Stop your talking and pass that bill that alone shows some promise for getting the budget deficit under control. Stop temporizing and stop nitpicking over little things. Have the big debates and solve them, but for God's sake do something."

Mr. President, I believe if we had open television coverage of the Senate we would be more likely to take that action than we are in the sacred silence that we impose.

Mr. MELCHER. Mr. President, I listened all morning and so far this afternoon to this debate. I have listened with a great deal of interest, even when it bogged down in conflicting and confusing amounts in the quagmire of this budget system that we have invoked upon ourselves.

Yesterday, Mr. President, I said that I want to vote for the proposal and vote for a similar proposal by Senators BYRD and CHILES. I am going to vote for these proposals because the times are critical. The economy is in recession in the basic industries. The prices for commodities in the basic industries are all down. Whether it is agriculture commodities or it is minerals, energy, forest products, prices for commodities are all down.

I keep asking my friends, my colleagues, and my constituents if they can tell me at least one commodity where prices were better than they were 4 or 5 years ago. I am pleased to tell you that I found one. I found one, lamb prices—lamb and sheep. They are a little bit better. I am delighted. But that is the only commodity I have been able to find that is in better shape now than it was, say, 3 or 4 years ago from the standpoint of price.

So, indeed, the economic situation is very tenuous in this country. It is no exaggeration to say that the economy of the basic industries are in very sad shape and are in a recession.

Turning to the matter at hand, the budget process has not brought about deficit reduction. Some had thought it would. This proposal, the Gramm-Rudman-Hollings proposal, is another step in the budget process to bring about deficit reduction. And some believe it will. If and when the vote occurs, I believe a hefty majority will vote for it, including myself.

It is, above all, and all it is, a symbolic vote. But it may not measurably reduce the deficit, unless it alerts the public, stirs the grassroots to demand that the Congress, in exercising its constitutional authority, significantly lowers appropriations or significantly increases revenues, or both.

As far as I can detect, the proposal is constitutional. The process of appropriations and revenue measures remain intact. The methods have served the Republic for 200 years successfully up until now, the process of appropriations of revenues. Our responsibility lies in Congress.

During the past 5 years, however, we have had $900 billion in deficits. And so this method, this constitutional system, is failing. The reason that it has failed is that we have had 5 years of bad management from, first of all, the executive branch of Government and, second, from Congress, also guilty of bad management. The bad management comes from a willing majority in the Senate and the House to foolishly draft bills appropriating too much money and then pass them, voting for them.

Let me repeat: The President is wrong. The Congress is wrong. The Senate and the House are wrong to agree with the President.

The President asks for too much money—and that is all he can do, just ask for it. He cannot force anybody to appropriate money. He can just ask for it; ask for the funds. Tragically, Congress, by majority votes, gives him too much in appropriations.

Of course, our differences are in what the President wants to spend in various categories and what the Congress, by majority votes, directs in funding to various categories, but the combination has brought the disaster.

We have incubated this egg and it has hatched. It turns out to be a turkey—a turkey economy, with huge deficits dragging down the economy. It is not a turkey that you can give any thanks for. It is not one you want to eat at Thanksgiving—not this year; probably not next year. Because this economy is sinking and it is sinking harshly.

A great deal of the responsibility of the sinking economy goes directly to the deficit. But in this process, let us just take a look at what we have this year. The President would have an appropriation of $350 billion for defense for this fiscal year, instead of $292 billion that is likely to be appropriated. And there is plenty of evidence that both amounts are way too high and are not necessary. But if Congress is going to appropriate $292 billion or more by majority House and Senate votes, they join in this madness, this overspending.

In contrast to that, the President would have a total of appropriations from Congress for this fiscal year lessened, cut, by about $20 billion for domestic programs. Thirty billion dollars more in domestic program cuts than what the Congress, by majority votes, is going to appropriate.

Now this proposal we have before us now, the Gramm-Rudman-Hollings proposal, in taking this additional step in budgeting, would require a further revision, a further revision in the budget process in arriving at reduced appropriations. And it involves both the President and the Congress. It would draw public attention. The effect of this would be to draw public attention to both sides of a confrontation between these two branches of Government and, Mr. President, would perhaps bring out grassroots demands for corrective actions to reduce the deficits.

There is merit to that. There is merit to that because these classic confrontations between the executive and the majorities in Congress on how to appropriate the funds that are available in the Treasury from revenues gained, revenues paid into it, and by the amount of Treasury borrowing, that classic confrontation should be examined and thoroughly understood by the public.

And they will dictate to their own Congressmen, Congresswomen, and Senators how they feel the priority should be arrived at, and how badly they believe the deficits are endangering the economy of the whole country.

That is one side of this constitutional responsibility, and one side of the people's chance to direct their Government through their representatives, and through their President as to what action should be taken. The other side of this constitutional mandate regarding expenditures involves the revenue bill, the revenue measure, and the revenue policy. Yesterday, also, Mr. President, I spoke very briefly about what I believe to be a very urgent need of enacting into law the minimum corporate tax on profitable corporations. We allude to that quite often. It has been alluded to several times in the debate today, and several times in the debate yesterday. It is talked about through the media periodically, and people throughout the country are grasping the facts that there are hundreds of very profitable corporations which are escaping paying any Federal income tax at all. There are many other hundreds that pay at a very low percentage of their profits.

So before this bill passes, it is my hope—at least my intention—to offer an amendment as others will too, and perhaps many of us will join together to offer an amendment to have a minimum tax on profitable corporations. That is just a small step, some would say, because what would it increase the revenues by? It depends on how you do it. But it is somewhere in the realm of $4 billion to $8 billion a year. Some would say, well, you know, that is not very much when you have a deficit of $200 billion a year. But, of course, that is true. It is not very much. It is a step. Perhaps many would shrug and say if that is all you are going to do, if that is all you have in mind, give us something that we can really sink our teeth in.

I understand that view. I also understand why vast numbers of Americans would say get it under control, do it now, show us your program, show us your game plan, and they would say, well, for this amendment it is a symbolic vote to vote for it. And I shall vote for it. But I fully realize, and I warn people of this country that while it is a game plan, and it is rather comprehensive, it does not get it done right now. And it will not get done at all unless these individual steps, one at a time, these appropriations bills and these revenue measures, are voted upon in the House and in the Senate, in both Chambers, and signed into law by the President. Those are one step at a time, and one bill at a time. There is nothing automatic about this proposal of Gramm-Rudman-Hollings. There is nothing automatic about it at all. It is another extension of the budget process.

Some of us are indeed wondering why we ever voted for a process that is so complicated, and that involves so much time of the House and Senate, and which does not do anything so far in reducing the Federal deficits. And some of us, at least I will, in all candor admit that in voting for this proposal as a symbolic vote, have serious questions on just how much it will accomplish to reduce the Federal deficit.

In all the debate involving the deficits, we cannot avoid talking about how significant it is in the current economy, how significant it is in next month's situation for the economy of the United States, next year and the year after—indeed, the most pressing problem we face is to assure the deficits are reduced so that we can have a decent economy in this country, and that the recession that I mentioned earlier that producers of commodities in agriculture, in minerals, in metals, forest products, and in energy find themselves in now will have some corrections.

It has to be significant to all Americans since these major, basic, economic interests—these millions of people that have invested their time, their lives, and their money in these basic industries—are collectively going down the tube with serious losses, with vast numbers of liquidations, and with the loss of jobs that are never going to come back. It is so serious that it will touch the lives and the pocketbooks of every last single American no matter where he or she lives, and no matter what business or enterprise he or she is engaged in.

So in this discussion about the seriousness of the economy, trade will be part of that discussion. The trade imbalance is indeed just as serious as the Federal deficits. The $123 billion of trade deficit last year, and likely $150 billion trade deficit for this current year, is just as significant as a $200 billion Federal deficit because they do go hand in hand. But to have corrections in the trade imbalance, I must also warn everybody in my constituency in Montana that correction will be only step by step, and it has no magic wand. There is no vast overall that can be undertaken immediately, and zip, it is gone. It also is a step by step.

I earlier mentioned that we have had 5 years of bad management by the executive branch as well as 5 years of flagrant, inept management by Congress. Some of this is macromanagement. Some of it is micromanagement. I would like to relate one area of bad management.

Mr. President, one of the areas in trade where there has been bad management was dramatically discussed by witnesses at a hearing that was held this year, on September 5 in the Russell Building.

Mr. President, I held this hearing to portray through the testimony of individuals a series of macromanagement decisions by the executive branch of Government that was adverse to the public interest and hampered trade.

The hearing involved witnesses testifying in three groups. One group was composed of representatives of foreign governments who are customers of the United States for agricultural commodities. These are traditional, longstanding customers that purchased American agriculture commodities from the United States.

The second group was representatives of private voluntary organizations who are engaged in the operation or their voluntary agencies around the world in numerous countries where agricultural commodities from the United States are utilized and where nutritional needs are better met by the operations of their organizations.

The third group was agriculture commodity organizations here in the United States testifying about their particular commodity group and how these same management decisions affected them.

They are all talking about the same area, Mr. President. They are all talking about the area of bad decisions by the executive branch of Government during the past few years which resulted in less opportunity for utilization of surplus American agricultural commodities.

I am going to read their testimony, which is not their total testimony but a brief summary of their testimony, at the September 5 hearing.

Mr. Pablo Pablo is the Deputy Administrator of the National Food Authority in the Philippines. He said:

> As a condition to receive P.L. 480 assistance for the importation of wheat and rice, importation must be opened up to the private sector without prior licensing or approval of the import by the National Food Authority. However, since July 1, the private sector was so authorized but have not undertaken any tender because of problems of the private sector particularly relating to foreign exchange. This has resulted in delays of imports, food shortages, and fluctuations in food prices.

Mr. President, that is a brief summary of the remarks of the Deputy Administrator of the National Food Authority of the Philippines saying why they were not able to import the wheat and the rice that they desired from the United States in the amounts that they wanted and at the time they wanted to receive them from the United States.

The questions that they raise concerned why these conditions were set by the State Department and imposed upon them which impeded, delayed, and decreased the amounts of surplus foods that they could purchase from the United States.

That is poor policy, Mr. President, but it is not unique.

H.E. Dauda S. Kamara, the Ambassador from Sierra Leone, said:

> The insistence that a private financial institution rather than the Central Bank of Sierra Leone be found to fund P.L. 480 programs resulted in a long period of delay before it was finally recognized that there was no private institute willing to undertake this activity.

Mr. President, the Ambassador from Sierra Leone was describing the conditions set down by the State Department that resulted in a long period of delay before they could get the food from the United States, food that was necessary for them.

Henry E. Thomas, who is a broker representing Mozambique, had this to say:

> Requirements for Mozambique to privatize are well received and present no philosophical problem. But there are very real and practical nonphilosophical problems. How can you privatize when you have almost no one in the country who has any private sector business or managerial experience? Or capital?

The State Department had asked them to privatize the handling of foods they would get from the United States. Those suggestions by the State Department on the theory of privatizing were well received in Mozambique, and really presented no philosophical problem. They said in Mozambique, "Yes, you are right, State Department. We ought to privatize."

But here is what happened, as he stated. There are real practical and nonphilosophical problems involved. The question is how can you privatize when you have almost no one in the country who has any private-sector business or managerial experience, or when there is no capital.

The question was one of delay. The question was one of how many more people are going to starve. It is a fact that the Government of Mozambique estimated 100,000 people died of starvation and malnutrition in the past year.

The point that Mr. Thomas was making was that philosophically, of course they would like to privatize. The country has been out from under the control of others and under their own control for about 12 years, since approximately 1972 or 1973. There is virtually no experience in Mozambique within their Government or within the private sector in developing the managerial experience or order to take over. It is all in the Government, in other words. There is no private capital available right now. It is all whatever the Government is. Whatever the credit line is, the Government has it and nobody else has a credit line.

They would like to move into the ideal situation where they have the private enterprise system fully in force and doing the things that are better done by private enterprise than by Government. They believe in that emphatically.

There was no way that they could just say, "We have it." It does not exist and it will not exist for probably a generation. Maybe a half-generation would be optimistic, but it is coming. In the meantime, they need the food.

Mr. Diani is a broker representing Kenya, Zambia, Liberia, Guinea, and Senegal. He stated:

> Privatization is not practical and in at least one country, Kenya, there is reason to believe that they will refuse food aid rather than accept conditions imposed on them. The manager of the Cereal Board is already in Sydney, Australia, arranging the purchase of a large quantity of wheat.

Traditionally, Kenya, year in and year out, looks to the United States to purchase wheat. When there are requirements imposed upon them by the State Department, they have to think about where does the food come from. Now they are in the process of looking into whether they can get it out of Australia. We will lose the sale.

In this hearing, a representative of the three largest of all private organizations in the world, and who have operated for more than a generation or two, said:

> A major obstacle to exports, whether donational programs, concessional sales, or commercial exports, are the automatic assumption that there is market displacement of U.S. markets through these programs. Also legislative restrictions on programs such as section 416 prevent creativity in developing programs that will lead to expanded markets.

Peggy Sheehan, vice president for Food Policy and Market Development, National Cooperative Business Association, presented those comments.

What Peggy Sheehan is saying is that regardless of how these exports move from the United States or these export commodities that we produce and whose prices are seriously depressed and whose storage costs under Federal ownership are going up, regardless of whether the program is a Food for Peace donation for humanitarian reasons or it is a concessional sale because we recognize that we have to give good terms to these developing countries because their economies are down, or it is a commercial export where they pay full cash on the barrelhead, the obstacles to that are the automatic assumption—and the assumption is made by the Department of State and by the Department of Agriculture—that there is market displacement of U.S. markets through this program. They make that judgment, they make that assumption, and when they do, they slow the exports down, and they lose sales.

Charles Sykes, the assistant executive director of CARE, another one of the private voluntary organizations, said:

> Current administrative procedures for food programs involve a multiplicity of governmental agencies and departments. It makes it difficult to make food aid transfers in a sensible, logical, and efficient way.

Mr. President, we must have invented redtape. The United States must have invented redtape, because we have, surely, the most of it. He goes on:

> CARE frequently finds it easier to work with food aid programs of other countries because they are less involved with red tape than U.S. programs. For example, CARE has just signed an agreement with Canada and Bangladesh involving $35 million worth of wheat for the next three years.

You might say, well, CARE does business with other countries. That is right. CARE does business with other countries. They have to get the food commodities where they can. When they cannot get it out of the United States, yes, they go to another country. They look first to the United States because we have it. Whether it is milk or wheat or soybeans or several other commodities, we always have it. It is here. But the redtape is getting so thick and the delays are so excessive that they find that they must, to operate their programs effectively, look to other countries.

When they do, we lose out on a sale, we lose out on the opportunity for market development to enhance our sales in the future.

John Swenson, deputy director for external affairs, Catholic Relief Services, had this to say in September here:

> It's somewhat ironic that the overall level of donational food has decreased but the regulations have increased to the point where one could more than half seriously say that they can be measured by the ream. The increased burden of administative response undermines one of the greatest advantages of Private Voluntary Organizations—the fact that they are small, run at low overheads and on small staff.

Mr. President, I should say right here that the money they operate on is all private money. They do it on their own money.

Going on with Mr. Swenson's testimony, he said:

> Providing food to hungry people should be an apolitical act. Food is one of the most basic needs and no program should be more free of calculation of relative political advantage.

Mr. President, the other group was the commodity organizations. Their testimony reflects these comments. Stephen Gabbert, executive vice president for the Rice Millers Association said:

> We have noted with some dismay the cookie cutter approach on the part of AID with the issue of privatization and its effort to stamp out a particular concept of it and to try to impose it across the board upon a number of lesser-developed countries. We always seem to pick on the countries that can't do much about it. The State/AID complex needs to be more sensitive to the situation in agriculture.

Mr. President, this development in policy by the Department of State and the Agency for International Development needs to be more sensitive to the situation that exists here, in the United States, with our agricultural commodities.

Jim Miller, who is secretary-treasurer of the National Association of Wheat Growers, said:

> We need to focus on exports for the survival of farmers and survival of rural America. Yet, there is still no plan developed that states where the United States is in terms of trade policy or in terms of agricultural policy. We don't know what is going to happen from one day to the next in terms of export incentives that might be promoted by the government. It is imperative that we develop an agricultural trade policy.

Ron Stoddard, the executive director of Nebraska Wheat Growers, reflected some of the same sentiments:

> It is frustrating that there are areas where the administration of ill-conceived rules or operating procedures or foreign policy considerations actually helped our competitors achieve greater market shares and increase their wheat export sales. Our government uses administrative and foreign policy manipulation to cut off our wheat sales and cater to our competitors' economic interest, and this administration would even rather finance countries and farmers in the Caribbean Basin that it would in the Missouri Basin.

Those are the comments of the people who testified at that September 5 hearing, short summaries of their testimony. I raise their testimony now to show that trade of agricultural commodities has been thwarted, delayed, reduced. We have lost some opportunities.

What does it amount to in dollars? Well, I would say it indicates, from the testimony we received from AID countries, that probably a like situation exists with another score of the 60 countries around the world that we have significant agricultural exports to every year, year in and year out, so perhaps we have lost $1.5 billion in wheat sales over the past 12 to 18 months; perhaps as much as $150 million in soybean sales, maybe more; perhaps another $100 million in rice sales, perhaps more.

But the indication points out that the problem exists, that we are letting it get away from us, that it is not all just a strong dollar that cuts off exports, because none of the testimony involving these countries was with regard to the strength of the American dollar. All it involved was the snafu, redtape, poor policy of the executive branch. These things must be corrected.

Perhaps people will shrug and say, well, we have bigger problems. But this is another one of those smaller steps that you have to take to get at the big problems and to correct the overall situation—the question of why is the deficit in trade so bad, what does it have to do with the Federal deficit? The only way to correct it is to take one step at a time, make the adjustments, work it out. It cannot all be done with one stroke of the pen or one wave of some magic wand.

Mr. President, that concludes my remarks on the subject before us. I now yield the floor.

DIVISION OF AMENDMENT NO. 730, AS MODIFIED

Mr. WEICKER. Mr. President, I demand a division of amendment 730 as modified.

The PRESIDING OFFICER. The amendment is so divided.

The majority leader is recognized.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. RUDMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. I thank the Chair. It is my understanding the Senator from Wisconsin has some questions regarding the pending measure, and I will simply ask the Senator if he wishes to state those.

Mr. PROXMIRE. Mr. President, will the distinguished Senator from New Hampshire answer this hypothetical question. It was raised earlier today, and I would like his expert opinion.

If we pass this legislation and we have very slow growth, it looks to Members of Congress that we are going to have a recession but it is not negative growth, we have not established that as a factor, and the two agencies that are supposed to report to us do not tell us that there is negative growth but the Congress passes a $6 billion jobs bill and in fiscal 1987 the limit is $144 billion. We are right at $144 billion. We go up to $150 billion. Say we pass that some time during the fiscal year of 1987. Would the President be free, or would he be required to sequester, say, $6 billion of funds to bring it down to $144 billion?

Mr. RUDMAN. The CBO report comes on October 1, and that would be after the adoption of the budget resolution and hopefully some of the appropriation bills for the following year. Now, anything that happened between October 1, let us say, 1987, for purposes of the Senator's question, and the following October 1 would not in any way impinge on action that had been taken for this fiscal year other than whatever action had been taken under this procedure anyway, if I understand the Senator's question.

Mr. PROXMIRE. So whatever happens after October 1, Congress could pass supplemental legislation because they would want to act right away, of course, in a recession to provide the $6 billion job program. The outlays would be occuring, most of the $6 billion outlays would be in fiscal 1987. We would simply exceed the $144 billion limitation that is in this bill?

Mr. RUDMAN. I want to make sure I understand this correctly. The sequestering procedure would not take place. However, the extent to which the proposal that the Senator from Wisconsin is describing, the measure that would be introduced by Congress, exceeded the target after the sequestering had been accomplished—the sequestering, let me assume, had been done to bring it back to the number——

Mr. PROXMIRE. That is correct.

Mr. RUDMAN. That would be subject to a point of order under the front half of this legislation.

In other words, this legislation has two enforcing mechanisms to the extent we can enforce anything here that cannot be overridden on the floor. First, it has a sequestering provision; second, it would not allow for legislation after that determination was made that added to the deficit without some countervailing appropriation, tax, whatever.

Mr. PROXMIRE. I appreciate that answer very much. That clarifies the situation. So that the discipline would come that we would either be able to make a point of order, and hopefully hold on that point of order, or if the Congress wished to do so, it would have to raise an additional amount to compensate?

Mr. RUDMAN. Or pass special legislation to slow down the growth of some other program during the same fiscal year. It could use any measure it wished so long as it was arguably what is called around here a zero sum amendment.

Mr. PROXMIRE. The problem with this economically, of course, as I am sure the Senator will appreciate, is that under these circumstances the reason for the additional spending would be to stimulate the economy, provide more jobs. If you have to have a countervailing action, that would either increase taxes or would provide for cuts elsewhere, obviously you would negate much of the stimulative effect. Now, under this bill, would it be possible for Congress to deliberately exceed $144 billion with the determination to stimulate the economy because of the recession or because of unemployment increases?

Mr. RUDMAN. I refer my friend from Wisconsin to pages 35 and 36 of the measure, which is the waiver section. That was put in there for precisely the kind of event the Senator from Wisconsin is describing. Obviously, it is conceivable, after October 1, the beginning of the fiscal year, for events to occur in the country—national disasters, economic disasters. We certainly hope not, but look at what happened in Mexico City. Assume that we were

faced with that kind of a disaster in our own country. Obviously, the Congress under those extraordinary circumstances would be justified to temporarily waive provisions. And we have a waiver provision here. The difference is, however, that at least the waiver provision contained in the amendment is clearly identified. It cannot be obscured as a very vague rider to "National Strawberry Shortcake Week" and passed as a rider to that. It must be freestanding as a joint resolution and I am sure with discussion in this Chamber and the other body about the reason for it, it could receive the votes if in fact the circumstances occurred. So the simple answer is certainly, in a case of major change circumstances after the 1st of October, there is a mechanism here for the Congress to make changes.

Mr. PROXMIRE. Let me ask the Senator another question. The Senator, I know, is an outstanding expert—and I mean that—one of the very few really outstanding experts in this body on the Defense Department and defense spending. I do not know anybody who has spent as much time as he has spent in the Appropriations Committee working on that, and I greatly respect his judgment.

It seems to this Senator that this measure is quite severe with respect to the Department of Defense, and I say that as one who has been critical of much of the spending in the Department.

So supposing the President submitted his budget and he decided that research and development spending in the Department of Defense should be off budget and he submitted a legislative proposal to that effect. Now, when we disagreed and added that money back in, all of a sudden we are overbudget. Could the President do that?

Mr. RUDMAN. Let me say to my friend from Wisconsin that I suppose that anyone, the President included, can come to this body and ask to take something off budget. As the Senator from Wisconsin recognizes, having been here a lot longer than I, if we get 51 votes in the Senate and a majority in the other body, it is going to pass and there is no question that if it came off budget, then obviously it would not be subject to the procedure.

But let me say to my friend from Wisconsin that it seems to me, when you are talking about Social Security and trust funds, that is one thing, but if you were to take an item that was funded from the general revenues of the Treasury and tell the Members of this body that we want to take it off budget, it seems to me that that is asking for a rather extraordinary vote with no justification.

So the question is, can it be done? It certainly can be. Would it be done? In my opinion, I do not think so.

Mr. PROXMIRE. The reason the Senator raises this is because I think there is great sympathy under these circumstances with the Department which is going to have to take a great deal of the burden of this, as we know. Social Security is out. Interest on the national debt is out. I thought that the Senator from Colorado did a fine job, and the Senator from New Hampshire, of course, did an excellent job in pointing out how much is going to be excluded. It comes down hard on the Department of Defense. The Department of Defense is probably going to have a great proportion of all that is left in, and that is why it seems to me that it might be a feeling on the part of the people, out of equity—it does not seem very logical perhaps in view of the attitude many of us have had in the past—because of the economy and with their concern for a strong national defense to try to maybe take it out.

Mr. RUDMAN. I say to my friend from Wisconsin the defense budget is the largest portion of the half called discretionary spending, so obviously any sequestering on that half will have a major impact on the Department of Defense. But it seems, at least to this Senator, that if we were debating that kind of a measure on the floor, to take, let us say, operations and maintenance off budget, or the salaries of the Air Force off budget, you could make a pretty good argument that we are trying to pull the wool over people's eyes and what we are really doing is finding a way to increase the deficit without being accountable. I hope people like the Senator from Wisconsin, who has been a leader in this regard, at that point would say, "Fine, we need that and we have got to have it. Let us find a way to pay for it."

Mr. PROXMIRE. I thank the distinguished Senator. Will he permit me to make a short statement of 3 or 4 minutes without losing his right to the floor?

Mr. RUDMAN. Mr. President, I ask unanimous consent that the Senator from Wisconsin be allowed to proceed and, when he has concluded, I do not lose my right of recognition.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I have been here all day, and I am very impressed by the debate today. I agree with Senator HART that it was a better debate than we had yesterday. I think Senator HOLLINGS, Senator RUDMAN, Senator HART, Senator MITCHELL, Senator DIXON, and Senator SARBANES were very helpful in enlightening those of us who were listening. I believe we understand it better now than ever.

I am going to vote for the measure—I know I am, now—but, unfortunately, I regret that this legislation does not do more. In the first place, it does nothing at all for this coming year. Maybe that is necessary, but the fact is that the Senator from New Hampshire said, "This year, we do nothing," and that was the most revealing in the debate.

What happens if in 1986 the deficit is $200 billion and not $180 billion, plus the 7 percent, which would bring it to $192 billion? In that event, we would be $8 billion short, and not much would happen on the basis of the answer I have just received from the distinguished Senator from New Hampshire.

Say, the following year the deficit should be no more than $144 billion. Then, suppose in fiscal year 1987, a year from now, OMB and CBO overestimate economic growth. This will be very far down in the recovery. We will have recovered 4 or 5 years, and we rarely have exorbitant growth over the period. So we have not a $144 billion deficit but a $175 billion deficit.

Under those circumstances, I think it is ambiguous as to whether or not the President can sequester funds. The Senator from New Hampshire has indicated that, in his view, he could not, during the year, not after the year begins, but that ambiguity is not clear in the legislation.

Then, suppose that in fiscal year 1988, during which the deficit is supposed to be reduced to $108 billion, but after the longest recovery in many years, a 6-year recovery, the economy suddenly suffers a recession and the deficit goes to $300 billion.

Many people may feel that this is a fancy that is wild and unlikely. I think it is the most likely development.

While I am going to vote for this amendment, I predict that we will probably have close to a $200 billion deficit in 1986 and a deficit near that figure, $175 billion to $200 billion, until we have a recession; and when we have a recession, we will have the biggest deficit in the history of our country, by far.

So, while this is a step in the right direction, it is a very short step. It is a mild step.

It seems to me that we should think very seriously about proceeding as the Senator from Idaho suggested. The Senator from Idaho and I are eye to eye on this. We should seriously think about cutting it off cold turkey, allowing perhaps a few weeks, and then saying that we are going to balance the budget, and go on a pay-as-you-go basis from there on.

I realize that that would be difficult, but it seems to me that that is the proper way to act, and eventually we will have to do it.

Mr. HOLLINGS. Mr. President, may I ask the distinguished Senator from Wisconsin one question?

Mr. PROXMIRE. The Senator from New Hampshire still holds the floor. Will he yield for that purpose?

Mr. RUDMAN. I believed I yielded to the Senator from Wisconsin.

Mr. HOLLINGS. I say to the Senator, respectfully, that we do have differences of opinion. We tried our best in getting together, in cosponsoring this, where we would put it on the mark and not try to force anything. So essentially the amendment duplicates the budget passed here in August, which was signed, as the Senator indicated and adds 7 percent due to the statistically significant feature of the amendment and you are up to $192 billion, so that nothing would have to be done in 1986.

I differ with that. I think the deficit will exceed that $192 billion figure. I think it will be triggered and something will have to be done, so we ought to look at it seriously. There is a difference of opinion. If we say nothing is to be done, we say nothing is going to happen this year. On the contrary, I think perhaps that budget would even be larger. I have always been of that school. I have said so on the floor.

Mr. PROXMIRE. I agree with the Senator. If it exceeds $190 billion—say, $210 billion—the President, during the year, will sequester funds.

Mr. HOLLINGS. Yes.

Mr. PROXMIRE. There seems to be ambiguity in that.

Mr. HOLLINGS. There is no ambiguity. The report comes in on November 1. OMB and CBO come in 14 days after their report—if they report on November 1 that we are out not just up to $192 billion, but up to $210 billion——

Mr. RUDMAN. The figure is $194 billion.

Mr. PROXMIRE. Nothing will happen in November. But, say, in April or May it is not clear that they are not going to make that and there will be a deficit of well over $200 billion. Under those circumstances, will the President be in a position to sequester funds then?

Mr. HOLLINGS. Not at that time. We will be in session. This is only to keep the truth in the action we have taken on the budget. At the beginning of January, we have the Budget Committees and the budget resolution. The President does not come back in and reestimate in April or May and say, "We are going over, and here is a sequestering order." No. He does this in a ministerial way, on our behalf, at the commencement of the fiscal year.

Mr. PROXMIRE. Where is the discipline in the first year?

Mr. HOLLINGS. It comes about because we know that we are going to have our picture taken. That is the whole idea.

This has been one of the greatest charades. In the budget resolution we have told ourselves we have to have a little continental shelf drilling, we have to pay for Conrail, and that the growth rate is going to be 4 percent, when it is 1.8.

Having stated this to each other, we finally beat each other down the best we can into a budget and say that we are only going to have a deficit of, say $170.9 billion. With this measure, we might say it is $170.9 billion, but CBO and OMB will come in at the first of the fiscal year and really give true estimates.

At that particular time, we will know that we are going to have to trigger this act. Knowing that that is going to occur, we will be a little more serious and a little more careful, realizing that we do not want to trigger, that we want our budget. We are not trying to turn over to the President authority to get an executive budget. We want a congressional budget.

Mr. PROXMIRE. Is the Senator arguing that this year there will have to be action by Congress to make some cuts in spending before the end of fiscal 1986 that would affect fiscal 1986?

Mr. HOLLINGS. I contend that it will be over the particular amount slightly. They think it will be slightly under. If I am accurate, the answer is yes, positively. The President will have that order, and then we will have a look at it, and we will be here.

Mr. PROXMIRE. Is there not a requirement in this law that would have us go back to $194 billion if we are over it during the year? It requires us to go back to the original deficit as estimated.

We would have to go back. It could not exceed $194 billion. At what point would that——

Mr. HOLLINGS. $192 billion is the trigger. That is the point.

Mr. PROXMIRE. The Senator just said $194 billion. Is it $192 billion?

Mr. HOLLINGS. $192 billion. That is how you estimate it. Correct me if I am wrong. I always thought 180 plus the 7 percent of 180 came to about $192.6 or $192 billion.

Mr. PROXMIRE. Whatever it is. I did not mean to nit-pick.

Mr. HOLLINGS. Yes. That is how I computed it.

It that correct?

Mr. RUDMAN. I believe the Senator is correct.

Mr. PROXMIRE. If it is over $192 billion the Senator is saying Congress would be in a position where they would be required?

Mr. HOLLINGS. This is a ministerial act. We do not have a recession. So the President would go ahead with this particular percentage as determined by OMB and CBO to go across the board and take his action, and if we disagree with it we are in session and we can act.

Mr. PROXMIRE. At what point?

Mr. HOLLINGS. At the point when he gives it up on November 15, 14 days afterward.

Mr. RUDMAN. Essentially when the President submits the information to Congress that says, "I have complied with the provision of this law and here is what I have done according to the percentages furnished me by CBO and OMB." At that point he also can submit an alternative plan and the two Budget Committees of Congress can immediately start working their own alternative.

Mr. PROXMIRE. November 15, 1985 is the deadline and after that if we find that the economy is in a slump or whatever and revenues are up sharply or we have some kind of a supplemental, we will not be able to act to cut that back. Is that right?

Mr. HOLLINGS. That is right. Thereafter we can do it.

Mr. PROXMIRE. That is how I feel. The Senator is correct. He thinks the deficit would be over $200 billion. I think we are not going to really discover that probably until later in the fall. Then it will be too late.

Mr. HOLLINGS. No. We will be in session. We will discover it and we have a little more accuracy in all estimations, I think not only from OMB and CBO but ours from working on the budget.

Mr. PROXMIRE. I hope the Senator is right.

I thank the Senator.

Mr. HOLLINGS. I hope so, too.

Mr. RUDMAN. Mr. President, I yield the floor.

MOTION TO RECOMMIT

Mr. BYRD. Mr. President, I send a motion to the desk.

The PRESIDING OFFICER. The motion will be stated.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] moves to recommit H.J. Res. 372 to the Senate Committee on Finance with instructions to report back with the following committee amendment:

"Strike all after the resolving clause and insert in lieu thereof the following: That subsection (b) of section 3101 of title 31, United States Code, is amended by adding at the end thereof the following sentence: The dollar limitation contained herein shall not apply during the period October 1 through October 18, 1985."

Mr. RUDMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, earlier this afternoon, the distinguished Senator from Connecticut asked for a division, and I understand in the event

cloture were invoked tomorrow, that would require 19 votes within the 100-hour period. Is that correct?

The PRESIDING OFFICER. The majority leader is correct.

AMENDMENT NO. 735

Mr. DOLE. Mr. President, in an effort to avoid that if cloture is invoked tomorrow, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 735.

On page 1, line 2 of the motion strike after the word "with" and insert "with instructions to report back forthwith"

SEC. . DEFICIT REDUCTION PROCEDURES.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 736.

Mr. DOLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 736.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment is as follows:

Strike "1985" in the matter proposed to be inserted, and insert in lieu thereof the following "1985—

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "Sec. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "301(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the

budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution."

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(1) HOUSE OF REPRESENTATIVES.—Section 305(a)96) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATION.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of

budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution or the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(B) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Impoundment Control Act of 1974, the President shall issue an order that—

(I) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of increase under each such provision, and

(II) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by sequestering such amounts of budget authority, obligation limitations, and loan limitations, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce each relatively controllable expenditure by a uniform percentage;

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and the total amount of payments which is to be adjusted under subclause (II) of this clause with respect to relatively controllable expenditures;

(cc) the amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and payments which are to be adjusted with respect to each such relatively controllable expenditure in order to reduce them by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, and loan limitations and each payment described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subclause (i)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under subclause (i)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—

(I) IN GENERAL.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(II) ALTERNATIVE PROPOSALS.—The President may, during the 30-day period specified in subclause (I), submit to each House of the Congress a joint resolution that will, if enacted—

(aa) reduce the deficit for a fiscal year to an amount not greater than the maximum deficit amount for such fiscal year, or

(bb) subject to the requirements of subsection (f) of this section, suspend (in whole or in part) the requirements of this section and of the amendments made by this section with respect to such fiscal year.

Such joint resolution shall be introduced (by request) by the majority leader of each such House on the day on which it is submitted and shall be referred on such day to the appropriate committees of such House.

The committees shall report the joint resolution not later than 10 days after the date on which it is introduced. Any committee failing to report a joint resolution within the 10-day period referred to in the preceding sentence shall be automatically discharged from consideration of the joint resolution, and the joint resolution shall be placed on the appropriate calendar. The provisions of section 305 of the Congressional Budget Act of 1974 for our consideration of concurrent resolutions on the budget shall also apply to consideration of any joint resolution submitted under this subparagraph and to conference reports thereon. Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to any such joint resolution.

(C) EFFECTIVE IMMEDIATELY.—Except to the extent that it is superseded by a joint resolution enacted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall be effective from and after its issuance. Any modification or suspension of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit for such fiscal year.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF JOINT RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after the issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives or the Senate may report to its House a joint resolution superseding such order. The report accompanying such joint resolution shall explain in full detail the nature and effects of each provision of the joint resolution.

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any joint resolution reported under clause (i) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such joint resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such joint resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year.

(iii) DEFINITION.—For purposes of clause (i), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under this paragraph and conference reports thereon.

(ii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to joint resolutions reported under this paragraph.

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly or indirectly, whether appropriated or contained in current law. This shall include entitlements and other payments to individuals, open-ended programs and grants, and other similar programs, and shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(a) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in Ofice of Management and Budget, Controllability of Budget Outlays, Report No. BPS0701A (August 27, 1985).

(H) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(5) CONFORMING CHANGES.—

(A) RULES OF THE HOUSE OF REPRESENTATIVES.—

(i) Clause 1.(e)(3) of rule X of the Rules of the House of Representatives is amended—

(I) by striking out "and" at the end of subdivision (C);

(II) by redesignating subdivision (D) as subdivision (E); and

(III) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(ii) Clause 4.(a) of rule XI of such Rules is amended by inserting after "Budget Act of 1974" the following: "and on joint resolutions under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985".

(B) STANDING RULES OF THE SENATE.—Rule XXV(e)(2) of the standing Rules of the Senate is amended—

(i) by striking out "and" at the end of subdivision (C);

(ii) by redesignating subdivision (D) as subdivision (E); and

(iii) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1968 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments

from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) WAIVERS AND AMENDMENTS.—Notwithstanding section 904(b) of the Congressional Budget and Impoundment Control Act of 1974, any other provision of law, or any rule or standing order of the Senate or the House of Representatives, no provision of this section, or of any amendment made by this section, may be waived, amended, or otherwise modified except by a joint resolution that—

(1) does so in specific terms, referring to such provision by its designation and declaring that such joint resolution waives, amends, or otherwise modifies such provision; and

(2) is addressed solely to that subject.

(g) Section 1106(a) of title 31, United States Code, is amended by striking out "July 16" and inserting in lieu thereof "September 16".

(h) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1990.

(3) OASDI TRUST FUNDS.—The amendment made by subsection (e) shall apply as provided in such subsection.

CLOTURE MOTION

Mr. DOLE. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate hereby move to bring to a close debate on amendment No. 736, to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

Bob Dole, Warren B. Rudman, James A. McClure, Phil Gramm, Pete V. Domenici, Bob Kasten, Daniel J. Evans, Ernest F. Hollings, Al Simpson, Barry Goldwater, Paul Trible, Bill Cohen, Arlen Specter, Jeremiah Denton, Ted Stevens, Mitch McConnell, Mack Mattingly, and Thad Cochran.

Mr. BYRD. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The Senate continued with consideration of the resolution.

Mr. CHILES. Mr. President, this would be a good day to have a mirror in front of every Senator's desk. In a way, I think that is what we have. We have to look each other in the eye and decide whether we will approve the White House request to raise the debt limit to $2 trillion. I think we need to take a good, close look and see the facts clearly. They are harsh and they are frightening.

In just 5 years, the national debt has doubled. In 5 years' time, we have piled annual deficits on top of each other to reach $2 trillion worth of debt. As a result, the issue now before the Senate is not whether we will approve an increase in this debt limit but, rather, what we are going to do about decreasing the annual deficits. We finally understand that something has to be done.

Now we face two basic questions: Do we have the will to do it, and do we have the wisdom to do it right?

The answer to the first question is reflected in the Gramm-Rudman plan. No doubt, in that plan, they found the will. But we have not discovered it suddenly. It has been developing gradually, vote by vote, over the years as we have come closer and closer to serious action on the deficit. It did not come quickly enough to head off the $2 trillion debt. It came to us in a series of near-miss congressional efforts to reduce budget deficits prescribed by the White House.

In 1984, to give an example, the White House sent us a budget calling for a $180 billion deficit in 1985. Congress resisted. Here, in the Senate, some of us introduced Senate Concurrent Resolution 96, requesting the President to resubmit his budget in 30 days, with $200 billion worth of deficit reduction over 3 years. I hear echoes of that effort in the Gramm-Rudman amendment.

That same year, 1984, the Senate came within a tie vote of adopting a Democratic budget to reduce the deficit to $149 billion by 1987. Again I hear echos of that effort in the Gramm-Rudman plan that would cut the deficit to $144 billion in 1987.

This year, on the morning of May 10, the Senate adopted a budget resolution that reduced domestic spending, slowed the increase in defense spending, and curbed the growth of entitlement programs. And there are similarities between those steps and the Gramm-Rudman approach.

In 1982, with the so-called Gang of 17 meetings between the White House and congressional leaders, with last year's Rose Garden budget, and this year's negotiations between Congress and the White House, it is obvious that the will of the Congress to cut deficits has been maturing.

Yet, a $2 trillion debt is staring us in the face just at the time we have finally gotten the willpower to act against the deficit. So, Mr. President, if as the saying goes, "Where there's a will, there's a way," we had better have the wisdom to make sure it is the right way. While Gramm-Rudman is a clear expression of our will, I think it needs some basic adjustment before we can claim that it is the right way.

Right now we see the administration still trying to avoid the reality of these deficits. Instead, they are resorting to another false remedy by leading the charge to monetize the debt. And I think that as much as the prospect of $2 trillion of debt, the group of five action to intervene on currency markets has acted as a catalyst to force us to eliminate our budget deficits. With that intervention came the realization that the President and Paul Volcker now accept the need for extremely rapid monetary growth to sustain our economy. Again, it is to the great credit of Senators GRAMM, HOLLINGS, and RUDMAN that they have said in effect, "We will not allow our hard-fought gains against inflation to be squandered. We will eliminate the deficit."

But we must eliminate the deficit in a way that gives us the best chance of success while preserving our prosperity. If our economy were to have a recession, the deficit would balloon. Although deficit reduction would be suspended during that period, the catch-up to meet even the delayed objectives of the amendment could require the elimination of the entire—defense plus nondefense—controllable part of the budget.

To avoid that outcome, we would have to defy economic history. Our longest post-war recovery lasted only 8 years—1961-69—and that one was sustained by a wartime build-up, and we reaped the inflationary harvest throughout the 1970's. The reality of this amendment is that if economic history repeats itself, the Federal Government could be out of business in 1991.

I have heard it argued in this debate that the $2 trillion debt means the congressional budget process has failed. I do not think that is the case at all, and the Gramm-Rudman plan really says as much. It does not seek to abandon the budget process. It is intended to modify it. This amendment is really a tacity assertion that the budget process is the best way we have to attack the deficits. In effect, it says

Congress had the wisdom to build a bridge to budget sensibility, and now it is up to us to cross it.

That's a very important point.

Congress has taken the initiative. We have finally become so impatient with the lack of Presidential leadership that Congress is determined to force the White House into deficit reduction.

Unfortunately, the Gramm-Rudman approach—while properly motivated would take the will of Congress and convert it into more power for the President. And that is a fundamental weakness of the approach.

It would hand over to the President the power to make automatic spending reductions. The fact is the President already has enormous resources at his disposal in the form of the budget he submits every year. He has yet to prescribe the kind of budget steps that might lead to serious deficit reduction.

And there's another troubling feature of the Gramm-Rudman plan that cannot be overlooked. It essentially preserves the philosophy that insists spending cuts alone can eliminate the federal deficit.

Mr. President, this country has given the administration 5 years to make that philosophy work. Congress has given the President virtually all the aggregate spending cuts he wanted. The result is the problem before us—a $2 trillion national debt, double what it was when the philosophy was adopted.

So while I certainly give credit to the authors and sympathize with the supporters of Gramm-Rudman and share their impatience and frustration, I think we can do better.

The amendment I will offer with the minority leader [Mr. BYRD] and others is meant to achieve the same goals as Gramm-Rudman, but do it in a way that preserves the constitutional responsibility of the Congress. Besides that, the approach I offer today applies the full range of our resources to solve our No. 1 economic problem, the Federal deficit.

I shall have printed in the CONGRESSIONAL RECORD the same background material on my amendment that is on every Senator's desk. But let me outline its key features.

First, it will reduce the deficit in stages so that by 1991, the deficit will be zero as opposed to the $120 billion called for in the budget resolution.

Second, the deficit reduction targets for each year are specified, and the budget resolution will be pegged to those figures. The resolution would also contain instructions to reach the goals we set.

Third, the President will be required to tie his annual budget to those same deficit-reduction plans.

Fourth, if those goals are not met, that is, if the deficits are still higher than the targets established by this amendment, then automatic deficit reduction will be triggered.

And here is the heart of the amendment. The excess deficits will be reduced by dividing it into thirds, and assigning one-third to defense spending restraint, one-third to domestic spending reductions—excluding Social Security, a means-tested program—and one-third to additional revenues.

Mr. President, this approach has several important advantages. It will maintain the shared aspect between Congress and the White House for deficit reduction, and avoid tilting the constitutional balance in favor of either branch.

By providing that any revenues come, first, from a minimum tax on corporations and individuals who now pay no tax, it will emphasize revenue fairness. Moreover, any revenues acquired will be used—not for higher spending—but for lower deficits.

Our approach will make it clear that investments we make in our future are keys to progress. There can be no doubt that all domestic spending programs will sustain some reductions. But we cannot decimate programs like education, research, and export promotion and still expect to be a competitive nation.

Despite all our good intentions; despite a year of rhetoric about the evils of deficits, nothing has been more compelling in this battle than facing up to a red dollar sign, a 2, and 12 zeroes. We have a $2 trillion problem and finally have discovered the will to deal with it. Now we need to make sure we have the wisdom to deal with it effectively.

Mr. President, there are some further problems with Gramm-Rudman. The Gramm-Rudman amendment has a provision departing from the deficit targets if OMB and CBO predict a recession during a particular fiscal year. We all know our current definition of a recession—one that we have been using for some time—is two consecutive quarters of negative growth. That is one that the Department of Labor, I think, came up with. To every economist I know, everybody else, it has been a common thing we use around here. Everyone agrees that is when we are in a recession. But it could happen that we could have a recession in a year and the growth rate for that year could still be positive. That has happened before.

You could have a 2- or 3-percent real growth in the first two quarters and then you could fall off in the last two quarters, but you could still have a positive growth for the year. In this case, in my reading of the Gramm-Rudman amendment, it would not allow for a suspension of your rules at that time. The Gramm-Rudman amendment allows a departure from the deficit targets if CBO and OMB predict a recession.

We have had plenty of experience with OMB's predictions. I have heard people say that all they have to do is predict a recession. I do not know whether my good friend from South Carolina knows how many times during its history OMB has predicted a recession. Maybe my friend from New Hampshire knows that.

OMB has never predicted a recession. Never. Never. But that is one of the features in this bill. We can depart from these thing at any time OMB decides to predict a recession.

Suppose we are going along at a slow pace of economic growth but CBO and OMB are not forecasting a recession. We could go ahead with deficit reduction to meet the targets and that would slow the economy further. So this amendment literally could take us into a recession if growth was slowing down. Yet we go forward into it.

Once we are in an actual recession, what happens under Gramm-Rudman then? Do we have to amend Gramm-Rudman to be able to use fiscal policy to stimulate the economy? The way I read it, once we are in a recession, the President may submit to each House of Congress a joint resolution that will, if enacted, reduce the deficit for a fiscal year in the amount not greater than the maximum deficit amount for the fiscal year. He may do that. He may send another proposal, once you are in the recession, or, two, he may suspend the requirements of this section with respect to that fiscal year.

Mr. President, I am not sure that I want to tie the fate of a nation entirely to what the President may do. Every definition is two quarters of negative growth. We have a number of features that are triggered now on the basis of there being two sessions of negative growth. Now we have a plan like Gramm-Rudman that is calling for what we all know are drastic cuts and even as we go into that recession the President may send us another order making some modifications or he may suspend.

That is a major difference between Gramm-Rudman and the Chiles-Byrd amendment, which says when you are in a recession, that is it. Bam. You suspend this thing during that period of time.

Now, we also say that once the recession is over, you have 2 years to make up the difference, to catch back up. So we are not trying to put something in that is an escape clause.

It seems to me, I say to my good friends who are on this amendment, this is a major weakness, unless you feel there is no problem with just handing the President all this power. He may go this way and he may go that way. That is a concern that I have. And, remember that he may go that way if the projections for the whole year are that you are going to

have a recession. So if you know you are going into a recession, you have one quarter, two quarters that are bad—under every other definition that would say you are there—the President does not even have the authority or the option to do it until we get a new report, another fiscal year report from CBO.

I will leave that, Mr. President, and talk about defense a minute. Under Gramm-Rudman the Congress would not be able to achieve savings from prior-year defense contracts. These are considered, in this Senator's understanding, uncontrollable under the OMB definition.

Now, in the last 5 years, as the Senator from New Hampshire knows, we have achieved inflation savings of over $10 billion from prior-years' defense contract savings. The authorization and appropriation committees have taken these savings and reduced the defense budget. Under Gramm-Rudman, we could not use these economies and efficiencies to reduce the defense budget. If next year we discovered another $4 billion, as we did this year in prior contract inflation savings, we could not use them. We would have to reduce real national security requirements. The following are examples of actual reductions we have made in the past 3 years through the use of prior-year contract savings which would not be available under Gramm-Rudman.

So we have $54 million in fiscal year 1984 from the F-18 contracts; $192 million from F-15 contracts; $143 million from the KC-135 contracts; $116 million from Trident; $14 million from the Navy CH-53 contracts; $50 million from hospital ship contracts; $217 million from prior year shipbuilding—all that in fiscal year 1984.

In fiscal year 1985, $500 million from the F-16 contracts; $29 million from the F-100 engine; $7 million from defense satellite communication programs; $84.8 million from the Trident contracts; $81.8 million from the DDG-47 program; $61.2 million from the FFG program, and $712 million for the low level guided bomb contract.

None of those savings, as I understand it, would be available for use, because they now fall under the OMB definition of uncontrollable.

In fiscal year 1986, $61.8 million in DDG-51 hull contracts; $41 million in TAO contracts; $28 million in CH-47 modification; $30 million in the EH-68 contracts; $12.7 million in the CG-47 hull contracts.

There are other problems with exempting prior year defense contracts. I found in my review of the completed contract tax method used by most defense contractors that numerous contracts are extended in costly and artificial ways in order to avoid paying taxes. When we begin a review of the tax reform, I will share more of this in detail.

However, by using OMB's sweeping definition of uncontrollable expenditures, Gramm-Rudman exempts some of the most questionable spending in the defense budget.

Another problem is that by setting arbitrary outlay targets as its goal, we could easily find ourselves in the position of negative real growth one year in defense and positive real growth in the next year.

I think we can all agree that some orderly spending in national defense pattern is preferred to radical increases and decreases every year. Gramm-Rudman seems to strip us of this possibility.

The requirements of national security do not lend themselves to arbitrary and artificial budget fixes. Gramm-Rudman, in that instance, is a little like snake oil: It looks like whiskey and might even smell like whiskey, but I do not think it is going to drink like whiskey.

Mr. President, I ask unanimous consent to have printed in the RECORD the CBO estimates of spending and tax effects of Gramm-Rudman and the Chiles alternative.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ILLUSTRATIVE CALCULATION OF EFFECT OF GRAMM-RUDMAN AND CHILES PROPOSALS

The Gramm-Rudman and Chiles amendments to the debt ceiling bill both specify a target path of declining deficits that would balance the budget and a formula that would reduce spending and (in the case of Chiles) increase taxes if the projected deficit in a given year exceeded the target. For comparability with the revised Gramm-Rudman proposal, which would balance the budget by 1991, we have modified the Chiles proposal so that it achieves its goal by the same year. Under the modified Chiles proposal, the deficit targets would be 4.2 percent of GNP in 1986, 3.3 percent in 1987, 2.4 percent in 1988, 1.6 percent in 1989, 0.8 percent in 1990, and 0 in 1991.

As modified, the two amendments provide for similar deficit-reduction paths but differ in how they are to be achieved. The Gramm-Rudman amendment specifies that deficit reduction would, if possible, be divided evenly among entitlements and discretionary spending; if the requisite cut in entitlements cannot be achieved through the full suspension of automatic benefit increases, then further reductions would have to be made in discretionary spending. The Chiles alternative provides for three equal categories of deficit reduction—defense spending cuts, domestic spending cuts, and increases in personal and corporate income taxes.

The effects of these two proposals under comparable but purely illustrative assumptions are shown in Tables A and B. If the policies of the Fiscal Year 1986 Budget Resolution are fully implemented, neither amendment would be triggered in 1986. While the effect of the two amendments in 1987 would depend on the policies of next year's budget resolution, and similarly for later years, the illustrative calculations assume that the 1987 budget resolution makes no changes in policy from the 1986 resolution. Also, even though the two amendments would each be implemented one year at a time, the illustrative calculations treat the deficit—reduction formulas in the amendments as the basis for a multiyear deficit reduction plan.

Since the Chiles approach provides for income tax increases—estimated to equal $5 billion in 1987, $9 billion in 1988, and $25 billion in 1990—it would require correspondingly less in the way of defense and domestic spending cuts than would the Gramm-Rudman amendment. As a rough average, Gramm-Rudman would require twice the domestic spending cuts of Chiles and one-and-one-half times the cuts in defense spending. Tables A and B also show the projected changes in spending and taxes relative to the assumptions of the 1986 budget resolution, which are displayed in Table C. The calculations extend only through 1990, since budget projections through 1991 are not available.

Additional observations about the calculations follow:

The Chiles alternative specifically excludes interest savings from the deficit-reduction calculation. For purposes of comparability, the Gramm-Rudman amendment has been treated similarly. Were interest taken into account, the Gramm-Rudman proposal would show additional savings of $1 billion in 1987, $3 billion in 1988, $8 billion in 1989, and $16 billion in 1990. The Chiles alternative would show interest savings of $1 billion, $7 billion, and $13 billion in 1987-1990, respectively.

The Gramm-Rudman amendment defines automatic spending and relatively controllable expenditures in terms of OMB controllability categories. The attached tables use the CBO categories of entitlements (including other mandatory spending but excluding social security) and discretionary spending. The reductions in discretionary programs are computed in terms of total outlays, even though OMB includes outlays from prior-year budget authority in the relatively uncontrollable category. This assumption would affect the initial distribution of cuts between defense and nondefense discretionary programs, but it would not make much difference over a few years time.

Excluding social security, the full suspension of automatic benefit increases would save approximately $6 billion in 1987, $14 billion in 1988, $22 billion in 1989, and $31 billion in 1990. This comprises the cost-of-living increases in federal civilian and military retirement programs, tier two of railroad retirement, veterans pensions and compensation, SSI, and food stamps, as well as the cost of increased reimbursement rates in medicare. Since these figures are less than half the total amount of deficit reduction required by the Gramm-Rudman proposal, the illustrative calculations assume that all additional deficit reduction would come from discretionary programs. Under the Chiles approach, a suspension of automatic adjustments in non-means-tested entitlements would more than meet the target for domestic spending cuts.

	1987	1988	1989	1990
TABLE A. ILLUSTRATIVE CALCULATION OF GRAMM-RUDMAN PROPOSAL				
CBO estimate of budget resolution	$163	$143	$132	$120
Gramm-Rudman deficit target	$144	$108	$72	$36
Total deficit reduction required	$19	$35	$60	$84
Entitlements (billions)	$6	$14	$22	$31

	1987	1988	1989	1990
Percent reduction	2.3	5.2	7.8	10.2
Discretionary (billions)	$14	$21	$37	$53
Percent reduction	3.0	4.4	7.3	9.8
National defense	$8	$13	$24	$34
Nondefense	$5	$8	$14	$19
Domestic Spending (billions)	$11	$22	$36	$50
Percent reduction	2.6	4.9	7.6	10.0

TABLE B. ILLUSTRATIVE CALCULATION OF CHILES ALTERNATIVE

CBO estimate of budget resolution	$163	$143	$132	$120
Chiles deficit target	$147	$116	$83	$45
Total deficit reduction required	$16	$27	$49	$75
National defense (billions)	$5	$9	$16	$25
Percent reduction	1.9	3.0	5.0	7.2
Domestic spending (billions)	$5	$9	$16	$25
Percent reduction	1.3	2.0	3.4	5.0
Income taxes (billions)	$5	$9	$16	$25
Percent increase	1.1	1.7	2.9	4.1

TABLE C. CBO ESTIMATE OF BUDGET RESOLUTION POLICIES

Entitlements, excluding Social Security	$257	$272	$289	$308
Discretionary spending:				
National defense	$285	$304	$326	$349
Nondefense	$173	$179	$184	$191
Subtotal	$459	$483	$510	$540
Domestic spending, excluding Social Security	$431	$451	$473	$499
Personal and corporate income taxes	$479	$525	$570	$614

Mr. CHILES. Mr. President, in looking at some of the effects of the Gramm-Rudman amendment on nondefense programs, under the Gramm-Rudman proposal, outlays for discretionary programs would have to be reduced by uniform percentage. However, we know that many programs have slow spendout rates, and the ratio of budget authority to outlays for these programs is very high.

Therefore, in 1986, to reduce outlays in these programs by a percentage such as 3 percent would require enormous reductions in budget authority. As a result, some programs would need to be almost completely eliminated in fiscal year 1986. Those programs would include EPA sewerage treatment grants, Veterans' Administration hospital construction. These programs, as we know, take high VA numbers, but they have very low outlay numbers in a particular year because they spend out over a large number of years. But if you say you have to reduce them by a fixed percentage of the outlay numbers, you are going to knock out most of the VA.

Subsidized housing falls in that category. Section 202 housing for the elderly and handicapped, community development block grants.

To achieve the outlay reduction of the Gramm-Rudman budget, authority for other programs would need to be slashed dramatically. A 55-percent reduction in urban development action grants. A 15-percent reduction for job training, and that would eliminate training slots for 330,000 people. A more than 40-percent cut in compensatory education. That would affect some 2 million children. It would take 2 million children out of special reading and math programs. Thirty-percent reduction in housing development action grants. Thirty-percent reduction in rental rehabilitation grants. More than 50-percent reduction in spending for Washington Metro. That is an item of no small consequence around here.

In addition to these enormous reductions, the Gramm-Rudman amendment would require significant across-the-board reductions in almost all the programs.

Mr. President, I ask unanimous consent to have printed in the RECORD some material that would show those reductions.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ESTIMATED IMPACT OF GRAMM-RUDMAN AMENDMENT ON FEDERAL PROGRAMS

Under the Gramm-Rudman amendment, the projections that OMB and CBO are required to submit would be based on the economic outlook for the coming fiscal year. But since a recession is defined as two consecutive quarters of negative growth, it could occur that we could have a recession during the year and yet the growth rate for the whole year would still be positive. Thus, we could have a recession but the amendment would still hold us to the original deficit targets.

For example, our country had a recession in fiscal year 1958 but the fourth quarter over fourth quarter grow rate was still positive. Under Gramm-Rudman, the deficit reduction cuts can only be forestalled if the OMB-CBO projections show a recession for the full fiscal year and the President chooses to send Congress an alternative. It is thus easy to see a scenario where the provisions of 9-R drive us into a deeper and deeper recession.

F. 050 1 DEFENSE

Under Gramm-Rudman the Congress would not be able to achieve savings from prior year defense contracts. These are considered "uncontrollable" under the OMB definition. In the past several years we have achieved over $10 billion in savings from prior year defense contracts by taking account of reduced inflation. The following are examples of actual prior year defense contract savings the authorization and appropriations committees have taken in reducing the defense budget in the past three years. Under Gramm-Rudman we could not use these economies and efficiencies to reduce the defense budget. If next year we discovered another $4 billion in prior year contract inflation savings as we did this year, we couldn't use them. We would have to reduce real national security requirements.

FY 1984 DEFENSE BILL

$54 million from F-18 contracts,
$192 million from F-15 contracts,
$143 million from KC-135 re-engining contracts,
$116 million from Trident contracts,
$14 million from Navy CH-53 contracts,
$50 million from hospital ship contracts,
$217 million from other prior year shipbuilding contracts.

FY 1985 DEFENSE BILL

$500 million from F-16 contracts;
$29 million F-100 engine contracts;
$7 million Defense Satellite Communications program contracts;
$84.8 million Trident contracts;
$81.8 million DDG-47 program contracts;
$61.2 million FFG program contracts;
$7.2 million low level guided bomb contracts;

FISCAL YEAR 1986 DEFENSE BILL

$40.5 million C-5 simulator contracts;
$61.8 million DDG-51 hull contracts;
$40 million TAO contracts;
$28 million CH-47 modification contracts;
$30 million EH-60 A contracts;
$12.7 million CG-47 hull contracts.

There are other problems with exempting prior year defense contracts. We have found that the completed contract tax method used by most defense contractors that numerous contracts are extended in costly and artifical ways in order to avoid paying taxes. However, by using OMB's sweeping definition of uncontrollable expenditures, Gramm-Rudman exempts some of the most questionable spending in the defense budget.

Gramm-Rudman has another problem. By using arbitrary outlay targets as its goal we could easily find ourselves in the position of negative real growth one year and positive real growth the next year. It is generally agreed that some regular and predictable pattern of defense spending is preferable to radical and drastic increases and decreases. Gramm-Rudman strips us of that flexibility.

EFFECT OF GRAMM-RUDMAN AMENDMENT ON NON-DEFENSE PROGRAMS

Under the Gramm-Rudman proposal, outlays for discretionary programs would have to be reduced by a uniform percentage. However, many programs have very slow spendout rates, and the ratio of budget authority to outlays for those programs is very high. Therefore, in FY86, to reduce outlays in these programs by the CBO estimate of 3 percent would require enormous reductions in budget authority. As a result, some programs would need to be almost completely eliminated in FY86.

These include: EPA sewage treatment grants, Veterans Administration Hospital Construction, Subsidized housing, including Section 202 housing for the elderly and handicapped, and Community Development Block Grants.

To achieve the outlays reductions of 3 percent, the amount of reduction estimated by CBO to be needed in the first year of Gramm-Rudman budget authority for other slow spendout programs would need to be slashed dramatically.

A 3 percent outlay reduction would require:

A 55-percent reduction in Urban Development Action Grants.

A 50-percent reduction for job training, eliminating training slots for 330,000 people.

A more than 40-percent cut in compensatory education, throwing 2 million children out of special reading and math programs.

A 30-percent reduction in Housing Development Action Grants.

A 30-percent reduction in Rental Rehabilitation Grants.

A more than 50-percent reduction in funding for the Washington Metro.

In addition to these enormous reductions, the Gramm-Rudman amendment would require significant across-the-board reductions in almost all other programs. These impacts are described below for each function of the budget.

F. 50 FOREIGN AID

Since most foreign aid funds are actually spent in the United States, a 10 percent reduction by 1991 in funding could lead to a 10 percent reduction in P.L. 480 food for peace assistance. Not only would this reduce food assistance for some of the world's poorest people, it could eliminate $130 million in

commodities purchased from American farmers for distribution abroad.

F. 250 SCIENCE, TECHNOLOGY AND SPACE

Across-the-board reductions in science, technology and space activities could have a catastrophic impact on space science programs which have taken years to develop and are ready for launch.

NASA's space shuttle operations could be disrupted by an across-the-board reduction in space flight, control and data communications funding. This would force reduction in space flights and have a "ripple effect" by disrupting scientific and national security mission planning.

NASA's ability to launch the new space telescope, which cost almost $1 billion, the Galileo mission to Jupiter and other scientific investments could be lost by an across-the-board cut in 1986-1991 NASA space flight activities.

Across-the-board reductions in the NASA research and development will preclude the additional $2 billion in funds needed over the next 5 years to develop the new manned space station—which the President set as a national priority. It would also preclude any significant new programs.

F. 270 ENERGY

Moratorium on Strategic Petroleum Reserve oil fill in FY 1987.

$180 million reduction in energy research activities; including probable termination of renewable energy research in FY 1987.

F. 300 ENVIRONMENT AND NATURAL RESOURCES

Delay or elimination of funding for clean-up of 50 Superfund sites in FY 1987.

Potential closing of 35 national park areas, affecting 7 million acres by FY 1990.

Delay or elimination of funding for 10 Bureau of Reclamation construction projects by FY 1990.

Delay or elimination of funding for 3 Corps of Engineers new starts or substantial cost-sharing with states by FY 1990.

F. 350 AGRICULTURE

Inability to provide loans for 15,000 FmHA borrowers in FY 1987.

10 percent reduction in agricultural research activities ($375 million) including potential curtailment of funds for 5 land grant colleges in FY 1987.

FUNCTION 500

The Gramm-Rudman plan could cut overall funding by as much as 10 percent in the fiscal year in key education, employment, training, and social service programs. Some education and training programs have very slow spend-out rates, resulting in even larger cuts in current year budget authority.

As a consequence of their plan, participation could drop by as many as (1) 27,000 children in Head Start (first year spend-out: 45%); (2) two million children in compensatory education programs for the disadvantaged (first year spend-out: 7%); (3) 330,000 disadvantaged adults and teenagers in training programs (first year spend-out: 20%); and (4) 15,000 older Americans in community service employment programs (first year spend-out: 18%).

As a consequence of the Gramm-Rudman plan, program operators of elderly nutrition programs could reduce the number of meals provided by 10 million—or drastically reduce the nutrition value of these meals.

Under the broad power given him by the Gramm-Rudman plan, the President could—at will—impose his favorite budget cuts. Funding for the Job Corps might be zeroed out.

F. 550 HEALTH PROGRAMS

Community Health Centers (current funding: $405 million) would be cut by $24.3 million in the first year. The cut would mean that approximately 300,000 low-income people who live in medically-underserved areas and have no other access to primary health care could no longer be served.

Maternal and Child Health Program funding (current level: $478 million) would be cut by $29 million in the first year. The program provides funds to States to help them bring pre-natal and post-natal care to hundreds of thousands of low-income women and small children. Unless States completely made up the Federal funding cut, it could mean as many as 30,000 pregnant women would lose access to essential health services. Even under current funding, as many as one-third of the women who are eligible and need such medical care are not served.

Total health block grant funding to the states, including preventive health care, immunizations, and alcohol, drug abuse, and mental health services as well as the programs mentioned above, would be cut by $111 million in the first year. It is not realistic to expect States to pick up all this difference.

Resources for *control of infectious diseases* (Center for Disease Control) would be cut by almost $5 million from current funding. That figure does not even anticipate the new funding being requested by the Administration now for AIDS research and the cut could effectively wipe out all opportunity to combat AIDS.

The current *NIH research* budget would be cut by $450 million in the first year. The cut for cancer research alone, over $100 million, is over one-half of all intramural cancer research projects budgeted by this Administration for 1986 alone.

F. 600

WIC (Supplemental Feeding for Women, Infants and Children). This proposal would force close to 300,000 low-income pregnant women, infants and children off the WIC program by 1991. This program provides nutrition supplementals to such individuals who are judged to be nutritionally at risk by health professionals.

This SSI proposal would affect the low-income elderly and disabled individuals who receive assistance from the supplemental security income (SSI) program. If the overage provision of the Gramm-Rudman amendment were implemented in FY86, all 1.5 million elderly, 80,000 blind and 2.4 million disabled recipients would have their benefits cut by at least 3 percent. By 1991, this reduction would most likely exceed 20 percent.

F. 700

1. Veterans Compensation: This proposal would affect compensation payments resulting from service-connected deaths and disabilities of veterans. If the overage provisions of the Gramm-Rudman amendment were implemented in FY86, all 2.2 million of these veterans and all 300,000 of their survivors would lose at least 3 percent of their benefits. By 1991, this reduction would most likely exceed 20 percent.

2. Veterans Pensions: This proposal would affect pension payments to needy elderly and disabled veterans and their survivors. If the overage provision of the Gramm-Rudman amendment was implemented in FY86, all 676,000 of these veterans and all 71,000 of their survivors would have their benefits reduced by at least 3 percent. By 1991, this reduction would most likely exceed 20 percent.

3. Veterans Medical Care: (FY87 funding assumed in current budget resolution: $9.4 billion) would be cut by over $320 million in the first year. Since expenditures in this account are mostly for medical personnel staffing veterans hospitals, nursing homes and other medical facilities, this reduction would only come from reductions in personnel. Based on average employee salaries, the cut could mean a loss of 11,000 personnel in the first year. This is 23 percent of all doctors, nurses, psychologists and dentists now employed by the VA medical care system.

4. Medical Research: Funded by the VA and through its medical facilities (current funding $200 million) would be cut by $7.5 million in the first year.

Mr. CHILES. Mr. President, in function 500, the Gramm-Rudman plan would cut overall spending. That is a major difference between Gramm-Rudman and the Chiles-Byrd amendment, in that Gramm-Rudman does not exempt means-tested programs other than Social Security, so the other entitlement and discretionary means-tested programs are not exempt.

Under the Gramm-Rudman plan, some education and training programs have very slow spendout rates and result in larger cuts. As a consequence of that plan, participation could drop by as much as 27,000 children in Head Start. The first year spendout of that would be 45 percent. Two million children in compensatory education programs for the disadvantaged—the first year spendout is 7 percent.

Three hundred thirty thousand disadvantaged adults and teenagers in training programs with a first-year spendout of 20 percent. Fifteen thousand older Americans in community service employment programs—a first year spendout of 18 percent.

As a consequence of the Gramm-Rudman program, the number of meals supplied to the elderly could be reduced by 10 million or the nutritional value of those meals could be drastically reduced.

Under the broad power given him by Gramm-Rudman, the President could at will impose his favorite budget cuts for funding for Job Corps, community service, block grants, WIC program, and public libraries.

Mr. President, it is interesting that I have not heard much about the safety net talked about lately. The President used to talk about the safety net all the time. It looks like to me there are a few holes in the net, if you are going to allow these means tested programs to be cut in this amount.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. BYRD. "Safety net" is about like the word "irregardless."

Mr. CHILES. Actually, it is more like oxymoron.

Mr. HOLLINGS. Oxymoron, that is right.

Mr. BYRD. It is useless and meaningless, I guess, when it first entered the language and remains the same today.

Mr. HOLLINGS. Mr. President, if the Senator will yield, it would be the case that it would be Congress' budget. I do not blame the President on that. The Senator is not trying to run a new budget now, is he?

Mr. CHILES. No. I think we have to talk about apples and apples. That is the Gramm-Hollings-Rudman and the Chiles-Byrd amendments.

Mr. HOLLINGS. Yes.

Mr. CHILES. What happens if you are thrown in the threshing machine? If you do, you exempt Social Security, and we do, but you do not exempt the means-tested programs, and we did. So we are saying what those cuts could be if Congress fails or if Congress and the President fail together. You have seen this sort of thing happen around here a lot.

Mr. HOLLINGS. And if we take the figure that the distinguished Senator submitted at the time of the enactment of the budget, then we will not get into any thrashing machine. Is that not correct? There is no reason for the Senator's particular amendment or my particular amendment.

Mr. CHILES. The Senator from Florida had a figure. If we, meaning the entire Congress, had taken and if that is what we had at the present time, we would have been on the same track to this balanced budget in 1990. The Senator from South Carolina was a coauthor of that plan with me. We would have balanced the budget in 1990.

Mr. HOLLINGS. That is the amendment. I am talking about the actual budget we have under consideration, the 1986 budget.

Mr. CHILES. I say we were not successful in that because we did not have the President's help.

Mr. HOLLINGS. The Senator from Florida was successful in passing the budget for 1986, he voted for it, the one we have under consideration.

Mr. CHILES. That still leaves us with a deficit for next year of, maybe, $200 billion again.

Mr. HOLLINGS. That is not what they said at the time they passed it.

Mr. CHILES. No; but we know that is what is said now by the administration.

Mr. HOLLINGS. That is the whole purpose of this. It is what is said at the time we say it and we should mean what we say and say what we mean. That is the whole thrust for this.

Mr. CHILES. It seems to me one of the reasons we did not get to the 1990 figure, as the Senator from South Carolina so well knows, is because we could not get the President to include any revenues.

Mr. HOLLINGS. I agree with the Senator there.

Mr. CHILES. And the Senator from South Carolina, who has been a leader in the freeze movement and in trying to do something about this deficit for as long as I can remember has had the courage in all the plans he presented—before he got caught up with this thing—to include revenues. I compliment him for that. I hate to see that he has strayed. I do not think he is going to hell because of this. I think he got credit from the Lord. But in spite of that——

Mr. HOLLINGS. How does the Senator provide for those revenues? The Senator was talking in his very first breath here as he made his point this afternoon about the Constitution. We have gone past it. The Senator and I know revenues originate in the House of Representatives. So if you have it in that provision that is a violation but have you got it? How do you write the corporate minimum tax? Is it in the Senator's bill?

Mr. CHILES. I do not have any problem with that at all. It is in this little bill of ours. It is going on a House revenue bill just as TEFRA.

Mr. HOLLINGS. The Senator has seen to the minimum corporate tax?

Mr. CHILES. Yes.

Mr. HOLLINGS. Very good. That is the first thing that comes up. Very good.

Mr. CHILES. It is like TEFRA. It was in the House revenue package and the House did not have courage to do anything. Senator DOLE and some of the others decided we had to have some additional revenues and we passed TEFRA. There is $90 billion in there. We are pikers compared to that amount. We are talking about maybe $25 billion in the fifth year in our plan.

I think that one of the things in the current NIH budget is that has only been cut by about $450 million. But if we look at the low-income elderly and the disabled individuals who receive assistance from supplemental security income [SSI] if the overage provisions of the Gramm-Rudman amendment were implemented in 1986, all 1.5 million elderly, 80,000 blind, and 2.4 million disabled recipients would have their benefits cut at least 3 percent.

Now, I really have a hard time with this. I have a hard time. My State has 17.4 percent of our population over 65. I believe that is higher by a couple percentage points than about any State in the Nation. So when it comes to Social Security I really want to take care of the folks because that is 17.5 percent of our people.

But how in the world do we say we will exempt the COLA's of the Social Security recipients but we will cut 3 percent the COLA's of SSI recipients, the blind, the poor, the halt, the crippled, and the lame? There is just no way that we can stand on that.

By 1991 CBO tells us that there could be a 20-percent reduction in real terms in the earnings or in the benefits under SSI.

Now, we are talking about people who only get money because they are means tested, because they are below the poverty line. Yet we are going to say that we will cut them.

This will force about 300,000 low-income pregnant women, infants, and children to leave the WIC program by 1991. That is a program the Senator from South Carolina has supported. He is one of the chief proponents of that particular program. I know the work that he has done as a Governor and since the time he has been here on hunger in this country. SSI is one of our programs that covers the hungry as well as our other programs.

Veterans' compensation—this proposal would affect the compensation payments resulting from service-connected deaths and disabilities of veterans. If the overage provision of the Gramm-Rudman amendment were implemented in 1986, all 2.2 million of these veterans and all 300,000 of their survivors will lose at least 3 percent of their benefits. Again, it is estimated that will be a 21-percent real reduction by 1991.

I will have to say those figures will only be true if Congress failed to do something and if it applied over all those years. Where it is the logic? Where is the rationale? How can we exempt Social Security recipients, 65 percent of whom Social Security is their principal source of revenue? And we all know there are a lot of Social Security recipients who do not have to have that income. My mother until her passing was one of those who received that income. She was fortunate enough that it was not her main source of income. Yet she would be protected under this. But the person who is on the poorest scale would not.

Veterans' pensions—the proposal would affect pension payments to needly elderly and disabled veterans and their survivors. If the overage provision of Gramm-Rudman were implemented in 1986, 676,000 of these veterans and 71,000 of their survivors would have their benefits reduced by at least 3 percent.

That is a 21-percent real reduction. Veterans' pensions are means tested. We do not give them to someone just because they sign up. They have to be in a certain percentage or income level before they can receive that to start with.

Mr. President, if Gramm-Rudman is to be drastic enough, that you are going to say the pit is so deep, so vast, and so wide that Congress is never going to jump into it, then why exempt Social Security? But once you

have exempted Social Security how can you not look at these means-tested programs for the elderly, the poor, and those who fought and were injured for their country, the blind? I think that is something that Congress cannot do.

There is a difference between the choice that this body will have in the Chiles-Byrd plan and in the Gramm-Rudman plan.

Mr. RUDMAN. Mr. President, it is late in the day. Many of us have been debating this since early this morning. I am going to respond only briefly to my friend from Florida, with whom I agree on a great many things. I have not seen his plan and that of the distinguished Democratic leader, but, from what I understand, there are a great many similarities between the two plans.

Mr. HOLLHNGS. Will the Senator yield at that point?

Mr. RUDMAN. Yes.

Mr. HOLLHNGS* I have been askijg for a ckpy of that. I am not trying to pressure anyone. But let the record show I have yet to be furjished a copy* I have been trying now for several days.

Mr. RUDMAN. The Senator is correct. I had hoped to have nne earhx this mnrjhng, but evidently it is not coipletely drafted yet. H am sure we will have jne nn Monday, at least I certaijlx hkpe so.

But the Senator frol Florida has gone through a whnle lhtanx of potential problems that exist. I am not going to attempt to take them jne by one the deal with them because, obviously, that is something we can probably do on Monday. I want to study those numbers. I respect the ranking members of the Budget Committee and I would assume there has been research in those numbers. But I think the Senator from Florida misses the point a little bit with the problem. We talk about that when we are talking about the proposal of the Senator from Florida.

I would call the Byrd-Chiles or Chiles-Byrd proposal a two-thirds Gramm-Rudman-Hollings. I say that not in jest, but for this reason: The ranking member of the Budget Committee has, as traditionally you might think a ranking member of the Budget Committee or any member of the Budget Committee would, tried to put some balance in this particular amendment. And by doing that, the Senator from Florida has suggested one-third revenue. As a matter of fact, the revenue source that the Senator from Florida is speaking of, I hope he will recall, was offered by the Senator from New Hampshire on the floor of this Senate during the budget debate—that very minimum corporate tax that the Senator from Florida speaks of—and was adopted by this body during that debate. Unfortunately, it lost during the parliamentary maneuvering that went on later that week. So we do not disagree on that.

The problem with putting revenue in this process is we have designed it for a totally different reason. And I get to my point. This process has been designed as an action-forcing mechanism. It is neutral in terms of choices, other than the only thing you can do when you are overspending is to start cutting down on your spending in the first instance. There are no other choices.

Now, I have listened to all of the potential problems the Senator from Florida talks about. Let me talk about another potential problem. Let me talk about all of the Americans that the Senator from Florida spoke of plus all of the rest of America that receives no benefits from these programs whatsoever—the people who essentially pay the taxes so that we can pay for these programs, at least some of them, because we are operating right now on a $200 billion a year deficit.

I have not talked to a reasonable and rational economist or banker who has not told me that this country is right now on the thin edge in terms of this economy. I am not going to get involved in the discussion of who killed Cock Robin. You can ask whether it was the President's fault, Congress' fault or go back to the Great Society days of Lyndon Johnson. I do not really care. I am not here to assess blame.

The fact is the reason we are discussing this measure is because we are about to this week—and we will do it one way or the other, screaming and agonizing and pounding, but we will pass it. We will tell the American people that we just authorized the Treasury to pass the $2 trillion mark in borrowing.

And what the economists tell me and tell the Senator from Florida, what the bankers in your State and my State will tell us, is we are reaching a point where the entire bottom will drop out and then we will not just be worried about whether or not we can maintain the safety net, we will rip gaping holes into the fabric of the economy of this country. We will have high unemployment. We will have hyperinflation. We will have all kinds of things the Senator from Florida, the Senator from South Carolina, the Senator from Wisconsin, and the Senator from New Hampshire all wish to avoid.

Now, the Senator from Florida has a very interesting proposal. The problem with the proposal is it contains one part that the Senator from Florida, the Senator from New Hampshire, and the President cannot control. There is no way that we could pass an action-forcing mechanism and assure that those taxes will ever come into effect.

From what I hear about what is going on over at the Ways and Means Committee that has been meeting night after night on what it called Treasury II, although I think is called Rostenkowski I, the fact of the matter is they cannot come to any agreement over there whatsoever. We do not believe that we ought to have that kind of problematical contingent part of our bill.

Maybe privately I might tell the Senator from Florida, or publicly, if we could absolutely assure that to go into place, I would vote for it tomorrow morning. But we do not think it is going to happen.

So what we have tried to do is develop a mechanism that forces action. I will tell the Senator from Florida, as I told the Senator from Colorado this morning, the Senator from Maine this morning, and the Senator from Illinois this morning, I do not expect for a moment, nor does the Senator from South Carolina, who can speak well for himself, I do not expect for a moment that this formula, as it is laid out, will ever go into effect precisely as we wrote it. That is why there is ample opportunity for alternatives for the President and the Congress. Because once the American people recognize that we cannot buy services with deficits, then we will have pressure put on us that will force priorities.

Let me say one other thing, and then I am going to yield the floor.

The Senator from Florida was concerned during his remarks about giving the President more power than he should have. Well, we had a good and wholesome discussion about that this morning. And, to my friend from Florida, I would simply suggest that sometime between now and Monday he might have an opportunity to look at pages 21 and 22 of our proposal, as well as page 36 of that proposal.

Page 22 sets forth the Presidential order in the event the sequester order takes place. Page 21 sets forth how that order is resolved and it says that the specific rate of reduction is set by the Directors of OMB and CBO. The President has no role whatsoever in setting that rate of sequestering. That is done under this formula. He cannot change it. He cannot pick and choose.

Second, let me refer the Senator from Florida to page 31, line 12, which says:

> The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in the Office of Management and Budget, Controllability of Budget Outlays.

I have a copy of that right here and I bet the Senator from Florida and his staff are far more familiar with that than the Senator from New Hampshire.

That, essentially, is the entire line item of the entire Federal budget that

is addressed by this proposal. So the President cannot set rates. He cannot pick and choose. His action in the sequester order, were it ever put into effect, would be purely ministerial.

One last point. There is a waiver provision contained on page 35 of this proposal. That waiver provision is directed exactly and precisely at the kind of concerns the Senator from Florida expressed. We do not know on October 1, with certainty, whether we will have growth during the year—zero, positive, negative.

But the Congress in the case of an economic disaster or a national disaster can override this with a joint resolution, but the point is it is free standing, it is clean, it cannot be hidden, it is an up and down vote, and I think there has to be justification before we do that.

So I think we can talk about this more on Monday but I did want to respond at least for a few moments to some of the Senators concerned.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. I will be brief because I am admonished by my staff that every word I say is going to have to be corrected in the RECORD. I do not want to keep them working here late.

Mr. CHILES. Say it directly.

Mr. HOLLINGS. I will try to say it directly as the Senator indicates because it will have to be direct.

The impression definitely should be corrected. The Senator from Florida approaches it with an entirely different attitude. His attitude is this a priority bill or amendment, and he enunciates his priorities as education, scientific research, and export promotion. In his discussion he also lays out priorities, safety nets, and considerations of women's infant's, children's feeding, and in his expression, the blind, the lame, and the hungry. That is not the thrust of Gramm-Rudman-Hollings. It gets me to a point, Senator, where we prevail on some of the things and not on all. Then we consider whether or not we would be a principal cosponsor. I would ask of any who are interested in looking at the original Gramm proposal. You will find, No. 1, when the sequestering or cuts came about it went first to entitlements. And thereafter, it went to the other controllable programs, or domestic or social programs.

I persuaded my distinguished colleague from Texas to change that around. Let us start with an impartiality here. Let us submit it 50-50. The Senator from New Hampshire knows that. That was one of the big changes. Another big change was the timing of the corrective action which was moved to the beginning of the fiscal year to accommodate my recommendation. Timing, Senator, is a problem I see with your approach. I haven't seen your final version. But I have been given a host of sheets that were given all Senators. But it comes too late to really do what you want to do next year. It has to come right at the beginning of the fiscal year. We will go into the other problem you have relative to defense on Monday, all of that new budget authority, and some $300 billion is subject to being sequestered. I got my way on that particular one. I am confident that the distinguished Senator from Texas was having difficulty with some in his own group that had the same view as I did, and apparently the Senator from Florida does because the Senator has observed it here this afternoon relative to Social Security.

But I insisted that we take Social Security, a trust fund as it is, people paying in certain tax moneys, their taxes, their employers' taxes, setting it aside, and not treat Social Security as a governmental appropriation, congressional kind of welfare. But take them in the same breath as the blind, the lame, and the hungry because paid in under contract-like insurance, the trust fund says that you reach certain benefits whether you are successful in life, whether you are a failure in life, whether you are blind or lame, or whether you are a philandering millionaire out on a yacht. That was the sort of contract made at the particular time, and politically I was trying to be realistic.

Now my distinguished colleague from Florida says I have lost my courage on revenues—not at all. With respect to that, I wanted, and made sure revenues were included but not specified. I agreed with the Senator from New Hampshire and the Senator from Texas that we not spell it out and mandate it. I think that is a significant difference in that we do not want to be accused of trying to write a new kind of budget. Someone could well say, knowing that you are going to have to mandate President Reagan to put in revenues, then the Congress in its treatment of the budget could well come in higher on social programs, low on defense; the proportion of one-third, one-third, and one-third, proposed by you, would not make you suffer so much, and in essence you would be mandating revenues from President Reagan. And that would not see the light of day. As the President said, "make my day," whatever it was. I mean that would be just an exercise in futility. So, while it allowed the revenues which I happen to be one who believes will be necessary, I did not lose my courage on revenues. I gained my realism on revenues, and took the Senator from Florida's budget that of course I wanted to vote for because I respect his brillance, his hard work, and leadership on the budget.

I know it is a many splendored thing to get together the disparate feelings, philosophies, and priorities of 100 Senators, particularly for us on the minority side, and to get together let us say a Democratic alternative, regular budget. It is tough. It is real tough. And the Senator from Florida has done an outstanding job. But that is not to say that I lose my courage on revenues. My courage on revenues is shown by record at the early part of the year when I said do away with the indexing and get us a minimum corporate tax.

It was thereupon that the Senator from Florida said "No that would be raising taxes." That is when we had the measurement. We will come back to some other measurements that you will find the Senator from South Carolina supporting the revenues to ensure sufficient funding for the lame, the blind, and the Women's, Infants, and Children's Feeding Program. I do not foresee by any manner or means these scare tactics of saying you are going to knock off if you vote for this amendment $300,000 from women's, infants, and children's feeding. I have always said countering, if you please, the Chamber of Commerce ploy that what we are going to do is make them stand and be counted. Our trouble is the crowd will not stand and be counted. I have been saying not to go forward with indexing, and I opposed it from the beginning—put in the minimum corporate tax, put in other taxes. And I supported, for example, the import tax on oil along with the Senator from Florida when we got to the July bipartisan submission of the budget to the conferees. I have not lost it. I just said the test now is to take the budget that the Senator from Florida passed, take it, do not have a new budget, and do not have priorities.

Let us not start looking out for what you are interested in, research, and I am interested in women's, infants, and children's feeding. Just take the budget resolution passed by the Congress and, if you can possibly make it, do it, measure it, sequester it, cut it back in equal percentages all the way across the board with no prejudice, and no partiality to anyone. So therein is the approach being used that seems to be missed by the distinguished colleague's submission here this afternoon that we are going to start another new budget. We are going to have new priorities and we have to take care of education, think about all the children that are going to be cut from the educathon programs—which will not be cut in by opinion. We are going to provide for those things. But take the budget he passed and with the $20 billion cushion from the figures he used just 60 days ago you are verifying what I said then with your tremendous concern

51-059 O-86-25 (Pt. 19)

this afternoon about the truth of my position back at the time when I took the floor that late evening and said, I know not many are listening but this deficit is already $20 billion understated. I can go down the record. This is Saturday again, late. So let us not do that.

But I can list them all as to why I felt it was $20 billion understated. If I were wrong and the Senator from Florida was right, none of these cuts will occur—none will occur.

I thank the distinguished Senator.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, this has been an interesting discussion. I do look forward to Monday when we will get a chance to hear the rebuttal on some of the specific things I have talked about.

Mr. President, I will wait until Monday to discuss those because it takes a while to look at those and digest them.

The distinguished Senator from New Hampshire said something about this plan is two-thirds like the Gramm-Rudman plan. I would say it the other way. I would say the Gramm-Rudman plan is about two-thirds of the Chiles-Byrd plan. It has the head and the feet, but it does not have the heart.

I have read that Gramm-Rudman was modified to take care of the President. He said he wanted some things on defense and the modification took care of that. I guess that was yesterday's modification.

Mr. RUDMAN. Mr. President, if the Senator will yield, the modifications were of a technical nature. The only change that was made was that we thought the first year trigger of $170 billion was too low in light of the fact that the budget process has just been completed and we do not have a chance to operate on the front end of this system at all. There were no changes for defense made here for the administration, whatsoever. Senator HOLLINGS agreed with the change.

Mr. CHILES. I apologize for that. I do not know what made the President say that.

Actually, the main reason here is an action-forcing mechanism. I appreciate that and I think that is correct. That is something that we decided we would follow in our plan. We copied that.

If you are having an action-forcing mechanism, I think you have to decide what you want to force.

We know Congress has been willing to do something. The Senate has been trying to do something. Part of our problem has been down on Pennsylvania Avenue. Are we going to have an action-forcing mechanism? Are we going to put some things in that give the President all kinds of authority, all kinds of discretion, like the determination of whether a recession has happened? We have talked about how this President has no discretion. We talk about programs. We know that, within an appropriations account, the President can have pretty broad discretion within that appropriations account, I say to my friend from New Hampshire.

Shipbuilding is an appropriations account, when you pick and choose the ships. Veterans hospitals will be such an appropriation. You can decide which hospitals you are going to pick and choose. It would get my attention pretty quickly in Florida. We have given that authority to the President.

This is an action-forcing mechanism.

Does the Senator want to put one more action-forcing mechanism in there, the tax bullet in the gun? If we are going to have spending on discretionary spending, spending on means-tested programs, why not put a tax bullet in that gun? Maybe that will make the action-forcing mechanism work for the President as well as it works for the Congress.

In fact, what we are really doing here is giving extraordinary constitutional powers that the Congress has to the President. The source of our problem in trying to deal with this deficit has been the same President, the man who says that tax reform is a lot more important than the deficit; a man whose Chief of Staff, when he was Secretary of the Treasury, said deficits do not matter. No one can convince him. There is no statistical study to show that deficits ever mattered.

We are giving a gun permit to a convicted felon and we are saying now we are going to give the power and all the action-forcing mechanisms there, but withholding one thing that seems to bother the fellow, and that is the tax situation.

The Senator from South Carolina said not to worry, that taxes will be forthcoming out of this.

I do not worry much. The President was going to veto the little action to continue the cigarette tax. The Senator from North Carolina had to call him and say, "I have a deal. Do not veto that. It is part of a deal."

Mr. RUDMAN. Will the Senator yield?

Mr. CHILES. I yield.

Mr. RUDMAN. I wonder if the Senator from Florida really believes that the President has any more power than he does now because the percentage of sequester is not set by the President and the President cannot pick and choose. I would argue the point the Senator made about picking between VA hospitals and ships.

As far as putting the tax bullet into the gun, let me say to the Senator that the Senator from South Carolina and I believe that the alternative proposal that the Congress can make can take that form or any other form. I do not believe for a moment that putting that provision in the Byrd-Chiles or the Chiles-Byrd plan ensures that this President or any President, or this Congress or any Congress, will pass that plan.

What we have been trying to do with this by calling it an action-forcing mechanism is to at least force action that we can ensure will happen. Since we have appropriated the money in the first place, not the President, we can instruct the President to reduce that money by a proportionate amount, but no amount of rhetoric in a bill can mandate a President of the United States or a Member of Congress to be for or against the tax bill.

I am not arguing whether the Senator has a good idea or not. I am just saying it is not very practical.

Mr. CHILES. We simply define this as telling the Secretary of the Treasury to adjust the percentage of the tax to the amount CBO says is needed to raise the revenues. That is just the way the tax indexing in COLA's works right now. We establish a set of conditions. We tell the Secretary to adjust the tax rates or the Social Security benefits. Later, when he sees the data on inflation, as long as we are defining components, we are not delegating legislative authority.

I thank the Senator. I have enjoyed the discussion. I look forward to a continuation of this on Monday.

I assume another 10 or 15 days will be needed to look at these proposals and understand them clearly.

The PRESIDING OFFICER (Mr. HECHT). The majority leader is recognized.

Mr. DOLE. Mr. President, there may be additional speakers but I am not certain. If there are others willing to debate, obviously we would like to continue the debate. If not, it may be that we can find other things to do.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HART (for himself, Mr. LAUTENBERG, Mr. LUGAR, Mr. PRESSLER, Mr. DODD, Mr. MURKOWSKI, Mr. ZORINSKY, and Mr. D'AMATO):

S. Con. Res. 76. Concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government; to the Committee on Foreign Relations.

SENATE CONCURRENT RESOLUTION 76—ASKING THAT THE PRESIDENT BRING THE RIGHTS OF THE POLISH PEOPLE TO THE ATTENTION OF THE SOVIET GOVERNMENT

Mr. HART (for himself, Mr. LAUTENBERG, Mr. LUGAR, Mr. PRESSLER, Mr.

DODD, Mr. MURKOWSKI, Mr. ZORINSKY, and Mr. D'AMATO) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations.

S. CON. RES. 76

Whereas the successive governments of the Polish People's Republic have continued their repression of the natural rights of the people of that country, and have done so largely because the police and military powers of the Soviet Union require it;

Whereas the Polish regime, notwithstanding the pledges it made by signing the Helsinki Accords of 1975, has done little for "the promotion of human rights", but has instead harassed and arrested citizens whose offense was to make attempts to monitor the government's fulfillment of its international obligations under the Accords;

Whereas few, if any, of the scores of formal agreements the government signed with the Solidarity free trade union have been honored; and this union which government spokesmen in February of 1981 called a permanent part of the government structure has been declared illegal; and every kind of legal and illegal pressure is being applied to workers to join state unions organized by the communist government;

Whereas some 15 political and religious activists have died in police custody or under suspicious circumstances since the end of martial law, while many others have been beaten or tortured, and some who were freed in much publicized amnesties have since been reinterned;

Whereas the government of Poland has adapted new legal measures that make Polish civil law increasingly difficult to distinguish from martial law, including new police rights to search without a warrant, and the empowerment of courts to arrest, convict, sentence, and jail anyone for political or other crimes all within a 48 hour period and without a trial: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of this Congress that the President of the United States should raise with Soviet authorities at the highest level the matter of the continuing and thorough suppression of independent speech and peaceful political activity in Poland, and that by so doing the President raises and defends the principles of human rights as embodied in the Helsinki Accords.

● Mr. HART. Mr. President, the upcoming summit meeting in Geneva provides President Reagan with a significant opportunity to emphasize our Nation's profound concerns for human rights. The President has announced his intention to raise the issue of human rights with Soviet General Secretary Gorbachev, and I commend him for this.

Recently, all 100 Members of the Senate signed a letter to the President urging him to raise the plight of prisoners of conscience, refuseniks, and Jews in the Soviet Union. We have made it clear our concern for Soviet human rights abuses will affect Senate consideration of any future agreements relating to the Soviets.

But we must not overlook the importance we as Americans attach to liberty and freedom of expression throughout the world. Our concern for Soviet human rights abuses cannot be limited to those violations which occur within the confines of the Soviet Union.

Mr. President, the successive governments of the Polish People's Republic, acting on the behest of the Soviet Union, have consistently repressed the rights of the people of Poland, and have done so largely because the police and military powers of the Soviet Union require it. Few issues are as important and sensitive as the current human rights situation in Poland, and I believe now is the time to make clear that the Congress and the public hope this will be a matter of highest priority for the President.

I am submitting today a concurrent resolution urging President Reagan to raise the issue of human rights in Poland with Soviet leaders. An expression of U.S. concern about the current situation in Poland is particularly timely for several reasons:

The Polish martial law regime has launched a propaganda offensive that aims to regain international legitimacy and more positive relations with the United States. The regime is especially eager to secure new loans and trade credits from our Nation. We can make it clear to Polish authorities that human rights improvements are a prerequisite to any warming in relations and to any U.S. economic concessions.

The Polish Government is currently intensifying mistreatment of its citizens. Repression of Polish dissidents is on the increase, and a number of human rights activities and Solidarity leaders have recently been arrested or rearrested.

The Solidarity movement is currently planning protests to publicize the intensifying repression of dissidents. In particular, Solidarity intends to draw attention during the summit to the connection between Soviet pressure and the new Polish crackdown. To allow the brave Solidarity activists to not be recognized internationally for their herosim at this important time would be unconscionable.

Finally, we have just recently marked the 10th anniversary of the Helsinki accords. As a signatory to these agreements, the Polish regime is pledged to protecting basic human rights. With so much recent discussion of the accords, we should use this opportunity to highlight the gulf between the promise and reality of human rights in Poland.

Americans have been inspired by the courage and unity of the Polish people and the leadership of Solidarity and the church in defying the Communist regime. Despite the Government's most repressive efforts, the Polish people have used their energy, ingenuity, and perseverance to survive.

But even this small level of freedom is constantly in jeopardy. The martial law regime only awaits an opportunity—a weakening of American and international opprobrium—to crack down on those who pursue liberty in Poland. President Reagan should stress at the summit that the United States will never stop pressing for fundamental human rights for the brave people of Poland.

Through this concurrent resolution, Mr. President, the Congress can also send an important message that must be heard before the November summit. In just over a week, Poland will hold its national election. Of course the results are not in doubt, and none of us believes it is an election in any true sense of the word. But the election is a significant event for those who struggle for freedom in Poland. The Polish underground has organized a boycott of the election to provide the Government has not succeeded in eliminating opposition. A substantial boycott will expose the hollowness of the Government's claims that it has made real progress in ensuring basic rights.

Our support for this resolutinn will show the people of Poland we stand beside them during this critical hour and during the months and perhaps years to come. Let us affirm our special concern for human rights in Poland and demand that the Polish Government live up to its obligations under the Helsinki accords. And let us urge the President to remind Moscow that we will not accept the destruction of the Polish people's most basic human rights.

Mr. President, I appreciate the cooperation of the distinguished cosponsors of the concurrent resolution, and thank them for their support.●

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

DOLE AMENDMENT NO. 735

Mr. DOLE proposed an amendment to the motion of Mr. BYRD to recommit with instructions the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

On page 1, line 2 of the motion strike after the word "with" and insert "with instructions to report back forthwith" with the following amendment:

SEC. . DEFICIT REDUCTION PROCEDURES.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

DOLE AMENDMENT NO. 736

Mr. DOLE proposed an amendment to amendment No. 735 proposed by him to the motion to recommit with

instructions the joint resolution House Joint Resolution 372, supra; as follows:

Strike "1985" in the matter proposed to be inserted, and insert in lieu thereof the following "1985—

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "Sec. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "310(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is futher amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15.....	Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution."

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) HOUSE OF REPRESENTATIVES.—Section 305(a)96) of such Act is amended—

(I) by inserthng "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apphy to anx fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATION.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution or the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(B) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or

resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Impoundment Control Act of 1974, the President shall issue an order that—

(I) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of increase under each such provision, and

(II) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by sequestering such amounts of budget authority, obligation limitations, and loan limitations, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce each relatively controllable expenditure by a uniform percentage;

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and the total amount of payments which is to be adjusted under subclause (II) of this clause with respect to relatively controllable expenditures;

(cc) the amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and payments which are to be adjusted with respect to each such relatively controllable expenditure in order to reduce them by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, and loan limitations and each payment described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subclause (i)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under subclause (i)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—

(I) IN GENERAL.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(II) ALTERNATIVE PROPOSALS.—The President may, during the 30-day period specified in subclause (I), submit to each House of the Congress a joint resolution that will, if enacted—

(aa) reduce the deficit for a fiscal year to an amount not greater than the maximum deficit amount for such fiscal year, or

(bb) subject to the requirements of subsection (f) of this section, suspend (in whole or in part) the requirements of this section and of the amendments made by this section with respect to such fiscal year.

Such joint resolution shall be introduced (by request) by the majority leader of each such House on the day on which it is submitted and shall be referred on such day to the appropriate committees of such House*.The commitees shall report the joint resolution not later than 10 days after the date on which it is introduced. Any committee failling to report a joint resoultion within the 10-day period referred to in the preceding sentence shall be automatically discharged from consideration of the joint resolution, and the joint resolution shall be placed on the appropriate calendar. The provisions of section 305 of the Congressional Budget Act of 1974 for our consideration of concurrent resolutions on the budget shall also apply to consideration of any joint resolution submitted under this subparagraph and to conference reports thereon. Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to any such joint resolution.

(C) EFFECTIVE IMMEDIATELY.—Except to the extent that it is superseded by a joint resolution enacted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall be effective from and after its issuance. Any modification or suspension of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit for such fiscal year.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF JOINT RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after the issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives or the Senate may report to its House a joint resolution superseding such order. The report accompanying such joint resolution shall explain in full detail the nature and effects of each provision of the joint resolution.

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any joint resolution reported under clause (i) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such joint resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such joint resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year.

(iii) DEFINITION.—For purposes of clause (i), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under this paragraph and conference reports thereon.

(ii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to joint resolutions reported under this paragraph.

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly or indirectly, whether appropriated or contained in current law. This shall include entitlements and other payments to individuals, open-ended programs and grants, and other similar programs, and shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(a) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in Ofice of Management and Budget, *Controllability of Budget Outlays*, Report No. BPS0701A (August 27, 1985).

(H) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(5) CONFORMING CHANGES.—

(A) RULES OF THE HOUSE OF REPRESENTATIVES.—

(i) Clause 1.(e)(3) of rule X of the Rules of the House of Representatives is amended—

(I) by striking out "and" at the end of subdivision (C);

(II) by redesignating subdivision (D) as subdivision (E); and

(III) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(ii) Clause 4.(a) of rule XI of such Rules is amended by inserting after "Budget Act of 1974" the following: "and on joint resolutions under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985".

(B) STANDING RULES OF THE SENATE.—Rule XXV(e)(2) of the standing Rules of the Senate is amended—

(i) by striking out "and" at the end of subdivision (C);

(ii) by redesignating subdivision (D) as subdivision (E); and

(iii) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1968 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) WAIVERS AND AMENDMENTS.—Notwithstanding section 904(b) of the Congressional Budget and Impoundment Control Act of 1974, any other provision of law, or any rule or standing order of the Senate or the House of Representatives, no provision of this section, or of any amendment made by this section, may be waived, amended, or otherwise modified except by a joint resolution that—

(1) does so in specific terms, referring to such provision by its designation and declaring that such joint resolution waives, amends, or otherwise modifies such provision; and

(2) is addessed solely to that subject.

(g) Section 1106(a) of title 31, United States Code, is amended by striking out "July 16" and inserting in lieu thereof "September 16".

(h) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1990.

(3) OASDI TRUST FUNDS.—The amendment made by subsection (e) shall apply as provided in such subsection.

ADDITIONAL STATEMENTS

MEDIA MANIPULATION IN SOUTH AFRICA

● Mr. SYMMS. Mr. President, I was somewhat leary of the news broadcasts coming from South Africa prior

to the approaching vote on the Senate floor on sanctions. The media loves sensationalism, because after all, exciting news brings more viewers. But, there is a difference between television cameramen filming legitimate incidents, and those same cameramen attempting to create news. I remember stories emanating from Iran before the fall of the Shah that mobs would start their demonstrations when the cameras started rolling. But even worse than this obvious, deliberate manipulation of the media, are reports that journalists were enticing demonstrators to certain actions to make for sensational evening news coverage.

An article which recently appeared in the Star, a South African paper which is often highly critical of the Government, highlights some questionable journalistic tactics ongoing in South Africa. Mr. President, I submit this article for the RECORD.

The article follows:

TACTICS OF FOREIGN NEWSMEN IN SOUTH AFRICA COME UNDER SCRUTINY

(By David Braun)

The massive negative publicity that South Africa is currently receiving abroad has placed the Government in a quandary.

Selective reporting and increasing incidents of misrepresentation are boosting an increasingly popular argument in Government quarters that troublemakers clearly interested only is sensational "hypes" should be ordered out.

But at the same time there is the still dominant school of thought that "constructive engagement" and improved relations with the foreign media with a view to improving the accuracy and objectivity of coverage would be much more effective.

There are also moves afoot to re-establish some sort of State information service, either in the form of a department or a bureau, possibly under a Minister in the Office of the State President.

On the side of the hardliners, at least one Government official seriously suggests that a news blackout for a limited period of a month or so would do more to restore calm in the country than anything else.

Foreign correspondents encourage these sentiments by frequently transgressing basic principles and ethics of journalism.

Government embassies report that biased coverage of the South African situation, highlighting the worst possible aspects, have almost become the norm, broadcasting to the world on a daily basis a vivid picture of a country at full-scale civil war or in advanced stages of violent revolution.

At last count there were 162 accredited foreign news people in the country, excluding stringers with another 70 or more applying for visas.

According to one senior official closely involved with the foreign Press, only last week a television journalist was caught paying black youngsters in Diepkloof to burn their school books (for filming purposes), while in the Western Cape a camera crew which missed earlier action asked a crowd of blacks to re-enact a stone-throwing scene.

In an incident verfied by an American diplomat, a US camera team paid a black family to have their shack demolished at Crosslands, because it was in the line of sight for a particular scene which was planned to be shot.

Still photographers compete for dramatic pictures, not surprisingly as one local man reportedly earned R100000 for pictures used inside and on the cover of an international news magazine.

Print journalist have not escaped criticism. Officials point to a recent international news magazine cover story which in just the opening paragraphs make two major omissions and juxtaposed certain key facts.

A reputable Fleet Street Sunday newspaper recently published, as fact, a collection of some of the whackiest rumors doing the rounds in South Africa—including the story of President Botha having suffered a debilitating stroke last year and a fictitious account of Mr. Botha running down a corridor of the Union Buildings ranting that he would resign if anyone mentioned grand apartheid again.

An unfortunate by-product of the overzealous foreign Press has been the tendency to play up to the camera, Government sources say.

They claim that in many cases unrest incidents are sparked or aggravated because of the presence of cameras.

South African journalists have learned that certain community leaders, including celebrated churchmen, appear willing to speak into any foreign camera pointed at them but play hard to get for the local media.

Foreign journalists do not entirely agree with these criticisms.

Johannesburg-based Mr. Peter Hawthorne, who represents various overseas organizations, says it is true that journalist who have been sent to South Africa on short notice for short periods tend to opportunistic and superfical.

But he rejects allegations that journalists who has been based in the country for some time stage manage the news.

He agrees that there is an urgent need to improve communications between the Press and the Government, particularly the police. Journalists try to their best, but usually get the cold shoulder, he says.

"The police need good, efficient, articulate and complete communications with the Press, using spokesmen who know what they are talking about. That makes more of an impression on foreign journalists than anything else," he said.

For the time being, the Government appears not be contemplating any action against the foreign Press.

"Press freedom is very important and we must not move against the Press as a whole," says one senior official.●

FREEDOM FIGHTERS

● Mr. SYMMS. Mr. President, I would like to add to today's RECORD a newspaper article from the Union Leader from September 26.

The article was authored by my good friend and colleague from Utah, Senator ORRIN HATCH, and it persuasively argues for American support and and assistance to freedom fighters around the world. Senator HATCH gives particular attention to UNITA, the National Union for the Total Independence of Angola, a unique pro-Western guerrilla organization fighting against Soviet imperialism that has for too long been ignored by the Congress and the world media. I intend to do my part, as Senator HATCH is doing, to reverse that situation, and to focus attention not only on UNITA's cause, but on freedom movements around the globe that are pleading for our recognition and backing.

The article follows:

FREEDOM FIGHTERS: THOSE WHO ACTIVELY OPPOSE TOTALITARIAN OPPRESSION

(By Orrin G. Hatch)

One of the tenets of Leninism is the belief in the inevitable victory of worldwide communism. This belief did not die with Lenin or Stalin or even Khrushchev. Apparently, it is firmly implanted in the minds of Soviet leaders today. My good friend Ambassador Max Kampelman, who has spent over 400 hours negotiating with the Soviets, was impressed by the extent to which high-level Soviet officials are permeated with Leninist ideology. In Kampelman's view, this high degree of commitment of Leninism, "strengthens an attitude which believes in the inevitable victory on their part because they are riding the waive of history."

In spite of the Soviets' global ambitions and their awesome military power, courageous freedom fighters all over the world are working to turn this tide around. They live in places such as Afghanistan, Nicaragua, Angola, Poland, Ethiopia, Laos, Cambodia and Vietnam. In my view, a freedom fighter is anyone who, at great personal risk, actively opposes totalitarian oppression. There are plenty of freedom fighters in the Soviet Union. People like Angrei Sakharov and his wife Yelena Bonner and hundreds of thousands of others, many of whom are unknown in the West but who nevertheless are languishing in Soviet prisons, psychiatric hospitals, or concentration camps because they refused to knuckle under to the Soviet regime.

Those of us who are fortunate enough to live in a free country cannot be freedom fighters ourselves, but this does not relieve us of our moral responsibility to lend whatever support we can to the brave men and women who literally risk their lives every day in their struggle against Communist oppression. As important as our financial support and humanitarian aid are, our moral support is also vital. The strong, clear, consistent message that we need to send to freedom fighters throughout the world is: Don't give up! We're behind you and we believe in what you're doing!

It took many Americans almost 10 years to properly recognize that the members of the U.S. armed forces who served in Vietnam were freedom fighters. Certainly one of the key lessons of Vietnam is that moral support is essential to victory.

Interestingly, this point was made recently by Mr. Jeremias Chitunda, who is the foreign secretary to the freedom fighters group in Angola, known as UNITA (the National Union for the Total Independence of Angola). While lobbying Congress to repeal the Clark Amendment which bans U.S. support to the Angolan freedom fighters, Mr. Chitunda pointed out that UNITA does not need our financial support, but it desperately needs our moral support. Unfortunately, when the Clark Amendment was passed in 1976, it sent a signal to other governments that the United States does not endorse UNITA's cause. I am proud to be counted among the 63 senators who voted recently to repeal the Clark Amendment.

UNITA's forces, led by Dr. Jonas Savimbi—freedom fighter par excellence—are

an inspiration to other resistance groups throughout the world. According to Mr. Chitunda, UNITA commands a force of 50,000 well-trained and well-equipped fighting men. After 10 years of fighting the Cubans, UNITA has won many impressive victories. Savimbi reports that his men now control well over ⅓ of the country, even though they are up against some 40,000 Cubans, 1,500 Soviets and 2,000 East Germans—not to mention some 43,000 Angolans. UNITA's base in Jamba, Angola, which was built from scratch in 1979, is now a thriving community with a hospital, schools, training centers and sports fields.

In spite of the lack of U.S. support, UNITA's forces are well on their way to victory. UNITA has been stockpiling arms, ammunition and supplies for several years—in Dr. Savimbi's words, ". . . enough to sustain our war of independence against the Soviets for a very long time." I believe that one of the keys to UNITA's success is the determination of Dr. Savimbi and the morale of his fighting men. As Dr. Savimbi has stated "There is no way UNITA can collapse."

Recently the leaders of four anti-Communist resistance groups (the Nicaraguan Democratic Force, the Afghan Mujahideen and the Laotian Hmong insurgents) held a conference in Jamba, Angola, to see how Dr. Savimbi has organized UNITA into an effective fighting force. At the end of the conference, the group formed the "Democratic International." They issued a declaration which stated in part, "Today, the tide of history has turned against Soviet colonialism. The Soviet empire is fated to fall—just as previous empires have collapsed, because Soviet imperialism violates the true nature of man."

I share this belief in the ultimate victory of the forces of freedom over the forces of oppression. Resistance groups all over the world must be encouraged to stay the course until their countries are free.

Of course, each liberation movement must develop its own political/military strategy based on the unique geopolitical conditions in each country. At the same time, their cause is universal. As the declaration of the Democratic International states, "The victory of any freedom-loving movement is the victory of all, for the struggle for freedom transcends borders and nationalities." The United States is viewed as the quintessence of freedom by the whole world. If we don't support the freedom fighters who will?

ORDERS FOR SUNDAY, OCTOBER 6, 1985

RECESS UNTIL SUNDAY AT 3 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 3 p.m., Sunday, October 6, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. At that time, Mr. President, the two leaders under the standing order will have 10 minutes each. I ask unanimous consent that they be followed by a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the execution of the special order, I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend beyond the hour of 4 p.m., with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEADERSHIP TIME

Mr. DOLE. Mr. President, I ask unanimous consent that on tomorrow, following the special order in favor of the distinguished Senator from Wisconsin [Mr. PROXMIRE], any time remaining be equally divided between the majority and the minority leaders.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. That is any time remaining prior to 4 o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. At 4 p.m., the Senate will begin a live quorum under the provisions of rule XXII. Upon establishment of a quorum, a cloture vote will begin on amendment 730, as modified.

ORDER FOR MONDAY, OCTOBER 7, 1985

RECESS TOMORROW UNTIL 12 NOON MONDAY

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business on Sunday, October 6, it stand in recess until 12 noon on Monday, October 7.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. I ask unanimous consent that following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. I ask unanimous consent that following the special order in favor of Mr. PROXMIRE, there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEADERSHIP TIME

Mr. DOLE. Mr. President, I ask unanimous consent that in the event cloture is not invoked on amendment No. 730, as modified, on Sunday, October 6, the time remaining after the time used by the leaders and the special order between 12 noon and 1 p.m. be equally divided between the majority and minority leaders.

Mr. BYRD. Mr. President, is that on Monday?

Mr. DOLE. That is on Monday, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, if cloture is invoked on amendment No. 730 as modified, on Sunday, the minority leader's motion to recommit House Joint Resolution 372 with instructions falls, and the Senate would then resume amendment No. 730, as modified, immediately following the conclusion of routine morning business on Monday, under postcloture. If cloture is not invoked Sunday, at the hour of 1:00 p.m. on Monday, a live quorum will begin under the provisions of rule XXII, to be followed by a cloture vote on amendment No. 736, in the second degree to Senator BYRD's motion to recommit.

RECESS UNTIL TOMORROW AT 3 P.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until Sunday, October 6, 1985, at 3 p.m.

The motion was agreed to and, at 5:14 p.m., the Senate recessed until tomorrow, Sunday, October 6, 1985, at 3 p.m.

SENATE—*Sunday, October 6, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 3 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

"O God, our help in ages past,
Our hope for years to come,
Our shelter from the stormy blast,
And our eternal home."

—*Isaac Watts.*

"Lord, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hadst formed the earth and the world, even from everlasting to everlasting, Thou art God."—Psalm 90:1-2.

"He that dwelleth in the secret place of the most high shall abide under the shadow of the Almighty. I will say of the Lord, He is my refuge and my fortress—my God; in Him will I trust."—Psalm 91:1-2.

God of our fathers, overrule human caprice and let justice, righteousness and truth prevail in this place.

"Our fathers' God to Thee,
Author of liberty,
To Thee we sing.
Long may our land be bright,
With freedom's holy light,
Protect us by Thy might,
Great God our King."

—*Samuel F. Smith.*

Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order the leaders have 10 minutes each. I ask that any of my time I do not use be reserved. Then there will be a special order in favor of the distinguished Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes. All time remaining prior to the hour of 4 p.m. will be equally divided between the majority leader and minority leader so that will probably be about 30 minutes equally divided. Then, at 4 o'clock, under the provisions of rule XXII of the Standing Rules of the Senate, a live quorum will begin, to be followed by a cloture vote on amendment 730, as modified, to the debt-limit extension.

Now, if cloture should be invoked, I think a couple other votes could occur. If cloture is not invoked, I assume there would be no additional votes today. Again I apologize to my colleagues for the extraordinary Sunday session. But it seems to me that if, in fact, we have a deadline of Monday, October 7, and this is October 6, there was not much other choice to try to bring this issue into sharper focus. Again, it would seem to me that we have an opportunity, if we can get two-thirds of those present and voting to vote for cloture, to move on this amendment.

The distinguished Senator from Connecticut yesterday very quietly asked for a division of the so-called Gramm-Rudman-Hollings amendment, and we now would have 19 votes on the amendment rather than 1. That would probably mean, if that should be pursued throughout, about 6 hours of rollcall votes. But, hopefully, that might be modified later.

In any event, I appreciate that many of my colleagues had to change weekend plans. I must say, from those I spoke with, they felt it was important that they be here today, and I would guess that most Members on both sides of the aisle will be in attendance.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. TRIBLE). Under the previous order, the Democratic leader is now recognized.

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve my time.

The PRESIDING OFFICER. Without objection, it is so order.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is now recognized for not to exceed 15 minutes.

WHY THE LIVERMORE LAB SCIENTISTS ARE WRONG ON NUCLEAR WEAPONS TESTING

Mr. PROXMIRE. Mr. President, why does this country continue to refuse to negotiate an end to the testing of nuclear weapons? On September 13, Science magazine carried the most convincing answer this Senator has seen anywhere, and I have tried to study everything available on this crucial subject. The article was written by R. Jeffrey Smith. In the judgment of this Senator, the negotiation of a comprehensive nuclear weapons test ban is the single most critical step the superpowers can take to stop the arms race. Will this single action end the arms race? No. Both superpowers could continue to produce the weapons already designed and tested. A comprehensive test ban would not even stop the development of new "super-reliable" weapons that did not require testing.

Why then do I argue that the test ban represents such a crucial advance in stopping the arms race? The answer, Mr. President, is that without the test ban, any reduction in the number of nuclear weapons will simply constitute a great deception. Again and again the administration has told us in the Congress that for 20 years this country has been reducing nuclear warheads and megatonnage. None of this reduction has been in compliance with any arms control agreement. None of it has been motivated by any illusion that the country has chosen to get out of the great nuclear weapons competition with the Soviet Union.

Does anyone seriously claim that this apparent reduction in nuclear weapons has in any way diminished the power of the nuclear arsenal of the United States? Of course, not. We in the Congress have been told over and over again that we need to spend the many billions we have expended on our nuclear arsenal to enhance our nuclear deterrent, not to weaken it. In spite of the deep concern of the Congress over the Federal deficit, we in the Congress have listened to the pleas of our Presidents to match or surpass the Soviet's nuclear power. This country has been in the nuclear arms race all the way, sled length. This is not simply a policy of the Reagan administration. In all fairness we have been in the nuclear arms race in the administration of every President since the dawn of the nuclear age 40 years ago.

How has the United States been able to build its nuclear armed forces while reducing the number of war heads and the megatonnage of our nuclear arsenal? Answer: The United States has persisted in conducting nuclear weapons tests, thereby constantly improving the accuracy, the invulnerability, and the reliability of our weapons. The present U.S. nuclear arsenal is

without doubt the most potent it has ever been. It is a far more effective deterrent than it was 20 years ago and 20 years from now, if there is no test ban treaty, we may or may not have as many war heads and as much megatonnage as we have today. But we will have an even more deadly, devastating and certain capacity to utterly destroy any potential adversary or combination of adversaries. And, of course, 20 years from today without a test ban treaty the Soviet Union will also have a far more powerful nuclear capability. If this happens will the world be a safer place or will it be more dangerous? The answer, Mr. President, is that it will be far more dangerous.

Why more dangerous? Two reasons. First the superpowers locked in a constantly exploding contest to develop ever more devastating offensive and defensive weapons may find the predominant power fluctuating back and forth, depending on the vagaries of weapons breakthroughs. The situation in all likelihood will be volatile, unstable, and unpredictable.

But even if, somehow, the new weapons become more stable and reliable, and even if the United States maintains a clear and decisive advantage, there is a second reason why it is a virtual certainty that continued nuclear testing will sweep the world into a far more dangerous nuclear weapons era. Here is why: The article to which I have referred in Science states that with continued testing, "Future nuclear weapons can be made smaller, lighter, and cheaper." What does that mean? As has happened so often, one way or another, knowledge of the new technology will spread. It means that nations that cannot afford to build the massive bombers or the $2 billion submarines or the mammoth ICBM's will then be able to afford to build the little antimatter bombs that have more than 100 times the explosive force of fission or fusion bombs per pound. And that lightness will make them very cheap indeed. No sub, no bomber, no ICBM will absorb the billions of dollars for delivery of the devastating payload. The bomb eventually could be delivered from a projecting weapon no larger than a rifle—and eventually from a revolver-sized launcher. The warhead itself might be not much larger than a bullet. But one such bullet could have the capacity to blow up an entire city. Why does that make such a newly developed weapon brought on by another 10 or 20 years of testing much more fearsome than our present nuclear weapons? Ah, because then the world will have a true equalizer. Armed with these nuclear weapons of the future, 50 or 100 or 150 nations would have the power to take on and destroy a superpower. Would the imposing deterrence of the superpowers prevent such a catastrophe? Maybe, but maybe not. After all, the more widely nuclear weapons proliferate, the more difficult it would be to fix responsibility for a nuclear attack.

So it is no exaggeration to say that continued unrestrained nuclear testing would lead to a more dangerous world. We should never forget that the prime obstacle to wholesale nuclear proliferation for the past 40 years has been the immense cost of producing and deploying a nuclear arsenal. Any American who cherishes his children or grandchildren, any American who loves this country should think long and hard about the conclusion by Science magazine that "Future nuclear weapons can be made smaller, lighter, and cheaper." That simple sentence explains precisely how civilization could end on this planet.

Mr. President, I ask unanimous consent that the article to which I have referred in the September 13 issue of Science magazine by R. Jeffrey Smith be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WEAPONS LABS INFLUENCE TEST BAN DEBATE

LIVERMORE, CA.—Situated on the first floor of a large building at the weapons laboratory here, past the barbed wire and the armed guards, is perhaps the world's most sparsely attended yet interesting museum. Arranged in artful displays throughout a series of alcoves are scale models of dozens of nuclear bombs, all designed by Livermore's scientists. Many of them are light enough to pick up, and some can be disassembled to display their inner workings.

Aside from the security precautions, the museum is no different from similar galleries at major corporations throughout the country. The purpose is both to display variations of the firm's principal product and to demonstrate the technical prowess of its employees. Visitors to the museum, chiefly a small group of senior defense officials, typically depart with a sharp appreciation of the fundamental and continuing changes in weapons design, as well as a keen awareness of the laboratory's pride in its own work.

These two factors—the unceasing interest in weapons modifications and the enormous professional enthusiasm of those involved—each play a major role in the stout resistance of the nuclear weapons laboratories to a comprehensive ban on nuclear testing, commonly known as a CTB. For if such a ban were agreed upon with the Soviet Union, life at the laboratories would be drastically changed, and the evolution of modern weapons would probably come to a halt.

In the past, the opposition of the weapons labs has been widely known but rarely openly stated. One reason was that, officially at least, Presidents Kennedy, Nixon, Ford, and Carter considered the CTB a major foreign policy goal. Under the Reagan Administration, however, the laboratory scientists feel that their views have achieved sufficient stature in Washington for them to be frank.

"A comprehensive test ban is the wrong way to go," says Paul Robinson, the principal associate director for national security programs at Los Alamos National Laboratory. "In fact, testing is not even a proper subject for arms control limitations. It serves as a distraction from the more important business of sharply reducing the number of nuclear weapons." Similarly, George Miller, the deputy associate director for nuclear design at Livermore, says that "the case for and the value of a CTB, in a political sense, should be overwhelming before entering into it. For us, the situation is exactly the opposite. In terms of maintaining stability, engaging in real arms control, and moving toward a more peaceful world, continued nuclear testing plays a very positive role."

The Reagan Administration's sympathy for this view was demonstrated by its refusal several weeks ago to join a nuclear test moratorium begun by the Soviet Union. Instead, it suggested that Soviet scientists take direct yield measurements at the U.S. test site, thereby enhancing the verification provisions of an existing treaty that limits explosions to 150 kilotons (Science, 16 August, p. 631). Although there was never any possibility that the Administration would follow the Soviets' lead, the moratorium as well as the attention it attracted, were discomfiting to the labs, which have done their best in recent years to dampen any public enthusiasm for a CTB.

A major reason for this anxiety stems from the simple fact that the task of improving upon existing weapons designs is considered a fascinating scientific challenge. As a result, their employees look upon the dismantling of the Nevada Test Site in much the same manner that a particle physicist would react to a decision not to construct any more supercolliders. "I am an experimentalist" says Robinson, 43, who came to the laboratory directly out of graduate school, as did most of his colleagues. If the most important experiments are prohibited, he adds, little productive research can be performed.

Moreover, if a CTB were signed tomorrow, it would halt one of the richest periods of experimentation that the labs have enjoyed. Under Reagan, the number of tests—particularly those that involve basic weapons physics—has dramatically increased, although no one will say exactly how much. "At present, the nuclear weapons program in total, both in offensive uses, defense suppression, as well as defense, is more exciting than I've ever known it," Robinson says. "There are lots of new ideas, lots of new things being looked at. The list . . . has blossomed a lot since the narrow views that we had for a long time."

The Administration has been candid in describing the fruits of continued nuclear testing. A host of nuclear-driven missile defense technologies are depicted as unusually promising, including an x-ray laser, a particle beam, and a microwave weapon. Future nuclear weapons can be made smaller, lighter, and cheaper. Blast and radiation can be kept under better control. More safety features can be incorporated, such as inert high explosives in bomb detonators. Innovations are possible in both the fission and fusion constituents of a bomb. As Miller says, "There are things that technology can do for national security across the board."

The problem is not that all weapons design work would cease without testing, but that the most interesting work would be severely constrained. "We know that we can design bombs that work the first time out. We did it at Trinity and we did it again with the plutonium bomb, the weapon we used at Nagasaki, "Miller points out. Hence, additional bombs—derived from older, thoroughly tested designs—could still be added to the

arsenals on both sides, but they would clearly be large and primitive, not compact and state of the art.

"There would be a lot of pressures to build anyway, using new designs," Miller explains, "but my position is that modernization would stop." Donald Kerr, the Los Alamos director, agrees. "Basically, I wouldn't offer anything that hadn't been previously tested . . . to the point where you had simulated the flight of the delivery vehicle." In short, the basic practice of the last 30 years—in which bombs are created to fit aboard weapons invented by the military—would be reversed, and any future weapons would have to be made to fit around the bombs.

The reason is that although the labs have made tremendous progress in reducing their testing requirements to an absolute minimum, they have not succeeded in eliminating the need altogether. Over the past two decades, for example, they have purchased the world's most advanced computers and developed extensive computer codes capable of modeling the dynamics of bomb detonations and faithfully depicting the implosion and explosion in three dimensions. They have constructed elaborate nonnuclear test ranges with powerful accelerators for flash radiography, research into collateral nuclear effects, and investigations of controlled nuclear fusion. The ultimate goal is to be able to design weapons based on "first principles" knowledge of the fundamental physics of a nuclear weapons explosion. But this moment is "optimistically at least a decade away," Miller says.

Scientists at the lab fear that as the most interesting work dwindles, some of the brightest researchers will inevitably drift away. Miller, who has been at the lab since 1972, says that this would probably become noticeable after 5 years, and that "the replacements will be good, but they won't have any experience. It'll be a losing battle." Although this would ultimately be felt by the weapons program, the most immediate impact would be on the quality of life at the labs themselves. To advocates of a CTB, a diversion of talent elsewhere is a healthy phenomenon; to those who have devoted their careers to weapons design it is a stifling prospect.

Scientists at the labs assert that 15 years or so after a ban has taken effect, not only the competence of the labs but also the reliability of the arsenal will have degraded. As Kerr told Congress last May, "Nuclear weapons are affected significantly by aging and obsolescence; over an extended period the materials used in warheads deteriorate physically." Nuclear testing is needed to verify that bombs will still work, he asserts, and without it there will be substantial pressures to ensure an adequate deterrence either by expanding the size of the nuclear arsenal or by initiating a massive buildup of conventional armaments.

No other claim about the drawbacks of a CTB has aroused as much controversy. "The laboratories are guilty of vast quantities of misleading information on this subject," says Spurgeon Keeny, executive director of the Arms Control Association. Similarly, Wolfgang Panofsky, director emeritus of the Stanford Linear Accelerator Center and a former scientist at Los Alamos, describes the laboratory concerns as "greatly overblown." Along with Hans Bethe, Norris Bradbury, Richard Garwin, George Rathjens, the late Herbert Scoville, and Paul Warnke, they recently wrote a letter to Congress, which asserts that "continued nuclear testing is not necessary in order to ensure the reliability" of the stockpile, and that nonnuclear tests, as well as periodic weapons disassembly, are adequate to uncover any flaws.

The debate is difficult for an outsider to assess because both arguments depend in part on highly classified data and the participants accuse each other of being factually incorrect. In particular, the weapons designers argue that nuclear tests have been required in the past to fix various weapons defects, and the critics say it isn't so. The only detailed public study of the subject, prepared for the Energy Department by Jack Rosengren of R&D Associates in Marina Del Ray, lists a number of bomb repairs made with the assistance of nuclear tests. But the critics argue forcefully that equivalent repairs could have been made without this assistance.

In part, the debate is a reflection of the laboratory's intrinsic and appropriate conservatism. A written certification that any given weapon will produce its rated yield is required from the lab directors before it may enter the stockpile, and they take their responsibility extremely seriously. More fundamentally, however, the debate is a reflection of the fact that long-term weapons reliability is not at present the paramount goal of a designer, and probably won't be until a CTB has been signed.

As Kerr explains, "If you ask the question could we come up with a basic design or class of designs that would basically be very insensitive to anything you could imagine happening . . . I think the answer probably is yes, there is no a prior reason to say why that's impossible. Right now, it's not a thing that we do because from the point of view of delivery systems, it's not a particulary interesting path to go along. "Bombs that are relatively impervious to aging would inevitably be larger and weigh a good deal more, Kerr explains, because they would probably need more fissile material and more high-energy explosive. Such bombs could only be deployed on less capable yet more expensive weapons systems, he adds.

To Ray Kidder, an associate division leader at Livermore who is frequently at odds with laboratory policy, the fact that the labs have never designed such super-reliable weapons, even though a CTB has long been under consideration, is "a real scandal." Hugh DeWitt, another internal lab critic, suggests that it is part of the lab's deliberate anti-CTB strategy. But a more plausible explanation offered by Miller, is simply that economic constraints have precluded any other approach.

In any event, the problem is not a permanent one; no one doubts that more reliable weapons can be developed if politicians so direct. And some CTB advocates even argue that degraded reliability is good, because it will give both sides pause during planning for a first strike. The labs, of course, have a response here as well. They claim that the burden of uncertainty may fall unequally on U.S. and Soviet shoulders, creating a worrisome recipe for strategic instability. The basis for this argument is that Soviet bombs already are larger and heavier than ours, and therefore might be more "robust" and "less susceptible to degenerative changes," as Miller puts it. But he acknowledges that "I can't prove it because I don't know what's in their bombs." Robinson agrees that the United States can only speculate. "I would say we're ignorant" of Soviet bomb designs, he says.

In the end, the debate between test ban advocates and laboratory officials brings into sharp relief several key features of a CTB. By itself, it will clearly not end the arms race. Bomb designs would indeed be frozen, but enough are available on the shelf to keep arsenals on both sides well stocked in the absence of further limitations. Confidence in the reliability of bombs may be diminished, but this might be offset by "super-reliable" weapons designs. Given the professional enthusiasm of the labs' employees it is hardly a surprise that the CTB is one experiment they don't wish to try.

THE GENOCIDE TREATY: AN EXAMPLE TO FOLLOW

Mr. PROXMIRE. Mr. President, a Psychology Today study of non-Jewish rescuers and their Jewish survivors examines the motivation for these individuals to risk their lives voluntarily for the sake of the Jews.

The study evolved from an ongoing project begun in 1981 by Stephen P. Cohen at City University in New York, which later merged with the work of Samuel Oliner of Humboldt State University in California to form the Altruistic Personality project.

So far the project has interviewed 220 rescuers and plans to interview 300 more in the United States, Canada, Europe, and Israel. The Psychology Today report consists of interviews with 25 rescuers and 50 survivors in the United States and the examination of historical documents about the rescuers and those they saved.

The inquiry asks what motivated those individuals to reach out to others, whom they had often never met before.

The motivating forces cannot be reduced to a formula or single personal characteristic. However, some common trends appeared.

Findings show that the rescuers, for the most part, fell into two groups; those who felt ethically compelled and those who personally identified with the victims. The motivation of each individual is generally revealed by his answer to the central question of why he rescued the victims.

The ethics-oriented rescuers would almost instinctively ask "what do you mean?" eventually matter-of-factly stating that "it was the right thing to do" or "I was doing what a human being should for another human being."

A young Catholic rescuer, who was 16 when Germany invaded Poland in 1939, says her parents taught her not to distinguish between people based on religion. Family tradition dictated a deep concern for others.

The actions of those rescuers who identified emotionally with the victims, on the other hand, often sprang from strong personal attachments or from empathy based on the rescuer's own vulnerability to persecution.

In some instances, a child, a spouse, or a sibling of the rescuer had been persecuted. A Ukrainian immigrant,

whose in-laws hid Jews, says "it was easy to understand what the Jews felt because the Jews and Ukrainians were in similar positions everywhere."

No matter what motivated these individuals, the stories all echo the traumatic nature of their roles. The rescuers and the victims all shared an uncommon preserverance.

Living under constant threat of exposure and death these people held fast to their convictions in aiding the Jews. This type of bravery required something beyond moral conviction. It demanded love, compassion, and caring for the victims.

Mr. President some 40 years since the end of the Holocaust these people still stand proud of the humanitarian acts in which they participated.

These acts endangered their own lives and the lives of their families. Yet these average citizens, many of whom will never be recognized for their heroism, took the risk for the sake of their fellow man.

Mr. President, the United States, having pioneered the original drafting of the Genocide Treaty and invested countless hours and money in the hunt for Nazi war criminals, has far less to lose than did the rescuers. As a nation, the risk has already been taken.

This country made a commitment to justice, responsibility and care long ago. Ratification of the treaty would enhance the promise made to promote human rights.

It would serve as a reaffirmation of the U.S. strong commitment to the objectives of this convention. The Senate's ratification of this convention on the prevention and punishment of the crime of genocide will echo in a small but significant way the moral and political courage exemplified by the immigrant rescuers and others who are still seeking to bring the Holocaust perpetrators to justice.

Mr. President, I suggest we allow the example set by this extraordinary group of individuals—and our strong ethical principles—to motivate us as we consider the Genocide Treaty. I urge that the treaty be ratified without further delay.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that Reaganomics has resulted in a decline in the poverty rate.

The administration has even gone so far as to proclaim that the poverty statistics represent a "triumph" for Mr. Reagan's economic policies.

Well, here are the facts, Mr. President. Last year, the national poverty rate did in fact dip by nine-tenths of a percent to 14.4 percent.

And yes; this decline was the largest 1-year decrease in more than a decade.

But here are a few facts that cloud the myth that the Reagan administration has beaten back poverty:

First. The 14.4 percent poverty rate in 1984 was still higher than it ever was from 1970 to 1980, the decade before the Reagan administration.

Second. We still had more people living in poverty in 1984 than we did in 1964, the year President Johnson declared his war on poverty.

Third. The poverty rate for blacks still is three times higher than the poverty rate for whites.

Fourth. The poverty rate for black children under six increased to a staggering 51 percent in 1984.

Fifth. The mortality rate for infants 1 to 12 months old, in fact, appears to be increasing.

Sixth. And the gaps between rich and poor also seem to be increasing.

Are happy days here again, Mr. President? No way.

It is the cruelest of myths to believe that this administration has triumped over poverty. The facts tell a different story.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

BALANCED BUDGET AMENDMENTS

The PRESIDING OFFICER. Under the previous order, the time until 4 p.m. is equally controlled by the majority and minority leaders.

Mr. PRYOR. Mr. President, I do not have a statement. I only have a question to ask the majority leader, if I could at this time.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I will be happy to yield.

Mr. PRYOR. I would like to pose a question to the majority leader and that is, I wonder if the majority leader would lay down a scenario about tomorrow, whether we adopt cloture or not this afternoon, as to when we might get this bill sometime tomorrow to the House for them to debate, not only the debt ceiling increase but also the issues as propounded by Senators GRAMM, RUDMAN, HOLLINGS, and others. Is this House going to have an opportunity tomorrow or tomorrow night to debate this at any period or any length, assuming we pass it and send it over?

Mr. DOLE. Let me indicate first that yesterday I was able to get an order for Monday so that Members will be apprised of the Monday schedule. We will come in at 12 noon tomorrow and, depending on what happens today there could be a vote as early as 1:30, maybe more than one vote.

As to what the House may do, again I have had a brief telephone visit with the chairman of the Ways and Means Committee on Friday, Chairman ROSTENKOWSKI, who indicated that they would like to study this proposal and as a result would like to send us a short-term extension of the debt limit. I have also discussed it with Congressman TOM FOLEY, one of the senior Democratic Party leaders in the House, who said pretty much the same thing.

As I suggested earlier, it may be that sometime early tomorrow it would be possible for the leaders in the House and Senate to sit down and see if we can figure out some way to preserve the amendment and at the same time avoid a crisis. At least the Treasury tells us it is going to be a real problem sometime this coming week and perhaps as early as tomorrow.

But I cannot tell. If the Senator will help me get cloture this afternoon, then I could give him a more specific answer.

Mr. PRYOR. I thank the majority leader for answering my question.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I reserve the remainder of my time.

Mr. BYRD. Mr. President, how much time do the two leaders have?

The PRESIDING OFFICER. Each leader had 15 minutes plus the time that was reserved. Nineteen minutes are remaining for the majority leader, 25 minutes for the minority leader.

Mr. BYRD. Nineteen to the majority leader, 25 to the minority leader?

The PRESIDING OFFICER. That is correct. If neither side yields time, of course, the time runs and is equally divided between the two sides.

Mr. BYRD. Does anybody on my side wish time?

Mr. HART. Mr. President, I wonder if the minority leader will yield me 3 minutes.

Mr. BYRD. Mr. President, I yield 3 minutes of my time to Mr. HART.

The PRESIDING OFFICER. The Senator from Colorado is recognized for 3 minutes.

Mr. HART. Mr. President, on the way to the Senate Chamber today from the airport, I heard one of the news accounts saying that the Senate was in extraordinary session not only to consider the increase in the debt ceiling to $2 trillion but also whether to adopt a resolution to balance the budget.

So far as it goes, I suppose that is a reasonably accurate description of what we are doing here today, but it does not go nearly far enough.

The issue before the Senate, the one we are here to consider—with some care, I hope—is not whether to balance the Federal budget but how to balance the Federal budget, whether the proposal put forward by the Senator from Texas and others or the proposal of the Senator from Florida and others is the best way to do that.

I would hate for this debate, if you want to call it that, to get down to the question of whether we are for or

against balancing the Federal budget. That is not the issue. The issue is how we balance the Federal budget and whether we do it in the best way possible.

If there is a Senator here who is against balancing the Federal budget, I think that individual should be heard from. I have not heard from that Senator yet, on either side of the aisle; and I think that the sponsors of the pending measure and the sponsors of the alternative measure are for balancing the budget. That is not the issue before the Senate.

The issue before the Senate is how to balance the budget, how many items in that budget will be on the table to consider, and how fairly we go about balancing the budget. That is what I hope the U.S. Senate is undertaking this weekend and this week.

I hope that those who translate our actions to the American people understand the difference between whether we are going to balance the budget and how we balance the budget.

I yield back the remainder of my time.

Mr. HOLLINGS. Mr. President, will the Senator from Texas yield me a few minutes?

Mr. GRAMM. I am happy to yield to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator form Texas has no time. The time is controlled by the majority leader and the minority leader.

Who yields time?

Mr. BYRD. Mr. President, surely, there is someone on the other side who is acting leader at this point and who could yield time to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The minority leader has time remaining.

Mr. BYRD. I understand that.

Mr. President, how much time does the distinguished Senator wish?

Mr. HOLLINGS. Just 2 or 3 minutes. I wish to respond to the distinguished Senator from Colorado.

Mr. BYRD. I yield 3 minutes.

Mr. HOLLINGS. I thank my distinguished leader for his generosity and courtesy. I did not want to use his time in opposition to the comments of the Senator from Colorado.

The Senator from Colorado and I have tried from the beginning to act responsibly on the deficit—we did not vote for Reaganomics. At the time of the tax cuts in 1981, the Senator from Colorado and I were discussing how to balance the Federal budget, and the Reaganomics approach was that we are going to do it by growth, we are going to grow out of the deficit.

To give us both credit, when we were asked how we were going to deal with the deficit, the Senator from Colorado and I said, "Responsibly, by paying for what we were buying or spending—namely, put up the revenues."

We have been on the same side, voted on how to do that, not only in 1981 but also in 1982, 1983, and 1984, and we have spoken out for that approach on the campaign trail.

I think it should be brought to the attention of our colleagues that when we were all admonished about proposing taxes and revenues and an oil import fee in the New England primaries during the 1984 Presidential campaign, the distinguished Senator from Colorado recommended all those things, and he cleaned us all out.

So that is always a constant reminder to me, when Senators and these so-called pollsters and journalists, all go on about what America believes and America thinks. Well, here comes a Senator from the Midwest and recommends an oil import fee, and he took New Hampshire, Vermont, Massachusetts right on down the line.

But we lost on how to reduce the deficit. That is the only reason I am in this position. The Senator from Colorado and I tried and fought the good fight on the same side as to how to do it, but they are not listening to how, and you cannot even get their attention on how.

So I do not know that we are going to balance the budget this way, but I do know that you can get some truth in budgeting. We are going to take what the Senator from New Mexico, the Budget Committee chairman, and what the Senator from Florida, the ranking minority member, described as a $171.9 billion deficit budget, and we are going to say, "Let's try to make that truth in budgeting as best we can." But they do not want to print that figure, because they know that the deficit will be much closer to $190 billion than to the $171.9 billion figure. So in order to be realistic, we are putting in a $20-billion cushion and saying that we will start at $191.9 billion rather than $171.9 billion.

Some have called this proposal a pig in a poke, but they have failed to acknowledge that there is another pig in this poke. We have Chiles-Byrd. There are two pigs in the poke that are substantially the same. One says, "Let's have some revenues," but I do not want to describe that when the distinguished minority leader has given me the time. But if there is really a pig in the poke, it is the budget we passed.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HART. Mr. President, will the minority leader yield me 30 seconds?

Mr. BYRD. Mr. President, surely, somebody on the other side should be designated to handle the time for the distinguished majority leader. Otherwise, I am having to yield our time to those who support him.

I yield another minute to the distinguished Senator from South Carolina.

Mr. HOLLINGS. I thank the distinguished minority leader for his generosity.

To complete that thought: The pig in the poke is the budget we passed in both Houses. We are trying to take the pig out of the poke, show it to everybody, and then make them keep what they buy. That is truth in budgeting.

All we are doing here is taking the budget we passed 60 days ago, in August and trying to measure it now against the truth of revenues and the projections and the savings that will be had. On that basis, it is less how to balance the budget, than making us use accurate numbers from the start.

The PRESIDING OFFICER. The Senator's time has once again expired.

Mr. BYRD. Mr. President, I hope that the time we yield to those on the side of the distinguished majority leader will be returned.

Mr. HOLLINGS. Mr. President, will the distinguished majority leader yield me 2 minutes?

Mr. DOLE. I think the Senator from Arkansas consumed some of my time, but we will work it out.

Mr. HOLLINGS. Will the Senator yield me 2 minutes?

Mr. CHILES. He already used 5 minutes of our time.

Mr. DOLE. Mr. President, how much time remains on this side?

The PRESIDING OFFICER. The majority leader has 15 minutes remaining. The minority leader has 17 minutes.

Mr. BYRD. We yielded 4 minutes of our time to Mr. HOLLINGS.

Mr. DOLE. Then, I have only 11? I do not think I can yield any more. I have 11 minutes and about five speakers.

Mr. BYRD. We want some of our time back.

[Laughter.]

Mr. DOLE. If you give me the 2 minutes back.

Mr. BYRD. I give the 2 minutes back.

Mr. DOLE. Mr. President, I yield 2 minutes to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I say to the Senator from Colorado that what I am trying to do is to get us to take that first step, to take the budget that we all bragged about and passed, claiming that we had finally gotten some $50 billion in savings, and to stick to it.

We have too many experts in budgetary matters—we do not need more experts in budgetary matters, all we need are experts in the truth.

We should use one rule, Mark Twain's. He said the truth is a very precious thing. It should be used sparingly. If the truth should be used sparingly, then the budget is the place to use it.

Mr. HART. Mr. President, will the minority leader yield me 30 seconds?

The PRESIDING OFFICER. Who yields time?

Mr. BYRD. I yield 30 seconds to the distinguished Senator from Colorado.

Mr. HART. I thank the minority leader.

Mr. President, I thank the Senator from South Carolina for his kind remarks. I think he of all the sponsors of this measure stands in a somewhat unique position. My calculation shows that of 35 or more sponsors only the Senator from South Carolina and the Senator from Connecticut [Mr. DODD] voted against the massive tax cuts in 1981 that have partly contributed to this massive deficit.

So I think I counted 33 sponsors who voted for those tax cuts. The Senator from South Carolina rightly told the Senate and the American people in 1981 this was not going to work, and I applaud him for it.

Mr. HOLLINGS. I thank the Senator very much.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I yield 3 minutes to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas [Mr. GRAMM] is yielded 3 minutes.

Mr. GRAMM. Mr. President, we are hearing discussions today about 1981. Our distinguished colleague from Colorado spent much of yesterday talking about the Gramm-Latta budget.

In that budget in 1981 we promised the American people that if they would adopt that plan it would stop inflation, and we have. We promised the American people that we would put the American worker back to work, and we have created 8 million new jobs under that program. We promised that we would rebuild national defense, and we have. We promised that we would reduce taxes to provide incentives for people to work, save, and invest, and we have. We promised we would save Social Security, and we have.

But the promise we made that we did not keep is the promise of balancing the budget. It seems strange to me that the ones who would stand up now and point the finger at those who did not balance the budget through the program in 1981 should be the ones who are now trying to prevent us from delivering on a promise that is long overdue.

Quite frankly, we started out in 1981 with a 3-year budget that Congress adopted.

The first year we got 90 percent of the savings we sought. The second year, a recession year and election year, we got 40 percent. Congress never did anything about the third year of the budget. Spending grew at 13½ percent last year.

Our tentative estimates for this year, the fiscal year that just ended, show 11 percent growth.

The budget process has clearly failed. That is why we are here voting to raise the debt ceiling to $2 trillion.

Now the proposal of Senator RUDMAN, Senator HOLLINGS, and myself is a simple proposal. We are willing to vote to raise the debt ceiling. We are willing to pay our bills. But we are not willing to do that without calling in the credit cards. To say that I am for balancing the budget but I do not want to do it this way, I am for balancing the budget, but let us not do it now, those are the same words that have been spoken for a decade.

We have before us a simple straightforward approach, an approach that does not transfer power from the legislative to the executive branch, a proposal that does not mandate a specific result, but it is a program that mandates a result. It mandates that we will set out maximum allowable deficits, the President will submit budgets within those deficits, Congress will come forward from committees with budgets that are within those deficits, that those budgets will be binding and if we do not do our job there will be an across-the-board reduction in automatic increases in controllable expenditures.

We have heard continually that this is a complicated proposal, that we need more time to analyze it. We want to stop and debate it. We want to study it.

It is a clear-cut proposal and, as I said last night, if we took the last 10 bills that we voted on and we set out multiple choice tests on what was in those bills and took this proposal and gave the same test, I believe the results would show that Senators have more knowledge of what is in the proposal before us now than any of the previous 10.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOLE. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The majority leader now has 17 minutes remaining and the minority leader has 18 minutes remaining, and that is taking into account the exchange of time between the two distinguished leaders.

Mr. DOLE. Mr. President, I yield 3 minutes to the distinguished Senator from New Hampshire [Mr. RUDMAN].

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 3 minutes.

Mr. RUDMAN. I thank the majority leader and I thank the Chair. I will not need the full 3 minutes. We had 6 hours yesterday.

Mr. President, I think yesterday's CONGRESSIONAL RECORD should be entitled "Everything You Ever Wanted to Know About Gramm-Hollings-Rudman and Something Else Maybe You Did Not Want to Know."

All I want to do this afternoon is have a chance to vote, not on cloture—we will have that chance—but a chance to vote up or down on this proposal.

Now one of the arguments that is being made here, made yesterday and made again this morning, was that we do not really understand this. With all due respect to my colleagues that is simply an attempt to shroud the American public's mind in fog. This is understood. As a matter of fact, the real problem is that it is understood all too well. What is understood is that this mechanism is an action forcing mechanism. It will force this Congress on both sides of the aisle and the President to make choices, something we have not been forced to do up to now.

What we do now is that we fail in all the major policy decisions and we pour the default of our responsibilities into something called the deficit, which is now at $2 trillion in terms of the national debt.

So all I say to my colleagues is let us vote for cloture. Let us let the democratic process work. Let us get the Senate to vote today on whether or not they like this plan or not. If people like it, then let us adopt it. If people do not like it, then let us defeat it. But let us not stall. It is stalling and defaulting of responsibility which has in fact caused us to come to the unhappy moment, whether it is this week or next week, when we will have to stand behind our leader and cast a vote that will extend the national debt to over $2 trillion.

Let me say for anyone who does not know what that means, it means that starting now every family of four in America is paying $34 a week in interest to finance that debt—$34 each week for every family of four.

I say it is time to do something better.

I thank the Chair and thank the majority leader.

The PRESIDING OFFICER. Who yields time?

Mr. MATTINGLY. Mr. President, will the majority leader yield me time?

Mr. DOLE. Mr. President, I yield 1 minute to the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized for 1 minute.

Mr. MATTINGLY. Thank you, Mr. President.

Mr. President, today we are debating raising the Nation's debt ceiling to over $2 trillion. Not 5 years ago, the Nation's debt ceiling stood at $1 trillion. This fact alone, the doubling of our Nation's debt in less than 5 years, is proof that our existing budget process has failed and failed miserably. Moreover, the Nation's debt doubling

in such a short period of time has brought justified public ridicule of elected officials in Washington for their inability to come to grips with their fiscal responsibilities. In fact, by a 4-to-1 margin, Americans feel that reducing the Federal deficit is the most important problem our country faces. With such an awareness by the citizenry of the need to address runaway deficits, the question we should ask ourselves is what are we going to do to reform a system that is not working and will never work.

Mr. President, a number of suggestions have been offered to restore order to the budgetary process, recognizing that the Budget Act of 1974 has failed. Senator THURMOND has suggested the constitutional amendment to require a balanced Federal budget, a measure I have been an original cosponsor of since coming to the Senate. Senator ARMSTRONG, has recommended increased recission authority, another suggestion I have long supported and cosponsored. I, along with Senators EVANS and BIDEN have introduced legislation to give the President 2-year authority to veto individual items in appropriations bills, rather than the current Presidential predicament of take-it-or-leave-it in its entirety. This initiative was debated extensively in July with 58 of my colleagues supporting cloture in our effort to allow consideration of the line-item veto measure. I continue to believe there is strong support for my effort, however, a few contrive to use the Senate rules to prevent an up or down vote on the issue. The attractive feature of the line-item veto is that it would allow the President to reduce unnecessary spending, something the Congress has failed to come to grips with. Overspending is the cause of our Federal deficits. We are not a Nation that is undertaxed—we are a Nation that is overspent.

I believe this Congress will act in some fashion to face the deficit problem. The public and some of us in this Chamber will force that action. They understand better than many Members of Congress that the status quo is a failure. They are not satisfied and will never be satisfied and should not be satisfied until Congress faces up to deficits and runaway spending.

The time has come for action. We've gone too long, voting for spending up here and then going home and wringing our hands over the national debt. I have mentioned several proposals by other Senators that would attack the problem. I have no misplaced pride of authorship in only wanting to see my bill, S. 43, line-item veto considered. But, I want to see something passed in this body, some action taken that will move us back to fiscal sanity. Whether it is enhanced recission, the balanced budget amendment, the line-item veto, or Gramm-Rudman-Hollings, I want to be able to go back home to Georgia and tell them that we are going to deal with the deficits.

The amendment now before us may be the best chance in this session to do something about the problem we all admit exists. This may be the most important vote we take this year. We cannot let this opportunity pass.

I am an original sponsor of the Gramm-Rudman-Hollings amendment and have offered suggestions I think will improve the fairness and effectiveness of the amendment. Like the line-item veto bill and others introduced to correct Congress' inability to deal responsibly with the deficit problem, the Gramm-Rudman-Hollings proposal is not a panacea. Nevertheless, it is an attempt to force Congress to do what it continues not to do: perform and fulfill its fiscal responsibilities.

The Balanced Budget and Emergency Deficit Control Act of 1985, as the Gramm-Rudman-Hollings amendment has been named, amends the budget process to establish a maximum allowable deficit ceiling beginning with the $172 billion deficit set out in the 1986 budget and reduces the allowable deficit in four equal steps to zero in fiscal year 1990. During the 5 years this emergency measure is in effect the amendment will set into place an automatic mid-course correction process to eliminate any projected deficit exceeding the maximum deficit limit for each fiscal year, based on a joint estimate of OMB and CBO. Projected deficits which exceed the maximum allowable deficit limit will be eliminated by reducing automatic increases and controllable expenditures across the board by a uniform percentage. Social Security, however, will be taken off budget and therefore will not be a part of any automatic reduction, a suggestion I brought to the attention of the White House last Friday and the Senate majority leader and author of the bill this past Tuesday, October 1.

The beauty of the Gramm-Rudman-Hollings amendment is that it will force Congress to act. For too long, Members of the Congress have said one thing in their States and districts and voted another in Washington. Again, this amendment will require Congress to "put it's money where it's mouth is." It will force tough budgetary decisions, but that's what we were elected to do anyway. It will mandate forced discipline on a Congress that has put off hard decisions on restoring fiscal sanity to the budget process for too long. For these reasons, this amendment should be passed and enforced.

Mr. President, we are still hearing the same tired voices saying you are upsetting the balance of our Government. I say to them that until we bring balance to the Federal budget, everything is going to be warped and distorted. I say to my colleagues who defend the status quo that the present spending process is dead and it is time to bury the body.

It is time to return to reality and not spend money we don't have.

It is time to leave the "Alice in Wonderland" world this Congress has lived in too long and step back through the looking glass to reality. Everyone living west of the Potomac will be glad to welcome back a Congress that has decided to leave the world of fiscal fantasy, where the Government can spend money it does not have.

It is time for action, Mr. President.

I can make one promise here today. I have never voted to increase the debt ceiling and I never will until this Congress takes dramatic action to address the deficit problem. They say Government will shut down. I say if that is what it takes to force action on the deficit, then let it happen.

In addition, Mr. President, I would just like to say that the Gramm-Rudman-Hollings proposal does deserve an up or down vote.

This body was thwarted already once this year on the line-item veto from allowing the body to have an up or down vote upon an amendment or upon a bill.

I was interested in seeing last night on television some of our colleagues saying that there was a cocked pistol at the heads of the opponents of this piece of legislation. The cocked pistol is not at the opponents of the legislation, nor are we trying to pull a trigger on it. The cocked pistol is at the heads of the American people and of our Government because if we do not do something like this it is going to go off and it is going to go off right in their pocketbooks.

So, in fact, what we need to do is lower that cocked pistol and there is a good way to do it and it is by passage of this amendment because this debt bill should not be passed unless it is amended and the way that we do business is changed in this body and in this Government.

It is time for us to act now. This bill not only needs to be passed, the debt ceiling bill, but this amendment to it needs to be passed and then this amendment should be enforced because this body has not been able to enforce any fiscal restraint.

Thank you, Mr. President.

The PRESIDING OFFICER. The Senator's time is expired.

Mr. BYRD. Mr. President, I yield 4 minutes, or less, to the distinguished Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I thank the minority leader and I thank the Chair.

Mr. President, there are few in this body who have had as much experi-

ence at government balanced budgets as this Senator.

As a fiscal conservative of long standing and one who has offered and supported many well-thought-out and necessary proposals to directly attack the most pressing economic problems of our country, one might presume I would fall in line with the proposal before us. It appears politically astute to do so at this tense moment. We are being maneuvered and herded unnecessarily to "ride the last train" out of the station headed toward the magical ride to Oz and the land of fiscal responsibility.

Be that as it may, I do not choose to ride because from what I understand of this hastily designed and advanced proposal, it may have serious flaws that will adversely affect the interests of the people of my State and my country. With some corrections I might board, but I question the stampede action that is being whipped up, and will not be a party to this measure as it stands. Cloture would all but eliminate possible constructive changes. After all, I remind the Senate, this is supposed to be the most deliberative body in the world. Is it under these conditions? I think not.

There is no legitimate reason for this highly unusual Sunday cloture session. It should be clear to all that we have been over coached into this predicament by design. It is part of the game plan. Not many successful coaches use a strategy that concentrates on a Hail Mary pass for sure victory.

It should also be clear to all that the best debt ceiling measure was called up, complete with the principal shifting sand amendment conveniently timed and attached, as late as possible. It was all orchestrated well. On Wednesday the President called for a clean $2 trillion debt ceiling free of all amendments. On Friday, following a well publicized White House press conference, the game plan was reversed with White House enthusiastic endorsement of the principal amendment that is being peddled on the floor as balancing the budget by not touching Social Security COLA's, ever or never, avoiding any hint of increased revenues even in the form of a minimum income tax on wealthy corporations, and with the President's specific assurances that notwithstanding anything else there would be no relenting on his defense buildup. Who is kidding whom and for what reason?

The only possible reason I can discover for all of this is to get through the President's request to bust through the $2 trillion debt ceiling limit by sugar coating the bitter pill with a less than meaningful deficit reduction package.

I view the measure before us as a hastily and ill-thought-out proposal and an exercise in crisis management. It holds out a panacea when, in fact, it is political fantasy that delays rather than expedites meaningful action on the calamity of debt and deficits that face us.

If we are in serious financial difficulty, which I think we are, why not face the music now, rather than conveniently putting it off, which this measure does in a devious fashion, until after the 1986 elections?

There is no good answer to that question, and I urge my colleagues to think twice and oppose cloture.

I yield back the balance of my time remaining to the minority leader.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, how much time remains?

The PRESIDING OFFICER. The majority leader has 12 minutes remaining and the minority leader has 16 minutes remaining.

Mr. DOLE. Mr. President, I yield 6 minutes to the distinguished chairman of the Budget Committee, Senator DOMENICI.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for 6 minutes.

Mr. DOMENICI. Mr. President, I thank the distinguished majority leader for yielding.

Let me say to my friends here in the Senate, I think we are here today because we are living on borrowed money and borrowed time. I do not think there is anybody that has looked at the situation in our country that would not conclude that the current Federal deficit and the current rate of borrowing by the Federal Government has reached a level that it is just a matter of time until this borrowing yields something that none of us will like.

I have recently looked at the private sector of the United States, the trade deficit and the Federal deficit. Let me just take a couple of minutes to tell you that I think we have had, for a very long time, a grace period that we are really not entitled to in which to set this Nation on a path toward fiscal balance. Instead of facing up to it, we are squandering this opportunity and it is just getting worse.

This year, Americans will borrow almost $700 billion in domestic nonfinancial credit markets. This will bring total debt outstanding to $6.6 trillion. This growth in debt is led by the enormous growth in Federal borrowing. But make no bones about it, every sector of the U.S. economy is adding debt at a record rate.

Total debt in the American economy has grown at more than 20 percent a year for the past 3 years. This is twice the rate of past recoveries.

Business debt, which is about 35 percent of the total debt, is up 9 percent this year, when the inflation rate is only 3.5 percent. Whether for mergers, new investment, or ordinary business operations, businesses will add $186 billion in new debt this year. And most of this is short term. Short-term business credit is now more than 50 percent of all borrowing. I only tell you that because, if the dam breaks, the nature of the debt is enormously important.

As a result, the share of debt on corporate balance sheets is rising sharply and is now over 60 percent. Last year, American corporations bought back $80 billion in outstanding equity and more often than not turned it into outstanding nonfinancial debt.

Consumers are on a borrowing binge. Consumer credit has grown at historically high rates over the past 3 years. I could give you the numbers, but I will not. I will merely tell you that the credit binge is led by the U.S. credit binge in terms of its own record debt. We are hardly going to be able to service this in the near future.

Let me give you a number that is startling. This year—and I say this particularly to my friend from Louisiana, who has for years worked on the tax laws of this country—this year, one-half of all of the individual income taxes collected in this country—one-half—will go for nothing more than servicing the national debt. For those individuals who believe they are paying income taxes to pay for Federal programs when they write their check and send it in to the IRS, they ought to know that one-half is to service the past debts of this country.

Now there have been times when we had to spend to win a war. But now there is absolutely no excuse for us to continue on this course of action unless we expect some miracle to cure it for us. And there are no miracles. Nothing short of action on the part of the Congress and the President of the United States acknowledging that we are spending about $180 billion a year, in the best of times, more than we are taking in. Nothing short of doing something about it will solve the problem.

We are living on borrowed money, and, in my opinion, on borrowed time. But for the amelioration of the energy crisis, which we had little to do with, but for the fact that foreign countries are sending enormous amounts of money to use to pay out debt, and but for inflation which dropped dramatically for various reasons, we would not be able to service our debt.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOMENICI. Mr. President, will the distinguished majority leader yield to me 1 additional minute?

Mr. DOLE. I yield, Mr. President, 1 additional minute to the Senator from New Mexico.

Mr. DOMENICI. Some would ask, will this process that is being recommeded here today work? I can say to you there is no process that is a lead-pipe cinch to work. Congress and the Presidents can find ways to make anything we try not work, and they may succeed. But there is one thing that has been incorporated into this amendment. If we do not do our work, this process will force something to happen. So if we do not do the job, it will be done for us.

The PRESIDING OFFICER. The senator's time has once again expired.

Mr. DOMENICI. Mr. President, will the distinguished majority leader yield 1 additional minute?

Mr. DOLE. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The majority leader has 5 minutes remaining.

Mr. DOMENICI. Mr. President, I will use only 30 seconds.

Those who worry that it will not work, let me tell you, it will work a well as anything we can do. If we choose not to produce a budget, not to do the things we have to do, then there is a forcing mechanism. We will not like it because it will be harsh medicine. But all options will be before us as we proceed with our processes to try to get the job done. None, other then Social Security, will be out of our grasp. All accounts, all entitlements, military, and all other accounts can be addressed by us in a normal manner. If we do not choose to do it, the President will do if for us.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time?

Mr. BYRD. Mr. President, I yield 1 minute to Mr. LEVIN.

The PRESIDING OFFICER. The Senator from Michigan [Mr. LEVIN] is recognized for 1 minute.

Mr. LEVIN. Mr. President, I thank the minority leader. I hope today is not a vote on where you are on the deficit. Many of us that are going to vote against cloture have over and over again put our political careers on the line in voting for deficit reduction. The vote today is whether or not in correcting the deficit we want to take a few days or a week to have an opportunity to look at a proposal which has severe ramifications on so many programs and activities of this country. I tell my friends who are proposing this, we have tried for the last 2 days to get a copy of that OMB document which is so critical to this whole process. In the name of decency, and in the name of responsible legislation, we have a right to a copy of the critical document put out by the OMB which is incorporated by reference in this amendment. We all have a right to a copy of it. We have been trying to get a copy of it because that determines what is controllable, and what is not.

Reduce this deficit. It is long overdue. Keep the hammer over us. I am all for it. But let us be decent with each other and legislate decently. Keep a debt reduction amendment over our heads. Give us the week to know what we are doing.

If I have 30 more seconds, I would like to ask the question of my friends who are the sponsors of this amendment—who are not here on the floor. I do not want to catch them by surprise. If they do come back to the floor, I would like to tell us the answer to this question. We know what this amendment says—that all relatively controllable expenditures must be reduced by a uniform percentage in the President's sequester order. We understand that. But we have gotten different answers on the question of whether or not every project, program, and activity must be reduced by a uniform percentage.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LEVIN. Mr. President, I would like the answer to that question.

Mr. BYRD. Mr. President, I yield 4 minutes to Mr. CHILES.

The PRESIDING OFFICER. The Senator from Florida [Mr. CHILES], is recognized for 4 minutes.

Mr. CHILES. Mr. President, I think the Senator from Michigan is helping to put this debate in perspective today. We are not right now debating merits of the Gramm-Rudman proposal or the Chiles-Byrd proposal. We are talking about whether we should adopt cloture right now—today. What happens if we adopt it? If we do, we are not going to be able to get a chance to get up amendments. So we are going to lose that. What are the Democrats basically asking for? One, we are dealing with the debt service question. What do we do about the debt ceiling? So I think our leader has said we would like to have 10 days, 2 weeks, 14 days or 15 days, to look at this thing to see how we should draw it. We have a way of doing it. They have a way of doing it. Senator JOHNSTON has a third way of doing it—to get a little time in which we can look at this, and to cover that time, if you have problems on extending the debt ceiling. We will furnish the vast majority of our votes to extend the debt ceiling for that 14 or 15 days so we will be able to look at this. Everybody, I think, will say this is a very far-reaching proposal. We know it has a lot of consequences to it.

When I came here, I was told this was the greatest deliberative body in the world. Is this greatest deliberative body in the world supposed to be panicked into having to vote for this Gramm-Rudman proposal right now, and lock it in? Is the man that was able to panic the House of Representatives in 1981 now able to panic the U.S. Senate in 1985? It is his heritage. Maybe he has done it there, and he should be able to do it here. But I appeal to anybody that has not sort of made up their mind yet, you know, give us a chance to look before we have to leap. That is the basic thing. On the surface of it, does it look like there might be some problems?

I can tell you, I have tried to read this thing. It was a floating document. Remember it got modified. Remember, we could not find a written copy of it. But as I read this document, what happens in a recession? I say to the Senator from Louisiana, I will bet you he thinks the definition of a recession is two quarters of negative growth. That is what I have been told is a recession again since I got here. The Labor Department said that is the statistic. I always thought that was a recession. Do you know what is a recession under this Gramm-Rudman proposal? It is when OMB estimates that there is going to be a recession. That is when there is going to be a recession. Do you know how many times in the history of OMB they have estimated or they have acknowledged that there was going to be a recession? Never, never, never, never, never. Never have they acknowledged there is going to be a recession.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BYRD. Mr. President, I yield another minute to Mr. CHILES.

The PRESIDING OFFICER. The Senator from Florida [Mr. CHILES] is recognized for 1 additional minute.

Mr. CHILES. Mr. President, that is one proposal. What happens if there is a recession? It says the President may do something. He suspends this document, or he may. I would think that there is a little problem with giving the President that kind of power. I would think that what we are doing is we are giving to the man that has been our problem in trying to solve the deficit all the power, and taking it all away from ourselves. There has to be some better way to do this. I think we can sit down 2 weeks, 14 days, look at this soberly, having the deficit still over us, we have the same hammer. But, no. The mood is we are going to panic those boys. We are going to make then lock it in now. We are not going to allow them a chance to amend it. We are not going to allow them a chance to read it. We are not going to look at whether defense contracts are covered. We are not going to look. Are farm programs covered? A lot of people say they are not. I do not think they are. Can we spell out?

We should turn down this cloture motion today.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HATCH. Mr. President, we have before us in the Gramm-Rudman amendment an opportunity to do something that has been one of my goals for several years. In fact, the gradual reduction of the deficit over a specific number of years to achieve a balanced budget was a proposal which I made as an amendment to the fiscal year 1984 resolution on the budget. My distinguished colleague and now prime sponsor of this amendment, Senator GRAMM, was then a Member of the House and a strong ally in our efforts in 1983. For all of these reasons I am pleased to be a cosponsor of this legislation.

The proposal makes an excellent companion piece for the balanced budget/tax limitation amendment to the Constitution which I expect to be considered soon by the Senate. The Gramm-Rudman proposal would require a discipline in the Congress, a discipline which will eventually be required on a permanent basis by the balanced budget amendment. Gramm-Rudman is an emergency measure, but in view of the $200 billion deficits which continue despite economic recovery, it is an emergency measure which should be looked at seriously by every Member of the Senate.

Legislation to achieve a balanced budget in the near future is a necessary effort to reestablish the confidence of the American people in the ability of the Congress to control itself in a fiscal sense. For too many years now, the congressional answer to deficit problems has been an increase in taxes. As we can see, that approach has not worked. In fact, it had been popular for several years to blame the 1981 across-the-board tax reductions for our deficit problem. One way to lay this falsehood to rest is to look at Federal revenues and spending as a percentage of national income. Comparing these figures as percentages of national income measures them against a relatively stable background and also illustrates the increasing burden of Federal financing. In 1973, revenues were 23.8 percent; but in 1985 they were still at 24.3 percent. In contrast, in 1973, Federal spending amounted to 24.3 percent of national income; but in 1985 it surged to 31.2 percent, a 6-point increase. Even taking into account the business cycle's effect on national income, the point is clear. The deficits are not the result of a lack of revenue, Federal spending is to blame.

The past record of tax increases leaves us with no faith in that route as a solution to our problem of continuing deficits. Some of the greatest spending increases in the history of the United States took place in the late 1970's when tax revenues were climbing rapidly. Another case in point has been the addition of new tax increases since the across-the-board reduction in 1981. Since 1981, we have added the Tax Equity and Fiscal Responsibility Act [TEFRA], the gasoline tax increase, the 1983 Social Security Amendments, and the 1984 Deficit Reduction Taxes. Added together with inflation-induced tax increases and tax increases required by the 1977 Social Security Amendments, we have eliminated the 1981 tax cuts over the period of 1981–88.

The real importance of the Gramm-Rudman proposal is that it does focus on the spending side of the equation. It does recognize that you cannot constantly increase spending by creating new programs or expanding others without making reductions elsewhere. This is true to the real concept of a budget—that is, a limited amount within which you must make hard decisions. This is where Congress has failed in the past, by not reducing spending to make room for new programs. This is clearly demonstrated by the fact that we have been, on the average, $28 billion over our first budget resolution spending limits in the last 5 years.

This same concept applies to the portion of the Nation's output and capital consumed by the Federal budget. Each dollar removed for the economy is a dollar unavailable for the private sector. Morever, it is a dollar's worth of additional disincentive to work, invest, innovate, and take risks—all of the activities which we count on to keep the economy going. The truth is that the real measure of the "tax" on the economy is how much the Government spends. Changing the portion of that "tax" collected by the IRS or the Bureau of Public Debt, as a tax change would, does little to change the aggregate economic burden on the Nation.

Mr. President, I look forward to continuing my support for the principles behind the Gramm-Rudman proposal and hope that all my colleagues see the wisdom of its enactment.

Mr. GLENN. Mr. President, I favor the idea of reducing—and eliminating—the budget deficit in a short time.

It's harsh medicine, but it's medicine we unfortunately need at the present time.

It is harsh, because it forces fiscal policy into a single, unalterable course. Like pointing a ship in the right direction but welding its wheel to the deck, it doesn't leave enough flexibility for the winds and currents of changing economic conditions. But it does provide a plan—which we sorely need—of bringing about a balanced budget.

I am sure the bill is well intentioned. Hidden in the bill, however—this particular bill—are provisions that could do tremendous damage to our country.

It allows a few economists within the Office of the President to hold the country hostage over the disposition of billions and billions of taxpayer dollars.

It gives the President, in effect, a line item veto over the Federal budget; something the Congress has never allowed to happen despite several attempts by previous Presidents.

By its crude formula of across-the-board cuts, it seriously threatens a breakdown in essential government services such as maintaining the air traffic control system or providing medical care for our senior citizens.

It threatens, through a hidden feature, to cut drastically our defense readiness posture and personnel accounts.

Under this bill, the possibility of billions in budget cuts hangs on the average of estimates by a few economists at CBO—a nonpartisan service arm of the Congress—and the Office of Management and Budget—a truly partisan arm of the President. There is enormous potential for abuse here, in the introduction of partisan budget projections to show the workings of the bill towards the President's advantage.

Under the bill, the President can veto any budget adjustments Congress passes, but the formula adjustments of the bill automatically go into effect if Congress cannot act. This means that Congress would hand to the President the ultimate power to decide where these cuts are going to take place.

When these formula cuts take place, individual programs, projects, or activities of the Federal Government cannot, under the terms of the bill, be "eliminated." But the bill does not prevent delay, substantial weakening, or severe disruption of program administration. The President, therefore, has an effective line item veto over individual programs. This would be an extremely unfortunate situation that lays itself open to partisan politics.

As an example, under the bill, while Social Security payments themselves would not be touched, the administration of Social Security payments would be. This raises the possibility of late checks, delayed enrollment of new Social Security recipients, and other program deficiencies.

Concerning defense, under the bill, prior year contracts for weapons systems would be untouched. This means that 80 percent of defense reductions would probably come out of military readiness and personnel accounts. This would be catastrophic for our military security posture.

Would this then be a government by the people and for the people? Of course not. It is government by the White House and for the White House.

Mr. President, I do not blame President Reagan for supporting the

Gramm proposal, because it permits him to avoid the hard choices of leadership. He can support this proposal and put all responsibility on the Congress. The facts are, Mr. President, that President Reagan, with all the thousands of people in the executive branch to help him, is charged under the Constitution with the responsibility to submit a budget to the Congress for its consideration. If he truly believes in a balanced budget, then submit it to us. That's his responsibility. Instead of that, last January, the President submitted to the Congress the most unbalanced budget in all of American history.

Mr. President, although this bill is well intentioned, it fails to deliver its promise of balancing the budget without disastrous consequences to the very fabric of the Government. In its details lurk some serious threats to the provision of essential services. Therefore, I must vote against cloture on this amendment and urge my colleagues to do likewise.

Mr. THURMOND. Mr. President, I want to commend my distinguished colleagues Senator GRAMM, Senator RUDMAN, Senator HOLLINGS, and the other primary sponsors of the proposed Balanced Budget and Emergency Deficit Control Act of 1985. They have given us the opportunity to soften the blow that will surely be felt by our constituents when they learn that the debt ceiling of the Federal Government has exceeded the horrendous figure of $2 trillion.

Perhaps I err, however, when I conclude that the citizens of this Nation will be surprised by a $2 trillion debt. Have they not observed, after all, that Congress has been able to balance the Federal budget only once in the past quarter century? Have they not cringed as the level of our budget deficits have spiraled alarmingly during that period? Have they not urged Congress to get its fiscal house in order?

Mr. President, the fact is, our citizens are painfully aware of the failed fiscal habits of Congress which seriously threaten the economic future of the Nation. They are aware of the consequences of a fiscal system in which there is a virtual absence of serious fiscal restraints upon the ability of the National Government to spend money. So, what they continue to look for today—for what they have been pleading for some time—is for Congress to take the necessary action to reverse our fiscal course.

Mr. President, the amendment before the Senate is, I believe, an excellent step toward a return to fiscal responsibility. It would amend the budget process and mandate annual reduced deficits in each of the next 5 years, giving us a balanced budget in fiscal year 1991.

I am pleased to support this amendment and was pleased to join last week as a cosponsor. I believe its passage would be welcomed by the citizens of our Nation.

I want to remind my colleagues, however, that in the past, statutory efforts to balance the budget have failed. I believe what is ultimately needed—indeed, what is long overdue—is a balanced budget constitutional amendment. For many years, I have believed that only such an amendment can provide the external constraint that is necessary to reverse the spending tendencies of Congress. Accordingly, I have introduced the balanced budget amendment in the Senate for more than two decades.

I do not believe, then, that enactment of the amendment offered by Senator GRAMM, Senator RUDMAN, and others will in any way obviate the need for a constitutional amendment. I am hopeful that the Senate will consider and approve such an amendment in the near future.

Mr. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The minority leader has 6 minutes remaining.

Mr. BYRD. Mr. President, when Mr. Reagan became President, he stated that the accumulated national debt of this country over a period of 191 years could be shown by a stack of $1,000 bills which would reach 67 miles into the stratosphere.

In the 5 years between that time and now—1981-85—that stack of $1,000 bills would now be 67 miles higher. In other words, the national debt has increased in the last 5 years as much as it had accumulated over the first 191 years.

It has doubled in the 5 years of the Reagan administration.

What we see here is the supply-side economics chickens coming home to roost on a debt limit extension bill.

We are going to vote shortly on cloture on the Gramm amendment. We are concerned—those of us who want to balance the budget but who do not understand the full implications of this amendment—we are concerned about the consequences. It will shift too much authority from the legislative branch to the executive branch. The people of this country will have their priorities determined—not by their elected representatives in the Congress but by one man in the oval office and the bureaucrats and political appointees who will advise him.

Programs critical to the security, the health, and the growth of the Nation could be all but wiped out.

What are some of those programs? Soil conservation, agricultural research, and farm programs; veterans health services, Medicare, SSI, NIH research on cancer, heart, stroke and other diseases; educational programs that are critical to the literacy and education of our population; troop readiness, fuel, ammunition, training, operation and maintenance.

In addition, if we enact the Gramm amendment without change, it will be unfair because the burden of the deficit reduction will fall most heavily on many of those individuals in this country and those programs which have already suffered from major cuts during the past 5 years beginning with 1981.

We all know what brought on this tremendous deficit and this tremendous debt.

First, in 1981 a tremendous tax cut amounting to $749 billion over 5 years; a tremendous defense appropriation amounting to $1.5 trillion over 5 years. I must confess I voted for that tax cut because the people back home said, "He is a new President, give him a chance."

So I gave him a chance in voting for that tax cut, and I have regretted it ever since. I said then that it was a tax cut that was unfair and favored the rich and would increase the deficit. Mr. President, here we are faced on the Sabbath with a vote to invoke cloture on an amendment about which we do not know the full implications. We do know, as I have said, that the Gramm amendment would cause those who have already borne the major burden in the first 5 years of budget cuts, to make further sacrifices while some major profitable corporations, that have escaped payment of Federal income taxes, and very high-income individual taxpayers some of whom pay little or no income taxes would walk away from the wreck scot-free.

On the other hand, the amendment that Mr. CHILES and I hope to offer would at least make those profitable corporations, that pay no income tax whatsoever, and those individuals who enjoy very high incomes—not middle class—but those who enjoy very high incomes and pay only little or no taxes would be made to share the burden in reducing the deficit. That is what Mr. CHILES and I would do, and our amendment would also balance the budget within 5 years.

Now let us take a look. The date of the arrival in the Senate, from the House, of the joint resolution was September 9. The date it was placed on the Senate calendar was September 26. It was not called up for Senate action until Thursday, October 3.

The modified Gramm amendment was offered in the afternoon of Friday, the day before yesterday, and a cloture motion was slapped on it immediately. So how much time have we had in which to study and debate it? We have had since Friday. This amendment has had no hearings in committee, has had no markup in committee, has had no committee report—I am talking about the Gramm amendment that we are going to be voting cloture on in the next few minutes.

We have had very little time to even discuss it.

So here we are, brought in on a Sunday to invoke cloture on an amendment on which we have had very little time even to study and debate. Very few Senators know what the Gramm amendment really does.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BYRD. I ask unanimous consent that both sides be given an additional 2 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BYRD. Mr. President, this is what we ask for: I have proposed to the distinguished majority leader—on Friday and on yesterday—that we extend this debt limit for a very short period, say to October 18. That is what my motion to recommit would provide for. I have also proposed that, during that brief period, we will agree on a time for debate and vote on the Gramm amendment, on the Chiles-Byrd amendment, and on other amendments.

There are those who say, "Well, this is just an effort to kill the amendment."

Mr. President, if we extend the debt limit for just, say, 2 weeks, the Government can continue to borrow to pay its bills. At the end of that period or before, the House will send over another debt limit extension. It cannot be avoided. We have to have it. There is no way of avoiding further action on the debt limit. In the meantime, the Government can continue to borrow, and we can have a few days to better understand the consequences that will result from adoption of the Gramm amendment. We can legislate in an orderly way on that amendment and other amendments to balance the budget and reduce the deficit to zero.

Mr. President, I make that offer again to the distinguished majority leader. There is no way of avoiding this. There would have to be another debt limit extension after the brief extension. When that other debt limit extension is before us, we can vote on these amendments, and we can agree on time limitations thereon today or tomorrow.

Mr. President, we are not trying to filibuster. Those on the other side have had the floor as long as we have.

Mr. President, we Democrats also want to balance the budget. All we want is to do it in a fair way and orderly way that will enable us to understand what we are legislating on, so that the burden of lowering the deficit will be fair and equitable, and will promote rather than endanger the security, health, and economic growth of the Nation.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I thank the distinguished minority leader and all the others who are here today participating in the debate. I must say at the outset I have no doubt in my mind there are some who have legitimate concerns; some on each side who have legitimate concerns. I would guess that eventually there might be more votes for the amendment on the Democratic side than will be indicated in today's vote.

As I look over the history of how people voted on the Senate budget resolution, how they voted on the balanced budget amendment, how they voted on the line-item veto, and how they vote on any spending cuts, I think we have to take that in mind.

There are some in this Chamber who do not want to cut spending. They want to talk about the deficit. They want to raise taxes and cut defense. That is it. Cut defense and raise taxes.

I no not believe that will get us where we need to go.

Whether there are 10 in that group, 20 in that group, 30 in that group, or 40 in that group—there may be some on each side. But we have a rare opportunity today. If, in fact, we want to reduce the deficit, which 78 percent of the American people say we ought to do, we ought to vote for cloture. There can be other amendments offered to the debt ceiling.

I certainly would not stand in the way of a major amendment coming from that side, a Byrd-Chiles amendment, whatever amendment it might be. But I think we ought to know that there are some who are not going to vote for anything. They are going to make great speeches. They will tell us how they want to reduce the deficit, how they are against it, they are against the interest payments on the debt. They just want to talk about it for awhile. Their only aim is to kill it.

They will be the same ones up here on the balanced budget amendment. Some are up here on the line-item veto. Some were making the same speeches on May 10 when we voted on the Senate budget resolution and won by one vote. It is time the American people understand that some do not want to do anything unless it is to dismantle defense and raise your taxes.

Now, there are Democrats and Republicans who feel the other way. Some want to attack the deficit head on. This is a bipartisan proposal. It is supported by Members on both sides, hopefully an equal number. But let us not let a few decide what the majority should do.

Now, if we could make an agreement today to vote on this on Wednesday or Thursday and get the House to vote on it Thursday, dispose of it this week, I would be prepared to try to make that agreement even though some of my colleagues on this side would say, "Oh, you can't do that."

We are down to the nitty-gritty. Tomorrow is the critical day, according to Treasury. If we invoke cloture, then we can start voting on the amendment. This should not be a partisan matter. The amendment is not partisan. The amendment is bipartisan. We cannot pass the debt ceiling unless we have Republicans and Democrats voting to extend the debt ceiling. And that has become a bit more partisan in the last few years. But I would suggest that we not pass up this opportunity. These are extraordinary times. This is an emergency. That is why we are here on a Sunday afternoon at 2 minutes after 4. This is why we will be here tomorrow and probably all next week, unless we can bring this to a close.

Again, I do not quarrel with anybody except those few who always make the best speeches and never cast a vote to cut anything unless it is defense or to raise taxes. I think the American people ought to be able to sort those out.

This debate will occur time and time again. We will have a balanced budget amendment up here before we leave this fall. I assume we are going to hear some of the same speeches then. It is not perfect.

My time has expired. I ask unanimous consent to include in the RECORD at this point a statement by the President.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATEMENT BY THE PRESIDENT

This is a momentous day for the United States Senate. Zero hour is approaching. By tomorrow, the Federal Government's cash balances will be virtually exhausted and we will be facing a financial emergency.

The choice before the Senate is clear: to meet its responsibilities by approving the Gramm-Rudman-Hollings Amendment to bring deficits down, thereby permitting the debt ceiling increase to pass, or, to resort to a temporary quick-fix that will only postpone the day of reckoning and raise the price all of us must pay.

This latter course would be imprudent, unwise and unsatisfactory. The American people have grown very weary of delays, excuses and inaction. They cannot accept that this Government is incapable of living within a reasonable budget, when their families can and do live within their budgets.

I'm confident that the people are united with me, the Republican leadership and many other Republicans and Democrats in urging the Senate—seize this moment of opportunity; move now to pass the historic Gramm-Rudman-Hollings Amendment that will deal decisively with deficits, and give our Nation a balanced budget by 1990.

There is no problem that we Americans cannot fix, if only we have the faith, unity, and courage to act. The days of delays have run out.

Mr. DOLE. Mr. President, it seems to me we have an opportunity now. I

do not think we are going to get cloture; I am realistic, but we should get cloture. It is not enough to stand up and say this is not a vote on reducing the deficit. It is a vote on reducing the deficit. You may be able to explain it to the people back home. But they are tired of explanations with no results. They do not want any more press releases from my office or your office. They want us to vote to do something and I think the time is now.

CLOTURE MOTION FILED ON MOTION TO RECOMMIT

Mr. BYRD. Mr. President, I send a motion to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion made by the Democratic Leader [Mr. BYRD] to recommit House Joint Resolution 372 with instructions.

Robert Byrd, Alan Cranston, George J. Mitchell, Lawton Chiles, Jim Sasser, John Melcher, John Glenn, John C. Stennis, Paul Sarbanes, Tom Eagleton, Gary Hart, William Proxmire, David Pryor, Carl Levin, Paul Simon, Don Riegle, and Wendell H. Ford.

CLOTURE MOTION ON AMENDMENT NO. 730, AS MODIFIED

The PRESIDING OFFICER. One hour having passed since the Senate convened, the clerk will now report the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment No. 730, as modified, to H.J. Res. 372, a joint resolution increasing the statutory limit on the public debt.

Bob Dole, Al Simpson, Bob Packwood, Phil Gramm, Rudy Boschwitz, Chic Hecht, Jake Garn, Malcolm Wallop, Ernest F. Hollings, Orrin Hatch, Steve Symms, David Boren, Thad Cochran, Warren B. Rudman, John Danforth, Slade Gorton, Mark Andrews, Gordon Humphrey, Strom Thurmond, Mitch McConnell, Bill Cohen, Edward Zorinsky, Richard G. Lugar, John Warner, Frank Murkowski, Alphonse D'Amato, Ted Stevens, Chuck Grassley, Daniel J. Evans, Jesse Helms, Barry Goldwater, Bob Kasten, James A. McClure, Paul Laxalt, Don Nickles, James Abdnor, Paul Trible, Pete Wilson, and Pete Domenici.

CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The bill clerk called the roll and the following Senators answered to their names:

[Quorum No. 17 Leg.]

Abdnor	Gore	Metzenbaum
Andrews	Gorton	Mitchell
Armstrong	Gramm	Moynihan
Baucus	Grassley	Murkowski
Biden	Harkin	Nickles
Bingaman	Hart	Nunn
Boren	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Proxmire
Bumpers	Hecht	Pryor
Burdick	Heflin	Quayle
Byrd	Heinz	Riegle
Chafee	Helms	Rockefeller
Chiles	Hollings	Roth
Cochran	Humphrey	Rudman
Cohen	Johnston	Sarbanes
Cranston	Kassebaum	Sasser
D'Amato	Kasten	Simon
Danforth	Kennedy	Simpson
Denton	Kerry	Specter
Dixon	Lautenberg	Stafford
Dodd	Laxalt	Stennis
Dole	Leahy	Stevens
Domenici	Levin	Symms
Durenberger	Long	Thurmond
Eagleton	Lugar	Trible
Evans	Mathias	Wallop
Exon	Matsunaga	Warner
Ford	Mattingly	Weicker
Garn	McClure	Wilson
Glenn	McConnell	Zorinsky
Goldwater	Melcher	

VOTE

The PRESIDING OFFICER. A quorum is present.

The question is, Is it the sense of the Senate that debate on amendment No. 730, as modified, to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt, shall be brought to a close? The yeas and nays are automatic under the rule.

The clerk will call the roll.

Mr. DOLE. Mr. President, may we have order in the Chamber?

M. BYRD. Mr. President, will the clerk repeat the names and the votes cast?

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Arizona [Mr. DECONCINI], the Senator from Hawaii [Mr. INOUYE] and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 57, nays 38, as follows:

[Rollcall Vote No. 203 Leg.]

YEAS—57

Abdnor	Cohen	Evans
Andrews	D'Amato	Garn
Armstrong	Danforth	Goldwater
Bingaman	Denton	Gorton
Boren	Dixon	Gramm
Boschwitz	Dodd	Grassley
Chafee	Domenici	Hatch
Cochran	Durenberger	Hawkins
Hecht	Lugar	Simpson
Heflin	Mattingly	Specter
Heinz	McClure	Stafford
Helms	McConnell	Stevens
Hollings	Murkowski	Symms
Humphrey	Nickles	Thurmond
Kassebaum	Nunn	Trible
Kasten	Packwood	Wallop
Kerry	Quayle	Warner
Laxalt	Roth	Wilson
Leahy	Rudman	Zorinsky

NAYS—38

Baucus	Gore	Mitchell
Biden	Harkin	Moynihan
Bradley	Hart	Pressler
Bumpers	Hatfield	Proxmire
Burdick	Johnston	Pryor
Byrd	Kennedy	Riegle
Chiles	Lautenberg	Rockefeller
Cranston	Levin	Sarbanes
Dole	Long	Sasser
Eagleton	Mathias	Simon
Exon	Matsunaga	Stennis
Ford	Melcher	Weicker
Glenn	Metzenbaum	

NOT VOTING—5

Bentsen	East	Pell
DeConcini	Inouye	

The PRESIDING OFFICER. On this vote the yeas are 57, the nays are 38. Two-thirds of the Senators present and voting not having voted in the affirmative, the motion is rejected.

The majority leader.

MOTION TO RECONSIDER

Mr. DOLE. Mr. President, I enter a motion to reconsider the vote by which cloture was not invoked on amendment No. 730, as modified.

MOTION TO TABLE BYRD MOTION TO RECOMMIT

Mr. DOLE. Mr. President, I move to table Senator BYRD's motion to recommit and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficent second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, would the majority leader give us 3 or 4 minutes?

Mr. DOLE. Four minutes on a side?

Mr. BYRD. Yes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BYRD. Mr. President, I hope Senators will vote against tabling the motion to recommit which I made and on which a cloture motion has been entered.

Mr. President, the situation is this: The Government ran out of borrowing power on October 1. We have since been going along because the Government had enough cash to keep the Government operating. By tomorrow night or Tuesday the cash will run out. Even then, if it had to, the Government could still operate on the basis of the revenues that would be coming in. I am not advocating it, but if anyone wants a balanced budget immediately, you can have it the day after tomorrow. If there is no extension whatsoever of the debt limit, the

Government would not close down; it would simply operate on the basis of the revenues that are anticipated over the next year—$780 billion, whatever it is. What is it? I will ask Senator CHILES.

Mr. CHILES. That is about right.

Mr. BYRD. So the Government would spend only what it is taking in. You would have a balanced budget right away—fast.

Why my motion to recommit with instructions? So as to bring back to the Senate a simple debt limit extension that would carry through to October 18, during which period the Government could borrow and nobody would get hurt. But within that period, we could vote on the Gramm amendment, the Chiles amendment, the Johnston amendment, and others—not a lot of amendments, I should think, would be offered.

How will we be able to do that? If we vote a very temporary extension, the House could send over then another joint resolution to extend the debt limit and when that resolution comes over, and it is bound to come—there is no way out of it, no way to avoid it—this would mean that within the next 10 days or 2 weeks when the House sends over the joint resolution extending the debt limit for the next 3 or 6 or 8 months, whatever, we can attach the Gramm amendment, or the Chiles amendment, or the Johnston amendment. We can have time agreements, hopefully, on these amendments—3 hours on one, 6 hours on another, or less, and so on. The majority leader can be assured that we would vote on the Gramm amendment and we would vote on alternatives, with time limits on all, hopefully, and we will try in good faith. Then the majority leader would get what he wanted: he would get a vote and he would get a vote on the alternatives.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BYRD. I ask for 1 more minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I would like to ask my colleagues to meet in conference after this next vote. We will try to give the majority leader an agreement which will assure the majority leader of what he wants: a vote on the Gramm amendment. It will assure us what we want, a vote on alternative amendments. That is all we want. A little time. We would have a better understanding of the consequences. We would vote on the amendments, and we would vote on the extension of the debt limit. Nobody gets hurt, the Government continues to operate, and the Nation will be better served.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I appreciate the comments of the distinguished minority leader. I do not want to suggest for a moment that these amendments were not offered in good faith, because they were. We just completed a vote and there were 57 Senators who voted, in effect, for the Gramm-Hollings-Rudman amendment. That is a pretty good percentage of this body. I think everybody who voted on it believes in it. Some may decide to vote against it. Hopefully, there are some on the other side, and four on our side, who may yet see the wisdom of the Gramm-Hollings-Rudman amendment.

I happen to believe that when push comes to shove in the next couple of days, the distinguished minority leader will be right. You will bring the leadership of the House, the leadership of the Senate, and someone from the White House, and we will sit down together and see if we can put together a meaningful deficit reduction effort.

But the Government will not shut down tomorrow. Money will still be coming in. There will not be as much coming in. We will not be able to take care of everything, but it will not shut down.

It is critical. We have had a gun at at the taxpayers' heads for the last 10 or 15 years. Somebody suggests we will have a gun at our heads. It is about time. We have been robbing the American taxpayers for years without a gun. I believe the American people are ready for us to say yes just one time, not knowing whether or not it is perfect, and it may not be perfect.

I will bet there are one or two Senators in this body who never know completely what is in every piece of legislation that passes. [Laughter.]

I have to believe that we could have asked questions about the tax bill that passed last year and I will bet 1 out of 100 would not know precisely everything about it. That is not a requirement here, to know everything about a piece of legislation. In fact, it is not a requirement to know anything about it. [Laughter.]

The American people do not know anything about it either, except they know we are broke. They know we are making speeches and putting out press releases saying, "Oh, boy, we are going to cut the deficit." But these same people say not now, not this way, not with a line-item veto, not with a budget amendment, not with the Senate resolution on May 10 which froze Social Security benefits and a lot of other hard choices, and not now, with a bipartisan Rudman-Gramm-Hollings-Boren amendment.

The best way to derail this amendment or anything similar to this amendment is to not table the distinguished minority leader's motion to recommit.

The reason I offered the motion to table is to determine whether or not we really want to cut the deficit, make an effort at it. So I hope that we would table the motion to recommit. We have not lost anything because, even if it is not tabled, we are right back where we were. It will not come up. It will not pass. And I hope we could send a clear signal to the House of Representatives and the White House that the Senate is serious. So when the House comes in tomorrow morning they are going to know that we have had two votes. We had the big majority who wanted to do something, and we had a bigger majority who did not want just a little 14-day extension of the debt ceiling. In my view that would start some positive movement, movement we might all agree upon. So I hope we could support the motion to table.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. All time having expired, the question is on the motion of the majority leader.

The Senator from New Jersey is recognized.

Mr. BRADLEY. Mr. President, I would be pleased to address the majority leader with a question. If we are serious about reducing the budget deficit—and I certainly do not question the motives of the majority leader—then I do not see any reason why on this bill we do not actually enact the laws that would reduce the deficit as opposed to saying that what we need is a process. The Senator from New Jersey wants to cut the deficit——

Mr. DOLE. I yield to the Senator for a question.

The PRESIDING OFFICER. There is no time remaining.

Mr. DOLE. Two minutes.

The PRESIDING OFFICER. Under the regular order, a unanimous-consent request is necessary. There has been no request and no request granted.

Mr. DOLE. Mr. President, I ask unanimous consent for 1 minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Just to respond to the distinguished Senator from New Jersey.

We have tried it the regular way for so long; that is why we are here today with a $2 trillion debt, time running out. The American people think we have gone bonkers because we will not do anything. That is why we are here today, and that is why we ought to table the motion to recommit.

VOTE ON MOTION TO TABLE BYRD MOTION TO RECOMMIT

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the motion to table the motion to recommit with instructions. The yeas and nays have been ordered. The clerk will call the roll.

Mr. BYRD. Mr. President, will the clerk state the entire motion? It is short.

The PRESIDING OFFICER. The clerk will report the motion.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] moves to recommit H.J. Res. 372 to the Senate Committee on Finance with instructions to report back with the following committee amendment:

"Strike all after the resolving clause and insert in lieu thereof the following: That subsection (b) of section 3101 of title 31, United States Code, is amended by adding at the end thereof the following sentence: The dollar limitation contained herein shall not apply during the period October 1 through October 18, 1985."

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Arizona [Mr. DECONCINI], the Senator from Hawaii [Mr. INOUYE] and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 59, nays 36, as follows:

[Rollcall Vote No. 204 Leg.]

YEAS—59

Abdnor	Gorton	Murkowski
Andrews	Gramm	Nickles
Armstrong	Grassley	Nunn
Bingaman	Hatch	Packwood
Boren	Hawkins	Pressler
Boschwitz	Hecht	Quayle
Chafee	Heflin	Roth
Cochran	Heinz	Rudman
Cohen	Helms	Simpson
D'Amato	Hollings	Specter
Danforth	Humphrey	Stafford
Denton	Kassebaum	Stevens
Dixon	Kasten	Symms
Dodd	Kerry	Thurmond
Dole	Laxalt	Trible
Domenici	Long	Wallop

Ford	Matsunaga	Stennis
Glenn	Melcher	Weicker

NOT VOTING—5

Bentsen	East	Pell
DeConcini	Inouye	

So the motion to lay on the table the motion to recommit was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

MOTION TO RECOMMIT HOUSE JOINT RESOLUTION 372, WITH INSTRUCTIONS

Mr. DOLE. Mr. President, let me indicate that I am going to do a couple of things, and then we will have some time for discussion.

First of all, I send to the desk a motion to recommit House Joint Resolution 372 to the Committee on the Budget, with instructions to report back forthwith the following amendment.

The PRESIDING OFFICER. The clerk will report.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the motion to recommit.

The PRESIDING OFFICER. Is there a sufficient second?

The clerk will report the motion first.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] moves to recommit House Joint Resolution 372 to the Committee on the Budget, with instructions to report back forthwith the following amendment:

SEC. . Deficit Reduction Procedures.

AMENDMENT NO. 737

Mr. DOLE. Mr. President, I send to the desk a first-degree amendment.

Mr. BYRD. Mr. President, that is the first amendment and this is the second one, I suppose.

Mr. DOLE. Yes, and there will be one more.

The PRESIDING OFFICER. The clerk will report.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 737:

On page 1 line 2 of the motion to strike after the word "with" insert instructions to report back forthwith with the following amendment:

SEC. . DEFICIT REDUCTION PROCEDURES.

(A) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 738

Mr. DOLE. Mr. President, I send a second-degree amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 738 to amendment numbered 737.

The legislative clerk proceeded to read the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD addressed the Chair.

The amendment is as follows:

Strike "1985" in the matter proposed to be inserted, and insert in lieu thereof the following new section "1985—

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "Sec. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu

thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "301(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is futher amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution."

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph

(A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) HOUSE OF REPRESENTATIVES.—Section 305(a)(6) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATION.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution or the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(B) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the

case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Impoundment Control Act of 1974, the President shall issue an order that—

(I) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of increase under each such provision, and

(II) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by sequestering such amounts of budget authority, obligation limitations, and loan limitations, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce each relatively controllable expenditure by a uniform percentage;

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and the total amount of payments which is to be adjusted under subclause (II) of this clause with respect to relatively controllable expenditures;

(cc) the amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and payments which are to be adjusted with respect to each such relatively controllable expenditure in order to reduce them by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, and loan limitations and each payment described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subclause (I)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under subclause (I)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—

(I) IN GENERAL.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(II) ALTERNATIVE PROPOSALS.—The President may, during the 30-day period specified in subclause (I), submit to each House of the Congress a joint resolution that will, if enacted—

(aa) reduce the deficit for a fiscal year to an amount not greater than the maximum deficit amount for such fiscal year, or

(bb) subject to the requirements of subsection (f) of this section, suspend (in whole or in part) the requirements of this section and of the amendments made by this section with respect to such fiscal year.

Such joint resolution shall be introduced (by request) by the majority leader of each such House on the day on which it is submitted and shall be referred on such day to the appropriate committees of such House. The committees shall report the joint resolution not later than 10 days after the date on which it is introduced. Any committee failing to report a joint resolution within the 10-day period referred to in the preceding sentence shall be automatically discharged from consideration of the joint resolution, and the joint resolution shall be placed on the appropriate calendar. The provisions of section 305 of the Congressional Budget Act of 1974 for our consideration of concurrent resolutions on the budget shall also apply to consideration of any joint resolution submitted under this subparagraph and to conference reports thereon. Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to any such joint resolution.

(C) EFFECTIVE IMMEDIATELY.—Except to the extent that it is superseded by a joint resolution enacted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall be effective from and after its issuance. Any modification or suspension of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit for such fiscal year.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF JOINT RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after the issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives or the Senate may report to its House a joint resolution superseding such order. The report accompanying such joint resolution shall explain in full detail the nature and effects of each provision of the joint resolution.

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any joint resolution reported under clause (i) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such joint resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such joint resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year.

(iii) DEFINITION.—For purposes of clause (i), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under this paragraph and conference reports thereon.

(ii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to joint resolutions reported under this paragraph.

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly or indirectly, whether appropriated or contained in current law. This shall include entitlements and other payments to individuals, open-ended programs and grants, and other similar programs, and shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(a) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in sec-

tion 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in Office of Management and Budget, *Controllability of Budget Outlays*, Report No. BPS0701A (August 27, 1985).

(H) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(5) CONFORMING CHANGES.—

(A) RULES OF THE HOUSE OF REPRESENTATIVES.—

(i) Clause 1.(e)(3) of rule X of the Rules of the House of Representatives is amended—

(I) by striking out "and" at the end of subdivision (C);

(II) by redesignating subdivision (D) as subdivision (E); and

(III) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(ii) Clause 4.(a) of rule XI of such Rules is amended by inserting after "Budget Act of 1974" the following: "and on joint resolutions under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985".

(B) STANDING RULES OF THE SENATE.—Rule XXV(e)(2) of the standing Rules of the Senate is amended—

(i) by striking out "and" at the end of subdivision (C);

(ii) by redesignating subdivision (D) as subdivision (E); and

(iii) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1968 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) WAIVERS AND AMENDMENTS.—Notwithstanding section 904(b) of the Congressional Budget and Impoundment Control Act of 1974, any other provision of law, or any rule or standing order of the Senate or the House of Representatives, no provision of this section, or of any amendment made by this section, may be waived, amended, or otherwise modified except by a joint resolution that—

(1) does so in specific terms, referring to such provision by its designation and declaring that such joint resolution waives, amends, or otherwise modifies such provision; and

(2) is addressed solely to that subject.

(g) Section 1106(a) of title 31, United States Code, is amended by striking out "July 16" and inserting in lieu thereof "September 16".

(h) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1990.

(3) OASDI TRUST FUNDS.—The amendment made by subsection (e) shall apply as provided in such subsection.

(i) It is the sense of the Senate that any reductions in sequestering of controllable expenditures shall not disproportionately be made in lesser populated areas.

CLOTURE MOTION

Mr. DOLE. Mr. President, I send to the desk a cloture motion on the second-degree amendment.

The PRESIDING OFFICER. The cloture motion will be stated.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the pending amendment in the second degree to the motion to recommit with instructions.

Bob Dole, Phil Gramm, Al Simpson, Bill Cohen, Mack Mattingly, Paul Trible, Warren B. Rudman, Slade Gorton, Mark Andrews, Strom Thurmond, Pete Domenici, Daniel J. Evans, Bob Kasten, Steve Symms, Jesse Helms, Ernest F. Hollings, and Jake Garn.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, may I have the attention of Senators?

The PRESIDING OFFICER (Mr. HECHT). The Senate will be in order.

Mr. BYRD. Mr. President, what we have here is a motion to recommit with instructions. Once my motion to recommit was wiped out by the leader's tabling motion, of course, this line of motions and amendments was opened.

In order that my colleagues may know why I have been displaced by the distinguished majority leader's prior recognition, in 5 years I have never tried to vie with the distinguished majority leader to get recognition, because it would be an action in vain. He has first recognition, and he should have.

What we have here now is a motion by the majority leader to recommit with instructions to report back.

Since we did not complete the reading of the second-degree amendment, essentially, I suppose it is the same as the Gramm amendment in the second degree to the first-degree amendment to the House joint resolution. If there were a cloture motion adpoted to the second-degree amendment in the recommital motion—I believe it is to strike out and insert—so that it could not be divided into 19 divisions, as Mr. WEICKER was able to do on the Gramm amendment on which cloture has just failed. That is what the distinguished majority leader is accomplishing here.

I do not know of anything else I want to say on this particular item

today, but I do want to again offer to the majority leader this suggestion: That the Senate pass a short-term extension of the debt limit. It can be a week, it can be 2 weeks, but it would give the Senate time in which to analyze and study and vote on the Gramm amendment, the Chiles amendment, other amendments. That is all we have been asking for.

We are not trying to avoid a vote up or down on any one of these various proposals, all of which would supposedly balance the budget. The Chiles-Byrd amendment would balance the budget in 5 years. The Johnston amendment would balance the budget. But we do need time.

So my offer is that we pass a short-term extension so that the Government can continue to borrow. It cannot borrow right now. It has not been able to borrow since October 1. The Government could resume its borrowing and the Senate and the House would have a short period of time, in which to study these proposals.

We would all then be better able to understand the consequences of our actions. We would know how much authority would be transferred from the legislative branch to the President with respect to funding matters and with respect to the choice of national priorities.

We would know what the consequences are going to be with respect to the sacrifices that the American people will have to make in order to balance this budget over a 5-year period. We would be able, I hope, to put at least an income tax on corporations that are profitable and that do not pay any Federal income tax. Not all of them are included in this, but many of them, very profitable corporations, do not pay any Federal income tax; and there are individuals who are high-income citizens who do not pay any income tax. I am not proposing that middle- and low-income individuals pay more taxes.

We ought to balance the budget, but we ought not put an unfair burden on people who have already sacrificed, beginning with 1981, while some corporations and the rich get a free ride on income taxes. Let some of the sacrifice be borne by the profitable corporations that have not been paying any income tax. Let us put a minimum tax on those profitable corporations. Let us put a minimum tax on those individuals who, through the various loopholes that are in the Tax Code, have been able to walk away and escape any of the burden that they should, in fairness, be willing to bear.

We need a little time, that is all. That is all we have been asking for. That is all we are asking for now. Is that too much?

We do not propose to walk away from voting on the Gramm amendment or other amendments. I will assure the majority leader that we will do everything we can to offer him a time agreement on each of the amendments, with the understanding included in that agreement that when the House sends over the next debt extension, the amendments will be acted upon. The House cannot avoid sending a further extension over. They will do their duty and in good faith.

In the meantime, nobody gets hurt and, hopefully, we can have a little time to study these amendments and analyze them. There would be fewer people who would be wrongfully hurt than by hasty action—and that is the track we are on right now, hasty action.

I hope that the distinguished majority leader will consider that.

Mr. DOLE. Mr. President, let me thank all of my colleagues again for being here today. We had 95 Members present. The others were unavoidably detained on both sides, or they would have been here. So I wish to commend my colleagues on that.

This was an important vote. It is not yet resolved, but I believe that at least the two votes have indicated there is a clear majority who want action. And that majority is not nearly as great as the majority outside the Congress, the taxpayers, the American people, the farmers, the business people, whoever they may be.

Having said that, obviously, it is in everyone's interest to try to come to grips with the central problem. If we can, we will try to work it out. If we cannot, I am not certain what will happen. Much will depend on what the House is willing to do. And what they may do tomorrow, I assume they will send us, hopefully, a very, very short debt limit extension.

But I hope that any agreement we would make would be based upon some rather immediate action, not action within the next 2 or 3 weeks. It seems to the majority leader that the overwhelming majority of Senators who are present today, by nearly two to one, have indicated a desire to move on.

Mr. ARMSTRONG. Will the leader yield for a moment?

Mr. DOLE. I am happy to yield.

Mr. ARMSTRONG. Mr. President, I would just like to say to the distinguished majority leader that I share completely his belief that we ought to act on the Gramm-Rudman-Hollings amendment and move on. But I just want to caution both the majority leader and the minority leader that if they should think in terms of working out some agreement under which there would be a temporary continuation or extension of the debt limit, that there are those of us who would not be agreeable to that. Indeed, many of us are much attracted to the scenario which the minority leader spelled out earlier, the idea that we would put the Government on a cash basis.

Now, that would be chaotic. It would result in severe dislocations in certain sections of the economy. It would mean that the Senate would probably be in session every Sunday maybe for 3 or 4 months. It would be agony. But, in my opinion, it would not be a wholly undesirable outcome. In fact, I am not so sure that we would not spend 3 months in chaos and agony and the rest of our lives rejoicing that we had finally put the Government on a cash basis.

But it is not my purpose to argue that question this afternoon, only to say that any kind of unanimous-consent agreement which would lead to that sort of a result would be almost certain to encounter an objection.

May I also say to the minority leader particularly, but to other Members who may be interested, that any sort of an agreement which would suggest time limitations on three amendments and not make other amendments in order, would also not be satisfactory, at least to the Senator from Colorado.

Now, there are some of us—the Senator from Georgia, Mr. MATTINGLY, who has advanced the idea to have the line-item veto; Senator SYMMS, from Idaho, who has a proposal, and others also have suggestions—who have felt the course of wisdom was to get behind this single, bipartisan approach and see if we could not really act on it in the time available. But if we are going to open the door for consideration of a lot of different proposals, I think it is fair for Senators to know that there are others of us who have suggestions we want to bring forward.

So let me just say to the leader, not to take more time than I should, that I hope we can get to a vote on Gramm-Rudman and then on the debt limit extension. But I hope that if, for any reason, that is not possible, we would not foreclose the rights of Senators either to object to the passage of the bill or to offer their own amendments, if it comes to that.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Colorado. I think he has made it clear to Senators on both sides that all of the problems are not on the other side. There are problems on both sides. So when we start talking about what the leaders are going to do, we are going to do whatever we can do. What you may want to do may be something we cannot do.

Based on the overwhelming support today—I will make one unanimous-consent request that, notwithstanding any other agreements tomorrow, that we vote on the Gramm-Rudman amendment at 3 p.m. on tomorrow, Monday, October 7.

Mr. BYRD. Mr. President, reserving the right to object, I will object because this does not have to happen tomorrow. All we want is a little time. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BYRD. Mr. President, I have a unanimous-consent request. I ask unanimous consent that on tomorrow the Senate vote at 6 p.m. on a short-term extension, which we can develop, and that we vote on the Gramm proposal, the Chiles proposal, the Johnston proposal and other amendments—and we can limit them; we can get together and limit them—beginning, let us say, on Wednesday next—that does not give us much time, but it appears we are not going to get any time—beginning Wednesday, with a certain amount of hours which the majority leader and I can agree on each amendment, beginning on Wednesday at 4 o'clock p.m.

Mr. DOLE. Mr. President, I will object.

Mr. DIXON. Will the majority leader yield?

Mr. DOLE. Let me reserve the right to object.

Again, "such other amendments," we do not know which amendments would be offered. We have not seen any other amendments on the other side, except the broad outline of the Chiles amendment, which is similar, in many respects, to the Gramm-Rudman-Hollings amendment. I think this may be something that the leaders should discuss, but I am not prepared to say at this time, based on statements just made by the Senator from Colorado and others who I think would make similar statements, to agree to that.

So I am compelled to object.

Mr. DIXON. Mr. President, will the majority leader yield? I wish the majority leader would accommodate the request of the minority leader and give some careful consideration to the request. Some on this side who have been supporting this proposition, we think it to be a very reasonable request that we would consider the Chiles-Byrd amendment on Wednesday, as I understand the minority leader's request, and the Johnston amendment prior to the time that we would go to the Gramm-Rudman-Hollings amendment. I think that is a very reasonable request, as one who supports that amendment.

Mr. DOLE. But I understood that there would be additional amendments, in addition to those three. It would not be just those three amendments, the Johnston amendment, the Chiles amendment, and then the Gramm-Rudman-Hollings amendment. There could be additional amendments.

First, I would want to consult with my colleagues. I certainly will consider it. I hope that we can resolve this so that we can pass the debt ceiling with an amendment that will help us reduce the deficit. If we do not want to do it, it will force us to do it. This is all we are looking for.

I am happy to yield to the Senator from Oklahoma.

Mr. BOREN. I thank the majority leader.

I want to join with what the Senator from Illinois has said. There are those on your side of the aisle who I think have a right to be assured of the fact that they will have amendments offered of substance, and will give the Senate an opportunity to choose between options for mechanisms of getting the deficit down. I happen to support the Gramm amendment myself. I think certainly the Chiles-Byrd amendment is one that has been given a lot of thought. It is one that has a great deal of merit, and is certainly worthy of being assured of an opportunity to have a vote. I think if that vote can come prior to the Gramm amendment, I do not think any way that confuses the issue, but it would, I think, move us toward reaching a bipartisan consensus.

I will say that I have ordered printed on Monday one amendment with Social Security and one with the minimum tax that I hope to have an opportunity to vote on in a very short amount of time after the Gramm amendment is acted on, in the event it is adopted. There are others on this side of the aisle—and that side perhaps, too—that have some amendments. But I think a very short time agreement could be worked out. I would urge that. There are those of us on this side of the aisle who have been voting consistently on these procedural motions today in an effort for an opportunity to proceed to a vote on the Gramm amendment. But we do also feel very strongly that those on our side of the aisle should have an opportunity to have their major proposals presented. So I hope that over the next few hours—if it is not decided immediately here on the floor—the majority will sit down with the minority leader, and perhaps we can get something worked out that will be fair in a bypartisan sense that will enable us to proceed.

Mr. DOLE. I certainly have no quarrel with trying to see what we are going to proceed with. Before we can proceed, we need to know how many amendments there are. Some suggested two. Now we are up to four, in addition to one on this side, and there may be others on our side. If in fact we know what we are dealing with, we might be able to negotiate something that will move us along very quickly this week. I am certainly willing to do that. I cannot agree on the floor. I do not know what we are agreeing to.

As far as the minimum tax, keep in mind that we have a tax reform bill coming over here. We may be looking for revenue when that comes to keep the bill revenue neutral. I hope we can keep everything in perspective. But, again, that will be determined when the amendments are offered. But I pledge to Senators, whether they supported the Gramm-Rudman-Hollings-Boren amendment or not, that we are going to try to accommodate everybody we can. I have no quarrel with having to vote on the Johnston amendment or the Chiles amendment. I indicated a couple of days ago to the distinguished Senator from South Carolina, Senator HOLLINGS, that we would do that first before we vote on the other amendments, if I can obtain consent on my side.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Will the distinguished majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. BYRD. The distinguished majority leader has just offered the best argument for my case. I have been trying to make that argument all the time—that we have a little time to determine the number of amendments. Maybe we would not have to have votes on more than three or four amendments—I can't say now. So let us vote on the Gramm amendment. But let us at least have a couple of days so that we will be able to know what we are voting on. I hope we all understand, that no amendments can be offered to the Gramm amendment right now—none. It is a second-degree amendment.

So if we could, just may I say once more, and then we Democrats want to meet in a conference. I hope my colleagues will be able to agree on a consent request to pass, tomorrow, a brief extension of the debt ceiling. It will not yet be up to $2 trillion. It will be somewhat less than that. It can be extended until the 15th, or the 18th or 19th; I think we return from the holiday on the 18th. I do not know what the flaws are even in the Chiles-Byrd amendment. We had to draft it so hastily because we wanted to spread the burden of lowering the deficit to certain profitable corporations, and to certain high-income taxpayers of this country who are getting a free ride. We want to spread the burden. But I am not entirely satisfied with the proposal that Mr. Chiles and I hope to offer because we had to just draw it up so hastily. I would be happy to attempt to limit the number of amendments to, say, 10.

Mr. DOLE. Where do they come from? All on that side?

Mr. BYRD. No. Let half of them come from the Senator's side.

Mr. DOLE. I think the point I was making is I do not know how many amendments there are. People are

jumping up all over now. Everybody decided this is Sunday evening, and we might as well stay here a while. So I am going to leave the floor.

Mr. SARBANES. Will the majority leader yield for a question before he leaves the floor? Just so I can try to gain some understanding of where we are parliamentarily, I gather the majority leader has a motion to recommit to the Budget Committee with instructions on which a cloture petition has been filed and on which a vote will take place on Tuesday. Is that correct?

Mr. DOLE. That is the motion to recommit. There are two additional amendments to the instructions in the motion. What we are in effect doing is trying to avoid what the distinguished minority leader pointed out earlier—19 yea-and-nay votes—and trying to get one vote on the Gramm-Rudman amendment.

Mr. SARBANES. That cloture vote comes on Tuesday.

Mr. DOLE. That is correct. We will have another cloture vote tomorrow on the motion to reconsider the cloture vote today.

Mr. BYRD. That is the cloture vote.

Mr. SARBANES. We will have a vote tomorrow, and the majority leader intends to vote tomorrow on what proposition?

Mr. BYRD. The Gramm number one.

Mr. SARBANES. I would like for the minority leader, if he will, to indulge me.

Mr. DOLE. I had a motion to reconsider the vote on cloture, and I intend to vote on that tomorrow.

Mr. SARBANES. Then on Tuesday, the majority leader intends to vote on what?

Mr. DOLE. On Tuesday there will be a vote on the cloture on the motion to recommit which has been amended twice which I just did a few moments ago, and on which I filed a cloture petition.

Mr. SARBANES. Am I correct that the majority leader has lined up his amendments in such a way that on one of these propositions on which he intends for us to vote, either tomorrow or the next day, that any other alternative can be offered? Is that correct?

Mr. DOLE. I attempted to do that. I am not an expert on the rules. If I did not do that, I will probably find out.

Mr. SARBANES. But it was the majority leader's intention to deny, in effect, to close out, any opportunity for anyone to put forward a different proposal in terms of how to address this question? Is that correct?

Mr. DOLE. After the Gramm-Rudman-Hollings second degree amendment is adopted, you can offer all the amendments to Gramm-Rudman-Hollings that you wish. As I suggested earlier this week, assuming I have the votes to defeat any other amendment, we will let you offer that one first. Of course, I do not intend to offer an amendment where I think I am going to lose.

Mr. SARBANES. Can an amendment be offered to Gramm-Rudman?

Mr. DOLE. Not now.

Mr. SARBANES. Because the majority leader closed that out? So there is no opening here for anyone to offer an amendment under the current circumstances?

Mr. DOLE. Not at this time.

Mr. SARBANES. Is that correct?

Mr. DOLE. That is correct.

Mr. BUMPERS. Mr. President, will the majority leader yield for an additional question?

I want to first of all say I sort of echo what Senator BOREN has said. There is a lot of sentiment over here for this whole approach to budget deficit reduction. But we would like to have an opportunity to vote on the Chiles amendment, maybe on the Johnston amendment, and then if the majority and minority leaders can agree to, say, 10 amendments, 5 on either side, with a definite vote no later than 3 o'clock on Friday afternoon, but at least give us a chance to amend the Rudman amendment. I understand where the votes are, and I certainly understand the politics of this issue. But I understand all the uneasiness on this side because of the politics of the issue. But there is something that seems rather abusive about this procedure. I suppose if you have the votes, you have the issue, you have the press, and you have the American people with a certain understanding, there is not any use to turn loose of it, but just here on the floor what is the rationale for not allowing people who essentially favor the Gramm-Rudman amendment but who have honest questions about the OMB document, who have honest questions about what the effect on the defense budget is going to be, whether readiness and manpower for example are the only controllable items, some of those issues that have been raised here, why is it not fair and sensible and in the interest of all of us—nobody should inpugn the motives of anybody else. There is not one person more patriotic than another on this floor. There is not one person who wants the budget balanced more than any other person on the floor. Why not give both sides an opportunity to try to clean up the Gramm-Rudman amendment? That is going to be the final vote. That is the one that is going to pass overwhelmingly here. There is not anybody over here naive enough to believe otherwise.

But why not allow that proposition, which literally cries out in a few areas for explanation, to be amended, and then give all of us a chance to vote for it?

Mr. DOLE. Mr. President, again let me indicate that all those things may be possible, but first we need to know how many amendments there are. Again, of course, you are not foreclosed after we adopt this amendment. Other amendments still can be offered. We have even offered to let a major amendment on that side go first. I am certain we have the votes to defeat it. I think everybody would agree, to let it go first is not unreasonable. We are trying to accommodate those who are concerned about the deficit and those who have indicated by their votes that they would like to work out something that the majority of us can support.

Mr. BYRD. Mr. President, Mr. BUMPERS is exactly right. No amendment is in order to either of the Gramm amendments because each is an amendment in the second degree.

Will the distinguished majority leader allow me to ask for the yeas and nays on the pending Gramm amendments?

Mr. DOLE. Yes.

Mr. BYRD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. So the yeas and nays have now been ordered on both Gramm amendments, is that correct?

The PRESIDING OFFICER. Yes.

Mr. RIEGLE. Will the majority leader yield for a question?

Mr. DOLE. Yes.

Mr. RIEGLE. I would like to be able to draft perhaps one or two very carefully drawn amendments to the Gramm amendment to deal with some of the problems that I think exist in terms of how spending cuts would actually be applied down through functions and down finally to individual activities so that we really get an even spread in applying mandatory spending cuts.

I also have a concern in the area of the recession trigger.

My concern, as I say to the majority leader, having listened to most of the debate, and having read what I have not been able to hear in person, is I still do not understand clearly enough exactly how the Gramm proposition is to work to feel confident in drafting the correcting amendments that I think are needed.

I just want to say to the majority leader that I think the request the minority leader has made for the time and for opening up the possibility for careful crafted amendments—not a laundry list but a limited number that really go to critical points that probably a dozen or two dozen Senators have raised and have concern about on both sides of the aisle—is proper.

My question is if we have a sufficient time, limited through it would be, and also with an open amendment

process, in the two, three, or four critical areas of the Gramm proposal where there is great question and doubt precisely as to how it would work, we could try to nail that down. At least we could have a clearcut amendment offered, have it voted on and establish the legislative history. If we are going to pass it, then we know after the fact what it is we have.

I am worried. I do not want to see the precedent of 1981 with Gramm-Latta, at that time thinking we would have a budget surplus in 1984 and we ended up a half-trillion dollars off the mark.

It is not reasonable to ask for just that degree of time and care to try and make sure that at least we know precisely what we are doing?

Mr. DOLE. Let me indicate to the distinguished Senator from Michigan that I understand there will be a caucus on that side of the aisle. If there is a proposal agreed to by your side and submitted to us, I will have a caucus on our side tomorrow. I cannot agree unless we know what the offer is.

I am not unwilling to look at it. It has already been indicated on our side that there may be others with a much different view.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent there now be a period for the transaction of routine morning business not to extend beyond the hour of 6:15 with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, it is not my wish to delay Members or staff since it is Sunday afternoon, but my remarks are time sensitive.

A BURIAL BEFITTING HUMAN BEINGS

Mr. HUMPHREY. Mr. President, this afternoon, literally at this hour, in East Los Angeles, CA, some 16,500 human fetuses are at long last being given a burial befitting a human being, along with the religious services just prior to burial.

Mr. President, it has been some 3 years since workers made that awful, grizzly and hideous discovery in Woodland Hills, CA, in a warehouse where they found these tiny infants, some of them as much as 5 months old, some of them in excess of 4 pounds weight, each individually preserved in formaldehyde and plastic bags, some 16,500.

The authorities and other interested parties, after necessary investigation, sought to bury those infants as human beings, but tragically were blocked by the American Civil Liberties Union and a number of feminist organizations who presumably wanted, at all costs, to prevent any acknowledgement of the humanity of these tiny human beings, much to their disgrace, in the opinion of this Senator.

Nevertheless, Mr. President, those who felt a deep concern about this matter, not because of the sheer numbers involved, for their concern extends even to the single human being who loses his life to abortion, but because of the principle involved the groups concerned pressed on until finally they succeeded in achieving today's sad but at least fitting event, the religious ceremony which is now taking place in Los Angeles, and, in a short time after the religious messages and the closing hymn, the "Battle Hymn of the Republic," the final burial of these 16,500 human beings.

Mr. President, I want to commend and pay tribute to Dr. Philip Dreisbach and his wife, Jeannette, who were the principal movers and whose determination never flagged.

Mr. President, I wish to pay tribute also to the Odd Fellows who made a burial plot available in their cemetery in East Los Angeles, and to the Guerra-Gutierz-Alexander Mortuary of Los Angeles who made their services available. And I also commend Ricardo Gutierz, who not only provided ultimate funeral services but hired a law firm to ensure these babies would receive a proper burial. While I do not have the names of these sainted lawyers, let the world know that they are present today acting as pallbearers at the funeral.

Mr. President, this Senator had planned to be at that ceremony but, as Members know, official business of the Senate made that impossible. And so I will take a few minutes now to read into the RECORD my remarks in hopes that those who read the RECORD will pause and meditate on what is happening not only in Los Angeles but what is going on more particularly in the abortion clinics of America weekdays and weekends as well.

Before doing so, Mr. President, I commend President Reagan who, as early as May 1982, shortly after the discovery of these little human beings pickled like laboratory specimens, endorsed proposals for a decent burial and for proper and fitting religious services.

These remarks, Mr. President are not my words. They were prepared for me by Bill Gribbin of the Republican Policy Committee. They express my thoughts but probably in a way better than I could have done myself. Bill Gribbin is a talented writer and a man who is committed to the pro-life cause.

My remarks, which were to have been delivered in Los Angeles, are as follows:

REMARKS OF SENATOR HUMPHREY

My friends, this will be brief, as brief as the little lives we are here to honor, as best we can.

Let our words today be brief, but let our memories be long, so that our fellow Americans will never forget what has been allowed to happen in this country we love so dearly.

We are here to grant a decent interment to the least of our brethren. Boys and girls, they were. Men and women they would have become. But like millions—millions!—of others, they were made victims of the Abortion Reich.

They need our help no more, though we all would gladly give it. But there are millions of others like them, this year and next year and the next, who will need our assistance, our rescue, our intervention.

They and their mothers will need that last desperate warning before they enter the abortuary. They will need the offer of pro-life counselling, a room to live in amid a family that cares, a chance to choose life in the very face of the gates of hell.

Today we covenant with these little ones we could not save to do all we can, by law and by love, to save their brothers and sisters. To save them from the scalpel and the suction and the saline. To save them from the money-grubbers and the madmen who do such things and demand payment for them.

We pledge to one another never to leave this fight until it is won for the children. And we know that, however bright and bold our own efforts, the ultimate triumph must depend upon more than human strength. But we shall have it, rest assured, we shall have it. For as Isaiah tells us, these little ones will never be forgotten by their Maker. He has carved them in the palm of His hand.

As the children's song goes, "Red and yellow, black and white, they are precious in his sight."

That must give us hope. As we picket and pray, as we lobby and legislate, as we continue the work of the last decade that has already turned the tide against the Death Industry.

It is no secret any more: the children are winning. They are winning in state legislatures, in the Congress, and in the White House, where a President has committed to their cause, heart and soul.

It is only a matter of time before they win as well in the Courts, which, for a time, remain the last bastion of the abortion business. It is only a matter of time before that last outpost falls and, with it, the anti-life ethic of Roe v. Wade and its fatal progeny.

It is only a matter of time, but time runs out, every hour of every day, for more babies. They are the doctors who would have healed, the musicians who would have played, the builders who would have raised wonders, the athletes who would have set records, legislators who would have balanced the budget, the saints and savants that would have led us to a better future.

If they had ever had a chance.

Well, we have a chance. Let us use it. Today, tomorrow, as long as it takes to restore the rule of law and the law of life.

That will be our best tribute to these lost children.

But no, not lost. They have found a life we do not know. They are orphans no more. And it is we who will be privileged to consider ourselves members of their family.

They rest in peace, even though the abortionists still rage against their little bodies. But we will not rest—you and I and millions and millions like us—we will not rest, in Congress or in courthouse, we will not rest or wait or be patient, until this holocaust can never happen again.

That is our pledge to one another, our ultimatum to the abortionists, and our final, solemn promise to the boys and girls we leave with God today.

Mr. President, I would only add to the eloquent words of Bill Gribbin:

May God save the children from the abortionists, the judges, and the politicians who have let this nightmare descend upon our land.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL COSPONSORS

S. 8

At the request of Mr. CRANSTON, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of S. 8, a bill to grant a Federal charter to the Vietnam Veterans of America, Inc.

S. 1579

At the request of Mr. CRANSTON, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 1579, a bill to clarify that the remedies available for the enforcement of certain civil rights statutes are applicable to the States.

AMENDMENT NO. 584

At the request of Mr. CRANSTON, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of amendment No. 584 intended to be proposed to S. 1579, a bill to clarify that the remedies available for the enforcement of certain civil rights statutes are applicable to the States.

AMENDMENT NO. 729

At the request of Mr. GRAMM, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 729 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

AMENDMENT NO. 730

At the request of Mr. GRAMM, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of amendment No. 730 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

DOLE AMENDMENT NO. 737

Mr. DOLE proposed an amendment to the motion to recommit the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

On page 1 line 2 of the motion to strike after the word "with" insert instructions to report back forthwith with the following amendment: Sec. Deficit Reduction Procedures.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

DOLE AMENDMENT NO. 738

Mr. DOLE proposed an amendment to amendment No. 737 proposed by him to the motion to recommit the joint resolution (H.J. Res. 372), supra; as follows:

Strike "1985" in the matter proposed to be inserted, and insert in lieu thereof the following new section:

1985—

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "Sec. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "301(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution."

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(1) HOUSE OF REPRESENTATIVES.—Section 305(a)(6) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesig-

nated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATION.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution or the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(B) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and October 1 of such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year, and specifying the percentages by which automatic spending increases and relatively controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, notwithstanding the Impoundment Control Act of 1974, the President shall issue an order that—

(I) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of increase under each such provision, and

(II) subject to clauses (ii) and (iii) of this subparagraph, eliminates one-half of such excess by sequestering such amounts of budget authority, obligation limitations, and loan limitations, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce each relatively controllable expenditure by a uniform percentage;

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and the total amount of payments which is to be adjusted

under subclause (II) of this clause with respect to relatively controllable expenditures;

(cc) the amount of budget authority, obligation limitations, and loan limitations which is to be sequestered and payments which are to be adjusted with respect to each such relatively controllable expenditure in order to reduce them by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, and loan limitations and each payment described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subclause (i)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under subclause (i)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—

(I) IN GENERAL.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(II) ALTERNATIVE PROPOSALS.—The President may, during the 30-day period specified in subclause (I), submit to each House of the Congress a joint resolution that will, if enacted—

(aa) reduce the deficit for a fiscal year to an amount not greater than the maximum deficit amount for such fiscal year, or

(bb) subject to the requirements of subsection (f) of this section, suspend (in whole or in part) the requirements of this section and of the amendments made by this section with respect to such fiscal year.

Such joint resolution shall be introduced (by request) by the majority leader of each such House on the day on which it is submitted and shall be referred on such day to the appropriate committees of such House. The committees shall report the joint resolution not later than 10 days after the date on which it is introduced. Any committee failing to report a joint resolution within the 10-day period referred to in the preceding sentence shall be automatically discharged from consideration of the joint resolution, and the joint resolution shall be placed on the appropriate calendar. The provisions of section 305 of the Congressional Budget Act of 1974 for our consideration of concurrent resolutions on the budget shall also apply to consideration of any joint resolution submitted under this subparagraph and to conference reports thereon. Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to any such joint resolution.

(C) EFFECTIVE IMMEDIATELY.—Except to the extent that it is superseded by a joint resolution enacted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall be effective from and after its issuance. Any modification or suspension of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit for such fiscal year.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF JOINT RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after the issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives or the Senate may report to its House a joint resolution superseding such order. The report accompanying such joint resolution shall explain in full detail the nature and effects of each provision of the joint resolution.

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any joint resolution reported under clause (i) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such joint resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such joint resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year.

(iii) DEFINITION.—For purposes of clause (i), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—The provisions of section 305 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of joint resolutions reported under this paragraph and conference reports thereon.

(ii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to joint resolutions reported under this paragraph.

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly or indirectly, whether appropriated or contained in current law. This shall include entitlements and other payments to individuals, open-ended programs and grants, and other similar programs, and shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(a) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "relatively controllable expenditures" means budget outlays that are classified as relatively controllable outlays in Office of Management and Budget, *Controllability of Budget Outlays*, Report No. BPS0701A (August 27, 1985).

(H) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(5) CONFORMING CHANGES.—

(A) RULES OF THE HOUSE OF REPRESENTATIVES.—

(i) Clause 1.(e)(3) of rule X of the Rules of the House of Representatives is amended—

(I) by striking out "and" at the end of subdivision (C);

(II) by redesignating subdivision (D) as subdivision (E); and

(III) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(ii) Clause 4.(a) of rule XI of such Rules is amended by inserting after "Budget Act of 1974" the following: "and on joint resolutions under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985".

(B) STANDING RULES OF THE SENATE.—Rule XXV(e)(2) of the Standing Rules of the Senate is amended—

(i) by striking out "and" at the end of subdivision (C);

(ii) by redesignating subdivision (D) as subdivision (E); and

(iii) by inserting after subdivision (C) the following new subdivision:

"(D) to report joint resolutions with respect to Presidential orders issued under subsection (d)(3) of the Balanced Budget and Emergency Deficit Control Act of 1985, and to take such other actions as may be required of it under that section; and".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1968 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) WAIVERS AND AMENDMENTS.—Notwithstanding section 904(b) of the Congressional Budget and Impoundment Control Act of 1974, any other provision of law, or any rule or standing order of the Senate or the House of Representatives, no provision of this section, or of any amendment made by this section, may be waived, amended, or otherwise modified except by a joint resolution that—

(1) does so in specific terms, referring to such provision by its designation and declaring that such joint resolution waives, amends, or otherwise modifies such provision; and

(2) is addessed solely to that subject.

(g) Section 1106(a) of title 31, United States Code, is amended by striking out "July 16" and inserting in lieu thereof "September 16".

(h) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1990.

(3) OASDI TRUST FUNDS.—The amendment made by subsection (e) shall apply as provided in such subsection.

(i) It is the sense of the Senate that any reductions in sequestering of controllable expenditures shall not disproportionately be made in lesser populated areas.

ADDITIONAL STATEMENTS

IN DEFENSE OF SDI

● Mr. GOLDWATER. Mr. President, the President's strategic defense initiative which, unfortunately, has been misnamed star wars, is not an easy issue to understand. During the debate on the Department of Defense authorization bill, I promised that a committee would be set up to provide, when the Senate desired, information concerning the technical, scientific aspects of SDI. I am happy to inform the Senate that has been done.

From time to time, I find, in magazines that are oriented toward defense, interesting articles explaining SDI in language the average layman can understand. Without inferring that the minds of the Members of the Senate are those of the average layman, but recognizing that not many of my colleagues have had scientific training, I feel it is important to simplify these complex issues in order to better understand the subject.

In an excellent magazine, Defense Science, the August and September issues contain two articles on SDI, which I think will be of interest to Members of the Senate and other readers of the CONGRESSIONAL RECORD. I ask that both of these articles, "In Defense of SDI" and "SDI, The Hidden Opportunity," be printed in the RECORD.

The articles follow:

IN DEFENSE OF SDI

(By George F. Chapline)

While the President's speech in March, 1983, was a surprise, the reaction to it was not. The intellectual community, did not take lightly a non-intellectual intruding into one of their sacred domains—namely, basic strategic doctrine.

The scientific branch of the intellectual establishment was quick to respond. The Union of Concerned Scientists pointed out that "no reputable scientist" supported the President's position. One man said the president's proposals would destroy the arms control process. Two others said it wouldn't work and another said the president made his speech at a particularly inauspicious time.

Since I long ago gave up dreams of becomming a respectable scientist, it does no harm to confess that I am intrigued with the president's proposals, and I am unimpressed with the arguments of the critics, particularly those critics who claim that a defense against ballistic missiles is not technologically feasible.

History teaches us that when it comes to predicting the technological future the experts are often wrong. It is a curious fact that ideas for new technologies often meet with extreme hostility from the experts. For example, the Wright brothers had to build the engine for their first airplane themselves because no engine manufacturer wanted to expose himself to the ridicule of being involved in a project experts had declared impossible.

Indeed, in the 19th century it was widely believed in academic circles that manned flight was impossible. Theodore von Karman mentions in his history of aerodynamics that the famous Helmholtz once failed a student because he was unable in the course of an examination to prove that human flight would never be possible.

One would think that physics professors in the 20th century would be less dogmatic and more aware of the follios of trying to predict the technological future. Unfortunately this does not seem to be the case.

In 1937, a well-known theoretical physicist published a theorem that stated an absolute upper bound to the energy which a cyclotron could produce. In the preprint it was claimed that, as a consequence of relativistic effects and practical limitations of radio frequency voltages, it would be impossible to produce protons with energies greater than 5.5 Mev (million electron-volts). However, after the preprint appeared, the authors received a call from Berkeley pointing out something must be wrong with their arguments because a cyclotron in Berkeley already had produced 8-Mev protons. The phone call resulted in the authors adding a footnote, raising the absolute upper limit to 12-Mev. They let stand the remarkable admonition that ". . . it seems useless to build cyclotrons of larger proportions than the existing ones." The cyclotron builders in Berkeley, including at this time one Robert R. Wilson, apparently did not let this advice deter them because they went on to build in the next year a 60-inch cyclotron which spit out 16-Mev deuterons.

In 1939, E. O. Lawrence announced plans for a 100-Mev cyclotron. In arguing the case for this cyclotron before the Rockefeller Foundation, Lawrence claimed that such a machine could produce the mesotrons of Yukawa, and thereby unlock the secrets of the nuclear force. The 184-inch cyclotron was, with the hiatus of World War II, finished in 1946 and produced 400-Mev α-paricles. In 1947 a search for π-mesons was begun, and in 1948 artificial production of π-mesons finally was demonstrated. Thus began the enterprise of doing elementary particle physics with large accelerators that

has its culmination at Fermil National Accelerator Laboratory.

This story illustrates that even brilliant physicists can be wrong when they say something can't be done. Unabashed, though, Professor Hans Bethe still seems anxious to share his views of what can't be done. Together with three other professors, he recently assured the readers of Scientific American that a defense against ballistic missiles is a technological mirage.

I disagree.

Actually, I do agree with those authors on one basic point. Unlike previous technological challenges, like the airplane or the hydrogen bomb, one is not just trying to defeat nature, so to speak, but a determined and possibly clever human adversary. Consequently, I agree that a flexible offense is probably always superior to any fixed defense. But I strongly disagree with Professor Bethe and his colleagues about their contention that a defense against ballistic missiles could never work well enough to make some contribution to our national security.

There are two basic issues involved here: technological feasibility of a ballistic missile defense and whether such a defense system would contribute to national security.

TECHNOLOGICAL FEASIBILITY

There are really two questions of interest. First, is it possible to build a defense against the offensive ballistic missiles already deployed? Second, what could the offense do to defeat such a defensive system? The answer to the first question is quite important in itself because of the large proportion of Soviet ballistic missiles used as first-strike weapons.

With technologies already invented and under development, one could build a defense against existing ballistic missiles that would be at least 99.9 percent effective. The key technologies that make this possible are the nuclear explosive-pumped X-ray laser, highpower XeCl or free-electron lasers, laser-guided projectiles and electron beams, and supercomputers on a wafer.

The first two technologies provide the ability to project large amounts of energy over long distances at the speed of light. When people say traditional defensive systems are not very effective, keep in mind that traditional defensive systems use projectiles not moving much faster than the objects being shot at. Projectiles moving at the speed of light are moving 40,000 times faster than the speed of ballistic missiles. Of course, there is the well-known problem of providing a line of sight to the target. With the possible exception of putting nuclear-pumped X-ray lasers into Earth orbit, the current limitations on putting large amounts of mass into orbit probably means that defensive systems must be deployed on the ground.

This presents certain problems if one wants to attack ballistic missiles during their boost phase. Contrary to what some critics suggest, though, there is no insurmountable time problem in doing this. With a 10-g acceleration rocket, one could reach the required line-of-sight altitude, approximately 500 kilometers in about 100 seconds. This leaves about three minutes before the current generation of ballistic missiles begin to unload their re-entry vehicles. This should be plenty of time to respond; if the Soviets simultaneously launched 1,000 missiles, one should respond instantly. If the attack were spread out, the warning time is correspondingly increased, while the missiles launched initially could be attacked either in midcourse or over the U.S.

The general scheme for a strategic defense is to provide a first line of defense with nuclear pumped X-ray lasers either popped up from submarines, or placed in high earth orbits, a second line of defense by high-power, ground-based lasers, perhaps bouncing their beams off mirrors popped up into orbit, and a third line of defense by X-ray lasers shooting downward and rocket or electromagnetically launched projectiles shooting upward.

The operation of a strategic defense system obviously will require enormous data-processing capabilities. Fortunately, extrapolation of current technological trends suggest that the needed capabilities will be well in hand by the end of the century. A company in Israel already makes a machine that can scan a printed circuit board in a microsecond and using artificial intelligence techniques, spot any defects. In addition special-purpose, pattern-recognition CMOS computers for robotics applications are already on the drawing board. The computers capable of 10^{11} VAX-equivalent operations per second. Pattern recognition computers, two orders of magnitude faster, on a wafer using bipolar logic are just around the corner.

Critics may point to the failure of Trilogy. However, new techniques such as laser pantography have appeared that promise to overcome the difficulties Trilogy faced. By the end of the century, we comfortably can expect wafer-sized, fifth-generation supercomputers, capable of directing an attack against hundreds of thousands of warheads and decoys, to be available.

COUNTERMEASURES

Bethe and Richard Garwin claim that a strategic defense is unworkable because there are simple things the offense can do to defeat the defense. This may be so, but nothing Bethe and Garwin have suggested fits into this category. The countermeasure most often mentioned is fast-burn boosters. There is little doubt that on the time scale that a defensive system could be built that the current rocket boosters which burn out well above the atmosphere could be replaced with boosters that burn out at much lower altitudes. However, because of atmospheric drag neither re-entry vehicles nor decoys could be deployed below an altitude of 100 kilometers.

Because the buses carrying the re-entry vehicles and decoys are vulnerable to attack, this mode of operation does not prevent one from destroying the re-entry vehicles before they and their decoys are separated. In fact, the payload may be even more vulnerable to attack in the case of a fast-burn booster since a bus traveling at high speed through the upper atmosphere has a unique UV signature. Because the time available for attacking the buses is relatively short (approximately 100 seconds), the payload of a fast-burn booster would be most easily attacked from orbit. However, a pop-up system using a high acceleration rocket also may be useful under some circumstances.

Another countermeasure often cited is the use of foils or aerosols to protect the re-entry vehicle against X-ray laser attack. Unfortunately for the offense, the weight of such a shield would be prohibitive if the direction of the incoming laser beam is unknown. Because an intense X-ray beam can ionize atoms in its path the propagation of an X-ray laser beam is fundamentally limited only by Compton scattering. Hence, it would take 10 tons of mass to provide a 4π Compton shield. Even if the X-ray laser beam were not bright enought to penetrate the shield, one has a scenario in which a sizable explosion goes off next to the re-entry vehicle. At the very least this might deflect the warhead off course.

A more clever countermeasure has been suggested by Sidney Drell. He proposed setting off nuclear explosions in the atmosphere to push part of the atmosphere into the line of sight of an X-ray laser beam. Although this might be of some efficacy against pop-up X-ray lasers, it is not useful against orbitally based X-ray lasers.

Time delays between the launches of offensive missiles provide another possible countermeasure. The cost effectiveness of nuclear-pumped X-ray lasers is largely due to their ability to attack many targets at once. One could deny the defense this advantage by spacing out in time the launches. However, the price an attacker would pay for this is the loss of surprise and fewer targets for the defense to deal with at any given time. This would be a disaster for the offense if the defense had sufficient reserve capabilities.

What about the issue of decoys? It is true it would be difficult to deal with thousands of decoys. However, it is not physically possible to begin deploying lightweight decoys at a sufficiently low altitude such that the vehicle deploying the decoys is not vulnerable to attack. Thus, by attacking the vehicles carrying the decoys to the top of the atmosphere, one could reduce the number of decoys substantially and thereby perhaps make it feasible to attack nuclear warheads in midcourse. Even if this does not prove feasible, it is possible to distinguish lightweight decoys from warheads when they reenter the atmosphere. In fact, there is approximately a 10-second window where the warheads would be clearly distinguished from decoys yet vulnerable to attack from space-based weapons. Ten seconds may seem to be a short time, but—for the kind of technologies we are envisioning—10 seconds is as good as a century. This 10-second window is very important because it permits defense of cities.

The critics of strategic defense, and even some bureaucrats in the Reagan administration, often have insinuated that it is not possible to defend cities, but only missile silos. However, the so-called terminal defenses for missile silos almost certainly would be useful only if the attack were previously thinned out, either initially or in midcourse. In any case, the marginal benefits of terminal defense probably are cancelled by having the warheads aimed at a particular place. Many seem to prefer defending missiles rather than people, but I believe either an entire nation can be defended against nuclear attack or nothing can be defended.

SUMMARY

Although the existence of an effective countermeasure to a strategic defense system cannot be ruled out, no one has yet demonstrated that the president's original proposal to make ballistic missiles "impotent and obsolete" is out of reach. In particular, a strategic defense system utilizing both orbitally based and pop-up X-ray lasers as a first line of defense seems hard to beat.

Would a defense against ballistic missiles really contribute to national security? A number of people have questioned whether a defense against ballistic missiles should be built even if it should prove technologically feasible. Whether nor not these arguments

are correct, it is interesting that the Soviet Union has admitted publicly that the Strategic Defense Initiative induced them to resume arms control negotiations. Therefore, it seems to me that the possibility of providing a strategic defense already has proved to be of political value.

As to whether it is desirable to replace the current strategy of mutual assured destruction with a new strategy, I agree that one can have legitimate doubts as to whether a successful strategy should be replaced with an untried strategy. On the other hand, I can visualize circumstances where the current strategy would fail. For example, suppose there was an accidental launch, or a launch that the Soviet Union or some other country claimed was accidental. In the absence of a defense against ballistic missiles, what should the president do?

Another situation in which the present strategy would fail: an insane political leader comes to power and doesn't care about starting a war in which half the world's population dies. This particular situation is not unknown to history.

A most important consideration is the meaning of a civilized society. I am not thrilled with the idea of killing millions of innocent people for no better reason than perhaps the Soviet leadership is stubborn or incompetent. It seems much better to strike back at the forces or weapons that are directly threatening us. A little-known corollary of the Pershing II deployment in Europe is that it gives us the capability of insuring that the Soviet leadership will not survive a nuclear war. I applaud this, but as an adjunct we should also destroy the weapons that have been sent to kill us.

Can we save the world in the last 10 seconds? Yes. Not by wishful thinking—but by using our inventive capabilities to develop the means of destroying all missiles before they reach us.

SDI—The Hidden Opportunity

(By Dr. Joseph D. Douglass, Jr., and Dr. Samuel T. Cohen)

President Reagan's Strategic Defense Initiative (SDI) is an attempt to break out of the mutual assured destruction (MAD) logic that has dominated US strategic thinking for more than two decades. This type of thinking may have been acceptable when the United States ruled the strategic balance. However, the United States no longer rules the balance, and the major limitations of MAD as a vehicle for guiding force development have become increasingly clear. Accordingly, on March 23, 1983, the President proposed a way out—SDI.

Now, after two years of SDI planning, the program appears headed for trouble as Congress begins to cut deeply into the SDI budget. In a sense, this should not be much of a surprise. The vast majority of the Pentagon bureaucracy has opposed the concept since its introduction, because all correctly see the SDI cost coming out of "their" budgets. The prior leadership oppose the concept, because it represents a negation of their assured destruction policies. And, the present leadership beneath the President has short-changed the concept by couching their support mainly in well-intentioned but currently unattainable objectives. For example, SDI will make nuclear missiles obsolete and SDI will protect the population. Congress, to its credit, is rightfully skeptical.

How SDI should be judged, depends on its role. Unfortunately, its "role" has not yet been adequately defined in operationally meaningful or strategic terms. This problem is exacerbated in the current development process because SDI is being developed and evaluated mainly as defense against ballistic missiles and as defense in isolation.

But the operation of SDI depends on the operation of other elements of the strategic forces. All the forces need to operate together as part of an integrated strategy. This brings up what may be the most central part of the problem, US nuclear war strategy. SDI needs to fit into the strategy. Accordingly, and practically by definition, the U.S. strategy needs to be redefined. The reason is obvious. The current strategy does not allow for defense. It is an offense-only strategy that was developed under a policy of mutual vulnerability, that is, of defenselessness.

SDI's Role

The essence of successful strategy is to defeat the enemy without war, as ancient Chinese military philosopher Sun Tzu counseled centuries ago. One's strategy should seek to defeat the enemy's strategy.

The dominant US nuclear goal is to prevent or deter war. To do this, it is essential to understand the Soviet strategy in going to war and to defeat that strategy. The issue is not retaliation or assured destruction. The issue is what is the Soviet strategy and how do we defeat it. This is most important now because for the first time we face the possibility of defeating Soviet strategy without needlessly resorting to such artifacts as mutual annihilation.

Soviet strategy for war calls for the execution of a surprise first strike. The Soviet view of first strike is one in which the enemy, the United States, is caught unaware. Their objective is to destroy the majority of our forces before we can successfully mount an organized and powerful counterstrike. Aside from responding to a perceived US first strike, a most unlikely event, it is extremely doubtful that they would initiate a nuclear attack unless they believe they had an extremely good chance of executing a successful surprise first strike. This is not only nuclear common sense; this is Soviet strategy.

To deny the Soviets confidence in being able to achieve a first strike capability would be a highly significant contribution to deterrence. So much so that it probably should be regarded as the sine qua non of US deterrent strategy. It would be nice to be able to ride out a Soviet attack and respond at our leisure in the aftermath. However, Soviet strategy and capabilities have made such a responsive strategy unrealistic and impossible, unless one is advocating de facto capitulation. Accordingly, the minimum (but most important) US requirement is for a highly effective SDI optimized first to ensure the ability of the United States to launch a deliberate, organized, powerful counterstrike while under attack or, more precisely, at the beginning of the Soviet first strike.

Further, in this context, the need to consider all defensive measures in addition to ballistic missile defenses during the SDI development and evaluation process becomes increasingly clear. Even an extremely effective SDI against ballistic missiles will not suffice by itself if the Soviet first strike can be achieved by other methods—for example, cruise missiles or bombers. Similarly, implicit in the need for SDI is the need for greatly improved US internal security capabilities to guard against sabotage.

Secondary Roles

There are two secondary roles for SDI: help preserve US residual forces, or strategic reserves, that is, those not designed and developed to be the initial US counterattack response, and help limit damage to the United States in the event of war. The emphasis is on the word "help" because SDI can contribute to both objectives, preserve residuals and limit damage, but in both cases, the major contribution—certainly in the near- and mid-term—has to come from other means, specifically, from the manner in which the offensive reserves are designed and from other defensive measures.

The problem with the US offensive "reserves," is that most were not developed as reserves, as that term is traditionally used, and did not foresee the manner in which the Soviet threat would develop. This is obvious in the case of the land-based forces and less obvious, but also true, of the sea-based force. Reserves do not suddenly become reserves simply because someone such as the Secretary of Defense decides some elements of the force are now "reserves." Reserves have to be designed as reserves from the ground up. Fixed site, vulnerable missiles dependent on electric power that may disappear after a day or a week, submarines with communications likely to rapidly disappear, and bombers devoid of covert recovery bases do not constitute effective reserves. It makes little sense, a priori, to look for defensive forces to eliminate obvious offensive vulnerabilities that can be corrected more cheaply and dependably in other ways.

Similar problems are even more evident in the case of limiting damage to the United States in the event of war. SDI can and would contribute, but the major tasks lie elsewhere. As the situation currently exists, in the event of a Soviet nuclear attack, there would be tens of millions of casualties. And most of them would be collateral casualties—that is, casualties that are the indirect effects of attacks on other targets. The most obvious way to save lives cheaply is through a well thought-out, reasonable civil defense and recovery program, one that is based on a careful analysis of Soviet strategy. The concept of building an SDI to "protect the population," without recognizing and acting on the fact that the major contribution has to come from other measures, simply does not make strategic sense.

The SDI Opportunity

SDI has been touted as the way to make nuclear weapons obsolete. To better "sell" SDI, it has been proclaimed that SDI reduces our need for offense, that in SDI, offense is being traded for defense, and so forth. It is important not to let long-term political goals interfere with current, near-term and foreseeable future realities or to let catch phrases interfere with intelligent national security planning.

The basis of SDI as put forth by the President in March of 1983 is the belief that the US strategy and policy—the mutual assured destruction, mutual assured vulnerability, offensive retaliation only, and so forth—is no longer valid and needs to be revamped.

This is the essence and opportunity of SDI. It is a mechanism for challenging the way business is being done, or not being done, by all those elements that should contribute as a team to US national security—beginning with strategy and including offensive forces, internal security, civil defense, and active defenses against planes as well as missiles. All these elements need to

be reassessed and placed in an integrated context in the process of bringing in SDI.

This is necessary if the president's objectives are to be achieved. This also may be an effective way to convince Congress and the public that SDI is not just another flight of fancy.●

ORDERS FOR MONDAY

Mr. DOLE. Mr. President, as I understand, we have a convening hour of 12 noon, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Then under the standing order, the leaders have 10 minutes each, and I think we also have—do we have unanimous consent for special orders?

The PRESIDING OFFICER. Senator PROXMIRE, 15 minutes.

Mr. DOLE. I add to that Senators NUNN and GOLDWATER for not to exceed 15 minutes each, prior to the special order for Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Since the minority leader's motion to recommit was tabled today, there will be no cloture vote on Monday, not on that particular one.

ROUTINE MORNING BUSINESS

Therefore, I ask unanimous consent that the order for the time to be divided between the majority leader and the minority leader be vitiated; and I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend beyond 1 p.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following morning business on Monday, the Senate will resume consideration of the debt limit extension. Pending is amendment No. 738 in the second degree to the majority leader's motion to recommit.

There is also pending a motion to reconsider, which could bring about a vote on cloture tomorrow. So we could have three votes. I want Members to know that there is a possibility of three votes. One, in effect, would be another cloture vote.

Following morning business on Monday, the Senate will resume consideration of the debt limit extension, as I have indicated.

We have filed a cloture motion, so on Tuesday there will be another cloture vote; but I indicate to my colleagues that we can expect rollcall votes during the day on Monday.

Again I say that if, in fact, there is a proposal from the distinguished minority leader to the majority leader, I will, in turn, discuss that with my colleagues; and I hope there will be an effort to reach an agreement with House leaders as well as representatives of the President.

Again I caution everyone that it has to be meaningful or I will not be able to, and would not, seek any agreement on this side of the aisle. If it is not meaningful, all bets are off. If it is meaningful and we have a right to vote up or down on Gramm-Rudman-Hollings-Boren amendment, then I think we are in stiking distance of making some progress. Otherwise, we have to let the chips fall where they may.

RECESS

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that, in accordance with the previous order, the Senate stand in recess until Monday, October 7, 1985.

The motion was agreed to, and at 6:12 p.m., the Senate recessed until Monday, October 7, 1985, at 12 noon.

SENATE—*Monday, October 7, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Father in Heaven, I confess not knowing enough about what is happening here to pray relevantly. But, God of wisdom, Thou dost know what is happening. Thou dost know truth from error, honesty from deception, substance from procedure, merit from intrigue. Thou dost know the Senators, their motives, their consciences, their plans. And the Senators know.

God of Truth and Justice, with profound respect, admiration, and affection for the men and women of the Senate, I pray for these people I love, that Thou wilt keep them from attitude or action which demean public trust or jeopardize national interest. Guide them through these critical hours that they will do nothing which they will later regret. Help them to find the immense power for good and greatness they have in unity. In His name who is Truth and Love. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each.

I ask unanimous consent that the time of the distinguished minority leader be reserved and any time that I do not use be reserved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOLE. That will be followed by special orders in favor of Senators GOLDWATER, NUNN, and PROXMIRE for not to exceed 15 minutes each; followed by morning business in which Senators are permitted to speak for not more than 5 minutes each.

Following routine morning business, the Senate will resume consideration of House Joint Resolution 372, the debt limit extension. Pending is amendment No. 738 in the second degree to the majority leader's motion to recommit. Rollcall votes can be expected throughout the day.

The majority leader did enter a motion to reconsider the vote by which cloture was not invoked on amendment No. 730, the Gramm-Hollings-Rudman amendment. That vote is expected sometime today. Additional rollcall votes could occur in relation to the majority leader's motion to reconsider the vote by which cloture was not invoked.

I would just say this: We have a meeting at 1:15 p.m. with the sponsors of the amendment, along with the chairman of the Finance Committee, Senator PACKWOOD, and this is really his bill on the floor, and the chairman of the Budget Committee. It is my hope that we can make some report to the Senate following that meeting.

In the meantime, I hope to have an opportunity to visit with the distinguished minority leader. I have discussed procedure with the Republican leader in the House of Representatives, Congressman MICHEL. We have had an opportunity at a staff level to exchange views with the chairman of the House Ways and Means Committee through his staff.

I understand the President will issue another statement at noon today indicating the need for immediate action.

I have also requested the Treasury Department to send us a letter indicating that we are on the razor's edge. So hopefully that will be here before long. Hopefully, sometime today we will have some resolution of these issues before us. I am not optimistic, but certainly hopeful.

If not, then the crunch will continue through today and tomorrow, and again I would hope to have factual information from the Treasury Department on what is happening as the Federal Government has not been able to borrow money since October 1. Does it make any difference? That is one question to be asked. And if it does, is anyone suffering? Where is the impact? What will happen to Social Security checks that are in the mail? Will they and all other Government checks be ultimately honored?

We need to have that information available because I assume that if that should happen, there may be a number of people getting phone calls in the U.S. Senate.

But above all, we would like to complete action and move on to the reconciliation bill this week. That will take considerable time.

Someone indicated to me that people say we have not had enough time to discuss this. This is only one bill. We have had about 22 hours on the floor in discussion so far. We could have another 7 or 8 hours today.

Alternatively, the reconciliation bill, which covers literally hundreds of programs, by law has only 20 hours of debate. So if there cannot be an understanding of this one issue after 30 hours of debate, then I do not know how we are ever going to complete the reconciliation bill. Arguably, we could make the same argument that we did not really understand everything in the reconciliation bill.

It is one hope that we could satisfy some of the legitimate concerns of some Senators. On the other hand, there are some who will never be satisfied. Some will just want to make speeches and issue press releases and talk about the deficit and vote against every opportunity to reduce it.

It is obvious that the special interest groups are starting to gather. They are going to be all over the Capitol saying this is a bad idea. And that is why I think it is urgent that we try to come together on a procedure for completing action on the debt ceiling as well as the Gramm-Hollings-Rudman amendment and the amendment to be offered, as I understand, from the other side, the Byrd-Chiles amendment, which in many ways is similar to the Gramm-Hollings-Rudman-Boren amendment.

At this time I would indicate to my colleagues that there probably will be a vote somewhere between 2:30 and 3 p.m. I reserve the remainder of my time.

RECOGNITION OF SENATOR GOLDWATER

The PRESIDING OFFICER (Mrs. KASSEBAUM). Under the previous order, the Senator from Arizona [Mr. GOLDWATER] is recognized for not to exceed 15 minutes.

DOMINANCE OF THE BUDGET PROCESS: THE CONSTANT QUEST FOR DOLLARS

Mr. GOLDWATER. Madam President, today, Senator NUNN and I give the fifth in our series of floor statements on organizational and procedural problems in the Department of Defense and Congress. Last week, we spoke of problems in Congress—because we are a large part of the problem—and we spoke of problems in the Joint Chiefs of Staff, the Unified Commands, and the Office of the Sec-

retary of Defense. As I explained to my colleagues, these speeches are based on a study by the staff of the Armed Services Committee concerning organizational problems in the Department of Defense which began 3 years ago under Senator TOWER and Senator JACKSON. Senator NUNN and I have continued that study. It began, is continued, and I hope will be concluded, in a totally bipartisan spirit.

Before I begin this morning, Madam President, let me take just a moment to talk about the American fighting man. In the late 1970's, the country finally woke up to the fact that we had permitted our Defense Establishment to languish while our principal adversaries rapidly expanded theirs. Senator NUNN and I had been sounding this alarm for some time. This led to widespread support in the country for increasing our defense capability. Therefore, beginning in 1979, we began an unprecedented peacetime buildup of our Armed Forces. And, Madam President, I am proud to report that our investment has paid off. In many ways, we have never had finer soldiers, sailors, airmen, or marines. They are better educated, better trained, better equipped, and better led than at any time in the past. Their morale has never been higher and their spirit of patriotism and pride is extremely high. When called upon, they have fought bravely and with great skill. Madam President that is not just my conclusion. All of the members of our Armed Forces, from the buck private to the Chairman of the Joint Chiefs, agree with these conclusions. I know because I have talked to them.

The statements that Senator NUNN and I have been making, and the study being prepared by the committee staff, absolutely do not reflect on the men and women in our Armed Forces. We are not questioning their integrity, courage, dedication, or professionalism. However, there are organizational shortcomings which seriously hamper their effectiveness. And it is those problems that are the focus of our concerns.

Madam President, as I have previously explained to my colleagues, our committee has formed a task force to examine these issues. The staff of our committee has drafted a lengthy staff study on these problems. The task force has been briefed on the study, but has not approved or endorsed the study. It is a staff, not a committee, product. But it is a first step in the examination and debate of these issues.

Our task force wants the best possible advice as we begin this process. Therefore, Senator NUNN and I invited a very distinguished group of outside experts to a meeting this past weekend at Fort A.P. Hill in Virginia to consider the draft staff study. The task force met with the group, which included two former Secretaries of Defense, two former Chairmen of the Joint Chiefs of Staff and chiefs of service, and numerous other former senior officials, both military and civilian, and leading scholars. Well, Madam President, the meeting was a great success. It was an extraordinarily productive session. Not all of the experts agreed on all points and, at times, the discussion got rather heated. But there was a consensus that there were serious problems that needed to be fixed and that the analysis in the study was essentially correct.

Before I turn to the subject of today's speech, I would like to point out to my colleagues that page 1 of yesterday's New York Times carried a story based on the speeches that Senator NUNN and I have been giving. It was headlined, "Two Key Senators Join in the Assault on the Military." The article was, I thought, an accurate reflection of what we said, but I would like to caution my colleagues that the headline does not convey what Senator NUNN and I have been trying to accomplish. We are both very ardent supporters of a strong defense and of our Defense Establishment. We do not wish to assail the Pentagon, but only to point out that there are management problems which, if corrected would strengthen the Department of Defense because we would have far more efficient forces. We could get, as President Eisenhower used to say, "More bang for the buck." And, as the Pentagon faces the constraints of fiscal reality for the forseeable future, we must get more bang for every buck we spend.

Let me now turn to the subject of today's speech which illustrates that point very nicely: That is, the predominance of the programming and budgeting process in DOD. The current programming and budgeting process in DOD does not permit us to get the most bang for the buck. The Department of Defense is preoccupied with chasing after resources. More time is spent preparing plans for the next budget than for the next war. Key civilian and military leaders in the Defense Department spend far too much time in their quest for dollars.

The preoccupation creates several key problems which run throughout the system. It draws attention away from more fundamental questions of military strategy and contingency planning. It has turned many in the professional officer corps into business managers instead of warriors. It distorts planning by elevating the importance of near-term goals at the expense of long-term objectives. It favors investment programs over readiness.

I will outline how this situation has developed, how it prevents DOD from developing effective military strategy, and turns our warriors into business managers. Senator NUNN will then discuss the way the system favors near-term over long-term decisions and investment over readiness.

BACKGROUND

In the first decade of the Department of Defense, resource allocation in all its phases—planning, programming and budgeting—was irregular and largely uncoordinated. The military departments prepared individual programs in pursuit of their own service-specific interests. There was limited integration across service lines and limited guidance from the Secretary of Defense.

This changed in 1961 when Secretary of Defense McNamara introduced a new planning, programming, and budgeting system, whose acronym is PPBS, to the Department of Defense. The PPBS system became, and remains, the fundamental decisionmaking framework for all Department of Defense programs.

The concept of the PPBS system is simple. Based on national policy and anticipated threats to national interests, a strategy is adopted. Once the strategy is established, force requirements and plans are developed. Based on these requirements and plans, programs are developed to acquire the personnel, equipment, facilities, property, and so forth over a designated time period. Once the programs are established, the PPBS system budgets the financial resources required to implement them. Because of the long-term nature of defense programs, the PPBS system incorporates planning, programming, and budgeting decisions that reach over a 5-year period into a document known as the Five-Year Defense Plan.

This programming and budgeting system has become the fundamental framework for DOD decisionmaking. It has been remarkably successful in controlling the free world's largest and most complex organization, the Department of Defense. Without question, the Department of Defense stands above the other departments of the Federal Government in this system for resource allocation.

There is, however, a lot of problems with the Defense Department's resource planning and budgeting system. People criticize DOD for finding $4 billion in savings. I should point out that these savings came from budgets that were put together 3 and 4 years earlier. There is not a single Member of the Senate who is capable of budgeting with precision how much he or she will need to replace the roof on his or her house 4 years from now, or the month he or she intends to replace his car, with what model and at what cost. While I think DOD can and should improve their estimating procedures and should not cause serious public perception problems by turning up $4 billion windfalls, we must recognize that it is a complex system.

The criticisms of just the estimating problems, Madam President, miss the big picture. The real problem with the PPBS system is that it has elevated financial issues to a preeminent position in the day-to-day activity of DOD. General MacArthur said, "There is no substitute for victory." I say to the Pentagon, budget policy is no substitute for defense policy. The PPBS system insures that budget policy will crowd out defense policy.

This is not entirely their fault. The Congress must share a major part of the blame. At roughly the same time that DOD implemented a long-range planning and budgeting system, the Congress started insisting on annual budgets. We have already discussed the significant problems in Congress that adversely impact DOD. The Congress' preoccupation with annual budgets shifted the emphasis in the DOD management system away from long-range planning to short-term budgeting.

FAILURE TO CONDUCT STRATEGIC PLANNING

What are the consequences of this preoccupation with resources?

The fundamental problem is that it diverts attention from the more fundamental question of developing an effective and coherent strategy. A senior DOD civilian official during the Carter administration criticized the lack of strategic planning this way, and I quote:

> There is all too little systematic strategy making in DOD, except in the strategic nuclear arena. Instead, the reality is best characterized as a piecemeal, irregular, highly informal process, largely driven by cumulative program decisions influenced more by budget constraints and consequent interservice competition than by notions of U.S. strategic priorities.

Madam President, it would be a mistake to say that DOD does no planning. Indeed, they spend hour upon hour, day upon day, planning. They are planning the wrong things, however. I am convinced DOD spends most of its time deciding which approach will be most successful in selling a program to the Congress. Congress fuels this by dwelling endlessly on these resource issues. I am beseiged by lobbyists trying to get the Armed Services Committee to intervene in some decisionmaking process in DOD. So let me say at the outset, I do not blame the Defense Department or the services alone for this problem.

This preoccupation turns strategic policymaking in DOD on its head. Strategic policymaking should begin from the top with a coherent assessment of goals and plans, and then to detailed directions for individual projects. All too frequently, however, the strategy is merely a convenient rationale to justify the weapons systems that the services want to buy. It would be as if a professional football team had separate recruiting and coaching departments for each part of the team. If the quarterback department recruited and coached quarterbacks who were good at passing, but the department for running backs recruited 180-pound speedsters who could not catch passes or block, the team strategy would, by necessity, be to punt a lot. Maybe that is what happened to the Redskins. It is certainly what has happened to the Pentagon.

Theoretically, the PPBS system is supposed to avoid these kinds of problems. However, strategic planning in DOD is left largely to the Joint Chiefs of Staff who prepare the joint long-range strategic appraisal and the joint strategic planning document. Those two documents are sent to the Secretary of Defense who in turn gives specific guidance to the military departments for achieving the strategy.

Strategic planning by the Joint Chiefs of Staff is fundamentally flawed, however, because usually the Joint Chiefs just accept the programmatic plans of the services with no regard for costs, and calls it a strategy. Unconstrained by fiscal resource limits, the JCS strategy would require 20 to 30 carrier battle groups instead of 15 we are going to be lucky to get, 60 or 70 tactical fighter wings instead of 36 we have today, and the 40 wings we someday hope to achieve, twice as many active divisions in the Army as we have today. As I said, these plans are developed totally apart from the question of affordability. It could be said that the JCS has never met a requirement that it did not like.

As a result, our strategic plans are totally unrealistic, and offer no guidelines for determining priorities in the actual allocation of resources. The military services can do their own thing, because everything they do is justified to meet JCS requirements. Inconsistencies can develop. Programs determine strategy rather than strategy determining programs.

BUSINESS MANAGERS, INSTEAD OF WARRIORS

A second consequence of this preoccupation with trying to find resources is that the military services are becoming more oriented toward business management than toward planning for and fighting a war. Our professional officer corps frequently behaves more like business managers than warriors.

Apparently, even many high-ranking military officers share this view. The Army recently conducted a professional development of officers survey, which found disturbing answers. Some 45 percent of the Army's general officers surveyed believe that senior Army leaders behave too much like corporate executives and not enough like soldiers.

In the same survey, a majority of the Army's officers felt that only half of their peers would make good wartime leaders. Not surprisingly then, four out of five Army officers, and two out of three Army general officers, believe that the Army's professional development system does not adequately prepare officers for war.

I refer to this survey, not to criticize the Army, but to congratulate it for trying to come to grips with this critical problem, and for candidly publishing the results. I urge the other three services to conduct similar surveys and face up to this problem as well.

The primary reason the officer corps thinks more like businessmen than warriors is because most of them are businessmen and not warriors in their day-to-day activity. A large portion of our officer corps is devoted to business activities of the services—running the "special project offices," "defense agencies," and acquisition commands and staffing offices and organizations, not to commanding forces. Of the 1,073 flag and general officers in the military services, only one in five—22 percent—actually command line units. An almost equal number—18 percent—are involved in logistics and material functions and in research and development activities. In the Air Force, there are more general officers holding jobs in logistics and research and development management—69—than commanding operational units—671.

At the end of World War II, there were 2,068 flag and general officers commanding over 12 million U.S. soldiers, sailors, and marines. Today, there are 1,073—almost half as many—commanding just over 2 million. There were two generals and admirals for every 10,000 enlisted personnel in 1945. Today, there are five for every 10,000 enlisted personnel.

As Senator NUNN observed in one of our earlier speeches, it takes more admirals and generals to wage peace than to wage war.

Now Madam President, it is important that we have able people managing resources in the Department of Defense, but I am concerned that the quest for and management of resources is diverting some of our best talent away from their primary responsibilities of planning and preparing for war.

Just as Congress has to disengage from its preoccupation with trivia, DOD has to disengage from its preoccupation with resources. This must be one of the critical goals of any reorganization plan for DOD.

We must change those organizational deficiencies in the Pentagon such as the planning, programming, and budgeting system which do not permit us to get the "most bang for the buck" in an era of declining resources and growing threats.

I am happy to yield to my friend from Georgia, Mr. NUNN, but before I do I want to reiterate, Madam President, through almost a lifetime of experience with the man in uniform, I

have never known forces to be so patriotic, loyal, or well-trained as the forces we have in the field today. What we are shooting at is that layer of management up at the top that has grown because of this body here.

I yield the floor to Senator NUNN.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia [Mr. NUNN] is recognized for not to exceed 15 minutes.

Mr. NUNN. I thank the Chair.

DOMINANCE OF THE BUDGET PROCESS: THE CONSTANT QUEST FOR DOLLARS

Mr. NUNN. Madam President, I want to underline and emphasize the points made by Chairman GOLDWATER, particularly in reference to our efforts in this reorganization study and our speeches on the problems we are trying to solve. It would have been more accurate if the New York Times headline yesterday had been "Goldwater and Nunn Make Efforts To Strengthen the Military." Instead the headline read "assault" the military. Of course, many people do not read beyond the headline. If they had read the whole story it would have put it in context. But that headline was precisely the opposite of what we are trying to do. We are trying to strengthen the military.

We recognize the tremendous dedicated effort of hundreds of thousands of military personnel out there in the field. I do not think the quality of personnel has ever been higher. That is a real tribute to the men and women who are serving in the military today. The men and women in uniform are making tremendous efforts and sacrifices. We are striving to improve DOD organization, so that we can insure that their sacrifice is more effective, and improve our national security.

Madam President, I am pleased to join Chairman GOLDWATER as we deliver the fifth in our series of statements on the organization and decisionmaking procedures of the Department of Defense and the Congress. We started with the serious problems in congressional oversight of national defense. We gave a brief history of organizational problems in DOD starting with the Spanish-American War which underscores the point that our critiques are not aimed at current civilian and military officials or any previous administration. We are not seeking to assess any blame. We dealt next with the organization of the Joint Chiefs of Staff and the unified commands. It is worth noting again that this critique was about the organizations and not the military individuals who have served their country with distinction in these key jobs. We ended last week with a speech on the Office of the Secretary of Defense and the failure to integrate defense decisionmaking on a mission basis.

At the outset, Chairman GOLDWATER and I said we would be blunt and candid in describing the problems in the Department of Defense and Congress. We were and we will continue to call the shots as we see them based on an objective review of the facts. We are talking about our collective failure to organize efficiently in the way we use resources and in the way we carry out our military strategy.

These speeches we made were based on what has been a truly bipartisan 3-year effort started by Senators Tower and Jackson. It is important to understand the context for this effort. This is not an effort to cut the defense budget.

Far from it, Chairman GOLDWATER and I have supported sufficient funds in the defense budget to do the job.

This is not an effort to impugn the patriotism and fighting spirit of our men and women in the military. We are proud of those men and women and proud of what they are doing for our country.

Gen. Jack Vessey—who recently retired as Chairman of the Joint Chiefs, and served this Nation with great distinction in three wars—was absolutely correct when he said our military is more capable today than they were several years ago.

As a Democrat, I am proud to be able to say that. They are more capable than they were several years ago.

There have been significant improvements in military personnel. Modernization of our strategic and conventional forces is well underway. Key areas such as command and control have received real emphasis and improvements. I am not here addressing the issue of whether or not these increases in defense capability have been commensurate with the money spent on defense. That is a subject for another day.

Are we more ready than we were 4 years ago? The answer is clearly yes. There are serious questions however. Have we spent the funds in the most effective way or could we have spent them in a way which would have made us much more ready than we are today? That is the question.

Madam President, we must give credit where credit is due. There are improvements in military capability. We are not here for the purpose of looking back except in a historical reference to see where we are and where we should be going in the future.

We must assess our military needs based on our national objectives and the military threat we face.

Our vital interests must be protected. The threats to these vital interests have continued to grow even as our capabilities have grown.

It is perfectly consistent, although some people may not see it in the first analysis, to say that there have been great improvements. These are improvements in our own forces over time.

The more important question is whether our forces measure up compared to a potential adversary.

The gap, then, between national objectives and our military strategy and the capabilities and resources to support that strategy has grown. Madam President, these gaps will not be closed by additional resources alone, particularly considering the likelihood of relatively static defense budgets, especially in a period of large deficits that we all recognize.

I might add, the Chair has been very diligent in looking at the whole military arena in the last several years, and has been a real leader in advocating reform.

Madam President, this is an important point. We are talking about the future and how best to obtain the most effective and most efficient defense for the dollars that are available. In the words of the old cliche used by Chairman GOLDWATER: We need the most bang for the buck.

Madam President, in a period of fiscal constraints and in an era of growing threats, we must help close these gaps by insuring that our defense structure and congressional oversight are organized to permit the most bang for the buck. They currently are not organized to insure this result. With this background in mind, we turn our attention today to the planning, programming and budgeting system within the Department of Defense, which Chairman GOLDWATER has addressed.

I agree with Senator GOLDWATER that the DOD bureaucracy is caught on a treadmill chasing dollars; they are preoccupied with inputs instead of outputs. The internal machinery of the Pentagon is geared toward putting together and justifying the annual budget submission—that is the request for how much money we will put into the Pentagon each year. The Pentagon is measured by how much the budget increases—not by the all important question of what it produces in military capability. There are two key problems caused by the system's fixation with inputs that I want to discuss. The first is the way that this overemphasis on dollars favors near-term goals at the expense of long-term objectives. The second is that the system is biased toward investment at the expense of readiness.

NEAR TERM AT THE EXPENSE OF LONG TERM

The current preoccupation with resources inevitably favors near-term fixes at the expense of long-trm goals.

As with Chairman GOLDWATER, I fault the Congress for this as much as DOD. Congress is preoccupied with the annual budget and that forces DOD to emphasize one year at a time as well.

Because of the emphasis Congress places on the annual budget submission, there is a natural tendency within DOD to look seriously at only the current budget year. DOD is busy trying to get as much packed into 1 year's budget as possible and to get it approved by the Congress.

That is why this year's Defense Authorization Act contains a provision which I sponsored and which received unanimous support in the Armed Services Committee, which calls for the Department of Defense to begin a 2-year budget cycle beginning with fisal year 1988. I am convinced that this will be a major improvement and will give Congress more time to concentrate on oversight and the Department of Defense more time to concentrate on strategy. It should help break the fixation on 1 year at a time.

Another problem is caused by the use of unrealistic long-term planning assumptions in the guidance to the services prepared by the Office of the Secretary of Defense. Because of the long development period for many programs and the long time it takes to procure weapons and build ships, DOD puts their overall program together in 5-year increments—called the 5-year defense plan [FYDP].

Since ships, for example, take years to build, DOD has to know how much money is needed in the budget 3 years down the road to cover the construction of that ship. In fact, almost 40 percent of each year's spending—the outlays—is virtually "uncontrollable" since it is based on prior year commitments.

Incidentally, this is a very important aspect of the Gramm amendment or the Chiles amendment, and others, which we are going to have to consider. These amendments set aside spending categories based on things that are virtually uncontrollable and a large portion of the defense budget, in my view, fits into that category.

I consider the 5-year defense plan to be seriously flawed. The pending budget year is constrained by realistic resources, but the planned so-called outyears—that is the years beyond the budget years—of the budget float to unrealistically high levels. While the current year ends up in the realm of the possible, the outyears of the 5-year plan stay in the realm of the impossible. Programs constrained in the near term get well by "plans" for large real growth in the future. In this dream world approach, everything fits. When everything fits, there is little need to focus on priorities, to require trade-off between the services, and to force more joint approaches.

I have questioned top executives in this country, "what if your 5-year corporate plan showed, as the defense plan does, growth averaging about 5 or 6 percent in real terms, but instead of that happening, you ended up with zero real growth? Now would that affect your priorities and your ability to manage your money?"

Universally all of them answered it would be absolutely devastating and "we would have to adjust our 5-year plan very rapidly to adjust to reality."

That has not been done in the defense budget and is not being done.

Let me say this is not a problem unique to this or any previous administrations—Republican or Democratic. Both have demonstrated this key weakness in the FYDP. Under the Carter administration, DOD was forced to use unrealistically low inflation forecasts. The effect was to overstate the level of real funds that would be available for programs in the out years, because most "real" funds would be required to finance unbudgeted inflation. The Reagan administration has also demonstrated this problem, not by underestimating inflation but by overstating likely real growth. Again, the effect is to give an unrealistic forecast for future defense spending in the out years.

In other words, in the Carter years DOD underestimated inflation. The Reagan administration has, if anything, overestimated inflation and that has provided a modest cushion. But in the 5 years of this administration, DOD has greatly overestimated the rate of growth, and that has resulted in the same thing as the Carter administration. The current FYDP shows out year real increases significantly higher than could possibly be attainable in the current economic and deficit environment and our understandable concern about the very large deficit.

Under these conditions, the services start more programs than they can afford to buy at efficient rates.

I shall use this term several times during the course of this presentation and in future presentations. The cost of weapon systems is determined by a lot of things. Contractor overhead is a large part of the weapon cost. If you do not produce weapons at efficient production rates, you are in effect wasting a very large amount of money in overhead. If we bought weapons at more efficient rates, the overhead burden is reduced tremendously.

Almost all programs can fit in the budget when they begin, but are often budget busters by the time they go into production. The services delude themselves to think they can afford to buy all of the new starts because they fit in an unrealistic 5-year plan. The problem is we never achieve the 5-year plan. As the Pentagon has to adjust the plan downward as it moves into the current year, significant inefficiencies occur.

This is one of the reasons why program stretchouts have become a fact of life in DOD procurement. Of the 92 major weapon systems or production lines contained in the fiscal year 1986 request, 29 were stretched out or deferred compared to plans announced only last year. DOD stretched out 22 problems in fiscal year 1985, driving up costs on those systems by more than $3 billion. In other words, Madam President, $3 billion went not for increased combat capability, not for more units of equipment, not for improved readiness—but to buy the same program which became more expensive because DOD plans to purchase those units at inefficient rates incurring higher costs. Since 1982, the Air Force has been able to procure only two-thirds of the quantities projected for major systems.

In other words, one-third of what was projected in 1982 has not been purchased.

The other two services fared somewhat better, though we consistently fall short of our objectives. Stretchouts and deferrals result in inefficient expenditures of defense resources. Yet the current FYDP, with its unrealistic outyears, drives the system to these inefficiencies.

This is why we have so many weapon systems in production at inefficient production rates. To use the example of combat aircraft and helicopters, the Navy on the average is producing aircraft at only 38 percent of maximum efficient economic production. The Air Force is at 58 percent while the Army is at 52 percent.

I think that is why our weapons systems costs per unit are going up so much.

We have so many systems in production at inefficient rates because we start more programs than we can afford. They seem affordable because only 1 year is constrained by realistic resource levels.

Usually, the first year of a production program is "affordable." But the cost of a system grows and grows in the outyears. This year provided a graphic example.

Almost every combat system is being manufactured at inefficient production rates. Four of the 12 combat aircraft in the Navy are being produced below minimum economically efficient rates, for example. Despite this systematic inefficiency, DOD requested—and Congress approved in the fiscal year 1986 authorization bill—continued development of five new giant programs that constitute a massive mortgage on the future. These five programs—the Army's LHX helicopter, the Navy's JVX tilt-rotor aircraft and advance technology aircraft, and the Air Force's C-17 transport and ad-

vanced technology fighter—cost only $1.3 billion this year. But these five programs are currently projected to cost from $180 to $200 billion. This is like making a down payment of less than 1 percent on a house on which you know you can't afford to make monthly mortgage payments.

There are other numerous signs pointing to a very worrisome future, evidence that our preoccupation with this year's problems are masking serious long-term difficulties.

Uniformly across the services, the average age of our combat systems is increasing because we cannot afford to replace older items on a one-for-one basis with new systems. These new systems are just too expensive to buy in quantity.

We are finding we cannot afford the increase in force structure we so optimistically projected 5 years back. The Air Force planned to have 40 tactical fighter wings by 1986 and 44 by 1990. Now they will be lucky to get 40 by 1990 and they have abandoned the goal of 44 entirely, I understand.

The Navy is close to achieving a 600-ship fleet, but we will have to commit at least 3 percent real growth per year for the next 10 years just to sustain this increase. I think it would be great to get 3 percent real growth each year for the next 10 years.

I am afraid that is very unlikely. If we do not get that 3 percent annual real growth, the 600-ship Navy will be a fleeting achievement, no pun intended.

Our optimistic plans for modernization are almost always dashed by budget constraints and cost increases. Under original plans, the Navy planned to buy their LAMPS III antisubmarine helicopters in a 4-year period. Instead the program is going to take no less than 10 years. By fiscal year 1986 under original plans, the Navy was supposed to have completed 65 percent of its acquisition of the F-18 fighter. Instead, we are only 35 percent finished and 5 years behind.

Consistently, DOD and the Congress settle for short-term goals at the expense of long-term objectives. The fault, again, lies in three factors. The military departments are on a resource treadmill chasing the greatest amount of resources possible. Congress is preoccupied with micromanaging 1 year at a time rather than taking a long term perspective. And the Defense Department refuses to make realistic long-term plans for the future. All these things work together to favor near-term fixes at the expense of long-term objectives.

INVESTMENT OVER READINESS

The resource treadmill is also biased toward investment at the expense of combat readiness. The dominance given resource allocation in DOD naturally favors investment decisions, that is the purchase of hardware, programs in research and development, and military construction.

The military departments in Washington are investment-oriented, while the operating commands in the field are readiness-oriented. The operating commands worry about being ready to go to war today and the Washington headquarters primarily worry about the war we may have to fight 8 or 9 years down the road.

All that is necessary. You are not going to eliminate all of that. But you have to have a balance, and the question is, do we have the balance?

Yet it is the departments in Washington that plan, program, and defend the annual budget submission. We have already covered in an earlier speech how our wartime commanders in the field believe they have inadequate input and influence in the Washington decisions on the budget.

Investment expenditures on new combat systems are concentrated. The majority of the expenditures go to a relatively small number of businesses in distinct geographical regions. These businesses, as would be expected, lobby hard to protect their programs in the budget. Readiness expenditures, by way of contrast, and decentralized, occurring widely throughout the economy and around the world. There are no businesses that sell readiness as there are who sell aircraft and ships. This naturally links Congress, the defense industries, and the military services together to favor procurement over readiness.

If a weapon system is challenged, the military department is reinforced by literally hundreds of lobbyists to defend it. There is no lobby for readiness.

This is why we spent $2.6 billion on attack submarines last year but didn't buy enough torpedoes to give each of them a full load. This is why have $45 million aircraft like the F-15 dropping World War II-era dumb bombs, because we cannot afford to buy sufficient quantities of modern munitions. This is why this year Congress directed the services to buy 560 million dollars' worth of aircraft that they had not requested and at the same time cut $655 million from aircraft spare parts and support equipment that they had requested. Spares and support equipment are essential to readiness.

REQUIREMENT FOR COMPREHENSIVE CHANGE

It is worth restating that three factors cause this state of affairs. The military services are preoccupied with a quest to maximize resources in the annual budget submission. Congress is preoccupied with micromanaging the annual budget. And the civilian Defense Department leadership refuses to establish realistic, stable, long-term plans for defense spending. This puts all of us on the resource treadmill together. The faster we run more we fall behind, since the goals in the 5-year plan are so totally unattainable. Unless we slow down this treadmill and bring the DOD planning, programming, and budgeting system down to reality, we will not achieve the desired goal of obtaining the "most bang for the buck."

The men and women out in the field, who are willing and do, indeed, risk their lives every day to defend us, deserve more of the system we give them. We are conducting this search for an improved system in DOD to support their sacrifices. Improving the organization of our defenses is the best thing that we, in Congress, can possibly do to partially compensate the young men and women who are making the sacrifices for our country.

Madam President, I am sure my time has expired. I yield whatever time I have remaining.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

THE REPORT OF SENATORS NUNN AND GOLDWATER

Mr. PROXMIRE. Madam President, before Senator NUNN and Senator GOLDWATER leave, I want to say that I have had a chance to hear part of what they have said and I have read in the RECORD everything they have said. I am deeply impressed. I think all Senators are in their debt. There are no two Senators who have greater credibility. I have been in the Senate a long time, 28 years. No Senators, in my judgment, in all those years have had greater credibility with respect to our military forces.

Their timing could not be better. Yesterday, we made sure that we are going to vote on the so-called Gramm amendment, which I am going to support, and I understand that both Senators who have spoken are going to support. That is going to have a tremendous impact on the military, probably more than any other sector, especially in what Senator NUNN has just talked about, maintenance and readiness. It will have to all be taken out of outlays, and, as you know, you cannot reach procurement on outlays. You have to hit outlays in readiness, and so forth.

I have calculated that in this area, in 1987, that is, the year coming up that we are going to be working on this year in the budget, we are going to have to cut readiness and maintenance by about 12 percent or cut it somewhere else. This is going to be extremely difficult. I think both Senator GOLDWATER and Senator NUNN have

shown us a way in which we can make some constructive cuts in this area. I do not think we can cut anything like that. Maybe we cannot cut at all. Maybe we should not cut anything. They have pointed out, for instance, the pathetic communications in Grenada between the Army and the Navy, the DOD pursuit of dollars rather than pursuit of what we have to develop. Senator GOLDWATER referenced just this morning the fact that we need not businessmen as officers but fighters, warriors who know something about war and concentrate on it and think about it, not think about business management primarily.

I understand it was pointed out that there are in the Defense Department eight layers between the Secretary of Defense and our troops in Beirut, so that any centralized command from Washington for changing our policies is virtually impossible.

What the Senators have brought to us this morning is extraordinarily helpful to us. I hope all Senators will have an opportunity to read those remarks in the RECORD.

Mr. NUNN. Madam President, I thank my friend from Wisconsin for his very kind and laudatory remarks. I must say I believe the number of layers between the President and the command in Beirut may be underestimated. I am not sure of the precise number, but I thought it was higher than eight.

Mr. PROXMIRE. The President is nine. With the Secretary of Defense it is eight.

Mr. NUNN. I will accept that, but I thought it may even have been more than that.

The Senator's point is well made. I want to comment on the relationship of all this to the pending Gramm amendment. I voted for cloture yesterday. I think we have to come to grips with our fiscal problems. We have a fiscal crisis in our country that is affecting our national security. If we do not have a strong economy, we cannot have a strong national defense or national security.

I want everybody to know I will probably support one of these amendments although I am not a cosponsor, but we better think very carefully about what we are doing in this area.

Our calculations—and I will be making a presentation on this today or tomorrow—indicate that if this amendment had been in effect in 1985, we would have had to take about $13 billion more than we took out of defense outlays after the fiscal year started. Now, that is outlays. That is not budget authority. A lot of people do not understand the difference. Budget authority is going to be spent out over a long period. Outlays are spent within the year.

The only way we could have done anything like that would have been to either cut some $50 to $60 billion out of procurement or we would have had to cut a combination of programs, including pay decreases, not refraining from increasing but pay decreases. We may have had to lay off people, in the tens of thousands, in the military. We may have had to limit the terms of the number of ships cruising the oceans. We might have had to have limited training flights by pilots. We would have had an enormous disruption.

I emphasize all of this would have had to have been done during the fiscal year after it had already started. The Gramm amendment would have required $13 billion reduction in outlays. So the Senator's estimate about a 12-percent cut in readiness for fiscal 1987 under this approach is probably right on the nose. It has enormous implications for our national security.

I saw in the paper yesterday where the President of the United States said he was all for the Gramm amendment and he had endorsed it, but he said he wanted to insist on 3 percent real growth for defense.

There is a message that the White House ought to get. The two goals—balanced budgets and higher defense spending without tax increases—are diametrically and totally incompatible. There is no way you can be for the Gramm amendment and also be in favor of 3 percent defense growth. It cannot happen. It is not a matter of philosophy, liberal or conservative. It is not a matter of priorities. It is a matter of arithmetic. All you have to do is look at the budget and add up the various categories. It cannot happen. So the President had better reassess his goals. In my opinion, there is no doubt we have to come to grips with this deficit.

If we pass something similar to the Gramm amendment or the Chiles amendment or the Johnston amendment, the President will be able to continue his plans of 3 percent real growth in defense a year, but he will have to face head-on a tax increase. There is no other way. He will have to face that choice. That is a choice the President does not want to make. He has not made it for 5 years.

When he endorses the Gramm amendment, he will have to recognize the implications. It is not 2, 3, or 4 years off. Next year, he will have to make those choices, and all of us will have to participate. It is not just the President. Congress will have to do it, also.

Mr. THURMOND. Madam President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. THURMOND. Madam President, I wish to take this opportunity to commend the able chairman of the Armed Services Committee, Senator GOLDWATER, and the able ranking minority member of the committee, Senator NUNN, for the excellent report they made today.

This is a matter of great importance not only to the Armed Services Committee and the entire Senate, but also to the entire country. The Defense Department spends the largest amount of any agency in the Government, except Health and Human Services, and it is highly important that every step possible be taken for us to get the full advantage of the money being spent.

This study has been going on for some time, and I believe it is going to result in great savings to the Defense Department and more efficiency.

(Mr. SYMMS assumed the chair.)

THE NITTY-GRITTY OF THE GRAMM AMENDMENT

Mr. PROXMIRE. Mr. President, this Senator intends to vote for the Gramm-Rudman-Hollings amendment and vote for it with enthusiasm. Why, then, have I voted twice against invoking cloture on this amendment?

I have voted against cloture in the fervent hope that the majority leadership would recognize the wisdom in the minority leader's plea for a hearing on this complex, far-reaching legislation. The majority leader has ridiculed this idea on the ground that Senators constantly vote on legislation without knowing what they are doing, so why should the vote on this amendment be any different?

The answer is that the pending amendment can only do the job all of us know we must do, if we understand it from the very beginning. The more thoroughly we understand this amendment, the more surely we can make it work—and it will be far more difficult to make the amendment work than most Senators imagine.

An overwhelming majority of the Senate will vote for this amendment, including this Senator. The amendment or something very much like it, will be adopted in the House and become law. So why not stop torturing ourselves, adopt it, and go back to business as usual? After all, the amendment permits a $192 billion deficit in 1986. Only 2 months ago, OMB was estimating a $170 billion deficit for 1986. So we have plenty of leeway. For this year, no programs will have to be cut significantly. For this year, we will not have to raise any taxes. We do not start any of that painful, tough, unpopular stuff until next year. We will not really get down to brass tacks on any of that until next summer and next fall.

What happens next summer and next fall? It is no secret. Next year is an election year. Thirty-four of our Senate seats and all of the House of Representatives are up for election. It is in the atmosphere of that election—

that struggle for control of the U.S. Senate—that the pending amendment will require Congress to reduce the deficit from $192 billion to about $151 billion. I am allowing, of course, for the statistically significant adjustment. That is a reduction of roughly $40 billion or 4 percent.

However, the way the amendment is drafted, all of the $40 billion must come from only $300 billion in outlays that will be available for cuts.

That means we must make 12 percent reductions in the only part of the budget we can touch. We cannot touch Social Security. We cannot cut interest on the national debt. We cannot cut contracts that have been made in the past years that require payment in 1987.

There are other large exemptions. Far and away, the biggest area of spending we can reduce is in the military. Does that mean we can cut spending for aircraft carriers, B-1-B bombers, the MX, and so forth? No, we cannot touch most military procurement. That falls in the untouchable $700 million that is not reached by outlays. It means we have to cut readiness, maintenance, personnel. Consider one account—military personnel, Marine Corps. A 12-percent cut, $600 million, means one of two things: Firing a number of marines or keeping the same number but cutting their pay. Will Congress cut marine pay 1 month before the election or lay them off?

Obviously, there will be areas of spending—big areas—like the Army, Navy, and Air Force maintenance and readiness, that we should not cut and will not cut. But then what happens? What happens is that we have to make even more savage reductions in education, in civilian pay, in agriculture, in environmental protection, in health research, in health delivery. What can we do to meet this situation? How can we avoid a deficit bigger than $151 billion in 1986 without cutting essential spending? Answer: We can raise taxes.

Get the picture? Late next summer, after wrangling about cutting any number of popular programs, Congress decides that it must raise taxes—3 or 4 months before the 1986 election. Do we? What do you think? No way, not before the election.

So, what else can Congress do? We can pass a waiver. We can decide that $151 billion was a mite ambitious, so we can pass a waiver next year raising the deficit from $151 billion to what we call a more realistic $175 billion or $180 billion. How many heroes are going to vote for that a few months before the voters go to the polls?

Of course, miracles can happen. No one can predict the economy. The country may enjoy the greatest growth year in history in the next 10 months. We may have such a remarkable improvement in personal income that tax revenues soar out of sight and the deficit dwindles in the current fiscal year, so OMB and CBO can estimate a continued zoom in income for 1987, without any painful spending cuts or tax increases. Under such happy circumstances, the deficit will—at least, on OMB and CBO projections—in the fall of 1986 come in for the next year on target. Most of us would agree that this miracle is a 100-to-1 longshot.

That is one miraculous possibility. It is not the only one. The country could suffer a shocking recession. Unemployment might soar, our business failures explode. With the country's heavy private debt, individual bankruptcies and home foreclosures might become common. Under those circumstances, the public mood might cry out for a waiver. It might be the most popular thing Congress could do. But this miracle is also a longshot—maybe 10 to 1.

Then, there is another miracle that could save us from the consequences of this bill. The country could go to war. It probably would have to be a bigger deal than Grenada. Hopefully, it would not involve the Soviet Union and nuclear weapons. But a medium-sized war—say, in the Middle East—would fill the bill. It would permit Congress to invoke the war clause in the amendment, and we would be off the hook for the 1986 election. I would call that miracle about a 50-to-1 shot.

Senators might disagree with my odds, but it is clear that it will take either a happy or a disastrous miracle to save us from the very grim 1986 political consequences of the pending amendment.

Mr. President, I started out by saying that I would vote for this amendment with enthusiasm. In view of what I have just said, where do I find my enthusiasm for what seems a very likely sadistic action? The answer is that this Senator views the deficit as such a serious cancer on our superb economy that unless we take the most painful and unpopular action, we will destroy the best economy in history.

In fact, this Senator would prefer a cold turkey, pay-as-you-go action right now, which is exactly what the distinguished Senator from Idaho [Mr. SYMMS], the present occupant of the chair, has said he also favors.

I would like to see us right now go on a pay-as-you-go basis. We might adjust until the first of the year, but at that point borrow no more. I think it would have a favorable effect on the economy and restore business confidence. But I must say that if we do, it is going to be very difficult to get done. In fact, of all the miracles I have just discussed accomplishing, that kind of cold-turkey treatment of our economy is the longest shot of all.

We will get the Symms vote and Proxmire vote, and maybe a few others, but we all know that it is not going to be done.

This Senator will predict, however, that the day will come in a few years when we will go that cold-turkey route and it will work. We have to do it, and I think that is the only way to do it.

That means raised taxes. That means go on a pay-as-you-go basis and borrow no more.

Argentina is doing it right now. It has been done by other countries in the past, and it is interesting in that when it has been done there has been an enormous public response in favor of it.

I think it can happen in this country, but, as I say, I think it is a little ways away.

WHY AN END TO NUCLEAR WEAPONS TESTING IS SO CRITICAL

Mr. PROXMIRE. Mr. President, every informed person on Earth must recognize that a nuclear war constitutes an ever increasing threat to the very existence of mankind. At the very least a nuclear war would end civilization as we know it. Certainly we in the United States have no more important obligation than to do everything within our power to prevent this supreme catastrophe. So what can we do about it? There is one action we can take which would do more to prevent the awful prospect of a nuclear war than anything any other nation can do. What is that action? It is to agree to comply with the pledge this country made in the Limited Test Ban Treaty of 1963, ratified by the Senate, and repeated in the 1970 Nonproliferation Treaty and in the 1974 treaty that limited the kilotonnage of underground nuclear weapon test explosions. The latter treaty was not ratified but was signed and it is viewed as a law of the land. That promise and pledge firmly and clearly committed the United States to negotiate with the Soviet Union a total end to nuclear weapons testing.

Why is an end to nuclear weapons testing so crucial to the prevention of nuclear war? William Epstein states the case very clearly in a superb article he wrote for the August 1985 Scientific American. Epstein contends that the Nuclear Nonproliferation Treaty that has played a major part in preventing the spread of nuclear weapons since it came into force in 1970 depends crucially on a good-faith effort by the two superpowers to negotiate an end to nuclear testing. Epstein points out that the Nuclear Nonproliferation Treaty, like the pledges in the treaties of 1963 and 1974, will require a halt to the testing of nuclear weapons. Epstein argues that most of the 128 signatories to the NPT view this provision as:

Having priority over other measures of nuclear disarmament and that it is logical to stop the development of new nuclear weapons before undetaking to either reduce the number of or eliminate such weapons. Hence these nations regard a comprehensive test ban not only as the most important first step toward ending the nuclear arms race but also as the most feasible and most easily attainable measure to halt both the horizontal and the vertical proliferation of nuclear weapons.

Horizontal proliferation is the spread of nuclear weapons to nonnuclear states; vertical proliferation is the further development of nuclear weapons by the superpowers. Why is the further development of nuclear weapons likely to lead to the spread of those weapons? Because with improvement or "modernization" of the Nuclear weapons, they become lighter, smaller, and cheaper. Why does this increase the likelihood of the spread of nuclear weapons to nations that presently do not have them? Easy. After all, why do the nonweapon states now fail to build and deploy this open sesame to infinite military power, this ability to inflict total devastation on any nonnuclear neighbor that may have every military advantage except the possession of nuclear weapons? The answer: Since the dawn of the nuclear age, nuclear arsenals have simply been out of the economic question for most nations. A few economic powerhouses like Japan and West Germany have the obvious capability to build nuclear arsenals but live in the shelter of an effective treaty and with a treagic military legacy which since the end of world War II has effectively discouraged major militarization in Japan and Germany. But the day is coming with the potential development of such as antimatter bombs when the constant testing of nuclear weapons by the superpowers will bring on bargain-basement nuclear weapons. If we permit that to happen the proliferation business will explode and nuclear war will become a certainty. Just this year the U.N. Secretary General declared:

It is of direct importance to the future of humanity to end all nuclear explosions. No other means would be as effective in limiting the further development of nuclear weapons.

The Nonproliferation Treaty now has 128 parties as signatories, more than any other arms control agreement. It represents the very heart of the effort to prevent the proliferation of nuclear weapons. It includes the great majority of the nonnuclear nations in the world. Many of those nations have become bitterly disillusioned with the failure of the superpowers to stop their continued nuclear weapons testing in spite of solemn promises engraved in the heart of three treaties to do exactly that. Epstein writes:

. . . the non-nuclear nations regard a willingness to enter into a complete test ban as a definitive test of the intentions of the two super powers and of their will to live up to their obligations under the NPT.

Mr. President, why, oh why, in view of all this has the United States refused to negotiate a total nuclear weapons test ban treaty with the Soviet Union? The answer is very obvious to this Senator. This country has an immense technological advantage over the Soviet Union. That technology represents the heart of the U.S. military advantage in nonnuclear as well as nuclear military matters. It was just this year that the Under Secretary of Defense for Research issued a report to Congress that showed the competitive status of the 2 superpowers in what the Secretary called the 20 most important areas of military technology. Where did the two superpowers stand? The United States leads in 15—15 mind you—out of the 20. The two superpowers were roughly tied in five. The Soviet Union leads in none; zero, zip. Obviously, the United States has continued to widen its massive nuclear military advantage by continuing the research and development that hinges crucially on testing. Our Presidents have not been about to surrender this advantage by agreeing to end it. Think of it. Since the 1963 Limited Test Ban Treaty, the superpowers have conducted over 1,000 nuclear weapons tests, twice as many as they conducted before the 1963 treaty limited testing.

Is this in our national interest? Mr. President, this nuclear weapons race is a race in which there are only losers. We can stay ahead, probably way ahead. How then will we lose? We lose because the weapons we develop will become, as they have consistently become in the past, common knowledge and then common weapons in other countries. The Soviet Union will, as they consistently have in the past, develop similar or identical nuclear weapons shortly after the United States does. And the arms race contagion will surely spread to other countries as weapons become cheaper. Certainly a U.S. agreement to renounce nuclear weapons testing is not an easy answer. It is a very painful answer. It requires risk and the sacrifice of a clear advantage. But the best way to prevent a nuclear war is to negotiate an end to nuclear testing. In those negotiations we can and must insist on the most thorough and effective verification. We must commit our scientific genius to the refinement and the constant upgrading of this verification. It will also require an alert followup by the United States to bring up any apparent violation of the agreement in the Standing Consultative Commission. There is no more critical decision that the United States could make than to take this crucial step toward world peace.

Mr. President, I ask unanimous consent that the article to which I have referred from the Scientific American and entitled "A Critical Time for Nuclear Nonproliferation" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A CRITICAL TIME FOR NUCLEAR NONPROLIFERATION

(By William Epstein)

Every five years since the Treaty on the Nonproliferation of Nuclear Weapons came into force in 1970 the parties have convened to discuss how well the agreement is achieving its purpose. This month the signatories will gather in Geneva for the third time, at what will probably prove to be the most crucial meeting in the series. It is already clear that an overwhelming majority of the nonnuclear nations believe the nuclear powers, and in particular the U.S. and the U.S.S.R., have not made serious efforts to achieve arms-control agreements or reduce the size of their strategic forces and have thus failed to hold up their end of the bargain. Indeed, this conference is almost certain to be the first one confronted with a total absence of progress on nuclear arms control since the preceding review. The continued credibility—even the viability—of the treaty is therefore put in question.

The treaty (usually called the NPT) was designed to prevent both the horizontal and the vertical proliferation of nuclear weapons. Horizontal proliferation is the spread of such weapons to nonnuclear states; vertical proliferation is the further development, production and deployment of nuclear weapons by the nuclear powers.

The NPT is the cornerstone of a "nonproliferation regime" that the signatory nations have built up over some 30 years. In addition to the treaty the regime has four other main components: the International Atomic Energy Agency (IAEA), the partial-test-ban treaty of 1963, the Treaty of Tlatelolco of 1967 (creating a Latin-American zone free of nuclear weapons) and the Nuclear Suppliers Group.

The IAEA was established in 1957 to promote the peaceful use of atomic energy. The nuclear nations agreed to assist nonnuclear nations in the development of the peaceful uses of nuclear energy on the condition that the nuclear material or equipment provided not be used for the manufacture of nuclear weapons. Hence the statute of the agency constituted a sort of nonproliferation bargain between the nuclear and the nonnuclear countries. At the time the U.S., the U.S.S.R. and the U.K. were the only nuclear powers. France set off its first nuclear explosion in 1960, China its first in 1964. In 1974 India exploded a "peaceful nuclear device," which incorporates the same technology as a nuclear bomb. All six countries are members of the IAEA, together with 106 others that have not exploded nuclear devices.

The partial-test-ban treaty prohibits tests of nuclear weapons in the atmosphere, under water and in outer space. It permits underground tests that do not create any radioactive debris outside the boundaries of the testing state. The treaty also declares that the parties seek to end "all test explosions of nuclear weapons for all time" and

will continue negotiations to that end. The treaty was concluded by the three original nuclear powers and now has 112 signatories. China and France are not among them.

It is noteworthy that the U.S. and the U.S.S.R. have conducted underground tests at a higher rate since the treaty than they conducted atmospheric tests before it. Consequently the treaty has turned out to be more of an environmental and health measure than a curb on the nuclear arms race.

The Treaty of Tlatelolco prohibits the signatories from making, testing, deploying or using nuclear weapons in Latin America. Cuba and Guyana are the only countries in the area that have not signed. (The treaty has 23 full parties but is not yet in force for Argentina, Brazil and Chile.) All five of the nuclear powers have signed a protocol wherein they say they will respect the treaty provisions and will not use or threaten to use nuclear weapons against the parties. This is the only treaty on nuclear weapons to which all the nuclear powers are parties, the only one that puts a legal limit on their right to make, test, deploy or use nuclear weapons and the only one forbidding such weapons in an inhabited area.

The Nuclear Suppliers Group consists of 15 nations (Western, Eastern and neutral) that seek to prevent the diversion of nuclear materials, equipment and technology to weapons. They set up restrictive export guidelines in 1974 and 1975. In 1977 a group of 66 suppliers and importers, with the assistance of the IAEA, expanded discussion of the arrangements in a meeting called the International Nuclear Fuel Cycle Evaluation. The aim was to minimize the danger of the proliferation of nuclear weapons without jeopardizing the development of nuclear energy for peaceful purposes. In 1980 the expanded group concluded that no technical measures could by themselves ensure the separation of peaceful and military applications in a way that would prevent the proliferation of nuclear weapons to additional countries. The group did envision some precautionary or ameliorative measures: the adoption of more effective and credible international safeguards and the establishment of regional organizations that might exert a restraining or deterring effect on nations edging toward nuclear weaponry. It seems clear, however, that such measures would not stop a determined nation from acquiring a capability to make nuclear weapons.

What, then, of the cornerstone of this edifice: the nonproliferation treaty? During the negotiations it was clear that both the nuclear and the nonnuclear countries wanted to prevent further proliferation. The nonnuclear countries insisted on a straightforward bargain: if they undertook to prevent horizontal proliferation, the nuclear powers must undertake to stop their vertical proliferation. Accordingly the preamble to the treaty recalled the pledge of the three nuclear powers in the test-ban treaty to negotiate an end to all testing, and Article VI obligated them "to purue negotiations in good faith on effective measures relating to cessation of the nuclear arms race at an early date and to nuclear disarmament."

The treaty came into force in 1970 and now has 128 parties—more than any other arms-control agreement. China and France have not signed the treaty; neither have some 40 other nations, including several that could make nuclear weapons now or will be able to do so soon. They include Argentina, Brazil, India, Israel, Pakistan, South Africa and Spain. Several of them are presumably avoiding the treaty because they have actual or potential national-security problems; others contend that the NPT is discriminatory, favoring nuclear haves over nuclear have-nots, and that in any case the provisions imposing obligations on the nuclear powers are not being carried out.

The continued refusal of some 40 countries, several with advanced nuclear programs, to become parties to the NPT tends to diminish the effectiveness of the treaty. Yet even the parties can withdraw on three months' notice. Therefore adherence to the treaty and acceptance of IAEA safeguards do not provide any absolute guarantee that a country will not at some stage decide to "go nuclear." (Under the terms of the treaty a conference must be held in 1995 to decide on the future of the treaty.)

Moreover, the treaty does not prevent nonnuclear countries from developing a capability or option of having nuclear weapons; it merely prohibits them from acquiring or making the actual weapons or explosive devices. The only conclusive proof that a country has done so is a nuclear test. A country could therefore prepare or acquire a small stockpile of plutonium or weapon-grade uranium without testing an explosive device and then begin testing after giving the required notice of withdrawal.

In the light of such possibilities the neutral and nonaligned nonnuclear countries regard a cessation of the nuclear arms race (the first obligation under Article VI of the NPT) as requiring a halt to the production, testing and deployment of nuclear weapons—in effect a freeze on nuclear weapons. Their view is that Article VI gives this objective priority over other measures of nuclear disarmament and that it is logical to stop the development of new nuclear weapons before undertaking to either reduce the number of or eliminate such weapons.

Hence these nations regard a comprehensive test ban not only as the most important first step toward ending the nuclear arms race but also as the most feasible and most easily attainable measure to halt both the horizontal and the veritcal proliferation of nuclear weapons. The reasoning is that with testing forbidden the nonnuclear countries would be unlikely to commit the resources required for a weapons program and the nuclear powers would not develop new weapons. Then over a longer term the deterioration of existing weapons would gradually make reliance on them less likely and their use less certain. Finally, the nonnuclear nations regard a willingness to enter into a complete test ban as a definitive test of the intentions of the two superpowers and of their will to live up to their obligations under the NPT.

From 1977 to 1980 the U.S., the U.S.S.R. and the U.K. did discuss a comprehensive test ban, but after making considerable progress they recessed the talks and have not resumed them. The reason is that the U.S. changed its position after the election of 1980, abandoning its long-time support of a ban and declaring that, although a test ban "remains an element in . . . [our] arms control objectives, we do not believe that, under present circumstances, a comprehensive test ban could help to reduce the threat of nuclear weapons or to maintain the stability of the nuclear balance."

This position did not go over well with the nonnuclear states. Their disappointment and frustration increased when the U.S. decided in 1982 not to resume the trilateral negotiations for a test ban, not only because of doubts about the verifiability of a ban but also because of a perceived need to keep testing new nuclear weapons. As the U.S. Arms Control and Disarmament Agency explained in 1983, "nuclear tests are specifically required for the development, modernization and certification of warheads, the maintenance of stockpile reliability and the evaluation of nuclear weapon effects." The UN secretary general seemed to lend support to the view of the neutral and nonaligned countries when he said earlier this year: "It is of direct importance to the future of humanity to end all nuclear explosions. No other means would be as effective in limiting further development of nuclear weapons."

Another component of the background of the NPT review conference is the record of the two earlier conferences (in 1975 and 1980). Both of them featured an unusual alignment. Sharing common interests, the U.S., the U.S.S.R. and the U.K. cooperated in resisting the demands of the nonnuclear countries, particularly the neutral and nonaligned nations (mainly of the Third World) known as the Group of 77. (The group now has more than 100 members, but the original name persists.)

At the first conference in 1975 the participants from the Group of 77 asserted that they had fully lived up to their commitments under the NPT whereas the nuclear powers had not done so. They emphasized the failure of the nuclear powers to implement the treaty's provisions for stopping the nuclear arms race and cooperating in the peaceful uses of nuclear energy.

The group made several demands, among them an end to underground testing, a substantial reduction in nuclear arsenals, a pledge not to use or threaten to use nuclear weapons against nonnuclear parties to the treaty and substantial aid to the developing countries in the peaceful uses of nuclear energy. Several of the nonnuclear nations allied with the U.S. and the U.S.S.R. were sympathetic to these demands. In the end the 1975 conference achieved a fragile consensus, expressed in a declaration in which the nuclear powers in effect promised to try harder to meet the demands of the nonnuclear countries.

In 1980, when the second conference was held, the nuclear powers had not met any of the demands. The conference failed to reach agreement on any aspect of stopping the nuclear arms race. The U.S. led the nuclear powers in refusing to make concessions on measures for the control of nuclear arms. As a result, even though the participants had achieved a consensus on plans to advance international cooperation in the peaceful uses of nuclear energy, the conference ended without a final declaration or even any formal reaffirmation of support for the NPT.

The outlook for this year's conference is as bleak or bleaker. The frustration of the neutral and nonaligned countries appears to be turning into resentment and anger because they believe the nuclear powers have misled them. These nations will no doubt renew their long-standing demands for a comprehensive test ban, nuclear disarmament, assurances that nuclear weapons will not be used or held out as threats against nonnuclear countries and greater assistance in the peaceful use of nuclear energy. It seems clear that they will concentrate more than they did in 1980 on pressing their view that the nuclear powers must stop vertical proliferation. Indeed, many members of the Group of 77 believe that an end to vertical

proliferation is the only way to stop horizontal proliferation and that both must be halted or neither will be.

In the view of that group the situation has worsened considerably since 1980. The members cite the rapid pace of the nuclear arms race; the abandonment of negotiations for a comprehensive test ban and of talks on intermediate-range nuclear weapons and on the reduction of strategic arms; the spread of the arms race to earth orbit and near space; the unlikely prospect of early progress in the resumed talks between the U.S. and the U.S.S.R. on nuclear and space-based weapons, and the escalation of global military expenditures to some trillion dollars per year. Members of the group also cite the absence of progress over the past five years on any substantive issue of nuclear arms control.

At the same time the fear of a possible "nuclear winter" has helped to create the growing demand for greater efforts to reduce and prevent the risk of nuclear war and to end the nuclear arms race. Many governments, organizations and individuals are calling for a freeze on nuclear weapons, to be followed immediately by substantial reductions in nuclear forces, and for a declaration by each of the nuclear powers that it will not be the first to use nuclear weapons.

The nonaligned countries are therefore considering new approaches to their goals of first halting and then reversing the nuclear powers to the seriousness with which they regard the current situation and its impact on the proliferation problem.

One strategy under consideration relates to voting at the conference. The previous conferences operated on the basis of consensus, not purely as a matter of preference but because neither the nuclear powers and their allies nor the Group of 77 could muster the two-thirds vote needed to make a decision. In 1975 only 57 of the 96 countries then party to the treaty attended and in 1980 only 75 of 115. Most of the absentees were small nations belonging to the Group of 77. The group is therefore pressing for a larger turnout this year in the hope of assembling a two-thirds majority.

If the conference is able to muster a decisive vote, the decisions would not be legally binding on the nuclear powers or other parties to the treaty. Nevertheless, they would carry a good deal of political, moral and psychological weight. Their impact could affect the credibility of the policies of the three nuclear powers and also the viability of the NPT if the three powers failed to bring their policies into line with their treaty obligations. Some members of the Group of 77 believe their views should be put to a vote even if only a simple majority favors them.

Another scenario is envisioned by some members of the Group of 77. They would concentrate their efforts at the conference on ending the nuclear arms race and controlling nuclear arms. Discussion of such other issues as peaceful uses and international safeguards on nuclear programs and facilities and on traffic in nuclear materials and technology would be deferred or downgraded.

In a third scenario some members of the Group of 77 would consider walking out of the conference if it becomes clear that the nuclear powers are not ready to proceed with speed and diligence toward fashioning a comprehensive test ban and halting the nuclear arms race. A related idea is for some parties to threaten to give notice of withdrawal from the treaty unless the nuclear powers move promptly to implement their treaty obligations.

Also under consideration is the notion of not ending the conference if the discussions are fruitless. Instead of Group of 77 would call for a recess of a year or so as a means of exerting pressure on the nuclear powers to come up with positive proposals.

Going further, some members of the group talk of taking matters into their own hands by calling a conference to amend the test-ban treaty of 1963 in order to prevent all nuclear tests. It would only be necessary to delete the provisions that permit underground tests. The treaty stipulates that the depository governments (the U.S., the U.K. and the U.S.S.R.) "shall convene" such a conference if one-third (38 or more) of the 112 parties call for it. An amendment would have to gain the approval of a majority (57) of all the parties, including the depository governments.

One cannot suppose the nuclear powers, particularly the U.S. and the U.K., would approve an amendment prohibiting underground tests. Hence the amending conference would not create new legal obligations for the signatories. Nevertheless, majority approval of such an amendment would put considerable pressure on the three nuclear parties. A failure on their part to respond could have profound political repercussions.

How might the nuclear powers deal with the demands they will encounter at the conference? The U.S. and its allies (the Western group) appear to have no new strategies. They will probably content themselves with the policies they pursued at the previous review conferences. Doubtless they will again emphasize the importance of the treaty and stress the fact that it is in the interest of all states—nuclear and nonnuclear, large and small—to strengthen the treaty and enlarge the membership.

In addition they will probably emphasize again their willingness to expand their cooperation in the peaceful uses of nuclear energy and to provide assurances of supply to nonnuclear parties to the NPT. They will also again propose various plans for international arrangements to manage the nuclear fuel cycle better, to strengthen and improve the IAEA's system of safeguards and to make the entire nonproliferation regime more effective.

Doubtless too the U.S. and its allies will try to put a good face on the lack of progress toward halting the nuclear arms race or negotiating a comprehensive test ban. At the previous conferences they could claim some degree of movement in those directions. They cannot do so this time, but they can point to the recent resumption in Geneva of arms negotiations between the U.S. and the U.S.S.R. and to their stated desire for drastic reductions in the size of the nuclear arsenals. They may also maintain that President Reagan's strategic-defense initiative (the "Star Wars" program) points the way to the elimination of nuclear weapons by rendering them obsolete.

The Western nuclear powers are also hoping to achieve a consensus on a short and simple final declaration that would reaffirm the importance of the NPT in enhancing the security of all nations. The declaration would also reaffirm support for the treaty as well as the need to strengthen it with strict adherence to its obligations and goals by moving seriously toward nuclear disarmament and by providing greater assistance in the peaceful uses of nuclear energy.

The Western nations are fully aware of the demands of the Group of 77. They recognize also that the non-aligned nations are most unlikely to be satisfied with Western positions and proposals. Accordingly it seems likely that the Western nations will continue their previous reliance on a "damage limitation" strategy, wherein they will try to prevent defections from the NPT. Perhaps the best they can hope for is that the debates of the conference will proceed without undue animosity and confrontation and that the conference will end, as in 1980, without adopting any final declaration.

In aid of this strategy the U.S. initiated talks with the U.S.S.R. last November to coordinate nonproliferation efforts. The two nations have agreed to hold such talks every six months. The U.S. also arranged to meet with 12 other members of the Nuclear Suppliers Group to reaffirm their policies on nonproliferation and their restrictions on the export of nuclear material, equipment and technology.

The U.S.S.R. and its allies (the Eastern group) will have an easier time at the review conference. They support a comprehensive test ban, a freeze on nuclear weapons, no first use of nuclear weapons (which is tantamount to no use against nonnuclear states) and the prevention of an arms race in outer space. In addition the U.S.S.R. will no doubt emphasize its recent agreement with the IAEA to accept safeguards over certain peaceful nuclear reactors in the U.S.S.R. (The U.S. and the U.K. had already made such an agreement.)

Some members of the Group of 77 have expressed the hope that the Eastern group might even decide to side with them, thereby ensuring a two-thirds vote for a final declaration supporting their common positions. A declaration with that level of support would give greater legitimacy to the positions and put heavier pressure on the Western group. Such an alliance seems unlikely, however, because the U.S.S.R. believes in maintaining solidarity with the U.S. on policies toward nuclear nonproliferation and strengthening the nonproliferation regime.

It is noteworthy that notwithstanding the disagreements between the U.S. and the U.S.S.R. on other aspects of the arms race and arms control, both countries want to prevent the spread of nuclear weapons to more nations. Nonproliferation is the only area where the two countries have maintained a common front, whatever the current tensions between them or the current state of their relations in other fields. Still, the U.S.S.R. has the option of joining forces with the nonaligned states at the review conference in order to increase the pressure on the U.S. and the Western powers. The U.S.S.R. also has the option of abstaining on any vote, ensuring that the proposal would be adopted but would not have the formal support of the U.S.S.R.

It may also come about that the Group of 77 will round up enough supporters (without the backing of the Eastern group) to muster a two-thirds vote for a final declaration supporting the Group of 77 position. In that case the Western group would find itself in an uncomfortable and embarrassing position. Even if no declaration can be formulated and the conference ends, as it did in 1980, without a consensus, such a second failure would have a negative effect on the future of the NPT. Hence there may be considerable support for a move to recess.

Given the present position of the parties it is difficult to see how the conference can avoid a confrontation between the Group of 77 and the nuclear powers, mainly the U.S. That situation would serve not to strengthen the NPT but to weaken it, creating doubt

and fear for its future effectiveness. As long as the treaty retains good credibility it exercises a restraining influence even on nonsigners who may contemplate acquiring or making nuclear weapons. Erosion of the treaty's credibility would make it easier for such countries to go nuclear. Since the treaty is the main bulwark against the further proliferation of nuclear weapons, the explosion of a nuclear device by even one or two more countries would put the entire nonproliferation regime in jeopardy.

PUTTING THE PAST TO REST

Mr. PROXMIRE. Mr. President, the Nazi Holocaust left deep emotional scars on many groups of survivors. One group, however, remains unique.

They are the twin children from the infamous Nazi concentration camp at Auschwitz. Records of the survivors liberated from the Auschwitz/Berkenau camp on January 27, 1945, show 157 twin children, among those released. They were all who remained of the approximate 3,000 twins who had entered the camp from 1943 to 1945.

The twins served as specially selected subjects for the brutal, inhuman experiments of Josef Mengele, the infamous Auschwitz Angel of Death.

Today, those twins make up the group CANDLES, which stands for children of Auschwitz, Nazi's deadly laboratory experiments. Many members of CANDLES kept silent over the past 40 years because they felt no one could share their thoughts and feelings. However many came to Auschwitz on January 27, 1985, for the 40th anniversary reunion of the liberation of the death camp.

On route to Auschwitz, many of the twins stopped at Yad Vishem, the Holocaust memorial and research institute in Jerusalem. Numerous psychologist joined the twins there to compare the emotional impact of Auchwitz on the twins and other survivors.

An article, written by Nancy L. Segal, In Psychology Today, reports that what distinguishes CANDLE members most is not simply the fact that they were twins, but rather special bonds between them because of the unique common experiences they endured.

Unlike most Holocaust survivors, twins generally remained together, thereby maintaining some sort of family relationship. The camp provided special quarters that housed only twins. Mengele found fascination in twins and often conducted experiments on them as a pair.

Extreme illness or death of one twin generally meant death for both. Segal found that many attribute their determination to survive to the feelings of responsibility they felt for their twin.

Like most survivors, the twins faced separation from their parents, but they say the presence of a twin gave them confidence and feelings of family unity. They were reminded that someone cared and needed care.

The motivation for the majority of the group in returning to Auschwitz, was the need to recover bits and pieces of their past. Stripped of childhood, family, and friends, they returned to see if any of those assets could be reclaimed—if the child who entered the camp in 1943 was still capable of emotion.

Thanks to Zvi Spiegel, who entered the camp at age 29 and took charge of the twin boys, the boys learned the names and family histories of those they shared quarters with. The reunion therefore, provided an opportunity to rekindle lost relationships and share somber memories of a common past.

The girls, on the other hand, had not had such leadership and appeared less unified, though still bound by their experiences.

Segal reports that for many who returned to Auschwitz, it "was as if the unfinished business had finally been completed and a huge burden lifted."

They could finally reconcile the gap between the Holocaust and their present lives. Many could pay homage to their parents, from whom they were separated more than 40 years ago.

Today, most of the twins are established workers and family members trying to put the past to rest. The optimism that they possessed in Auschwitz survives with little or no bitterness or hate. They can face issues long-buried but never forgotten.

In returning to Auschwitz, the twins won revenge against the Nazis, especially Mengele. Their survival and prosperity 40 years later stands as their triumph over the barbarism of the Nazis.

Mr. President, we also have unfinished business. Forty years ago, we began the drafting of the Genocide Treaty. 96 countries have since then ratified that treaty, yet we still ponder.

As a humanitarian country, we accepted the responsibility to extend a hand in assuring peace for mankind as a whole. We cannot erase the scars of the Holocaust felt by the twins and other survivors, but we can help ease their burden.

Ratification of the Genocide Treaty would help make it clear that future murders will not be tolerated. It is past time we completed this task, which began 40 years ago. I urge ratification of the Genocide Treaty immediately.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that we have turned the corner on health-care inflation. We have not. The recent news that health-care spending increased only 9.1 percent last year—the lowest rate in 20 years—is good news indeed. But in its rush to claim credit for this slowdown, the Reagan administration threatens to obscure the continuing threat posed by health-care inflation. It fosters the myth—and it is a myth—that we have turned the corner on the growth in health-care costs.

What are the facts? First, yes, there has been a slowdown in health-care inflation. Second, health-care price increases continue to gallop far ahead of overall inflation. Health-care expenditures are consuming an ever-increasing share of our gross national product. They are undermining the ability of the Government to meet its commitment to provide access to quality care for the elderly and the poor.

Today and tomorrow I intend to examine this myth and and demonstrate how there is little reason to believe that the rampaging explosion in health-care costs has been brought under control.

Let us look at just two indicators of how health-care costs measure up. In proclaiming the drop in the rate of increase in health-care costs—and our focus is merely a lower rate of increase, not an absolute drop in health-care costs—the Reagan administration spokesmen have conveniently overlooked the fact that the deep recession has resulted in a decline in the overall growth rate of inflation.

Over the last decade health-care costs have consistently outstripped the CPI—running ahead by 1½ times to twice the increase in overall prices. And there is little evidence that this gap is narrowing at all. This gap did not lessen in 1984 and when you look at the latest data—the month-by-month figures from July 1984 to July 1985—there is only 1 month, that's right, 1 month, where the CPI increased faster than medical care costs. In every other month, medical care costs maintained its relentless increase—with no lessening of the gap whatsoever.

Or take another measure. Compare the rate of growth in the GNP [gross national product] with the rate of growth in health-care expenditures. In the last decade the rate of increase in health expenditures has outstripped the growth in the GNP for 8 years out of 10—the gap was over 4 percent on average and reached a high in 1982 of 9.5 percent. In that year the economy grew at a mere 3.8 percent while health-care spending wallowed in an increase of 12.8 percent.

There were only 2 years when that pattern did not hold. One year during the Carter administration, 1978, when the hospital industry's Voluntary Cost Containment Program was attempting to head off Secretary Califano's mandatory Hospital Cost Cutting Program. The other year was 1984.

But think about 1984. It's true that the new DRG system for Medicare has resulted in profound changes in the

health care industry and, in the private sector, competition is beginning to take hold.

But what about the economy's hugh 1984 growth? Much of that growth was in investment and not consumption and, moreover, that rate of growth in GNP simply has not been sustained.

My forecast? Growth in health-care expenditures is coming down. But not far enough. Not fast enough. And health-care spending will continue to devour an increasing share of our gross national product, continuing to undercut the viability of the Medicare trust fund and undermining our ability to meet our Medicaid commitments.

Tomorrow I will discuss the implications of continued unrestrained growth in health care costs.

I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, with statements therein limited to 5 minutes each, not to extend beyond 2 p.m.

NATIONAL DEBT LIMIT DEBATE

Mr. MOYNIHAN. Mr. President, as debate on the extraordinary proposal that has come to the Senate under the not less extraordinary circumstances of the deadline of the national debt ceiling proceeds apace in an empty Chamber, I wish to make one observation and ask two questions.

I am referring, of course, to the amendment proposed by Mr. DOLE for Mr. GRAMM, Mr. RUDMAN, Mr. HOLLINGS, and other Members of the Senate to House Joint Resolution 372—a proposal to require a graduated reduction in the Federal budget deficit to balance the budget and to establish emergency procedures to avoid deficit overages.

The first observation, Mr. President, has something to do with the elemental integrity of this proposed measure.

I believe I have what may in time become a valuable document. I have a copy of the first edition of the bill which I believe only appeared just yesterday, a few hours before we were supposed to enact one of the most sweeping measures of our time.

But I would like to suggest, Mr. President, that the proposal for achieving a balanced budget is once again under this legislation very clear. As under budget resolution after budget resolution, which always show a zero deficit 3 years out, but not this year and not next year, this amendment shows exactly the same thing.

I had occasion to write an article on this some while ago, on the budget process as an oxymoron, and noted that it is always 3 years out that the budget deficit will reach zero, but under the new majority in the body this occurs 5 years out.

I want to make one simple point, that is, to those Members who have the privilege of having a printed copy of the measure, the amendment specifies that,

> The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

And then there is a sentence on line 21 on page 34,

> For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5."

This proposal, as now written, would permit the deficit to rise from $180 billion (on page 11, line 10) to $193 billion for the current fiscal year before any cuts were required.

It so happens that the budget resolution we have just adopted calls for a deficit of about $172 billion for fiscal year 1986. And so, the Dole-Gramm-Rudman proposal would actually allow us to increase the deficit spending in the current fiscal year by $21 billion—$21 billion more than the budget resolution. This is a proposal to allow the Congress to spend $21 billion more this year than we have already agreed to do. The sincerity of the whole enterprise is confusing to me. I mean, if there were a genuine intent to control spending, why does it not begin now? Why allow an even greater deficit than we already agreed on; considerably greater, $21 billion?

Why does it incorporate language such as on page 34, line 18, "statistically significant"? The term "statistically significant" to mathematicians refers to a test of the probable accuracy of a sample called a chi square test—the Greek letter X, c-h-i. The chi square test tells you the range of confidence you can have about a measurement taken by sample.

There is no sample involved here. What is this fancy language about statistical significance? What it means is, the deficit shall be treated as significant. That is all. Five percent of $200 billion is $10 billion. That is arithmetic, not statistics. And I do not know why we have to introduce this pseudostatistical kind of reference. But there is an awful lot pseudo this and pseudo that in this measure, very little of which is understood.

It is clear that in the outyears, after the 1986 election, some rather dramatic restraints are going to be placed on defense spending and they will be, I suppose, ascribed to a disposition on this side of the aisle. Even yesterday our distinguished majority leader said there are people around here who only want to cut defense spending and increase taxes. But the requirement that defense spending be cut will come from legislation originating over there; and when it does come, it will probably be forgot that it did.

One-half of the reductions that will be required eventually—and they will be—must come from about 25 percent of the budget, the largest single portion of which is defense spending. And it is spending on readiness, not spending for McDonnell Douglas aircraft or the other corporations, Grumman in New York and such, who have long-range contracts. It is the immediate spending on pay, on oil, on gasoline, on maintenance, on food, on ammunition, and such things as that.

But be clear that the "automatic spending increases" contained in three-quarters of the budget are required to absorb half the deficit reductions and one-quarter of total outlays the other half. If the elimination of certain cost-of-living adjustments does not equal the required half from that first group of expenditures, it then transfers over, adding deficit, reductions to that second category of relatively controllables. Within the second group, the legislation provides that greater than half of the deficit reduction be taken from defense, and the remainder from the small range of civilian activities that are available for such reductions.

Mr. President, this ought to be clear. There is another document, and I would like to put it in the CONGRESSIONAL RECORD—I hesitate to do so—but this is a matter of such extraordinary importance. The definition of the term "relatively controllable expenditures"—this is on page 34 of the bill at line 11—"means budget outlays that are classified as relatively controllable outlays in Office of Management and Budget 'Controllability of Budget Outlays', Report No. BPS0701A (August 27, 1985)."

I would be interested to know how many Members in this body have read Report No. BPS0701A of August 27, 1985. I have it here. It is a computer printout. It is an Office of Management and Budget document on the controllability of budget outlays.

The main thing to know, Mr. President, is that it gives on the first page, the total for relatively uncontrollable outlays in the current budget year, that is fiscal 1986.

Of total budget outlays for fiscal year 1986, $723 billion come under the heading of "relatively uncontrollable," $253 billion are "relatively controllable." Roughly speaking, this is a 75 to 25 percent split in the budget, and half of the required reductions would come out of the 25 percent of the budget considered "relatively controllable."

What programs are contained in this 25 percent? Let me read it to you. It is important. That $253 billion of "relatively controllable" outlays consists of

national defense, about $175 billion; and the civilian programs, some $78 billion.

There you are. You are $78 billion in civilian programs. That includes the Federal Aviation Administration, the air traffic controllers, the Coast Guard, and they are not optional. They are down almost to the bone. Former Budget Director David Stockman said last week that the spending cut period is over. The country is down to what it has. If you have $78 billion of civilian programs, which are the National Institutes of Health, the National Bureau of Standards, the FBI, the CIA, the Weather Service, NOAA, start thinking of them and see where you really have options. You have very few. So what will you do? What will you do? You will cut defense.

Here is the majority of this body saying we are going to cut defense, hard and sharp in a very short while—not next year, before the 1986 elections. But thereafter inexorably and painfully. We are not only going to be the world's largest debtor nation, but we are going to have, once again, a declining establishment—the kind of decline which this administration came to power saying it would reverse.

I offer you the thought that the world's largest debtor nation with a declining defense budget is not going to be seen as the world's most powerful nation. That will be an interesting legacy of these days of nondebate on this floor. May I say that again? The world's largest debtor nation with a declining defense budget is not going to be seen as the world's most powerful nation.

We are putting in place not just the decline of the Senate. We are putting into place not just the decline of the Congress. We are putting in place the decline of the United States. And I am not surprised that no person on the other side of the aisle is present to hear these remarks. I should not be surprised if they do not want to hear them.

Mr. President, two further matters. I said I would have two questions to pose. For some days, starting last Thursday, I stated my view that farm price support outlays were exempted from any reductions required under this so-called deficit reduction measure. And this has been denied. It is quite extraordinary. It has been denied as if it were an embarassment. But here we have, Mr. President, in that most singularly important document, OMB Report No. BPSO701A, August 27, 1985. Here it is on page 2 under the listing of "relatively uncontrollable under present law," the relatively uncontrollable outlays as defined in the statute, farm price supports, $15 billion—$15 billion for farmers.

Listen, farmers may need more than $15 billion. I am not in any way arguing against farm programs. I am asking what is the integrity of legislation that says we will face up, regardless of the difficulty of our deficits, but we will exempt from cuts the programs that are so important in certain States? There are words for that, Mr. President. I will not use them on this floor. I want to be very clear that I do not speak against farm legislation. The need is not denied; much less do I wish to minimize a genuine crisis in rural America—the farm credit situation. But there is a question of straightforwardness. I came to the floor Thursday and said, is it not odd? I gather that farm programs are excluded. Health programs are not excluded, nor are mass transit, highway, water projects, science projects, or research on strategic defense initiatives.

You know there are a lot of things the Federal Government does. Of the ones I just spoke of, defense, health, and science, all would be cut. Farm programs would not be. There might be a good reason in the judgment of this body to do that. But why write it into the law as making a distinction between dairy price supports and research into heart, cancer, and stroke. Dairy price supports are an agreeable arrangement if you live in Arizona, where the average payment was just under a quarter million dollars. But at the level of national priorities, I do not know they are that high. I speak as someone who lives on a dairy farm. The President told us the need for spending on space defense was very high indeed. Health research has always been important to our Government, and has shown results. The technological development associated with science has surely a great consequence. Funding for basic scientific research will be cut. Farm programs will not. Or so it says in this most important document, Report No. BPSO701A of August 27, 1985. And then that is a question I asked, and I believe have answered.

I would like to say, Mr. President, if no sponsor of this legislation denies what I have said and refutes what I said on the floor today, I take it as given. I have said it now 3 days out of 4 in this debate. It has been denied informally. I do not think it has ever been denied on the floor. I challenge Mr. GRAMM, my distinguished friend and learned colleague from Texas, now—if I am wrong that his legislation excludes farm programs from the category of relatively controllable expenditures, but includes health and defense—to come to the floor and say so.

If my colleague does not say otherwise, as I think he cannot, I think the point is well taken.

Second, I would like to know in what category, the Aid to Families with Dependent Children Program falls in this legislation. This program aids families of dependent children and is part of the original 1935 Social Security legislation. It is not here stated in the amendment one way or the other. There is no cost-of-living adjustment for AFDC. We did not index it. This is very significant. We did not index it. Incidentally, I am not talking about a few children in cities. Almost one child in three born in 1980 will be receiving AFDC payments before reaching age 18—32 percent, to the best of our calculation.

The arrangement is that, within certain ranges, the State governments decide what level of benefits they will provide children under the Social Security Act provision and, by a matching formula, the Federal Government automatically shares in the cost of providing those benefits. The Federal matching formula ranges from a high of nearly 80 percent, if my memory serves me, down to 50 percent. It is a formula and it is automatic.

Does that mean that AFDC increases provided by States—as they do, occasionally, from time to time—would be subject to limitation under the Gramm-Rudman proposal?

Since 1970, incidentally, the real value of AFDC payments to children dropped by one-third. Children represent the only beneficiary group in our society not receiving indexed benefits.

California is one of the only States which makes an automatic change in AFDC for the cost of living.

I would hope that at some point, anyway, the sponsors of the legislation would tell us in what category would the payments to children and the mothers of children under AFDC fall. If, for example, the State of New Jersey provided a $20 a month increase in the payments to a family of three, a mother and two children, would the automatic share the Federal Government would provide of that $20 come forward automatically and be exempt from this process, or could it be rejected, frozen or limited?

It would be interesting if children would be slashed in this process, somebody not old enough to vote.

I would like to ask that question and hope that I would have an answer.

I do not mean to suggest that there are not provisions for reducing cost of living allowances. There are. But it is particularly important to know in what category and what circumstances the AFDC payments would come.

Last, Mr. President, in the continuing unveiling of this legislation, some new provisions were paraded in the RECORD, of which the last sentence says, "It is the sense of the Senate that any reductions in sequestering of controllable expenditures shall not disproportionately be made in lesser populated areas."

What concern gave rise to that remark? Was that to tell the President to leave his cotton-picking hands off

Nevada and concentrate on Ohio, or what?

Mr. President, I mean no disrespect for anybody.

The distinguished Presiding Officer is from Idaho. That is one of the lessor populated areas.

Does that statement apply to Essex County, NY? I would like to know if the statement applies to Franklin County, Hamilton County, and, generally speaking, the Adirondacks?

May I ask the nonattending sponsors, what do they mean by lesser populated areas? I reside in Delaware County, NY, which only in the last census obtained the population that it had reached in 1840. We lost a lot a people in the war between the States and other things like that. But I do think we are a lesser populated area. Is my county protected? That is what I want to know. The people of Delaware County, all 40,000, will want to know.

Is this legislation serious?

The way we are dealing with it is not serious at all, Mr. President. We are not debating. There have been no hearings held on a matter where, at the very minimum, constitutional questions should be raised. The bill was only printed yesterday, as far as I can tell, but even yesterday changes were made.

In a body which has discussed agricultural policy for two centuries, we still do not know whether we have put agriculture into an area where it cannot be touched by deficit reduction. It is obvious to me we have, but the sponsors will not admit. Or if they will admit today, that would be fine. They have a right to propose what they will. We and the body have a right to know what they are proposing, and yet we do not know.

It is not seemly. It is hugely volatile to the traditions of this body and I do not see a prospect of it being stopped. Republicans begin to decline when they fail to respect their own positions both of stability and, much more, confidence in Government. Do we pass this larger bill without hearings, without opinions by outsiders, without informed judgments from our own counsel? We finally got the Budget Committee staff to say, "Yes, of course, this exempts farm price supports." It might well do that. If it does, make the argument.

But to avoid acknowledging something so blatant, so brazen, and then to put in a provision about lesser populated areas, just slip them in saying nothing, not indicating why? Is this the Anticity Deficit Reduction Act of 1985? What is it, Mr. President?

We do know that in sequestering of controllable expenditures, such sequestering shall not disproportionately be made in lesser populated areas.

Do I take it that this does, in fact, signal that this is the end of the commitment to urban America that began in the 1960's? Is it, in fact, the Anticity Deficit Reduction Act of 1985?

One begins to suspect, though I doubt we will ever know before we vote. As the majority leader said on Saturday, not without some pungency, things have to move quickly. He said things get stale when they stay around here. People start reading them.

I wonder if that will happen in time.

Mr. President, I thank the Chair for its patience and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I ask unanimous consent that the first two pages of table 17 of the OMB report cited in the legislation as determining what is relatively controllable, the term relative controllable expenditures means budget outlays that are classified as relatively controllable outlays in OMB Controllability of Budget Outlays, Report No. BPSO701A, be printed in the RECORD.

That is part of the statute. I do not think this report, Mr. President, is widely available. It is a printout, basically. It would be much too much for the CONGRESSIONAL RECORD to have the whole of it printed, but the essence of it is contained in two pages of table 17—the ones that begin with "Relatively Uncontrollable Under Present Law" and ends with "Total, Budget Outlays."

I think that would be of use to this body. I thank the Chair.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 17.—CONTROLLABILITY OF BUDGET OUTLAYS

[In millions of dollars]

	PY actual	CY estimate	BY estimate	Change BY—CY
Relatively uncontrollable under present law:				
Open-ended programs and fixed costs:				
Payments for individuals:				
Social Security and railroad retirement (code 103)	179,311	190,199	202,170	11,97
Military retired pay (code 111)	16,471	15,809	18,224	2,415
Other (code 113)	32,554	34,093	35,714	1,620

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HATFIELD). Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that the period for the transaction of routine morning business be extended until 2 p.m., with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

GIVING DEFICITS THE BUSINESS

Mr. DOLE. Mr. President, in today's economy—with deficits the Nation's number one problem—I would like to commend the efforts of a Parsons, KS, firm to become a part of the solution to rising Government expenditures. Energy Conservation Products, in partnership with Benchmark Properties, has succeeded in lowering the total gas consumption of numerous low-income residents of a Parsons HUD project by 24 percent.

THE "RESIDENT SYSTEM"—A MONEY-SAVER

Mr. President, 24 percent lower gas consumption offers tremendous possibilities for lowering Federal outlays and lifting the burden of high utility bills from homeowners everywhere. This considerable savings was achieved by upgrading the heating furnace's efficiency, utilizing the resident system which was designed and manufactured in Parsons. This innovative approach to saving low-income residents and the Government many years of energy costs will have a much faster return on investment than many of the more traditional methods of energy conservation. Tenants will also enjoy the same degree of comfort, since the resident system simply upgrades the furnance efficiency and does not effect the thermostat.

A KANSAS INNOVATION FOR THE NATION

Mr. President, it is this type of creativity and insight that could save the Government and homeowners millions of dollars in the years ahead. I would like to encourage this Kansas industry to continue its efforts to assist low-income public housing residents and homeowners in lowering their utility bills.

NATIONAL MS SOCIETY HONORS SENATOR ANDREWS

Mr. HATFIELD. Mr. President, I rise today to acknowledge an honor bestowed on our distinguished colleague, Senator MARK ANDREWS, by the National Multiple Sclerosis Society.

The National MS Society honors a Member of this Chamber annually with its Congressman of the Year Award. The award this year was presented to Senator ANDREWS for his strong support for Federal biomedical research and for his leadership role in the Senate Committee on Appropriations' sponsorship of the Tracor Jitco study, "An Evaluation of Research Opportunities and Needs of the National Institute of Neurological and Communicative Disorders and Stroke [NINCDS] in the Neurological and Communicative Sciences." The distinguished Senator from North Dakota has continued to be instrumental in obtaining the Senate's support for the highest levels of funding for NINCDS, keeping in view the long-range goals of the Tracor Jitco report.

Multiple sclerosis is a disease of the central nervous system—the brain, spinal cord and optic nerves. It most frequently strikes men and women between the ages of 20 and 40. It generally follows an exacerbating and remitting course, and is often progressively disabling.

Multiple sclerosis is characterized by inflammation and disintegration of the myelin sheath, an insulating covering that wraps itself around nerve fibers in the central nervous system. Later, scars form in the damaged places and nerve impulses traveling to and from the brain may be distorted, misdirected or lost entirely as they go by these damaged areas.

No two cases of multiple sclerosis are necessarily the same. Symptoms depend on the site and extent of damage to the myelin; they range from incoordination; loss of balance; pins-and-needles sensations and exhaustion to impairment of vision, hearing or speech; bladder and bowel problems; partial or complete paralysis. The cause of multiple sclerosis is, as yet, unknown. Recently several treatments were announced which seem to alter the course of the disease and some symptoms can be alleviated by good medical managment.

The National Multiple Sclerosis Society, through its network of chapters and branches located in every State in the United States, provides support programs and medical equipment loans to those with multiple sclerosis.

The society is the only voluntary health agency in the U.S. supporting programs in national and international research to find the cause, a prevention and a cure for multiple sclerosis, and more effective treatments for those who already have the disease. Since its inception in 1946, the National Multiple Sclerosis Society has allocated more than $65 million to research grants and training.

In honor of our esteemed colleague, the National Multiple Sclerosis Society has named for him a 3-year research grant of $84,992 to Kenneth J. Smith, Ph.D., Eastern Virginia Medical School, Norfolk, VA. Dr. Smith's research project is titled, "The role of neuroglial cells in determining the physiological properties of pathological central nerve fibers." We commend the distinguished Senator for his commitment to the neurosciences and congratulate him for this special recognition.

LETTERS FROM THIRD GRADE STUDENTS IN CHESTERFIELD, SC, EXPRESSING THEIR CONCERN OVER TEXTILE IMPORTS

Mr. THURMOND. Mr. President, recently, I received a group of letters from the third grade class of Edwards Elementary School in Chesterfield, SC. These students are from an area in my State that has been hard hit by textile unemployment. While they are very young, these children understand what is happening in their community because of ever increasing textile imports. They feel the fear that pervades the lives of those who are employed in America's textile/apparel industry.

Mr. President, these third graders have a very special way of expressing the feelings of many who live in textile communities across our Nation. Their teacher, Ms. Rivers, has taught them to be aware of current events and to express their opinions to their elected representatives. I believe that my colleagues can benefit from the views of these children and I ask unanimous consent that their letters be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I didn't like that because they are sending things to us

and you need to do something. People are losing their jobs. Please help us.

Love,

APRIL JEFFERIES.

DEAR SENATOR THURMOND: We have people who are losing jobs. My mom can not work. She baby sits. She works every day to Friday.

Please help us get jobs in our country. Thank you.

Love,

MARCELLA ANN BURCH.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: Dear Mr. Thurmond, it is not fair because they are sending stuff to us. And it is not fair. Please help the people to get their jobs back.

Love,

JASON WAYNE GAINEY.

DEAR SENATOR THURMOND: Thank you for working for our country. Some of my family have lost their jobs and it is not fair.

Would you give them back their jobs? If you could, it would be very kind.

Love,

ROBBY HANNAH.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: It isn't fair because different countries are sending clothes. Please make them pay taxes. I think it isn't right.

Love,

STEPHANIE MICHELLE MILLS.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I love you. I hope you love me, too. I am 10 years old and I hope you don't forget my mother. She lost her job. Please help her.

Love

STACY ANN SMITH.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I don't think it's fair taking our clothes jobs from Americans. You should be sorry for us. We want you to stop it, please, so the people can get their jobs back.

Love,

TIMOTHY JOHNSON.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: Please help the people get jobs.

Thank you.

Love,

BERNICE RATLIFF.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I think this should stop because my aunt got fired and I hope you will do something about it. Thank you.

Love,

JESSICA MARIE TEAL.

DEAR MR. THURMOND: My name is Jacqueline Teal. I am nine years old. How old are you? How are you doing? I am fine. One of my friends lost her job. It made me feel bad, please help us. The teacher says I got to do my classwork, please write me back.

Thank you

Love,

JACQUELINE TEAL.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I don't think it's fair. My mom's friend got fired. Can you help her?

Thank you.

Love,

RONALD EDWARDS.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: My mom lost her job and she isn't working at all. Please stop them from sending things so my mom can go back to work. Write me back, please.

Thank you.

Love,

WENDY MICHELLE PRUITT.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: We don't think it's fair for people to send their clothes to S.C. and we can't send anything to Japan.

And my mom has lost her job. And I think you are a cute guy. We have you picture on our wall. Thank you.

Love,

JANIE MAE MCQUEEN.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: Some people are losing their jobs.

My sister lost her job. It made me feel bad.

Please stop them from sending too many clothes.

We will like it if you write us back. We have a letter from you on our wall.

They send too much clothing for us to buy.

In Cheraw, if you go there, you will see clothes for 20 dollars or more.

This was written in Edwards Elementary School.

Love,

TASHA LITTLE.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I love you and I hope you love me, too. I am 8 years old and I hope you do it for my mother, please. She wrote, the President. Please keep her from losing her job.

Love,

SHANICA DIANE HANNAH.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: My mom and dad left me with my grandma. She lost her job picking grapes and my mom and dad and sister with her. Please stop them from sending so much stuff over here so my gramma can go back to picking grapes.

Love,

KEVIN COX.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I don't like it when we can't speak for our rights. People are losing their jobs. Do something about it now.

You have done it before. I know you can do it. It's just not fair.

Thanks.

SHINEKA MERRIMAN.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: We don't think it's a great idea. Please stop this.

It is messing up United States of America. Please stop it.

I don't mean that you better stop. I am asking you to stop it because many people are losing their jobs. Please stop it.

Love,

CEDRIC SPENCER.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: We don't think it is fair for some countries to send their goods to America without if paying taxes if goods there without paying there then we can't send some goods there they shouldn't be able to send here.

Love,

QUINCY PEGUES.

SEPTEMBER 27, 1985.

DEAR SENATOR THURMOND: I think Piggly Wiggly, stores should have lower prices. People are paying too much.

Love,

NANCY OLIVER.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 12:40 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 393. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. THURMOND].

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-440. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE JOINT RESOLUTION NO. 14

"Whereas, States and local governments are burdened by the presence of national forest lands which generate development pressures which, in turn, cause increased demands for transportation, education, police and fire protection, and other public services; and

"Whereas, Since 1908, Congress has provided counties containing national forests with 25 percent of the funds derived from national forest timber production and user fees for schools and roads as partial compensation for public service burdens and tax immunity associated with national forest lands; and

"Whereas, Counties currently receive a 25 percent share of gross national forest revenues, with credits provided to timber purchasers for road construction and reforestation deducted only from the federal government's portion of the revenues; and

"Whereas, In the 1984 federal fiscal year, national forest revenues totaled $900 million nationally, with states receiving $225 million, of which California received $44 million; and

"Whereas, California contains over 19 million acres of national forests, and many of the state's timber counties depend heavily on national forest revenue sharing funds to provide adequate education and transportation services; and

"Whereas, The United States Department of Agriculture has proposed legislation to eliminate the long-standing 25 percent national forest revenue sharing program and replace it with a local taxation system which would significantly reduce the amount of national forest revenues received by many counties; and

"Whereas, The Federal Office of Management and Budget has proposed to deduct National Forest Service administrative costs from the states' share of national forest revenues; and

"Whereas, The Office of Management and Budget has proposed to shift from the state revenue sharing of gross receipts to a net profit sharing system for national forest revenues; and

"Whereas, The implementation of these legislative and budgetary initiatives by the federal government would impose significant financial hardship on affected California timber counties and school districts; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States, the Secretary of Agriculture, the Chief of the Forest Service, and the Director of the Office of Management and Budget not to implement legislative or budgetary initiatives which would reduce the national forest revenue sharing funds received by the states; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of Agriculture, to the Chief of the Forest Service, to the Director of the Office of Management and Budget, and to each Senator and Representative from California in the Congress of the United States."

POM-441. A joint resolution adopted by the Legislature of the State of California; to the Committee on Appropriations.

"SENATE JOINT RESOLUTION NO. 23

"Whereas, The United States Coast Guard is a branch of the armed services originally created to defend our coastline and to ensure safe and orderly marine navigation in our territorial waters; and

"Whereas, During the last 10 years, the Coast Guard has been given many additional responsibilities pursuant to numerous federal acts, including the Boat and Safety Act, the Port and Waterways Safety Act, the Port and Tanker Safety Act, the Fishery Conservation and Management Act, the Water Pollution Control Act, the Clean Water Act, and the OCS Land Act Amendments; and

"Whereas, San Francisco Bay is one of only four areas in the country which, because of its unique conditions, has Coast Guard Vessel Traffic Service; and

"Whereas, The 1984 Coast Guard's Vessel Traffic Service, by directing over 67,000 movements in San Francisco Bay, provided essential safety services for vessels using the bay and its numerous ports and harbors, including inland Sacramento-San Joaquin Delta port; and

"Whereas, The Coast Guard has in the past stated that the Vessel Traffic Service is a major factor in avoiding ship collisions; and

"Whereas, Termination of this service will pose a serious threat to navigation and create unnecessary risks to life, property, and the environment; and

"Whereas, Alternatives for operation of a marine navigation traffic system other than by the United States Coast Guard have been fully explored and found infeasible, in part because no agency has the respect and competence of the Coast Guard: Now, therefore, be it

"Resolved, by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to provide full congressional funding to continue the Coast Guard Vessel Traffic Service in San Francisco Bay; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of Transportation, and to each Senator and Representative from California in the Congress of the United States."

POM-442. A joint resolution adopted by the Legislature of the State of California; to the Committee on Appropriations.

"SENATE JOINT RESOLUTION NO. 16

"Whereas, The National Railroad Passenger Corporation, known as Amtrak, serves the residents of this state; and

"Whereas, Our residents' use of Amtrak has increased continuously since 1971; and

"Whereas, Amtrak directly employs 1,000 residents of this state and indirectly supports the employment of approximately 3,000 residents of this state through the purchase of supplies and equipment from their employers; and

"Whereas, Amtrak has invested millions of dollars in this state in the form of passenger facilities and equipment; and

"Whereas, Amtrak has continually improved the quality of its service, its financial position, and the number of passengers carried to the point where it transported 22 million people in 1984 and expects to increase that amount by 2 to 3 percent in 1985; and

"Whereas, The budget presented to the Congress of the United States by the President would, if enacted, deprive Amtrak of the federal funding required for its continued existence; and

"Whereas, The elimination of Amtrak would result in serious adverse economic consequences to this state and its residents in terms of loss of investment, loss of income to equipment and supply contractors with the railroad, loss of railroad passenger service, loss of jobs, and a concomitant strain on the Railroad Retirement System by the loss of many contributors to that system; and

"Whereas, Amtrak must be continued in operation to serve this state as it has in the past: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislation of the State of California memorializes the Congress of the United States to provide sufficient funding through appropriation of those amounts of money necessary to keep Amtrak in at least as sound a position operationally and financially in the 1985-86 fiscal year as it has been in the 1984-85 fiscal year; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to each Senator and Representative from California in the Congress of the United States and to the United States Secretary of Transportation."

POM-443. A concurrent resolution adopted by the Legislature of the State of California; to the Committee on Banking, Housing, and Urban Affairs.

"SENATE CONCURRENT RESOLUTION NO. 43

"Whereas, For 130 years Chinese Americans have played an active and vital role in the cultural and economic growth of Los Angeles; and

"Whereas, the Chinese American community has contributed positively throughout the years to the development of trade between California and nations across the Pacific; and

"Whereas, Chinatown, located in downtown Los Angeles, which serves as a recognized core of Chinese culture in the United States, has no community facility dedicated to the preservation and cultivation of the special traditions of Chinese Americans; and

"Whereas, The 1.7 acre parcel designated Los Angeles County Lot 45 offers the optimal location for the construction of a 50,000 square foot Chinese American Community and Cultural Center with the additional potential for related commercial and residential uses; and

"Whereas, The value of the proposed cultural center is comparable to the highly successful Japanese American Community and Cultural Center located in the Little Tokyo district of downtown Los Angeles; and

"Whereas, There is substantial public support for the proposed Chinese American Community and Cultural Center project and the Los Angeles County Board of Supervisors has actively worked with the local Chinese American Community Coalition to create viable proposals for the development of County Lot 45 which include the construction of a Chinese American Community and Cultural Center: Now, therefore, be it

"Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Legislature of the State of California respectfully urges the Los Angeles County Board of Supervisors to approve a proposal for the construction of a Chinese American Community and Cultural Center and related facilities on Los Angeles County Lot 45 to be implemented in cooperation with the Los Angeles City Community Redevelopment Agency and the local Chinese American Community Coalition; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the Chairperson and members of the Los Angeles County Board of Supervisors, to each Senator from California in the Congress of the United States, and to each Representative from California in the Congress

of the United States representing the County of Los Angeles."

POM-444. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation.

"SENATE JOINT RESOLUTION No. 37

"Whereas, Boxing is a permanent fixture in the professional sporting establishment of this country; and

"Whereas, Unlike most other sports, its internal regulatory agencies are fragmented; and

"Whereas, Its participants are supported in a piecemeal fashion with insufficient consideration given to their safety and overall well-being; and

"Whereas, The New Jersey State Commission of Investigation has documented heavy infiltration of the sport by organized crime; and

"Whereas, Most states have failed to stand up to unscrupulous promoters whose motivation is profit rather than the health and welfare of professional boxers; and

"Whereas, Twenty-three fighters have died of injuries suffered in the boxing ring since January 1983; and

"Whereas, Although boxing has great inherent risk to its participants, with proper regulation this risk could be reduced significantly; and

"Whereas, A bill in the House of Representatives, H.R. 1689, would create the American Boxing Corporation, a national oversight committee and central registry for boxers; and

"Whereas, This central registry would bring to an end, mismatches, relentless scheduling of interstate fights, and the practice of allowing boxers to fight past their abilities; and

"Whereas, The boxing fatalities have occurred as a consequence of the lack of pertinent information, and because no one has the responsibility, or the oversight, for what is happening in other states; and

"Whereas, National regulatory controls and public scrutiny are vital to the survival of professional boxing: Now, therefore, be it

"Resolved, by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California urges the Congress of the United States to enact H.R. 1689, which would form the American Boxing Corporation to help improve the sport of boxing through the establishment of standardized rules and rankings; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-445. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation.

"SENATE JOINT RESOLUTION No. 20

"Whereas, Widespread participation of citizens in the political process is vital to the very essence of a democratic society; and

"Whereas, The people of California and of the United States have held steadfastly to the democratic system of governance for many generations; and

"Whereas, It has been amply demonstrated that many potential voters at presidential elections fail to cast their ballots solely because they are discouraged by early projections of election winners as broadcast by the electronic media prior to the closing of the polls; and

"Whereas, The nationwide presidential election returns are significantly distorted when large numbers of California voters fail to participate in the election; and

"Whereas, Such missing votes often significantly affect the outcome of numerous local and statewide election contests; and

"Whereas, It is in the public interest and supportive of a democratic society to encourage full participation in voting; and

"Whereas, A reduction of the time differential from three to two hours between the west and the east coast would serve as a partial solution to this problem: Nnow, therefore, be it

"Resolved by the Senate and the Assembly of the State of California, Jointly, That the Legislature respectfully memoralizes the President and the Congress of the United States to amend the Uniform Time Act of 1966 (Title 15, U.S.C. Sec. 260 et seq.) to allow the western states in the Pacific Time Zone to extend daylight saving time until after the presidential general election; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-446. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources.

SENATE JOINT RESOLUTION No. 13

"Whereas, States are significantly burdened by the presence of federal lands used for mineral leasing purposes and must respond to federal mineral leasing development activities that generate increased demands for education, roads, police and fire protection, and other public services; and

"Whereas, Under the federal Mineral Leasing Act of 1920, 50 percent of the sales, bonuses, royalties, and rentals related to the production of minerals on federal leases are payable to the state in which the leases are located in partial compensation for public service burdens and tax immunity associated with federal lands; and

"Whereas, In 1983, the federal government received over $1 billion in onshore mineral leasing revenues, with the total states' share exceeding $500 million, of which California received about $25 million; and

"Whereas, Most federal mineral leasing revenues shared with California are used for education purposes, with residual funds used for surface mining reclamation, geothermal activities, and natural resource and wildlife projects; and

"Whereas, As a result of inefficiencies and omissions in royalties management, California and other states have been receiving far less than the full amount of mineral leasing revenues authorized under federal law; and

"Whereas, The federal mineral leasing revenue shares of California and other states are also being seriously eroded by the deduction of windfall profits taxes, by the undervaluation of natural gas, and by the withholding of mineral leasing lottery fees; and

"Whereas, The Office of Management and Budget has proposed to reduce federal land revenues received by states by over $400 million annually by deducting administrative costs of the Department of the Interior from the states' share of mineral leasing revenues and by shifting from the sharing of gross receipts to a net profit sharing system for mineral leasing revenues; and

"Whereas, The federal government's mineral leasing royalty collection system, when combined with the implementation of budgetary initiatives to lower the states' share of mineral leasing revenues, will significantly reduce the mineral leasing revenues received by California and other states, and will adversely affect education and natural resource and wildlife programs in California; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States, the Secretary of the Interior, the Director of the United States Minerals Management Service, and the Director of the Office of Management and Budget, to revise the federal government's mineral leasing royalty management system to ensure that states receive their full entitlement of revenue sharing funds authorized under federal law and to refrain from implementing budgetary initiatives which would significantly reduce the mineral leasing revenue sharing funds received by states' and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of the Interior, to the Director of the United States Minerals Management Service, to the Director of the Office of Management and Budget, and to each Senator and Representative from California in the Congress of the United States."

POM—447. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works.

"SENATE JOINT RESOLUTION No. 36

"Whereas, Recently, several areas in the State of California have been afflicted with brush and forest fires of disastrous proportions creating enormous losses and severe hardships; and

"Whereas, The firestorm which began on June 26, 1985, has caused damage to over 375,000 acres in 24 counties through over 1,200 separate fires resulting in the deaths of three person, injuries to 124 civilians and 346 firefighters, the destruction of 215 homes and damages to 131 homes and five businesses, and the destruction of 71 other structures and vehicles, with a total damage estimate of nearly 65 million dollars; and

"Whereas, The Governor of California has declared a state of emergency to exist in the County of San Diego on July 1, the City of Los Angeles on July 3, the County of San Luis Obispo and July 8, the Counties of Monterey, Santa Clara, and Santa Cruz on July 9, and they County of Ventura on July 10, 1985, but these emergency situations are of a severity and magnitude that effective response is beyond the capabilities of the state and the local governments affected; and

"Whereas, The extreme hardships being endured by the persons directly affected by these disasters require immediate federal response and assistance; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, That the President and Congress are respectfully me-

morialized to immediately declare that a major disaster exists in the Countries of Moneterey, San Diego, San Luis Obispo, Santa Clara, Santa Cruz, and Ventura and the City of Los Angeles, making available federal assistance to the victims of these fires; and be it further

"*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

POM-448. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works.

"SENATE JOINT RESOLUTION NO. 28

Whereas, The United States Environmental Protection Agency has not approved the plan submitted by the South Coast Air Quality Management District to achieve health-based air quality standards as required by the Clean Air Act; and

Whereas, The Environmental Protection Agency has directed the State Air Resources Board and the South Coast Air Quality Management District to develop and adopt additional motor vehicle and stationary source emission control measures; and

Whereas, Other air basins in California are not expected to attain ambient air quality standards by 1987 as required by the Clean Air Act; and

Whereas, The air quality management plan for southern California adopted by the Southern California Association of Governments and the South Coast Air Quality Management District includes the determination that additional motor vehicle and stationary control measures incorporating even the most highly advanced and expensive pollution control technology will not, by themselves, bring the South Coast Air Basin within even reasonable compliance with the federal and state ambient air quality standards; and

Whereas, The air quality management plan for the South Coast Air Basin concluded that the substitution of cleaner burning fuels such as methanol for petroleum was the only remaining available strategy which would provide significant reductions in ambient concentrations of photochemical ozone; and

Whereas, Scientific analysis and technical studies conducted by the State Air Resources Board, the State Energy Resources Conservation and Development Commission, and the Environmental Protection Agency have confirmed that methanol-powered motor vehicles are capable of achieving reductions in emissions that could result in reductions in ozone levels in nonattainment areas; and

Whereas, The Environmental Protection Agency has issued an advanced notice of proposed rulemaking in order to eliminate regulatory barriers to the introduction of methanol-powered vehicles into the marketplace, and that the most significant of the proposed actions would be to provide a credit against fuel economy standards to auto manufacturers for the production of vehicles which operate on methanol, in recognition of the petroleum replacement value of methanol fuel; now, therefore, be it

"*Resolved by the Senate and Assembly of the State of California, jointly*, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to recognize the air quality benefits of methanol-powered vehicles and the important contribution they could make to improving air quality and energy security in California, and to reflect the petroleum replacement value of methanol fuel by providing auto manufacturers with a credit against their corporate average fuel economy standards for the production of methanol-powered vehicles, as well as for vehicles which are designed and optimized to operate on at least 85 percent methanol, but which can also operate on gasoline, methanol, or ethanol, or any combination of those fuels; and be it further

"*Resolved*, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Transportation, to the Administrator of the Environmental Protection Agency, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-449. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance.

"SENATE JOINT RESOLUTION NO. 30

"Whereas, The President of the United States has proposed a federal income tax reform plan to promote "fairness, simplicity, and growth"; and

"Whereas, The President's plan for tax reform would eliminate the deduction for state and local taxes paid by individuals; and

"Whereas, The elimination of the deduction for state and local taxes would be an unfair tax upon a tax and, therefore, would constitute double taxation; and

"Whereas, Seventy-five years ago, the simple concept of state and local tax deductibility was built into the federal income tax law in explicit recognition of the principle of federalism; and

"Whereas, The Tenth Amendment of the United States Constitution reserves to the states and the people powers not expressly delegated to the federal government; and

"Whereas, The elimination of the deduction for state and local taxes would impose a disproportionate tax burden on middle-income taxpayers; and

"Whereas, The citizens of the State of California would pay approximately $3.8 billion in higher taxes under this provision of the President's proposal; and

"Whereas, The federal government in recent years has shifted major responsibilities to state and local governments in the spirit of federalism; and

Whereas, The abolition of the deduction for state and local taxes will seriously impair the ability of state and local governments to discharge these new responsibilities; now, therefore, be it

Resolved, by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California memorializes the President and the Congress of the United States to retain the deductibility of state and local taxes in any revision of federal income tax law which is enacted; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-450. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations.

"RESOLUTION CHAPTER——

Senate Joint Resolution No.—Relative to Turkey.

"LEGISLATIVE COUNSEL DIGEST

"SJR 3, Petris. Turkey.

"This measure would memorialize the President and the Congress of the United States to petition the Turkish government to effect the protection of the civil liberties of Orthodox Christians.

"Whereas, it has been brought to the attention of the California Legislature through correspondence of the Order of St. Andrew the Apostle, a private nonprofit corporation with offices at the Greek Orthodox Arch Diocese of North and South America, that the civil liberties of Greeks living in Turkey have been repeatedly threatened and denied; and

"Whereas, The California Legislature is justly proud of its long and unyielding commitment to the pervasive extension of freedom; and

"Whereas, The military junta headed by General Evren in Ankara has decreed that Turkish citizens of Greek descent cannot buy or sell real estate, thus creating the expectation that their homes and businesses will be confiscated; and

"Whereas, Turkish officials recently visited the worldwide center of Orthodox Christianity, known as Ecumenical Patriarchate in Constantinople and called Istanbul by Moslems; and

"Whereas, In this holy place, which corresponds to the Vatican, all sacred items were registered and declared the national property of Turkey; and

"Whereas, The famous Greek Orthodox School of Theology on the island of Halki, from which renowed religious leaders (including His All Holiness, Ecumenical Patriarch Demetrios I. and His Eminence, Archbishop Iakovos, Greek Orthodox Primate of the Americas) have graduated, is now a modest high school with a Turkish principal; and

"Whereas, While Turkish law prohibits any repair work to Chrisan churches, schools, businesses, or homes exceeding two hundred fifty liras (or less than two dollars) without a permit, such permits are systematically denied to Greek Orthodox residents of the country; and

"Whereas, There are continuous efforts to seize the income-producing properties willed by Greek Orthodox people to the famous hospital in Baluki, Istanbul, which treats all members of the community regardless of religion or nationality; and

"Whereas, At least 300 Greek Orthodox families were forced to flee Turkey last year because of these and other oppressive conditions; and

"Whereas, In addition, the ethnically Greek population of Turkey has dwindled from half a million at the turn of the century to fewer than 5,000, and 92 percent of those who remain are age 65 or older; and

"Whereas, These facts strongly suggest a Turkish policy of retrenchment and, indeed, of active persecution of those Greek heritage; and

"Whereas, It is the intent of the California Legislature to urge that the United States government investigate these charges and, if substantiated, bring to bear upon the Turkish government appropriate economic and political pressure to correct the sup-

pression of civil liberties: Now therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorialize the President and the Congress of the United States to petition the Turkish government to effect the protection of the civil liberties of Orthodox Christians; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representatives from California in the Congress of the United States.——"

POM-451. A resolution adopted by the Commonwealth of Massachusetts; to the Committee on Foreign Relations.

"RESOLUTION

"Whereas, the United States of America, from its beginning, has stood for the protection of the oppressed and has welcomed with open arms those who have fled their homeland because of political oppression; and

"Whereas, the general rule of extradition treaties is to provide for an exemption from extradition for those accused of political offenses; and

"Whereas, there is presently pending before the United States Senate a proposed amendment to the existing extradition treaty between the United States of America and Great Britian which would remove the political exemption from said treaty; and

"Whereas, such removal would make this treaty such a great exception to the general rule as to make it fundamentally unfair; and

"Whereas, the actual application of the proposed amendment would be confined to one group therefore it is discriminatory; and

"Whereas, the actual application would occur in relation to a system where the right to a jury trial, even in cases of capital offenses, has been removed. The proposed amendment would be offensive to the concept of fundamental justice contained in the Massachusetts Constitution which states: 'No subject shall be held to answer for any crimes or offense, until the same is fully and plainly, substantially and formally, described to him; or be compelled to accuse, or furnish evidence against himself. And every subject shall have a right to produce all proofs, that may be favorable to him; to meet the witnesses against him face to face, and to be fully heard in his defense by himself, or his counsel, at his election. And no subject shall be arrested, imprisoned, despoiled, or deprived of his property, immunities, or privileges, put out of the protection of the law, exiled, or deprived of his life, liberty, or estate, but by the judgment of his peers, or the law of the land.

"And the legislature shall not make any law, that shall subject any person to a capital or imfamous punishment, excepting for the government of the Army and Navy, without trial by jury.'; and

"Whereas, the proposed amendment would remove the current opportunity for a case-by-case analysis of such cases; now therefore be it

"Resolved, That the Massachusetts Senate hereby respectfully urges the Congress of the United States and the President of the United States to reject the proposed treaty between the United States and Great Britain; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, the Presiding Officer of each branch of Congress and to the Members thereof from this Commonwealth."

POM-452. A resolution adopted by the Commonwealth of Massachusetts: to the Committee on Government Affairs.

"RESOLUTION

"Whereas, the United States Post Office located at the corner of North Shore Road and Beach Street in Revere is a major contributor to the economy of the area and ensures swift and convenient service for the area's residents; and

"Whereas, it has recently been put out of service due to an automobile accident thereby greatly inconveniencing the area's residents; and

"Whereas, the decision of the United States Postal Service as to whether or not to reopen is of great concern to the area's residents, and will in turn influence the area's growth and expansion; now therefore be it

"Resolved, That the Massachusetts Senate hereby respectfully urges the President and Congress of the United States and the United States Postal Service to reopen the post office in the Shirley Avenue area of Revere in order to ensure that the present and future needs of the public are best served; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, to each Member of the Congress from the Commonwealth and to the United States Postal Service."

POM-453. A joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary.

"SENATE JOINT RESOLUTION No. 31

"Whereas, A little known provision of federal immigration law artificially limits immigration from nonwhite colonial areas; and

"Whereas, When first imposed in 1952, the colonial quota affected residents of the Caribbean Islands seeking to enter this country; and

"Whereas, This antiquated and discriminatory colonial quota now, as a practical matter, applies only to individuals born in Hong Kong who seek to immigrate to the United States; and

"Whereas, For colonies such as Hong Kong, current law limits immigration to only 600 visas a year, compared with the 20,000 visa standard for independent nations; and

"Whereas, A bill in the House of Representatives, H.R. 1482, that would raise the colonial quota from Hong Kong from 600 to 5,000 visas a year, was introduced March 8, 1985, by Norman Mineta (D-California); and

"Whereas, There is a particular urgency to this legislation now that Great Britain has agreed to relinquish control of Hong Kong to the People's Republic of China in 1997, because at that time Hong Kong will presumably lose its limited status as a "colony" and thereafter be included within the overall quota for China; and

"Whereas, There are many thousands of people who wish to leave Hong Kong before 1997, and this legislation would facilitate the entry of many of these individuals to the United States; and

"Whereas, Without this legislation, only a few visas could be issued to Hong Kong residents before the return of Hong Kong to a Communist government; and

"Whereas, In both the 97th and 98th Congresses, proposals to raise the colonial quota to 3,000 visas a year were adopted without opposition; and

"Whereas, With the return of Hong Kong to China just 11 years away, we must act with dispatch to allow a reasonable number of people now in Hong Kong to leave before 1997; and

"Whereas, The vast bulk of these visas would be issued to relatives of United States citizens and permanent residents; and

"Whereas, All visas would be issued in accordance with the existing system of preferences; and

"Whereas, The current colonial quota is artificially low and discriminatory on its own, but the situation in Hong Kong makes the problem all the more urgent; now, therefore, be it

"Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California memorializes the President and the Congress of the United States to enact H.R. 1482 to raise the yearly quota for immigrants from Hong Kong from 600 to 5,000; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-454. A joint resolution adopted by the legislature of the State of California; to the Committee on the Judiciary.

"SENATE JOINT RESOLUTION No. 24

"Whereas, A grave injustice was done to both United States citizens and resident aliens of Japanese ancestry by the evacuation, relocation, and internment of those persons during World War II; and

"Whereas, The basic civil liberites and constitutional rights of the civilians of Japanese ancestry who were interned to the United States during World War II were fundamentally violated by that evacuation and internment; and

"Whereas, The findings of the federal Commission on Wartime Relocation and Internment of Civilians describe the circumstances of the evacuation, relocation, and internment of 110,000 United States citizens and permanent resident aliens of Japanses ancestry; and

"Whereas, H.R. 442, which would enact the Civil Liberties Act of 1985 and implement the recommendations of the Commission on Wartime Relocation and Internment of Civilians, was introduced on January 3, 1985 in the House of Representatives of the United States; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legisalture of the State of California urges the Congress of the United States to enact those portions of H.R. 442 of the 99th Congress which relate to the redress of the injustice done to United States citizens and resident alines of Japanese ancestry who were interned in the United States during World War II; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the Unted States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the Uinted States."

POM—455. A joint resolution adopted by the legislature of the State of California; to the Committee on Labor and Human Resources.

"SENATE JOINT RESOLUTION No. 10

"Whereas, The art, flair, culture, and hobbies associated with professional and amateur sports have become a vital part of California's social and economic communities; and

"Whereas, Sports stars are often looked upon as modern day heroes in the eyes of our nation's children; and

"Whereas, The image of the athlete has been enhanced in our society through the collection of trading cards, autographs, posters, and other forms of memorabilia; and

"Whereas, The image of athletes can be tarnished by abuse of drugs or alcohol at all levels of professiona! and amateur sports; and

"Whereas, California has a huge financial investment in, and commitment to, its national and international sorts images, as the largest sports state in the nation with 16 professional sports teams, and as host to the 1984 Summer Olympics, Major League Baseball's 1984 All-Star Game, and the Super Bowl within the past 12 months; therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, On behalf of the state's professional and amateur sports consumers and sports image, that the Legislature finds that it has an interest in enhancing the positive image of sports and leagues the players represent; and be it further

Resolved, That the Legislature encourages all professional sports leagues, amateur athletic associations, and fans' clubs to work together to combat substance abuse on and off the field; and be it further

Resolved, That the Legislature respectfully requests that the President and the Congress of the United States research the problems and incidence of substance abuse in sports through the establishment of a natinal sports drug information and rehabilitation network designed to educate both athletes and fans on and off the field, with a special emphasis placed on educating children and amateur athletes about the hazards of drug and alcohol abuse; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Franchise of Americans Needing Sports."

"SENATE JOINT RESOLUTION No. 12

"Whereas, A new national cemetery in California for veterans is urgently needed, and the best site for this facility would be at a site in northern California; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President, Congress, and the Veterans' Administration to establish a new national veterans' cemetery at a site in northern California; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Administrator of Veterans' Affairs."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MATHIAS (for himself, Mr. HATCH, Mr. D'AMATO, Mr. WILSON, Mr. COCHRAN, Mr. KENNEDY, Mr. CRANSTON, Mr. SASSER, Mr. GORE, Mr. SIMON, and Mr. LEAHY):

S. 1739. A bill to amend title 17 of the United States Code with respect to home audio recording and audio recording devices and media, and for other purposes; to the Committee on the Judiciary.

By Mr. MATHIAS (for himself, Mr. STAFFORD, Mr. BENTSEN, Mr. ROCKEFELLER, Mr. BURDICK, Mr. CHAFEE, Mr. HART, Mr. SIMPSON, Mr. MOYNIHAN, Mr. ABDNOR, Mr. MITCHELL, Mr. HUMPHREY, Mr. BAUCUS, Mr. LAUTENBERG, Mr. DOMENICI, Mr. DURENBERGER, and Mr. SARBANES):

S. 1740. A bill to designate Bloomington Lake located on the North Branch of the Potomac River, near Bloomington, MD, and Keyser, WV, as the "Jennings Randolph Lake"; to the Committee on Environment and Public Works.

By Mr. DURENBERGER:

S. 1741. A bill to amend the Internal Revenue Code of 1954 to provide capital gain treatment for sales of certain condominiums; to the Committee on Finance.

By Mr. TRIBLE (for himself and Mr. MATTINGLY):

S. 1742. A bill to improve the enforcement of the restrictions against imported pornography; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HATFIELD:

S. Con. Res. 77. Concurrent resolution deploring the intention of the United States to withdraw from the compulsory jurisdiction of the International Court of Justice; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS (for himself, Mr. HATCH, Mr. D'AMATO, Mr. WILSON, Mr. COCHRAN, Mr. KENNEDY, Mr. CRANSTON, Mr. SASSER, Mr. GORE, Mr. SIMON, and Mr. LEAHY):

S. 1739. A bill to amend title 17 of the United States Code with respect to home audio recording and audio recording devices and media, and for other purposes; to the Committee on the Judiciary.

THE HOME AUDIO RECORDING ACT

● Mr. MATHIAS. Mr. President, today I join 10 of my colleagues in introducing legislation addressing the problems caused by the unrestricted home taping of copyrighted music. The Home Audio Recording Act would allow individuals to tape music from records, prerecorded cassettes, compact discs, and from the airwaves without first securing permission from the copyright owner. In exchange for that privilege, the bill would impose a modest royalty on the tools used to copy copyrighted music: Music-quality audio recording tapes and audio recording machines. The revenues from that royalty would be pooled and distributed to the copyright owners. Thus, the legislation will achieve two goals: It will ensure that the creators and producers of America's music receive a portion of the funds otherwise denied them by the unbridled practice of home taping, while protecting home tapers from liability under the copyright law.

The need for this legislation is demonstrated by the fact that musicians, composers, and producers are annually losing over $1½ billion in sales to unauthorized audio home taping. The most visible result of that revenue loss is a decrease in the amounts of money invested to cultivate new recording talent. Indeed, the current volume of new releases is less than one-half that of just 6 years ago. Another important result is that less money is available to support the less popular forms of music such as classical music and the uniquely American genres of jazz, folk, and gospel. Thus, by enacting this legislation we will be carrying out our constitutional mandate to promote the arts and sciences, as well as ensuring American consumers an innovative

and diversified selection of high quality music.

The Home Audio Recording Act will bring needed clarity to the copyright law because the Supreme Court has not directly addressed the issue. In the much publicized Betamax case, the Court held that video home taping—if done for time-shifting purposes only—is not an infringment of the copyright statutes. It said nothing about audio home taping, and the legality of this widespread practice remains in doubt.

In introducing the Home Audio Recording Act, I want to emphasize that the bill is not a precursor of similar legislation on video taping. The video industry is in a state of flux with a market still trying to respond to an extremely dynamic situation. This legislation addresses entirely different issues in response to studies that clearly demonstrate the harmful economic and cultural effects of unrestricted audio home taping.

While this body has previously considered similar legislation, we must act now because a new technological twist threatens to exacerbate the music industry's problems. Walk into any stereo shop and you will see dual-port recorders specially designed for rapid duplication of copyrighted prerecorded cassettes. Even though it is questionable whether such devices are consistent with our copyright laws, one Japanese electronics manufacturer announced early this summer that it will soon add to its line a triple-port cassette recorder—a machine designed to simultaneously make two unauthorized copies of prerecorded cassettes. I imagine that they are basing that strategy on Mae West's bromide that "too much of a good thing is—wonderful."

The Home Audio Recording Act specifically targets these assaults on the copyright system. The bill makes the distribution of these triple-port home recording devices, as well as those with a greater capacity, an infringement of our copyright law. Dual-port recorders would not be outlawed but would be subject to a special royalty charge of 25 percent of the wholesale price since they are clearly designed for easy duplication of prerecorded cassettes. The standard royalty assessed on other recording machines that have the capacity to make high-quality copies of copyrighted recordings would be 5 percent of the wholesale price. It is important to note that the definition of "audio recording device" in the bill is intended to exclude cassette machines with microphone-only recording capacity as well as playback-only machines—such as the Walkman and automobile cassette players. Further, the Copyright Royalty Tribunal is empowered to exclude from the royalty charge any machines that are unsuitable for copying records and cassettes containing copyrighted materials, and those that are used for noninfringing business, trade or professional purposes—such as tapes and equipment used by libraries, schools, and radio stations.

Another well considered exemption from the machine royalty applies to any recording device that is manufactured to include a decoder chip that can control copying of records and prerecorded tapes. With this new technological breakthrough, the home taping enthusiast would be able to duplicate specially encoded phonorecords or prerecorded cassettes, while other purchasers could choose a less expensive, uncopyable version. By encouraging widespread use of these decoder chips, we could eliminate the penalty now paid by the music buff who does not copy at home, and minimize the need for the royalty arrangement proposed by our bill.

The royalty rate on blank tapes would be 1 cent per minute of playing time, adjustable every 5 years by the Copyright Royalty Tribunal. The 5-year interval for this review cycle was designed to fit in with the existing review responsibilities of the tribunal in other areas, such as cable television royalty rates. The initial royalty rate should, in our view, be set by Congress. Under the 1-cent-per-minute formula, a taping buff could copy a standard longplaying record for less than 45 cents more than he now pays for the blank tape. The increase could be even less if competition prevents the tape manufacturer from passing the full royalty on to the consumer.

In addition to the 5-year review of the royalty rate, the tribunal will also develop technical criteria for determining which tapes or other media are subject to the royalty and which are excluded as unsuited to duplicating copyrighted music. The distinction here is between voice-quality tapes, that might be used for business dictation and other personal uses that do not infringe copyrights, and music quality tapes, that would naturally be preferred for taping from records and prerecorded cassettes. The legislative history of the bill, including the hearings in the last two Congresses and the further hearing record that will be developed in this Congress, will give more extension guidance to the Copyright Royalty Tribunal on the standards to consider when exempting certain machines and cassettes.

Finally, the effective date of the bill is deferred until July 1987 to allow manufacturers of recording equipment sufficient time to conform to the new law, and to give the tribunal lead time in developing the exemption standards.

I urge all my colleagues to give careful consideration to the ballooning problem of unauthorized home audio taping, and to support the balanced solution proposed by the Home Audio Recording Act. In my view, this bill improves on the legislation considered in previous Congresses. I look forward to working with my colleagues on the Judiciary Committee on further improvements to this important legislation.

I ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1739

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Home Audio Recording Act."

SEC. 2. (a) Chapter 1 of title 17 of the United States Code is amended by inserting at the end thereof the following new section:

"§ 119. Limitation of liability: Audio recording

"(a) AUDIO RECORDING.—Notwithstanding the provisions of section 106(1), an individual who makes an audio recording of a musical work or a sound recording is exempt from any liability for infringement of copyright if the recording made is for the private use of that individual or members of his or her immediate household: *Provided, however,* That nothing in this section shall exempt from liability a person who, for purposes of direct or indirect commercial advantage, induces, causes or materially contributes to the making of audio recordings by any individual or entity.

"(b) Compulsory License for Audio Recording Devices and Media.—

"(1) AVAILIBILITY OF COMPULSORY LICENSE.—Notwithstanding the provisions of section 106(1), the importation into and distribution in the United States, and the manufacture and distribution in the United States, of any audio recording device or audio recording medium shall be suject to compulsory licensing if the importer or manufacturer of the device or medium records the notice, and deposits the statement of account and total royalty fees, specified by this paragraph.

"(A) The importer or manufacturer shall, at least one month before the distribution in the United Sates of any audio recording device or any audio recording medium or within sixty days after the date this section becomes effective, whichever date is later, record a notice with the Register of Copyrights (hereafter in this section referred to as the 'Register'). Such notice shall include a statement of its identity and address and a description of any trade or business names, trademarks, or like indicia that it uses in connection with the importation, manufacture, or distribution of audio recording devices or audio recording media in the United States. Thereafter, from time to time, the importer or manufacturer shall record such further information as the Register shall prescribe by regulation to carry out the purposes of this paragraph.

"(B) The importer or manufacturer shall deposit with the Register, at such times, for such periods, and in accordance with such requirements as the Register shall prescribe by regulation, a statement of account, covering the pertinent period next preceding, specifying the number of audio recording devices or amount of audio recording media imported into or manufactured in the

United States during such period, and the number or amount distributed in the United States during such period, together with such other information, and in such form, content and manner, as the Register shall from time to time prescribe by regulation. Such statement shall be accompanied by the total royalty fee specified in subsection (c) of this section for the period covered by the statement, computed in accordance with such regulations as the Register shall from time to time prescribe.

"(2)(A) INFRINGEMENT.—Notwithstanding the provisons of paragraph (1), the importation into and distribution in the United States, or the manufacture and distribution in the United States, of any audio recording device or audio recording medium is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506, 509, and 511, if the notice, statement of account, or total royalty fee specified by paragraph (1) has not been recorded or deposited, or if the statement of account or total royalty fee does not materially comply with the requirements of paragraph (1) or any regulations prescribed thereunder.

"(B) Multiple audio recording devices shall not be subject to compulsory licensing under paragraph (1), and the importation into and distribution in the United States of such devices shall be actionable as an act of infringement under section 501, and shall be fully subject to the remedies provided by section 502 through section 506, and section 509.

"(3) DEPOSIT OF ROYALTY FEES.—The Register shall receive all fees deposited under this section and, after deducting reasonable administrative costs, shall deposit the balance in the Treasury of the United States, in such manner as the Secretary of the Treasury shall direct. All funds held by such Secretary shall be invested in interest-bearing United States securities for later distribution with interest by the Copyright Royalty Tribunal (hereafter in this section referred to as the 'Tribunal') as provided by this title. The Register shall promptly submit to the Tribunal a compilation of all statements of account covering the pertinent periods provided by paragraph (1).

"(4) COPYRIGHT OWNERS ENTITLED TO ROYALTY FEES.—The royalty fees deposited pursuant to this section in connection with audio recording devices and media shall, in accordance with the procedures specified in paragraph (5), be distributed to the owners of copyrights in musical works and sound recordings that were included in radio or television transmissions, or distributed to the public in the form of phonorecords or copies, during the period to which such fees pertain.

"(5) DISTRIBUTION OF ROYALTY FEES.—The royalty fees deposited pursuant to this section shall be distributed in accordance with the following procedures:

"(A) During the 30-day period specified by the Tribunal for each year after the year in which this section becomes effective, every person claiming to be entitled to compulsory license fees under paragraph (4) of this subsection shall file a claim with the Tribunal for fees covered by all statements of account for periods during the preceding year in accordance with requirements that the Tribunal shall prescribe by regulation. All such claimants shall negotiate in good faith among themselves in an effort to agree to a voluntary proposal for the distribution of royalty fees. Notwithstanding any provision of the antitrust laws, for purposes of this clause any claimants may agree to the proportionate division of compulsory licensing fees amongst them, may lump their claims together and file them jointly or as a single claim, or may designate a common agent to receive payment on their behalf.

"(B) After the first day of the month following the period established for the filing of claims under subparagraph (A), in each year after the year in which this section becomes effective, the Tribunal shall determine whether there exists a controversy concerning the distribution of royalty fees. If the Tribunal determines that no such controversy exists, it shall, after deducting its reasonable administrative costs under this subsection, distribute such fees to the copyright owners entitled to such distribution, or to their designated agents. If the Tribunal finds the existence of a controversy, it shall, pursuant to chapter 8 of this title, conduct a proceeding to determine the distribution of royalty fees. In making its determination, the Tribunal shall so far so possible give effect to any voluntary proposal for the distribution of royalty fees negotiated in accordance with subparagraph (A).

"(C) During the pendency of any proceeding under this subsection, the Tribunal shall withhold from distribution an amount sufficient to satisfy all claims with respect to which a controversy exists, but shall have discretion to proceed to distribute any amounts that are not in controversy.

"(c) ROYALTY FEES.—

"(1)(A) AUDIO RECORDING DEVICES.—The royalty fee payable under subsection (b) for each audio recording device imported into the distributed in the United States, or manufactured and distributed in the United States, shall be five per centum of the price charged for the first domestic sale of such device.

"(B) DUAL AUDIO RECORDING DEVICES.—The royalty fee payable under subsection (b) for each dual audio recording device imported into and distributed in the United States, or manufactured and distributed in the United States, shall be twenty-five per centum of the price charged for the first domestic sale of such device.

"(C) AUDIO RECORDING MEDIA.—The royalty fee payable under subsection (b) for each audio recording medium imported into and distributed in the United States, or manufactured and distributed in the United States, shall be one cent per minute of the maximum playing time or fraction thereof for such medium.

"(D) EXEMPTIONS.—The Tribunal shall by regulation exempt from royalty fees particular kinds of audio recording devices or audio recording media, if any, that the Tribunal finds, on the basis of technical criteria that are relevant to the purposes of this section, are unsuitable for making audio recordings by individuals for private use.

"(E) NONINFRINGING USES.—The Tribunal shall by regulation establish a procedure under which audio recording devices or audio recording media purchased and used only under the circumstances specified in this paragraph shall not be subject to payment of any of the royalty fees otherwise payable under subsection (b). Pursuant to this paragraph the Tribunal shall exempt from royalty fees audio recording devices or audio recording media that—

"(i) are purchased under circumstances where any part of the purchase price is deductible by the purchaser either as an ordinary and necessary business expense under section 162 of the Internal Revenue Code of 1954 or as an allowance for depreciation under section 167 of such Code, or, in the case of purchases by a nonprofit organization, would be so deductible if either section was applicable; and

"(ii) will not be used for making audio recordings by individuals for private use or for other infringing purposes in violation of this title.

"(2)(A) ADJUSTMENT OF ROYALTY FEES.—The fees specified in paragraph (1) shall be subject to adjustment by the Tribunal in the fifth calendar year after the date this section becomes effective, and in each subsequent fifth calendar year, in accordance with the petition procedure described in section 804(a)(2) of this title and regulations that the Tribunal shall prescribe. Notwithstanding the provisions of section 809 of this title, any final determination by the Tribunal in the first and any subsequent adjustment proceeding under this paragraph shall become effective thirty days following its publication in the Federal Register.

"(B) In determining royalty fees under this paragraph, the Tribunal shall consider, in addition to all other relevant factors, the following criteria:

"(i) the value to an individual of the right to reproduce copyrighted works pursuant to subsection (a) of this section;

"(ii) the compensation that would have been received by copyright owners from distribution in the United States of phonorecords of their sound recordings and musical works but for private audio recording of such works;

"(iii) the projected impact of royalty fees on consumers and the benefits derived by consumers from the use and availability of audio recording devices or media;

"(iv) the benefits derived by importers and manufacturers of audio recording devices or media from the distribution in the United States of those products;

"(v) the projected impact of private audio recording on copyright owners;

"(vi) the projected effect of royalty fees on the structure and financial condition of the audio recording device or media importing and manufacturing industries;

"(vii) the relative roles of copyright owners and importers and manufacturers of audio recording devices or media with respect to creative and technological contribution to the development of sound recordings and musical works;

"(viii) the objective of maximizing the creation of new sound recordings and musical works;

"(ix) reasonable estimates of the amount of audio recording devices or media used in the United States during a relevant period for purposes other than making audio recordings by individuals for private use if such purposes are lawful under this title; and

"(x) new technologies for making audio recordings by individuals for private use.

"(C) Any determination by the Tribunal under this paragraph may distinguish among different kinds of audio recording devices or audio recording media, and may establish different royalty fees for different kinds of audio recording devices or audio recording media.

"(d) DEFINITIONS.—As used in this section, the following terms and their variant forms mean the following:

"(1) An 'audio recording' is a phonorecord or aurally perceptible copy (without accompanying visual images) of a musical work or sound recording that has been reproduced directly from a radio or television transmission or from a phonorecord or copy that has

been lawfully made and distributed to the public.

"(2) An 'audio recording device' is any machine or device, now known or later developed, which can be used for making audio recordings by individuals for private use, and which is capable of reproducing the sounds embodied in a radio or television transmission, or in a phonorecord or copy, by means of internal or external wire, cable or like connection between the equipment receiving or performing such sounds and the equipment reproducing them. The term 'audio recording devices' includes dual audio recording devices. Such term does not include a device (A) which is unable to receive the sounds embodied in a radio or television transmission, or in a phonorecord or copy, except by microphone; (B) which is capable only of performing such sounds (playback only equipment); or (C) which incorporates a decoder or similar mechanism that prevents the device from reproducing, or permits the device to reproduce, the sounds embodied in a phonorecord or copy in accordance with special instructions encoded in the phonorecord or copy for that purpose.

"(3) An 'audio recording medium' is any material object, now known or later developed, in any form commonly distributed for use by individuals (such as analog or digital tape cassettes, cartridges or reels), in which a musical work or sound recording can be fixed by use of an audio recording device. Such term does not include a material object that embodies a sound recording at the time it is first distributed by the importer or manufacturer, unless the sound recording has been so embodied in order to avoid the obligations of subsection (b).

"(4) A 'dual audio recording device' is any machine or device, now known or later developed, intended for use in private homes, which can be used for making audio recordings by individuals for private use, which is capable of reproducing the sounds embodied in a phonorecord by copying such sounds from a phonorecord in any digital or any tape format to an audio recording medium in any digital or any tape format, and which contains in a single apparatus one cavity for the insertion of a phonorecord in any such format and one cavity for the insertion of an audio recording medium in any such format.

"(5) The 'first domestic sale' of an audio recording device is the first sale of such device in the United States to an unrelated party. For purposes of this paragraph, an unrelated party is a person who is not controlling, controlled by, or under common control with the seller, and who is not acting in concert with the seller in order to avoid or lessen the obligations of subsection (b). Control will be deemed to exist if there is a fifty per centum or greater direct or indirect ownership interest between the seller and such other person.

"(6) A 'multiple audio recording device' is any machine or device, now known or later developed, intended for use in private homes, which can be used for making audio recordings by individuals for private use, which is capable of reproducing the sounds embodied in a phonorecord by copying such sounds from a phonorecord in any digital or any tape format to an audio recording medium in any digital or any tape format, and which contains in a single apparatus one or more cavities for the insertion of a phonorecord in any such format and two or more cavities for the insertion of an audio recording medium in any such format.

"(7) A 'radio transmission' and a 'television transmission' are transmissions by a broadcast station, cable system, multipoint distribution service, subscription service, direct broadcast satellite, or other means of transmission that are intended for reception in private homes.".

(b) The table of sections for chapter 1 of title 17, United States Code, is amended by adding at the end thereof the following new item:

"119. Limitation on liability: Audio recording.".

SEC. 3. (a) Chapter 5 of title 17 of the United States Code is amended by inserting at the end thereof the following new section:

"§ 511. Additional remedy for infringing importation or manufacture, and distribution of audio recording devices and media

"In any action filed pursuant to section 119(b)(2), the court may order that, in addition to any other remedies provided by this title, for a period not to exceed ninety days, the importer or manufacturer shall be deprived of the benefit of a compulsory license under section 119(b)(1). In the absence of such license by reason of such order, any importation into and distribution in the United States, or any manufacture and distribution in the United States, of audio recording devices or media by such party is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506, 509, and this section.".

(b) The table of sections for chapter 5 of title 17, United States Code, is amended by adding at the end thereof the following new item:

"511. Additional remedy for infringing importation or manufacture, and distribution of audio recording devices and media.".

SEC. 4. Chapter 8 of title 17 of the United States Code is amended as follows:

(a) Section 801(b)(1) is amended by striking out "and 116," in the first sentence, and inserting in lieu thereof ", 116 and 119,".

(b) Section 801(b)(3) is amended by striking out "and 116," and inserting in lieu thereof ", 116 and 119,".

(c) Section 804(d) is amended by striking out "or 116," and inserting in lieu thereof ", 116 or 119,".

(d) The second sentence of section 809 is amended by striking out "or 116," and inserting in lieu thereof ", 116 or 119,".

SEC. 5. Supplementary and Transitional Provisions.—(a) This Act, and the amendments made by this Act, shall become effective on July 1, 1987.

(b) Section 501(a) of title 17 is amended by striking out "118" and inserting in lieu thereof "119".●

● Mr. KENNEDY. Mr. President, I am pleased to join Senator MATHIAS and my other colleagues in cosponsoring the Home Audio Recording Act. This bill would amend our copyright law to clarify that home taping for personal use is legal, and would establish a small royalty fee on some tape recorders and high-quality blank tapes to partially compensate copyright holders.

The practice of home taping of copyrighted music is a growing phenomenon. In 1972, home taping accounted for 20 percent of the total hours of recorded music available. By 1982, home taping had risen to 43 percent of the total. The impact of home taping on sales of sound recordings is substantial. In testimony before the Senate Judiciary Committee in the 98th Congress, Dr. Alan Greenspan estimated that more than two-fifths of all home taping is in lieu of the purchase of prerecorded records or tape, for an estimated retail dollar loss from home taping of $1.4 billion in 1982.

Home taping has already had an adverse impact on creativity and diversity in the recording industry. During the period from 1978 to 1982, record releases fell by more than one-third and employment in the recording industry has dropped from 29,000 to 21,000.

Our copyright system is designed to balance the need to provide financial incentives to creators of artistic works with the important policy of keeping consumer costs reasonable. Advances in technology are straining the ability of our existing copyright laws to adequately safeguard composers and performers of music. The Home Audio Recording Act would restore adequate copyright protection to recording artists without placing an undue burden on consumers.

I urge my colleagues to give this legislation favorable consideration.●

● Mr. SIMON. Mr. President, I rise today to join my distinguished colleague from Maryland, with whom I am pleased to serve on the Judiciary Committee, Senator MATHIAS, in sponsoring the Home Audio Recording Act. This legislation would provide relief to our Nation's music industry by applying a small one-time fee on recording equipment and blank cassette tapes used primarily for the taping of recorded material.

Our Nation has the finest music and recording industry in the world. Our free enterprise system provides stimulation and opportunity for composers, artists, and producers. We reward creative musical talent and therefore encourage talented men and women to pursue their special abilities. The result is a musical community of rich diversity and spirited individualism.

Yet, recent technical advances in cassette recording have threatened our music industry in an unprecedented fashion. Home recording of music albums caused an estimated $1½ billion in losses to the recording industry last year. Since 1978, the total number of new albums released each year has dropped by more than half. Clearly, we must take steps to ensure that the creative men and women who generate our Nation's music and the thoughtful people who risk their own financial security by investing in these efforts are not discouraged from continuing careers in music.

The bill we are offering today is a fair and simple attempt to remedy this problem. This small royalty fee will generate a revenue pool to compensate

51-059 O-86-27 (Pt. 19)

those parties who are directly affected by the losses brought about by home taping. This new revenue will be shared by producers, composers, and performers alike through independent contractual agreements.

I understand the economic realities of this proposal. Any royalty fee has some inherent drawbacks. Consumers will pay a slightly higher price for blank cassettes and recording equipment. Album rental outlets and retailers of recording equipment and cassette tapes may not realize the fantastic profits of the past few years. This is an unfortunate situation and I regret any move that pampers these people. We should monitor the effects of this legislation closely to see that it does not unduly affect either these businesses or consumers. It should not.

It is offered as a step toward fairness. The low prices and high profits of the last few years have come at the expense of the men and women who have worked so hard to create this music. The debt we owe these people for sharing their creative genius—a debt many have escaped through home taping—will be paid in part by such a royalty fee.

I do not have any firsthand experience with the music industry. But I have come to sympathize with musicians through my experience with publishing. I have written several books, and while none of these have become a best seller, each publication represents a significant amount of thought and hard work on the part of this author. I do not appreciate the idea of somebody copying my work for their own enjoyment without rewarding this effort. I understand the frustration that composers and producers must feel when the fruits of their labor are duplicated without offering any payment for their original work.

We have always realized the importance of a vigorously enforced system of copyright laws in this country. These laws are inspired by our belief that creative talent should be rewarded and encouraged. We have historically encouraged our artists and composers because we understood that music is an art that erases boundaries between people and helps us share a common culture. The Home Audio Recording Act will protect our American musicians and ensure that American music will continue to enrich our lives for decades to come.●

● Mr. SASSER. Mr. President, I am pleased to be an original cosponsor of the legislation being introduced today by my distinguished colleague, the senior Senator from Maryland. The bill would provide for the collection of royalties on the sale of audio recording equipment and blank tapes.

Tennessee benefits greatly from a strong and vibrant music industry. Nashville is the center of the country music industry. This industry contributes thousands of jobs and tens of millions of dollars to the Tennessee economy.

Country music accounts for nearly 15 percent of the total annual record sales in the United States of roughly $570 million. So, country music in Tennessee is big business, and it is big business in a State where the unemployment rate has been above the national average now for several years.

The legislation we are introducing today is designed to cope with an increasing problem faced by the industry—home taping of music. It is a common practice in this country for people to get together, purchase one copy of a record or tape and then make several copies. Their feeling is that they save a lot of money on records and tapes and that no one gets hurt.

But someone is getting hurt, Mr. President—the writers who hold the copyright on the music. These writers earn only modest amounts from their music. For instance, of the 25,000 members of ASCAP, the American Society of Composers, Authors and Publishers, only 1,000 earn over $10,000 per year from performances of their music. If they continue to lose income to home taping, they will be squeezed out of the music business, then the quality and the quantity of the music being created will decline, and everyone will lose.

Home taping is currently estimated to cost about 30 percent of record sales—and thus about 30 percent of the writers' royalties. When seen in this context, it is apparent that home taping costs music writers significant amounts of income and may ultimately drive many writers out of the business.

Mr. President, the current copyright system recognizes that the royalties paid to a composer or writer should be commensurate with the success of the song. If an artist's work merits the long-term popularity of a hit, the artist should be rewarded on a continuing basis. By the same token, an artist is entitled to royalties each time one of his or her records or songs is sold.

This legislation requires a royalty payment of 5 percent on the wholesale price of audio recording equipment and 1 cent per minute for blank tapes. A higher royalty would be charged for equipment which is designed for little else but copying music and exemption would be provided for equipment which is unsuitable for recording music. The money collected will be distributed by the Copyright Royalty Tribunal upon application by the artists.

I believe that this is a workable method to ensure that our creative artists, composers, and songwriters receive the royalties they deserve from their work.●

Mr. LEAHY. Mr. President, I am pleased to join Senator MATHIAS and several of my colleagues in introducing the Home Audio Recording Act.

Millions of Americans enjoy taping copyrighted music at home. They do it from records, from prerecorded cassettes, from compact discs, and even from the radio. There is nothing evil about this practice. It's fun and it ought to continue. But the copyright owners—the composers, the lyricists, the musicians, the producers, and the publishers—whose music is being taped, ought to get some compensation for the use of their products.

That's what the Home Audio Recording Act does. It legalizes the practice of home taping, and it places a modest royalty on the audio equipment and high quality blank tape which is used for taping music.

While I have some reservations about the bill as it is drafted, and the fees that are imposed, I am supporting this effort for one simple reason—it is just.

American consumers are using and enjoying the valuable products of American artists. I think those same consumers will understand that it is fair to compensate those artists for their works, and that it is necessary if the broadest range of new music is going to continue to be written and recorded.

The bill being introduced today makes substantial departures from versions of this legislation which had been introduced in previous Congresses. First, it deals with audio home taping only. The law on video home taping is left precisely where it has been since the Supreme Court's Betamax decision. Second, the bill exempts machines and tape which are not used for the recording of copyrighted music. Schools, libraries, commercial users, and people using dictaphones will be able to purchase equipment and tape that are not subject to the royalty. Low fidelity taping systems also will not be subject to a royalty.

As I mentioned earlier, I do have some reservations about the bill as it is being introduced. The most significant of these is the royalty placed on blank tape. The bill sets a fee of 1 cent per minute. From the information I have received, I think that fee is too high. I am cosponsoring the bill because I believe that legislation is needed in this area, that this bill is a good first effort, and that we need to get on with the process. But I question this fee and will consider amending the bill in committee.

I also believe that hearings will help us refine the concept already embodied in the bill of exempting machines and tapes which are not used for infringing purposes. While there is no perfect solution to this question, I

am hopeful that we can come up with a just one.

I am looking forward to hearings on this bill and to working with affected individuals and groups to ensure that the bill we ultimately report properly balances the needs of consumers with the rights of creative artists in this age of modern duplication technology.

By Mr. MATHIAS (for himself, Mr. STAFFORD, Mr. BENTSEN, Mr. ROCKEFELLER, Mr. BURDICK, Mr. CHAFEE, Mr. HART, Mr. SIMPSON, Mr. MOYNIHAN, Mr. ABDNOR, Mr. MITCHELL, Mr. HUMPHREY, Mr. BAUCUS, Mr. LAUTENBERG, Mr. DOMENICI, Mr. DURENBERGER, and Mr. SARBANES):

S. 1740. A bill to designate Bloomington Lake located on the North Branch of the Potomac River, near Bloomington, MD, and Keyser, WV, as the "Jennings Randolph Lake"; to the Committee on Environment and Public Works.

JENNINGS RANDOLPH LAKE

● Mr. MATHIAS. Mr. President, I am introducing legislation today to honor and recognize the achievements of one of our most esteemed former colleagues, Jennings Randolph.

My bill would rename Bloomington Lake in his home State of West Virginia, as the Jennings Randolph Lake.

Senator Randolph retired from the Senate in 1984 after 52 years of public service, half of it in this body. Throughout his long and distinguished career, he never forgot the little people of his State. He worked hard in the Congress to improve working conditions, job opportunities, and recreational facilities for the people of West Virginia.

Major Federal programs bear his name or his sponsorship: The Randolph-Sheppard Act of 1936, a program to employ the blind; the Federal Aid to Airports Act of 1946; the National Defense Interstate Highway System Act of 1956; the Appalachian Regional Commission; the Solid Waste Disposal Act; the Coal Mine Health and Safety Act; the National Fuels and Energy Policy Study of 1971; and the National Institute of Peace.

One recent example of his efforts is Bloomington Lake, created by the Corps of Engineers in Elkins, WV. The lake borders my home State of Maryland and was formed by the damming of the North Branch of the Potomac River. In 1983, Jennings and I attended the dedication ceremonies for this wonderful lake for boating, fishing, swimming, hiking, picnicking and camping. It also provides a reserve water supply for downstream communities, including Washington, DC.

Jennings Randolph was an institution himself within the institution of the Senate, which he took very seriously. He truly believed in the Senate as the greatest deliberative body in the world, and when he took to the floor to speak, he always commanded the attention of his colleagues. Careful thought before speaking, and decorum, were important to him. I am sure many of my colleagues can vividly recall Jennings rising on many occasions, when the Senate became raucous, to state firmly: "Mr. President, the Senate is not in order!" This simple reminder from one of the Senate's elder statesmen would be followed by the pronounced pounding of the gavel by the Presiding Officer, who would acknowledge the situation by saying, "The Senator from West Virginia is correct. The Senate is not in order."

Heeding the admonition, Members then returned to their seats and to quiet attention so that the recognized speaker could proceed and be heard.

Senator Randolph has returned to his home in Salem, WV, where he writes a column for the local newspaper as well as a variety of other thoughtful pieces. I know my colleagues miss his presence here and his wisdom on so many subjects. And I know my colleagues join me in extending our fondest wishes to Jennings as he enjoys the retirement that his distinguished career of public service has earned him. I can think of no more fitting tribute to him than to rename Bloomington Lake as the Jennings Randolph Lake.●

By Mr. DURENBERGER:

S. 1741. A bill to amend the Internal Revenue Code of 1954 to provide capital gain treatment for sales of certain condominiums; to the Committee on Finance.

CONDOMINIUM COST REDUCTION ACT

● Mr. DURENBERGER. Mr. President, for most people the dream of homeownership often begins with the least expensive form of housing. Because of the high interst rates and land costs which have plagued our country during the last several years, condominiums have often become the most affordable form of homeownership available today.

Under current law, however, if an apartment owner converts his building to condominiums and sells the units to his residents, all the profit is taxed at ordinary income rates. If the owner sells the building to a middleman—commonly known as a converter—leaving it to the convertor to sell the units, the owner's profit is taxed at the capital gains rate and the converter pays taxes at ordinary income rates on his profit. Because of the impact of these tax laws that discourage sales to existing residents, virtually all condominium conversions are accomplished through converters.

Conversions by professional converters has had some negative impact on the housing market because of some insensitive converters and the position owners are placed in by the present tax laws. This legislation that I am introducing today would cut out the middleman-converter and would make conversions a much more humane and cooperative venture between the owners and the residents. In the typical conversion today the converter buys out the owner with short-term money usually pegged a few points above the prime rate.

Because of the high carrying cost and the fact that the converter has to pay ordinary income tax on any of his gain, this makes it necessary for him to sell the units as fast as possible to limit his carrying charges and overhead. Many times the converter upgrades the units so that he can charge a high enough price to pay for his expenses and cover his substantial risks. As prices increase to cover these costs, many of the current residents find it impossible to purchase their present units. In fact, the National Apartment Association [NAA] estimates the cost of conversion is increased by at least 25 percent of the converter's involvement.

The legislation that I am introducing today would provide that if an owner converts an apartment to a condominium after holding the building for 5 years or more, the amount of profit realized by virtue of gain in the value of the building as determined on the date of conversion is to be taxed at the capital gains rate and any profits realized beyond that, at ordinary income rates. I believe that if current tax laws did not discourage apartment owners from converting the buildings themselves the condominium market would work quite differently.

Within the confines of the present tax law, the owner is encouraged to sell the project but not directly to an individual currently living in the unit. This legislation would provide that the owner could sell the units to his residents and make a fair profit without incurring the high short-term costs and risks that the converter takes. The owner would also save considerable costs by selling the unit to the resident because he would avoid large real estate brokerage costs and other transaction costs associated with bringing in new owners. The owner could, therefore, sell the unit at a significantly lower price—one that the present residents would be able to afford. There would then be less need to upgrade the units beyond the affordability of the current residents. This will in turn lead to less displacement because it will eliminate the need to move the nonbuying residents out quickly. In addition, the owner will find it easier to comply with many local restrictions which require extended lease terms for current residents since he is already carrying the

building as a rental project without a large short-term obligation.

This bill is similar to legislation I introduced last year with former Senator John Tower. At that time the Joint Committee on Taxation estimated that this legislation would not have a significant revenue impact on the Treasury.

Mr. President, I urge the chairman of the Senate Finance Committee to schedule hearings on this bill as soon as possible so that this body can take timely action toward enacting this important piece of housing legislation into law.

I ask unanimous consent that a copy of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1741

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Condominium Cost Reduction Act of 1985".

SEC. 2. CAPITAL GAIN TREATMENT FOR PORTION OF GAIN ON SALE OF CONDOMINIUM UNITS CONVERTED FROM EXISTING STRUCTURES.

(a) GENERAL RULE.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

"SEC. 1257. CAPITAL GAIN TREATMENT FOR PORTION OF GAIN ON SALE OF CONDOMINIUM UNITS CONVERTED FROM EXISTING STRUCTURES.

"(a) GENERAL RULE.—For purposes of this title, any gain recognized by the taxpayer on the sale or exchange of any qualified condominium unit shall be treated as gain from the sale of property used in the trade or business (as defined in section 1231(b)) to the extent that the gain so recognized does not exceed such unit's allocable capital gain amount.

"(b) QUALIFIED CONDOMINIUM UNIT.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified condominium unit' means any condominium unit resulting from the conversion of qualified real property into condominium units.

"(2) QUALIFIED REAL PROPERTY.—The term 'qualified real property' means any real property—

"(A) which consists of one or more structures (and the land necessary for the use of the structures) used in a trade or business of the taxpayer at all times during the 5-year period ending on the determination date, and

"(B) with respect to which the taxpayer makes an election under this section.

"(3) SPECIAL RULE WHERE PROPERTY ACQUIRED BY INHERITANCE OR DEVISE, ETC.—For purposes of this subsection, the taxpayer shall be treated as holding any property and as using such property in his trade or business during any period during which such property was held and so used—

"(A) in the case of property acquired by inheritance or devise, by the decedent, or

"(B) by any other person if the basis of such property in the hands of the taxpayer is determined (in whole or in part) by reference to the basis of such property in the hands of such other person.

"(c) ALLOCABLE CAPITAL GAIN AMOUNT.—For purposes of this section—

"(1) IN GENERAL.—The term 'allocable capital gain amount' means, with respect to any qualified condominium unit, the portion of the imputed capital gain determined under paragraph (2) with respect to the qualified real property which is allocated to such unit under paragraph (3).

"(2) IMPUTED CAPITAL GAIN.—The term 'imputed capital gain' means, with respect to any qualified real property, the amount of the gain (if any) which—

"(A) would have resulted had such property been sold on the determination date for an amount equal to its fair market value on such date, and

"(B) is not treated as ordinary income under section 1245 or 1250.

"(3) ALLOCATION AMONG UNITS.—The amount of the imputed capital gain shall be allocated among condominium units in proportion to their respective fair market values on the determination date.

"(4) FAIR MARKET VALUE DETERMINATIONS.—For purposes of paragraphs (2) and (3), the fair market value (and adjusted basis) of any qualified real property (and of any condominium unit) shall be determined without regard to any improvement made in anticipation of the conversion into condominium units.

"(5) DETERMINATION DATE.—The term 'determination date' means, with respect to any qualified real property, the day on which the form of ownership of such property is changed into condominium units.

"(D) SPECIAL RULES.—

"(1) ELECTION.—An election under subsection (a) shall be made at such time and in such manner as the Secretary shall by regulations prescribe. Such an election, once made, may be revoked only with the consent of the Secretary.

"(2) SPECIAL RULE FOR CARRYOVER BASIS TRANSACTIONS.—If any taxpayer makes an election under this section with respect to any qualified real property, the same tax treatment which would apply to the taxpayer shall also apply to any other person whose basis in such property is determined (in whole or in part) by reference to the basis of such property in the hands of the taxpayer.".

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter P of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 1257. Capital gain treatment for portion of gain on sale of condominium units converted from existing structures.".

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to property the form of ownership of which is changed into condominium units after the date of the enactment of this Act.●

By Mr. TRIBLE (for himself and Mr. MATTINGLY):

S. 1742. A bill to improve the enforcement of the restrictions against imported pornography; to the Committee on the Judiciary.

PORNOGRAPHY FORFEITURE PROCEEDINGS VENUE ACT

Mr. TRIBLE. Mr. President, I am introducing legislation today—together with my distinguished colleague from Georgia, Senator MATTINGLY—that will strengthen the Government's ability to punish the importation of obscenity into the United States. I have worked closely on this proposal with my friend and colleague from the House, Representative FRANK WOLF, and this measure is patterned after language that Representative WOLF included in the House report on H.R. 3036, the fiscal year 1986 Treasury appropriations bill.

Mr. President, under current law, the U.S. Customs Service is empowered to seize obscenity and child pornography upon its entry into the United States. Specifically, 19 U.S.C. 1305 provides that the material be transmitted to the U.S. attorney in the district in which it is seized, and the U.S. attorney may then initiate forfeiture proceedings in the district court.

This seizure mechanism is an important part of the overall national effort to curb the proliferation of obscenity and child pornography. At a hearing before the Senate Permanent Investigations Subcommittee last year, Customs Commissioner William Von Raab testified that his agents were stopping hundreds of obscene books, magazines, films, and videotapes daily.

This activity was aided considerably by passage of the Child Protection Act last year. That bill removed the requirement that child pornography be intended for commercial sale, making it easier for Customs to seize and forfeit merchandise and to refer violators to the Justice Department for prosecution. The Department itself has also reported an increase in its prosecution of child pornography cases as a result of the Child Protection Act.

Nevertheless, I believe that the hand of the Customs Service and the Justice Department can be strengthened further, and the bill that Senator MATTINGLY and I are sponsoring will help to do so.

The existing forfeiture system requires that obscene matter which is seized by Customs agents be turned over to the U.S. attorney in the district in which it is seized. This places a disproportionate burden on the U.S. attorney in that district to try cases involving importation of obscenity and child pornography.

This legislation would alter 19 U.S.C. 1305 to provide Customs agents with the option of forwarding the seized material to the U.S. attorney in the district to which the material was addressed. This would achieve a number of important goals.

First, it would allow the burden of prosecuting such cases to be distributed more evenly throughout the country. Prosecutions would no longer be concentrated in a few ports of entry. This would ensure that more of the country's resources are bought to bear against these very urgent problems.

Second, this bill will bring forfeiture decisions into conformance with the

community standards requirements of the Supreme Court's decision in Miller versus California. Under that decision, triers of fact in obscenity cases are required to consider whether the average person, applying contemporary community standards, would find that the work appeals to the prurient interest.

It is obvious that the community standards in a relatively few ports of entry should not be used to judge obscenity imports that are destined for Richmond, VA, Macon, GA, or other cities and towns around the Nation. The community standards of those cities ought to be brought to bear on obscenity imports.

Finally, this measure will extend the 14-day time limit under which forfeiture proceedings must be commenced. Often, the Government investigates recipients of pornography only to find that criminal prosecution is unwarranted. In such cases, the 14-day time limit for forfeiture proceedings may have already passed, and the government is faced with the undesirable prospect of forwarding the material in question to the addressee. My amendment will extend the grave period to 30 days, thus giving Federal law enforcement officials somewhat more flexibility in proceeding against obscenity imports. Civil forfeiture proceedings could also be stayed pending the completion of any criminal matter.

Late last year, Government authorities conducted an experiment indicating that these steps will produce an increase in the numbers of obscenity prosecutions around the country. In that experiment, Customs and postal inspectors diverted several mail shipments arriving in New York from the Netherlands, Denmark, and Sweden to an alternative destination in Wilmington, NC.

The test resulted in 53 seizures of pornographic material, of which 48 were forfeited and five were used for controlled deliveries. The Customs Service is convinced, and I agree, that this number is far higher than would have been proceeded against otherwise. It is also worth noting that one of the controlled deliveries led to the discovery of a huge commercial pornography reproduction center, where hundreds of additional pornographic books, videotapes, and similar materials were seized.

I believe that legislation that Senator MATTINGLY and I are offering will reap similar benefits for law enforcement's efforts to combat the importation of obscene matter, and I urge my colleagues to join us as cosponsors of this bill.

Mr. MATTINGLY. Mr. President, I am pleased to join my distinguished colleague from Virginia in introducing legislation which I firmly believe will aid the U.S. Customs Service and other law enforcement officials in more efficiently cracking down on the importation of obscene and pornographic materials into the United States. As these materials have become increasingly violent and explicit in nature, I believe that national concern over pornography has grown. The Attorney General's Commission on Pornography, which is holding hearings throughout the country, has contributed to this heightened awareness of the scope and seriousness of the problem. I commend the Attorney General and the commission for this, and I say to my colleagues that we should respond to this awareness with positive action. One such action is the improvement of existing enforcement procedures.

Under the provisions of current law, the Customs Service has the power to seize, upon its entry into this country, any material which it believes to be obscene. Once the seizure has taken place, the material must be forwarded to the U.S. attorney in the Federal judicial district in which the materials are seized, in order for forfeiture proceedings to be initiated or criminal charges to be lodged. This requirement has resulted in an enforcement burden on the handful of districts where the majority of such obscene and pornographic materials enter the country.

Our legislation would allow the Customs Service to forward the questionable material to the U.S. attorney in the region in which the individual to whom the material is addressed resides. The effect of this change would be to provide for greater flexibility and fairer distribution of work on pornography forfeiture proceedings throughout the Nation. No one prosecutor or court would any longer be expected to assume a disproportionate share of the enforcement work. The measure would bring the country's resources more equitably to bear against a serious national problem. Additionally, our legislation would allow for the prevailing community standards of each neighborhood, township, and locality to be considered in determining whether or not the materials are indeed obscene. Under the current system, the prevailing standard in New York, where a large portion of this foreign pornography enters the United States, is applied to materials addressed to individuals in Statesboro, GA, and Tupelo, MS, and Missoula, MT. As citizens from thousands of communities throughout America know, the prevailing community standard in New York City may not accurately reflect the community standard in the area for which the obscene material is bound.

Last year Congress approved and the President signed into law the Child Protection Act of 1984. That act outlawed the distribution of all child pornography in this country and strengthened prosecuting authority against producers and distributors of child pornography. It increased both prison terms and monetary fines, raising first offense fines from $10,000 to $100,000. I strongly supported these important improvements. Unfortunately, those who would prey upon our young people recognize no national boundaries. A domestic prohibition is no deterrent to the production of pornographic material in other countries. It may, in fact, lead to increased production abroad.

Those individuals who import such disgusting materials are at war with our children, Mr. President. They put them at risk. Obscene and pornographic materials imported from other nations have a detrimental effect on our children as those which are produced locally.

Mr. President, our children are this Nation's most precious resource. When we fail to take every conceivable step to enforce the law against the distribution and possession of child pornography, then we fail to protect them. We turn our backs on the menace which threatens them. I believe that when we discover roadblocks to effective enforcement, we must move resolutely to remove them. That is what my colleague and I are seeking to do with this legislation.

When the Senate was considering the Treasury, Postal Service appropriation bill on the floor recently, I intended to offer this measure as an amendment to that bill. I did not do so then because the distinguished chairman of the Finance Committee gave me his assurance at the time that he would cooperate in every possible way to schedule a hearing on this important issue and to seek committee action as soon as possible. I hope that the committee will indeed move as expeditiously as possible on this matter.

In closing I want to make my colleagues aware that the U.S. Customs Service and the Postal Service have contributed to the development of this proposal and support it. In addition, the Justice Department has expressed no opposition to a statutory change such as this.

This legislation is reasonable and responsible. It would enhance law enforcement activities in an area of concern to millions of Americans. Again let me express the hope that we move quickly to enact this change. I urge my colleagues' cosponsorship and support.

ADDITIONAL COSPONSORS

S. 402

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 402, a bill to amend the Communications Act of 1934 to provide for spe-

cialized equipment for telephone service to certain disabled persons.

S. 1133

At the request of Mr. RIEGLE, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1133, a bill to amend section 119(d) of the Housing and Community Development Act of 1974.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1437

At the request of Mr. THURMOND, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 1437, a bill to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs," and for other purposes.

S. 1456

At the request of Mr. LAUTENBERG, the names of the Senator from Colorado [Mr. ARMSTRONG], the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of S. 1456, a bill to recognize the Army and Navy Union of the United States of America.

S. 1457

At the request of Mr. LAUTENBERG, the names of the Senator from Colorado [Mr. ARMSTRONG], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Rhode Island [Mr. PELL] were withdrawn as cosponsors of S. 1457, a bill to amend the Internal Revenue Code of 1954 to establish certain rules regarding the regulatory treatment of certain Federal tax credits and deductions allowable to regulated electric utilities.

S. 1585

At the request of Mr. MATTINGLY, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 1585, A bill to amend the Internal Revenue Code in order to clarify the right of cooperatives to net earnings and losses among patronage allocation units, and for other purposes.

SENATE JOINT RESOLUTION 178

At the request of Mr. D'AMATO the name of the Senator from Kansas [Mr. DOLE] was added as cosponsor of Senate Joint Resolution 178, A joint resolution to designate the week of April 13, 1986, through April 19, 1986, as "Hemochromatosis Awareness Week".

SENATE JOINT RESOLUTION 189

At the request of Mr. HATCH, the names of the Senator from Michigan [Mr. LEVIN], the Senator from Nebraska [Mr. ZORINSKY], and the Senator from Utah [Mr. GARN] were added as cosponsors of Senate Joint Resolution 189, a joint resolution designating the week beginning January 12, 1986 as "National Fetal Alcohol Syndrome Awareness Week".

SENATE JOINT RESOLUTION 195

At the request of Mr. KASTEN, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from Utah [Mr. HATCH], the Senator from Mississippi [Mr. COCHRAN], the Senator from New York [Mr. D'AMATO], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of Senate Joint Resolution 195, a joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week".

SENATE JOINT RESOLUTION 207

At the request of Mr. WILSON, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from New Jersey [Mr. BRADLEY], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Arkansas [Mr. PRYOR], the Senator from Michigan [Mr. RIEGLE], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Senate Joint Resolution 207, a joint resolution to designate November 1, 1985 as "National Philanthropy Day".

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from New York [Mr. D'AMATO], the Senator from Florida [Mrs. HAWKINS], the Senator from Mississippi [Mr. STENNIS], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week".

SENATE JOINT RESOLUTION 209

At the request of Mr. D'AMATO, the names of the Senator from South Dakota [Mr. ABDNOR], the Senator from Mississippi [Mr. COCHRAN], the Senator from Wisconsin [Mr. KASTEN], the Senator from North Dakota [Mr. ANDREWS], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Rhode Island [Mr. PELL], the Senator from Mississippi [Mr. STENNIS], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Connecticut [Mr. WEICKER], the Senator from Connecticut [Mr. DODD], the Senator from Maryland [Mr. SARBANES], the Senator from Illinois [Mr. SIMON], the Senator from Idaho [Mr. MCCLURE], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Nebraska [Mr. ZORINSKY], the Senator from North Dakota [Mr. BURDICK], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of Senate Joint Resolution 209, a joint resolution to designate the period from October 28, 1985, through October 28, 1986, as the Centennial Year of Liberty in the United States.

SENATE JOINT RESOLUTION 211

At the request of Mr. DURENBERGER, the names of the Senator from Oregon [Mr. PACKWOOD], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Joint Resolution 211, a joint resolution to provide for the designation of the week of October 6, 1985, as "National Sudden Death Syndrome Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Mississippi [Mr. STENNIS], the Senator from Oklahoma [Mr. NICKLES], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 60

At the request of Mr. DANFORTH, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of Senate Concurrent Resolution 60, a concurrent resolution to strengthen support for the national investment in research and advanced education capabilities.

SENATE RESOLUTION 96

At the request of Mr. GOLDWATER, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of Senate Resolution 96, a resolution relating to the centennial observance of the University of Arizona

AMENDMENT NO. 584

At the request of Mr. CRANSTON, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of Amendment No. 584 intended to be proposed to S. 1579, a bill to clarify that the remedies available for the enforcement of certain civil rights statutes are applicable to the States.

SENATE CONCURRENT RESOLUTION 77—RELATING TO THE UNITED STATES INTENTION TO WITHDRAW FROM THE COMPULSORY JURISDICTION OF THE INTERNATIONAL COURT OF JUSTICE

Mr. HATFIELD submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 77

Whereas the United States sponsored and supported the establishment of the International Court of Justice, or World Court, on October 24, 1945, to provide for the orderly arbitration of disputes among nations under the rule of law;

Whereas the Senate gave its advice and consent to the acceptance of the compulsory jurisdiction of the International Court of Justice on August 2, 1946, in recognition of the importance of the rule of law to American interests and American values; and

Whereas the United States has utilized the International Court of Justice on numerous occasions to resolve its disputes with other nations: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress

(1) deplores the notification by the President or the Secretary General of the United Nations that the United States is withdrawing from the compulsory jurisdiction of the International Court of Justice and

(2) reaffirms its support for the international rule of law and the role of the International Court of Justice.

SEC. 2. The Secretary of the Senate shall transmit a copy of this Concurrent Resolution to the President.

U.S. WITHDRAWAL FROM WORLD COURT

Mr. HATFIELD. Mr. President, I am deeply concerned about the action that was announced this morning on the part of the administration to withdraw from the World Court, particularly since it is based on the assumption that the present case pending before the World Court, brought by Nicaragua, would somehow result in embarrassment to the United States in the world of geopolitics. I believe that those who reject the rule of law in the world will welcome this decision. I am sure that men like Khomeini and Qadhafi and all the other world-class thugs who thrive on the rule of the jungle will no doubt be the first in the cheering section to applaud this policy.

The administration is shortsighted because it says, in effect, "We can't take the heat from countries which disagree with us, and therefore we want to deny them a forum."

I might ask the question: Are we denying them a forum? Let us bear in mind that when we had the hostages being held in Iran and that country did not want to participate in the World Court, we still had the forum and we received a decision by that World Court that was favorable to us, in spite of the nonparticipating role of Iran.

We are not denying Nicaragua a forum by withdrawing from the court. We are denying ourselves the forum. I strongly believe that the world is better served through exposure to our principles and to our ideals than it is being shielded from the ideas of other countries, such as Nicaragua or Iran.

I believe that we should be prepared to argue our case with any country at any time, without fear, including the case now before the World Court. I think this is a serious mistake. I do not think it will be very long before we realize this fact, the next time American lives are being held hostage or where the territorial integrity of one of our allies is threatened.

What, then, will we appeal to; and what, then, can we turn to if we are no longer submitting ourselves to the compulsory jurisdiction of the World Court? Our alternative is simply the rule of the jungle.

I once heard the President describe America as a bright, shining city on a hill. In my view, today's action has smudged that light and dealt a tremendous blow to the rule of law.

I intend to pursue every legislative avenue available to challenge this ill-conceived action, for I believe that if the greatest constitutional democracy in the world lacks the courage and the conviction to keep this institution of the World Court alive, pray tell what incentive exists for any other nation to respect international law?

In the resolve section of this Senate concurrent resolution I have introduced today, it not only deplores the notification by the President to the Secretary General of the United Nations that the United States is withdrawing from compulsory jurisdiction of the International Court of Justice, but also, it reaffirms Congress' support for the international rule of law and the role of the International Court of Justice.

I indicate that it is my intention—and I put my colleagues on notice—that I intend to pursue this with more than words, and I shall use whatever appropriations process or legislative vehicle is open and available to us, under the rules of the Senate, to pursue this conviction that I express here today, in every effort to block this action by the administration.

I am not going to argue the case today of this being a matter of international treaty. I have serious reservations about the authority of the administration to take this action without some role by the Senate other than that of a spectator's role that they assume we will play, because I have heard no report from the Senate Foreign Relations Committee. I have not heard any such report or any indication that the Senate Foreign Relations Committee has had an opportunity to review this policy or to comment on it. I certainly have not been aware of any vehicle or forum in which I could participate in expressing my strong convictions.

Let us bear in mind that the United States sponsored and supported the establishment of this international court of justice on October 24, 1945, to provide for the orderly arbitration of disputes among nations under a rule of law.

The perception, in the vernacular of the school playground, is that if we cannot play it our way, we will take our marbles and go home.

This does not in any way add to the principle that America has stood for from its inception, that we believe in a government, we believe in a structure of resolving political disputes, economic disputes, social disputes, within the context of jurisprudence, within the context of a due process system; that we believe in a rule of law and not a rule of the giants who can use muscle and threat and persuasion of various and sundry kinds to get their way, which is the rule of the jungle.

Even though the pace may be less than satisfactory to some of us, let us move always with a commitment toward the goal of enlightenment, of peace through law, in a world existing under jurisprudence and law, a world that someday can live under that kind of protection and that kind of freedom.

There will be those who will say that we must pursue our goals exclusively through intimidation, through the leverage of economics, and other such techniques. I think that when you look at the billions of dollars we have spent on military aid, which is in many instances almost a form of bribery, to achieve political or military objectives, that dismal record of buying friendship in the world has not borne any results. But that is an alternative: using money, using power, using weaponry, using whatever, to achieve international policy or objective. These have all proven their bankruptcy; and the only hope we have is to engage in a program and a system of jurisprudence to have cases argued, to have conflicts resolved, through the process of court and the judgments of those who sit on such courts.

I also know the argument has been used that we have people sitting as judges who do not have sympathy to a constitutional system of government such as ours. But bear in mind that we won our case before this court on the question of the American hostages held in Iran. The complexion of that court was comprised of persons who do not have the same understanding of constitutional procedures that we have. But the judgment of that court was so influenced by the facts that we won our case.

Mr. President, maybe this administration does not think we have the facts on our side in the case of Nicaragua, but that is neither here nor there.

The point is simply that we undertook, as a participant under that charter, under the jurisdiction of that court, a commitment to that court system. Then, when we begin to read the tea leaves and think perhaps the judgment of that court will go against us, we pick up our legal briefs and run home. I do not believe that is in keeping with the principles of American

justice or jurisprudence, which say that the courts render their decision and we abide by those decisions.

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce the Committee on Agriculture, Nutrition, and Forestry will hold a hearing on the Farm Credit System on Thursday, October 17 at 9:30 a.m. in room SR-328A.

SUBCOMMITTEE ON AGRICULTURAL CREDIT AND RURAL ELECTRIFICATION

Mrs. HAWKINS. Mr. President, the Subcommittee on Agricultural Credit and Rural Electrification announces that it will hold a hearing on the subject of farm credit. The hearing will be held on Tuesday, October 15, 1985 beginning at 10:00 a.m. The Subcommittee will meet in room SD-436, of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DOLE. Mr. President, I ask unanimous consent the Committee on Armed Services be authorized to meet in Executive session, during the session of the Senate on Monday, October 7, to receive a briefing on the political and military aspects of the proposed sale of arms to Jordan.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

WEEKLY BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the budget scorekeeping report for the week of September 30, 1985, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act.

This report contains the final scorekeeping for fiscal year 1985 which ended September 30. The fiscal year 1985 current level is $52 million over the budget resolution in budget authority, $68 million over in outlays, and $1 million under in revenues. From this point on, the weekly report will contain revenue and spending totals for fiscal year 1986 only.

I ask that the report be printed in the RECORD.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 7, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal years 1985 and 1986. The estimated total of budget authority, outlays, and revenues for each fiscal year are compared to the appropriate or recommended levels contained in the most recent budget resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through October 4, 1985. The report is submitted under Section 308(b) and in aid of Section 311(b) of the Congressional Budget Act.

Since my last report Congress has completed action on the Emergency Extension Act of 1985, P.L. 99-107, H.R. 2475, Simplification of Imputed Interest Rules, and on Health Professions Educational Assistance Amendments, H.R. 2410.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONG., 1ST SESS., AS OF OCT. 4, 1985

[In billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
FISCAL YEAR 1985				
Current level [1]	1,062.2	946.4	736.5	1,823.8
Budget resolution, S. Con. Res. 32	1,062.1	946.3	736.5	[2] 1,847.8
Current level is:				
Over resolution by	.1	.1		
Under resolution by			[3]	24.0
FISCAL YEAR 1986				
Current Level [1]	1,067.0	980.1	793.0	1,823.8
Budget resolution, S. Con. Res. 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over resolution by		12.5		
Under resolution by	2.7		2.7	255.0

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate committee or passed by the Senate. Thus, savings from reconciliation action assumed in S. Con. Res. 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $1,823,800,000,000.

[3] Less than $50,000,000.

SUPPORTING DETAILS FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, 99TH CONG., 1ST SESS., AS OF OCT. 4, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
FISCAL YEAR 1985			
I. Enacted in previous sessions:			
Revenues			736,650
Permanent appropriations and trust funds	686,253	607,885	
Other appropriations	542,981	516,642	
Offsetting receipts	−182,025	−182,025	
Total, enacted in previous sessions	1,047,209	942,502	736,650
II. Enacted this sessions:			
Famine relief and recovery in Africa (Public Law 99-10)	784	289	
Appropriations for the MX missile (Public Law 99-18)		79	
Agriculture supplemental appropriation (Public Law 99-71)	1,000

THE DANGER FROM JAPAN

● Mr. D'AMATO. Mr. President, I rise today to recommend to my colleagues' attention an article entitled "The Danger From Japan," which appeared in the New York Times Magazine on July 28, 1985.

Whether one agrees with Theodore White's opinions or not, his article correctly depicts the United States as a victim of our own free trade policies. Although Japanese tariffs are not extremely high on a comparative basis, they are prohibitive for targeted industries. Also, nontariff barriers make the Japanese market extremely difficult to penetrate. For instance, the Japanese patent system is filled with such extraordinary delays and prejudice against U.S. companies that it is not unusual for the life of a patent to expire before it is even enforceable.

In view of the recent Commerce Department announcement that the United States is now a net debtor nation, we have to be concerned about our future. It is projected that the deficit in our trading account at year's end will be in excess of $150 billion. Japan will account for an estimated one-third of this.

We are in the midst of a crisis; one which has been ignored for too long. It is time that our trading partners are held accountable for their unfair and illegal trading practices.

Mr. President, Mr. White's article gives us, as legislators, a great deal to think about. I urge my colleagues to review it, and I ask that it be printed in the RECORD.

The article follows:

[From the New York Times Magazine, July 28, 1985]

THE DANGER FROM JAPAN

(By Theodore H. White)

(Forty years after the surrender, Japan's trade tactics pose a threat to the U.S., argues the author.)

No sense of irony stained the spectacle of victory aboard the U.S.S. Missouri, no sense of shadows to rise years later.

We were all too bedazzled by the splendor of the day—for here was American power at its zenith. We had won the war, totally, and the men who had won it, soon to become legend, were all there on the veranda deck in pressed suntans or navy whites. A band had been swinging through "Anchors Aweigh" as we gathered that morning, but as the climax approached a hush fell; silence stretched like a blanket over our murmurings.

None of us of course knew what America would make of the victory, or the Japanese of their defeat. But the power was all ours and stretched, visibly, as far as the eye could see. The Third Fleet had come in from offshore and now crowded Tokyo Bay—flattops and battleships, cruisers and destroyers, guns trained on the land we had laid waste. There was no question but that we had won this war.

It was Sunday, September 2, 1945, there on the other side of the dateline, and the skies, after a Saturday drizzle, stretched gray. But this was no guarded and hidden schoolhouse, with only a handful present to watch, as at the surrender of German forces only four months earlier at Rheims. Douglas MacArthur's sense of drama insisted that all the world be there to witness, and we were several hundreds thick on the foredeck.

The Missouri had been swept clean. The Stars and Stripes above the mainmast was the same that had fluttered over the Capitol on the day Japan attacked Pearl Harbor; it had just been flown out from Washington. The flag of Commodore Perry, who had pried Japan open to the West 90 years before, was draped on the rear turret, with the 31 stars of the then half-grown union faded but clear. And on each of the three 16-inch guns clung our sailors in white, holding on by a handgrip, or with their legs curled tight about the barrels.

Just in front of the turret was the surrender table, draped in a navy-blue coverlet, bare but for the documents. There the Japanese would sign. A few minutes before the appointed hour we heard the piping that announced the launch carrying the Japanese was alongside. We watched them come aboard: Mamoru Shigemitsu, the Japanese Foreign Minister, in morning coat and striped trousers; Gen. Yoshijiro Umezu, Chief of Staff of the army, in his starched brown uniform. Shigemitsu limped, for he had been crippled years before by Japanese terrorists who had tried to kill him, considering him a man of peace. But that brought him no sympathy from us now as he grasped the rail to pull himself up, then limped to the table of surrender.

I bristled at the sight of them. I had seen the Japanese blast and flame Chungking, the city I had lived in years before, then bring their planes down to machine-gun people in the streets. Japanese had shot at me, I had fired at them, and so the luxury of this moment was one I enjoyed. Others, too, hated the Japanese—perhaps all except Douglas MacArthur, who saw them as he saw all Orientals, as errant little brown brothers who must be rebuked, but then brought into Western civilization. Yet that day he was taskmaster and conqueror.

A few minutes after 9, General MacArthur himself appeared, and the Japanese came forward. No one helped Shigemitsu, but some Americans more generous than I brought him a chair to sit on as he signed the surrender. Next came Umezu, the brown pock marks on his creeks swelling and falling as he clenched his jaws. He wanted no chair; he stood stiffly, unfolded like a jackknife, then bent and signed the paper. Neither said anything. Then MacArthur spoke, for peace and conciliation—rather well, I think now as I read his text 40 years later. Then all the others signed. I notice, as I follow the notes I made on my copy of the text, that when the Dutch representative signed, the sun broke through the clouded morning, and the scene began to glisten.

At this point happened the episode that stands out sharpest among the memories of that day—the flyover. As MacArthur intoned "These proceedings are closed," we heard a drone and looked up. It is difficult to recall now, after years of floundering and blunder, how very good we were in those days, with what precision we ordered things. Four hundred B-29s had taken off from Guam and Saipan hours before to arrive over the Missouri at this precise minute of climax. They stretched across the rim of the horizon, and their heavy droning almost instantly harmonized with a softer buzzing as 1,500 fleet aircraft from our flattops joined them. The B-29s had burned out Japan's cities, dropped the two big bombs; the fleet aircraft had sunk the Japanese Navy. Now the killing arms of our power, the air forces, slid down from their height in the sky to circle low over the armada of American ships. Then, still very low, they disappeared across the sky, over two cities they had left in ruins, first Yokohama, then Tokyo, as if brandishing our power over the people who had dared, without warrant and with planned deceit, to attack and bloody us at Pearl Harbor.

We had won out over them. We lost more than 100,000 men to prove we could not be lacerated without warning, without seeking revenge.

Except that America's revenge on Japan was of such an extraordinary character as to befuddle all scholars who claim that history has a logic of its own. What we are faced with now is the idea that events contradict history's logic. Perhaps we did not win the war, perhaps the Japanese, unknown even to themselves, were the winners.

It had taken us years to get to Tokyo Bay. but that story had begun with an idea, as all wars do.

As a very young reporter, I had gone to Asia, and there became acquainted with the crowning Japanese idea: "The Greater East Asia Co-Prosperity Sphere." The slogan was scrawled across the walls of all the regions I visited, from Manchukuo to North China, down finally to Hanoi in 1940, when the Japanese took over Vietnam. And they meant to go further: to Thailand (with its tin), Malaya (rubber), Indonesia (oil and timber). The Japanese idea was simple: that Japan was the leader of East Asia, and so it should harness Asia, with its resources, its genius of mind, its hundreds of millions of people, and all would grow prosperous—Japan most of all.

But the Chinese, both Nationalist and Communist, had resisted. And, as the Japanese did their best to beat the Chinese into submission, America said: No. Franklin Roosevelt imposed his embargo on Japanese trade—no scrap metal, no oil, nothing that would help Japan pursue its purpose of conquest. The noose had thus tightened about Japan in 1941, whereupon they attacked us and hoped, having hurt us, that we would negotiate on their terms. Tactically, the attack on Pearl Harbor was one of the most brilliantly executed strokes of the war. But politically, it was most unwise, for America fought back.

Today, 40 years after the end of World War II, the Japanese are on the move again in one of history's most brilliant commercial offensives, as they go about dismantling American industry. Whether they are still only smart, or have finally learned to be wiser than we, will be tested in the next 10 years. Only then will we know who finally won the war 50 years before.

So we must go back to Japan at that weekend of surrender and see what we made of it.

The eye recalls almost nothing sharp of those first three days. Both Tokyo and Yokohama were wasteland. Here and there was a speckle of corrugated iron shacks where the bombed-out victims of our raids lived. Spikes of smokestacks rose above rubble. In the streets trudged the Japanese—forlorn and shabby. Along the country roads trickled the first of their demobilized soldiers, their belongings slung over their shoulders. All of Japan was open to us, except for the Emperor's palace in Tokyo, behind its moat and earthen walls. The 11th Airborne Division had arrived to protect him from all intruders—Americans and Japanese alike.

A few days before we entered Japan, an intelligence officer had briefed a few of us correspondents on how delicate that mission would be: Japan was still fully armed, with 57 divisions in the home islands. Some units were violent. There had already been one assault on the Emperor's palace in the days since he had radioed his submission to us; it has been beaten off. The Emperor was our key. "In essence," concluded the officer, "we've achieved a coup d'état. Our coup has been to take the Emperor. We've given him the widest latitude in telling his people how to take defeat. But, when they learn he takes orders from us, that we're using him to restore order, there's no telling how the mechanisms will react."

So, when we flew in on Friday, Aug. 31, before the surrender, the soldiers in my plane were taking apart, fingering, reassembling their guns as soldiers always do before assault, ready to shoot if this surrender was a trap.

But it was no trap; the Japanese had surrendered; the Emperor had defused the Japanese war machine, still capable of one last explosive bloodletting. The airfield perimeter had been guarded immediately by the 11th Airborne. The Japanese had not only obeyed our orders to remove all propellers from their planes at Atsugi Airfield, our point of descent, but the planes themselves had been bulldozed into a junkheap at the far corner.

That first weekend of reconnaissance and tingling fear we roamed the streets of Yokohama with strut and swagger. We took over the new Grand Hotel on the Bund—just up the street from the offices of the House of Mitsui. So I strolled down to visit it.

The House of Mitsui was one of the grand zaibatsu, those great Japanese merchant trading houses that we meant to abolish but did not. I walked in with Jim Stewart of the Office of War Information, who spoke fluent Japanese, and we were ushered into an executive's suite.

His face I have forgotten; in my notes his name reads simply "Fujiro," and he spoke fine English. When he understood that we had come not to arrest him but to talk, he relaxed. I wanted to pick up the threads of the story of defeat and surrender.

Fujiro told it well: It had been four months since the last ocean-going vessel of Japan's far-flung merchant marine had made it safely back to Yokohama, Japan's largest port. It has been more than a year since Kawasaki, the nation's oil port, had received a tanker from the East Indies. Yokohama was prostrate, he said. He guessed that 200,000 people had been killed in our bombings and 700,000 had fled.

But the Americans were not hated, he assured us. The people hated their army. "Why no planes, no guns to defend us?" He spat out names like Tojo, Oshima, Shiratori. The people expected them to be executed. People hated the United States bombers, but the first Americans to land were well-behaved. Jim Stewart remarked that, unlike the Japanese, American soldiers did not rape. Fujiro acknowledged this.

Then to his plea. Hunger. Food. Let Japan work to support herself. Japan could still make ships—"let us make ships to earn our way." Some textile mills remained; the Japanese could still make cloth to earn a living. But Japan needed food most of all—one-third of all its food in the closing days of the war had come out of China. Japan could sell us tea and silk, but it needed food.

What were the plans now of the House of Mitsui? we asked. He replied: "Frankly, gentlemen, until your military tells us what to do, we have no plans." Before we left, he poured us a toast: "To your safe arrival!" We drank; the House of Mitsui bowed as if we were not only liberators but allies.

These days, the House of Mitsui is thriving again, its trading net spread from steel mills in China to refineries in Iran to operations in America—the whole world has become its "Greater Co-Prosperity Sphere."

Food, then, that weekend and that month was of the essence.

There is a strange and wonderful thing about Americans, of which I am proud. In war we bomb, we kill, occasionally our soldiers are savage, too—although when an American officer goes berserk, we try him in our own military courts, as we did Lieut. William Calley for the massacre at Mylai. But Americans abhor starvation, and they and very good at organizing to help all starving people—defeated Germans, defeated Japanses, Ethiopians subject to Marxism.

So, in the first few days of occupation, our rage evaporated in the task immediately at hand: to feed the Japanese people we had conquered.

What MacArthur was up against were the essentials that geography forces on anyone who governs Japan. Japan is a nation of four rocky islands—with a combined area that is smaller than California. Seventy-two percent of the land is mountain and rock useless for anything but tourism and scenery. Only 16 percent is tillable. When, a century ago, the Japanese were a nation of 30 million people, they could barely feed themselves and infanticide was a common practice. Their internal history has thus been scorched with savage civil wars. Then, when Japan was opened, the coiled aggressions so long turned against each other turned against their neighbors—China first, then the Russians, then Korea.

But the Japanese add to their poverty of physical resources two extravagantly useful conditions. They have, first, a sharply indented coastline, with natural ports inviting deep water to their shore. England has the same advantage, which once gave that nation, and now gives Japan, access to all the world's resources or ore, oil, foods, timber; by cheap shipping, Japanese can draw raw materials from anywhere and can send competitive manufactures anywhere, too.

To this gift of geography is added a gift of genetics, a striking quality of mind. We often think of the Japanese as less than innovative but, technically, they are superb adapters and producers. We learned that in the war against them: their torpedoes were better and faster than ours . . . until we learned to make ours better. Their initial combat plane—the Zero—was a superlative machine; it could turn, dart, wheel away and mock American flying machines. No matter that Americans had invented the airplane and the flattop; when the war started, Japan had in several ares superior, if derivative, technology. What licked them was American bravery, the mobilization of then-superior American science and industry, and their own blundering politics that led them to challenge us.

Whether Americans made an equal blunder in entering Asia in 1945 is something historians will debate for decades to come. But if we did blunder in that fall season of 1945, the blunder stemmed from mercy and generosity. Both mercy and generosity proposed a peace the like of which had never been granted before to any conquered nation—except, perhaps, the Germany defeated only months before.

Our first challenge in those early weeks was, of course, the simple mechanics of occupation. But then we faced the problem of how to govern the now-abject nation—above all, how to feed it. Japan's hospitals were full of the diseases of malnutrition. MacArthur ordered at once that our occupying forces distribute their rations to Japanese civilians from Army kitchens. He then ordered that all the 3½ million tons of food stockpiled for our own armies for the projected landings of October and November be rushed in. Yet still there was not enough.

He himself described it best in a cable to the War Department in the spring of 1946—a spring of imminent starvation. We must either feed the Japanese or starve them, he wrote, and then we must face the consequences. "Starvation breeds mass unrest, disorder, violence. Give me bread or give me bullets," he finished in a grandiloquent MacArthurian flourish.

The next paragraph of MacArthur's reminiscences is a single sentence: "I got bread."

MacArthur had, almost immediately after moving his headquarters from Yokohama to Tokyo, set about creating a new Japan. Of the Emperor, he demanded that a new prime minister be immediately named. By October, the Emperor had replaced his uncle, the nominal prime minister at the time of surrender, with Baron Shidehara, to whom, on his first visit, MacArthur explained America's wishes for the new Japan.

MacArthur's directives were cut from the cloth of American good will. Japan (so ran his first directive) must completely emancipate Japanese women; must let workers organize in unions; ban abuse of child labor; abolish secret police. Further, Japan must reorganize its education system and "democratize" its industrial system. He left it to Shidehara to work out the details.

It was this broad grant of latitude that was most important. The Japanese could pick and choose their way through MacArthur's directives. The way they chose to implement them allowed their industry, their universities, their ingenuity to flourish. And the rebirth of Japan since its defeat is a parable of history. If one speeds up the interaction of ideas and drive, it becomes a drama.

It is impossible to blame the Japanese for accepting American mercy and the American invitation to thrive. Neither Congress nor the United States War Department wanted to feed Japan indefinitely or pay for its recovery. It was up to the Japanese to work their own way back, to remove themselves from the backs of the American taxpayer.

A young lieutenant with the 27th Infantry Division was among the first to land in that week after the surrender; his company had fought in the battle of Okinawa; it had entered with 180 men and come out with only 20. That young combat lieutenant, Malcolm Baldrige, is now Secretary of Commerce, and he recalls the desolation in Japan. "We sent them," he recalls now, "blood-fractionating technology on humanitarian grounds. Today the company we gave the technology to competes with Americans around the world. We sent them technicians from the Underwriters Laboratory to certify that Japanese products were up to American standards, fit for export. Today U.S. companies fight to get their exports certified for entry into Japan." Baldrige is both wise and somber. The Japanese, as Government policy, are undermining one American industry after another. But Baldrige, as a senior Administration official, must restrain his forebodings in public.

To understand his bitterness one must again go back to the story of governing ideas. Early in 1947, as Japan was thawing from defeat, we sponsored something called GATT—the General Agreement on Tariffs and Trade, with headquarters in Geneva. GATT embodied an idea almost two centuries old, the idea of Adam Smith. Smith believed that history moves in stages, and, because he lived at the dawn of the Industrial Revolution, he denounced the outworn ideas of mercantilism—the world stage was now set for "free trade." An "invisible hand," Smith held, should and would shape the flow of goods from one nation to another, wherever "comparative advantage" in production would draw wares from one country to another.

By the mid-1940s, American thinking had made a holy cause of "free trade." Our conventional analysis of the Second World War held that both Hitler and the Japanese had violated the theology of "free trade," staking out spheres of economic dominance with bayonets, thus bringing war. Now, however, in 1947, GATT would enforce free trade in all the non-Marxist world, eliminating tariffs and barriers, and allowing goods to flow freely from country to country. We were at our peak in the history of commerce. Thus—onward and upward to the sunlit plateau of world prosperity and peace.

For the Japanese it must have seemed too good to be true, and it took them several years to learn that the Americans had rewarded them with a world market far larger than the Great East Asia Co-Prosperity Sphere. The Americans had given them an invitation to the world trading game in total ignorance of what Japanese genius and tactics might accomplish. As late as 1954, a haze of victory still clouded American thinking. Said John Foster Dulles, Secretary of State, at a National Security Council meeting in August of that year, I "told Premier Yoshida frankly that Japan should not expect to find a big American market because the Japanese don't make the things we want. Japan must find markets elsewhere for the goods they export." It would be at least 30 years before history proved Dulles wrong, before our trade deficit with Japan grew to the thunderhead of an estimated $45 billion for 1985.

There were, of course, several things wrong with the ideas that begot GATT. First was the belief that all the world would behave by the rules codified by GATT. We could not entertain the idea that some nations would race, like broken-field runners, through the new rules of tariffs and trade; that GATT would be riddled and pockholed by subsidies, regulations, quotas and barriers that made mockery of the idea of free trade.

But the more important thing that went wrong with GATT was almost too simple to consider. If all people of the world were entitled to equally free trade, then the cheapest producers would be those who paid their people least, yet mastered world class technology. In other words, nations whose workers were grateful for starvation wages could conquer the markets of countries like America, whose workers demanded the world's highest wages. The only way thus to compete was by efficiencies of production, in which the Japanese steadily strove to match the Americans, or by wage standards with which American workers could not compete, or both. Asian standards of living would have to go up or our standards would go down until an equilibrium would be reached.

In the 40 years since defeat, Japan has grown to be a giant. Japan has passed the Soviet Union in industrial production and stands as world class No. 2 to our No. 1. If the present Japanese expansion of production continues, it will be, in 20 years, a greater industrial power than the United States.

When the Japanese looked out from their world of ruins in the months after defeat, disaster drew self-examination as tight as skin about every individual as well as the community. "Japan was smashed," says one American industrialist. "Its industry was shattered or obsolete. Every institution had failed them . . . . There was no leadership, no model for creating a new Japan except that which America forced on it." So MacArthur and his staff became the leadership, America the model.

What Japanese have done since in remodeling the American model is no less than spectacular. They have devised a system of government-industry partnership that is a paradigm for directing a modern industrial state for national purposes—and one designed for action in the new world of global commerce that the United States blueprinted.

The Japanese have a tangled bureaucracy that baffles foreign intruders, but one must recognize at least the two main players in the game to understand the dynamics of the Japanese trade thrust.

The Ministry of Finance comes first. In the words of the American Ambassador to Japan, "it has the ultimate call." Its policies set the exchange rate of the yen, keeping the currency undervalued in order to keep export prices low. It stimulates savings and investment, finances industry by directing the allocation of funds through the banks it controls. The Ministry of Finance provides the launching pad from which MITI directs the guided missiles of the trade offensive.

MITI—the Ministry of International Trade and Industry, the second major player in the game—is a totally new Japanese invention. MITI targets those Japanese industries that are to grow, targets the countries and markets to be penetrated. It can adjust depreciation rates for favored industries; coordinate research into arcane technologies—for example, into the fifth generation of computers. (Its only American rival in such research is the Pentagon, which can afford to match Japan Incorporated's budget).

Sometimes MITI makes mistakes—as in the overbuilding of the Japanese steel and shipbuilding industries, now in surplus capacity because of competition from South Korea. More often it is wise enough to put to sleep industries that can no longer compete. The island of Kyushu once employed 200,000 coal miners; only 7,000 remain there because oil and coal come cheaper from abroad—and so Kyushu has become a thriving center for electronics. MITI defines strategies; Japanese private enterprise follows through with zest. No better marriage of government planning and private enterprise has ever been seen.

The Japanese have caught the essence of Adam Smith—that history moves through its stages as opportunity and technology beckon. Nor is it alone in seeing the perspectives of the world America fostered. Although Jean Monnet designed Europe's Common Market, America was its godfather. Europe also presses to orient its industries to national purpose. West Germany, Europe's foremost industrial power, presses hardest. But the Germans expend much of their energies within the Common Market we sought to build. In American commerce, trade with West Germany is large, yet marginal. In 1971, when America first fell into the trade deficit that forced us off the gold standard, Germans exported $3.7 billion worth of goods to America, Japan $5.9 billion. Last year, the Germans shipped $16.9 billion—but the Japanese shipped $60.4 billion. The Germans, somehow, evoke little American bitterness because we understand their culture, establish American plants there without hinderance. The Japanese provoke American wrath because they are a

locked and closed civilization that reciprocates our hushed fear with veiled contempt.

Few American businessmen abroad would qualify as Knights of the Round Table. American oil companies once, in the prime of their power, could make and unmake governments. But many American businesses have been welcomed overseas, if only because they usually pay higher wages than competitors. Most of all, they have been restrained by American antitrust laws from the kind of nationally coordinated trade offensive captained by MITI against all other countries.

American industry grew up in partnership with European industry. But Japan rouses different fears. Behind Japan ("the Big Dragon," some call it) march the "four little dragons" (Korea, Hong Kong, Taiwan, Singapore) following in its path. And behind loom China and India, desperate as they are to raise their standards of living—at the expense of American standards, if necessary.

The Japanese are far ahead in the race for world trade markets, and they are moving now to yet another stage. Their export surplus gives them huge sums to invest—in the Middle East and America—so that Japanese capital is moving from penetration to control. Japanese are beginning to supply venture capital for the seedbeds of American technology, from Silicon Valley in California to Route 128 in Boston. They hover over the Draper Laboratories in Massachusetts—the national laboratories that devise the guidance system of our missiles—and acquire what patents security lets free to the public. In the Los Angeles area alone, the Japanese have installed or acquired 1,500 firms. Their acquisitions in our banking system have grown significantly; contrarywise, Americans are all but excluded from Japanese capital markets. And, by the doctrine of GATT, all this is entirely legal.

Yet what is legal may also be unfair. While Japan's tariff rates are, in broad economic terms, roughly equal to those of other industrial nations, they are spiked with special tariffs in industries that are considered vulnerable to foreign competition. In addition, Japanese markets are protected by a maze of so-called nontariff barriers to trade—many of which fall outside the reach of GATT regulations. We cannot sell our exports freely in Japan, whether beef, tobacco, citrus fruits, or leather goods. Consumer markets, too, are closed by regulations that the Japanese attribute to "cultural differences."

What Japan does import from us are, chiefly, those raw materials always taken by master nations from colonial nations—grain, cotton, ores, fuel. We still ship to Japan a few remaining high-technology items, like aircraft, and some telecommunications and high-powered computers in which we hold a narrowing lead. But the Japanese continue to squeeze that lead, because their infant-industry-protection laws are planned to give them time to catch up. They will not buy American satellites until they learn to make their own. Corning Glass Works has had a fiber-optics patent pending in Japan for 12 years; in this time, the Japanese have learned to make fiber optics of their own that they now sell to America. Crude oil may be sold to Japan; but the Japanese will not buy our refined oil. American products certified here must go through slow, tedious re-testing in Japan before entering the Japanese market, while Japanese technology catches up.

American markets for Japanese goods are not only open but come with an invitation. The United States Census makes its marketing information open to all; for a fee anyone can buy its tapes that define, area by area, county by county, income group by income group, where Toyota, Sony, Hitachi, Honda can best space their distrubutorships; and American advertising agencies will, for a fee, translate consumer appetite into market conquest. No nation that thinks of itself as an assembly of consumers can resist Japanese penetration. But a nation that thinks of itself as a community has reason for alarm.

Today not a single consumer radio is made in America, although Americans invented the modern radio; not a single black-and-white television set is made here, although America invented television. The few companies that assemble color television sets in the United States could not exist without imported parts made in Asia, although color television was originally developed in America. Almost all our video-cassette recorders are made in Japan; so are most hand-held calculators, watches, a huge share of our office machinery, and most high-fidelity audio equipment. Only one American motorcycle manufacturer remains (Harley-Davidson); the Japanese hold 95 percent of our market. Only one American piano manufacturer remains (Steinway). The Brooklyn Navy Yard, where the conquering U.S.S. Missouri was launched in 1943, no longer exists.

The American automobile and steel industries were the first to be hit by Japan's trade offensive—they were vulnerable. Emerging from the war fat, stuffy and complacent, content largely with obsolescent equipment and practices, shortsighted American management let its technologies fall well behind those developing elsewhere. In 1966, the Japanese shipped only 63,000 automobiles to America; by 1970, MITI had stimulated the shipment of 415,000. Americans found Japanese cars to be good cars; they consumed little gasoline, they were cheaper; their fit-and-finish were splendid, and with the rise in gasoline prices, the American appetite for Japanese automobiles soared. But when the Reagan Administration this spring released Japan from negotiated voluntary quotas on car exports to the United States, Japan announced that it would raise its shipments to 2.3 million autos to America, as if we were a controlled colonial market. It was too much. By a vote of 92 to 0, the Senate declared Japanese trade practice unfair. But it was a belated revolt; this summer, American consumers are gobbling up Japanese automobiles faster than the Japanese can gear up to ship them.

This year, apparently, MITI's chief target is the American electronic industry. Last year, the trade deficit with Japan in electronics surpassed our trade deficit in automobiles—reaching $15.4 billion of our total adverse balance with Japan of $37 billion. The American semiconductor industry is reeling from assault. The Japanese, without mercy, propose to wipe out our supremacy in this industry, based on our own research and invention, Hitachi, now an electronics exporter, was blasted to bits by our bombers in the last two weeks of the war as one of the leading Japanese armsmakers. But Hitachi is now on the conterattack, its tone martial again. Here, for example, is Hitachi's directive this year to its offices in Denver, where it is trying to take away the semiconductor market from America's Intel Corporation and Advance Micro Devices. It reads: "win with the 10 percent rule! Find AMD and Intel sockets. Quote 10 percent below their prices! If they requote, go 10 percent again. Don't quit till you win!"

A Benign prosperity temporarily soothes the American economy in the six years since 1979. America has added 6,000,000 jobs to its total work force. But these are mostly service jobs. In the skill-and-brawn base of American production, not only have real wages fallen, but the job base is shriveling. In machinery production, in these six years, the United States has lost 228,000 jobs; in primary metal-making (such as steel) we have lost 439,000 jobs; in fabricated metals, 241,000 jobs; in motor-vehicle production, 118,000 jobs; in textiles, 186,000 jobs. All in all, on the line, in the old shops, where Americans make things, we have lost 1,834,000 jobs.

No industry in America has been harder hit by Asian competition than the American garment industry, which has lost 155,000 jobs in the last six years alone. One should listen to Sol Chaikin, an air corps veteran of the China war theater against Japan.

Chaikin is now the president of the International Ladies Garment Workers Union. Once, in the early 1980s, his union counted 230,000 workers in New York City alone. Today he counts only 100,000 and they work at the lowest paid union jobs in the city.

"Ours," says Chaikin, "is the most competitive industry in America. It's a cheap industry to get into and we have 15,000 ladies-garment manufacturers in the U.S.A. They all have the most modern machinery, but the Asians have the same machinery and they work for less and for longer hours. The Japanese once were our chief competitors, but Japanese wage rates have now risen to levels comparable to ours. The Japanese now buy American designs, open factories with new machinery in Singapore and Hong Kong, ship the fabrics from Japan, and export from offshore. In Korea and Taiwan, they pay 57 cents an hour; in Hong Kong, $1.08 an hour; and in Sri Lanka they pay $5.00 a week. In New York, our workers get only $175.00 a week take-home pay—and they pay almost $1 for a subway fare each way."

Chaikin knows that his workers in New York cannot compete with Asian standards of living. "It's as if we were being poured into a Mix-master with China, India, Japan, Taiwan; they've homogenized the international labor market and are squeezing us out like toothpaste." Chaikin insists that some garment jobs, at least, must be preserved for American working people, that the American market should be shared with Americans. But there is no high-technology ladder to leap over cheap Asian wages when it comes to handwork. Of blue-collar jobs in America, one in seven is held by a textile-garment-apparel worker. The National Academy of Engineering estimated in 1963 that, of 2,000,000 jobs in the garment-textile industry, only 750,000 would be left in 10 years. Chaikin's back is up against the wall.

Less than a mile from Chaikin's union headquarters is the elegant executive suite of the Radio Corporation of America. Chairman of the Board Thornton F. Bradshaw is another combat veteran, whose destroyer was put out of action by the Japanese Navy in the last months of the war. Bradshaw, if anyone, is an authentic statesman of American industry. He is unworried about RCA, which is happy and prosperous. His view is entirely different from Chaikin's, for his company has adjusted to the world market. But RCA long ago gave up on penetrating Japan. Its creator, Gen. David Sarnoff,

thought the American market was enough, and licensed to Japan and the rest of the world the technologies RCA has patented—technologies that underlie much of modern eletronics production. RCA prospers from its lead in advanced electronics—from its satellites, from its arms contracts (like the Aegis guided missile cruiser) from its broadcast net, NBC, from its marketing of imported parts and products, from manufacturing television sets. But, despite RCA's prosperity, Bradshaw is deeply worried—about America as an industrial community where both work ethnic and practice have decayed.

Bradshaw is concerned for America's economy as a whole, Chalkin for his working people—both equally honorable concerns. But neither believes that any reasonable persuasion can slow the Asian trade surge unless the American Government acts—sooner rather than later. What is needed is a structural change in American life and thinking, as sweeping as Japan's in 1945-1950—from factory floor to research labs and universities, from reduction of the Federal budget deficit, to a total review of our trading policies.

So the story moves to Washington.

Washington is always in crisis—small crises, acute crises, lurking crises. But the trade crisis is quite extraordinary for the anarchy of ideas that prevails. Ideas clash in perception of a world that has totally changed since the days of victory. Trade, as we designed it, has become completely global, and America has become the last open gaming table for world adventurers. Within the confusion of Washington's thinking, however, at least three truths are taken as paramount.

The first truth, the starting point of all thoughtful conversations, is the overwhelming burden of the overvalued dollar.

"When I was dealing with Japan the problem was different," says Robert S. Strauss, Jimmy Carter's trade representative from 1977 to 1979. "I talked in a universe of tariffs . . . of trade . . . nontrade . . . cultural barriers . . . political difficulties." Strauss, a very suave, but very tough man, is remembered as one of the few American trade representatives who have been able to out-negotiate the Japanese. For a brief period, his tenacity caused the impermeable membrane of Japanese resistance to yield. "Now," he says, "you're talking about a world where trade has reached $2 trillion a year, but capital flows have reached a magnitude of $20 trillion a year, swirling around the world like a jet stream. It drops off here because of safety and high interest rates, and pushes the dollar up. It makes the trade problem look like a pygmy problem. It distorts everything, and leaves the poor American exporter, no matter how good or efficient, like a runner doing a sprint with an anvil under his arm.

"The Japanese don't adjust the yen every day. But you don't have to be a genius to know that when the Bank of Japan coughs, everyone gets the sniffles. But we have no policy. Even if we started now, we couldn't work things out in a year, or five. We need a strategy."

There comes next the second truth: Japan's "unfair" trading practices, its regulations, rules, restrictions, quotas. Says Secretary of Commerce Baldrige: "Japanese export policy has as its objective not participation in, but dominance of, world markets. Japanese trade policies assume as a *right* protection of their industries that are emerging, like satellites, depressed industries like paper and chemicals, politically important industries like argiculture, socially sensitive industries like leather. . . .

"In 1983, we took 30 percent of Japan's overseas exports, in 1984, 35 percent. In practical terms, this means that all the net increase in Japanese domestic employment in recent years is attributable to sale to the United States. . . . America's pursuit of free trade is like Sir Galahad's quest for the Holy Grail."

From the National Association of Manufacturers to the AFL-CIO, one catches the alarm in vivid language. "There are six to eight main interacting trade-and-production groups, of 'keiretsu,'" says one association official, who asked not to be identified. "They buy and sell chiefly to their own subsidiaries, and they divide Japan's market up. When we squeeze, they'll allot, say, 11 percent of a particular market to all importers. They are opaque, insensitive people, who don't know that they have brought us to the edge."

Says Lane Kirkland, president of the AFL-CIO, the man most concerned for the fate of American workingmen, who last visited Japan this winter, "To hear the Japanese plead for free trade is like hearing the word 'love' on the lips of a harlot."

The last body of truths comes from the engineering community—it is the most serious, most somber, most challenging. It is that the Japanese are very, very good, better at some things than Americans. They are brilliant, efficient, aggressive people who prize education as much or more than Americans—and have learned to use it. John Gibbons is the head of Congress' Office of Technology Assessment—he is a physicist, who comes to Congress from the Oak Ridge Labs of the Atomic Energy Commission. He starts the story of Japan's renaissance with the occupation:

"The most important thing we did after the war was to reorganize it; we democratized it; we lifted the burden of arms from it, and they poured resources into education. We helped them. We gave free doctorates in nuclear science to their students and brought them to Oak Ridge. But you have to realize that the Japanese already had traditional skills and techniques; they were superb in alloying metals, in ceramics, in fermentation—out of the broths they knew how to brew came the fermentation know-how vital to biotechnologies.

"They are ahead of us in productivity in automobiles, in steel, in robotics. We are ahead in fundamental research, but they get all our science papers and research, and they add to that their mastery of 'process technology,' translating fundamental research into the making of things. They recruit their managers from the factory floor; we get ours out of law schools."

In Gibbons's view, the challenge lies, above all, to American technology and education. Unless we can translate our lead in fundamental research into practice, then others will be the chief beneficiaries of our science and laboratories.

In a few days in Washington, one can trace a trail of irritations blistering under the bland rhetoric that still binds the Pacific alliance together.

Start at the State Department with middle-level officers who deal daily with the Japanese—and one hears language almost unheard eleswhere in that labyrinth of quiet diplomats. "Japan," said one, who asked not to be identified, "is a protectionist nation: That have no sense of moderation; that are aggressive. They are an island nation looking out on the rest of the world as plunder from a protected bastion. Negotiations are tedious, painful—oh, so painful—and, when they yield, they yield with no grace. It's not only quotas on beef, citrus fruits, leather, but even on our catsup and peanut butter.

"In 1981, they banned American metal baseball bats. We had the technology for making a safe cap for metal bats. The Japanese made a metal bat with a plastic plug top; a plug flew off at a baseball game and struck a spectator. So all metal bats, safe and dangerous, were banned. We negotiated for three years, we had to get them to change 18 laws and regulations; we had to get the consent of the Japanese Softball Association. Then, when the Japanese learned to make safe metal caps, they reopened the market. Last year, we finally managed to export 350 metal bats to Japan!"

This is the voice of a working displomat in the State Department. The bureaucracy bows to political leadership. But it remains the national political scouting force abroad, and cannot held but observe politics at home. Its officers do not blink at the reality that Americans want to buy cheap quality goods; no one forces them to buy Japanese goods. Nor can they blink at the fact that no fewer than 30 states now have their own offices in Japan soliciting Japanese investment. But they cannnot blink either at the fact that so much of American industry is being wiped out, and that the men and women discarded scream to Congress.

At the supreme level, President Reagan deals with Premier Yasuhiro Nakasone of Japan, who yields and, with exquisite courtesy, goes on television to urge his people to sample American and foreign imports. But at the working level, each negotiation is a tormented, ad hoc, item-by-item bargaining.

A shawl of self-restraint drapes over most official American spokesmen; to be accused of "Japan-bashing" is considered "protectionist" or, worse, "racist." Foremost among those who thus speak for the old free-trade tradition, one finds Secretary of State George P. Shultz.

"There is great sentiment for protection around the country," he told a gathering of the American Stock Exchange recently, "but in my opinion it's wrong . . . it's bad . . . this is a matter of deep conviction on my part." But no such restraint binds Congress, or the unions who influence so many constituencies. Congress is entertaining half-a-dozen bills right now sponsored by afflicted Congressmen; it is even considering a 25 percent tariff on all imported goods.

Congress is where one can best see the deadlock of ideas, as shoe workers, garment workers, steel workers, auto workers demand protection. But Senator Christopher Dodd of Connecticut is typical of a Congressman in the middle; he is a young, liberal, thoughtful Democrat, and knows that foreign trade is essential to America. He comes from that state in the Union that is most dependent on foreign trade—25 percent of Connecticut's gross state product goes into exports. But Dodd also sits on the Senate Foreign Relations Committee, which he describes as torn between "bumper-sticker patriots," and those who believe that world peace rests on world trade.

Dodd is worried not about his state, but about the lack of an American strategy for dealing with the nature of the new trading world. He says: "We can't make a strategy by assembling a majority in the House to protect shoes, or automobiles, or tool-and-die makers. We need an overall trade policy

and we need it now before the whole thing explodes."

And so Dodd comes down, as do Baldrige, Strauss, and the National Association of Manufacturers, to the conclusion that there must soon be a great international gathering that will create an orderly new system of trade to replace the present anarchy where the wolves pick off the laggards.

What such an International gathering will do, or can do, is still obscure. The Marshall Plan is remembered as an example of what may be won . . . but the Marshall Plan took five years to evolve, in interminable conferences from 1944 to 1949. Now the market that must be shared is not simply the Atlantic basin; it is the whole globe. Korea makes steel and ships, Taiwan makes electronics, Brazil makes steel, arms, shoes, India and China creep up on every technological front. All seek to follow Japan's course, at whatever cost to American jobs. Conscience prevents Americans from spurning the poor and suffering of the world who seek to better themselves; but common sense forbids a course that permits their betterment by our impoverishment. Somehow a new way must be found to fairly share both world resources and markets. It will take a long time to work that way out, for America must restructure to live in this world as the Japanese have done. And time is short.

So one tries finally to penetrate the thinking of Executive policy—where an ailing President, plagued with budget deficits, tax reform, the Middle East and terrorism is too busy to reflect on trade policy, decide on his will, or impose it.

It is left for others to speak for him, and when they speak, they speak of peace:

"Who won the war?," an official State Department spokesman repeated my question and answered: "We won the war. What did we get from the victory? We expanded the area of freedom. We made a democratic Japan. Our bases in the Pacific and Japan are essential to our defense. There's peace in the Pacific now, Japan is our ally, it's stable. Peace is our reward."

Peace, of course, is primordial. But the Japanese share the same peace, and under our protection, paying little for it, reserve the right to press American livelihoods to the wall. How far or how deeply then can press their trade strategy before Congress explodes in anger is unknown. But it would be well for the Japanese to remember that if peace is paramount, they need us to keep the peace more than we need them And if a ripple of depression forces Congress to act, a lockup of the open American market would wound Japan more than it would wound us. The superlative execution of their trade tactics may provoke an incalculable reaction—as the Japanese might well remember of the course that ran from Pearl Harbor to the deck of the U.S.S. Missouri in Tokyo Bay just 40 years ago.●

TRADE

● Mr. LUGAR. Mr. President, on September 23, President Reagan made perhaps the most important statement on trade policy of his administration. He said that "When there is equal opportunity to compete, American business is as innovative, efficient, and competitive as any in the world." He also said that he knows "The American worker is as good and productive as any in the world."

I, and every Member of the Senate, also know that to be true.

Mr. President, we all must further agree with President Reagan's warning: "To make the international trading system work, all must abide by the rules—all must work to guarantee open markets." Unfortunately, not everyone is living up to this standard. The Trade and Tariff Act of 1984 directs the President to conduct a survey of barriers to U.S. trade, which should be completed in the fall of 1985. However, a number of significant barriers to trade have already been identified:

In most Latin American countries, imports are controlled by licensing schemes, which are continually being modified, causing great uncertainty.

India also has an import licensing scheme; market forces do not determine imports.

In Europe, government postal and telecommunications entities procure only from domestic suppliers, thus cutting off the U.S. telecommunications industry from an important export market. By contrast, the U.S. market for telecommunications has been open since the breakup of AT&T.

Taiwan maintains high tariffs and assigns arbitrary values for imports called "custom uplifts." The tobacco monopoly discriminates against U.S. tobacco exports.

While Taiwan has made some progress in the counterfeiting area, more serious enforcement is required.

The EC's common agricultural plan of variable levies and subsidies restricts U.S. participation in the European market and causes disruption in our traditional Third World markets.

In Europe, local and regional standards operate as nontariff barriers, particularly in the West German electronic market.

Canada maintains high tariffs in a wide variety of products, particularly machinery. Restrictions on foreign investment remain through operation of the Foreign Investment Review Agency.

In South Korea, foreigners cannot own real estate or enter retail or wholesale trade. Intellectual property rights of foreigners are not respected, and tobacco products cannot be imported.

Most importation in the Middle East is controlled by foreign trade boards and does not respond to market forces.

Mexico and Brazil maintain performance requirements that limit trade.

Japanese barriers to the import of manufactured goods deserve a list of their own.

Mr. President, the burden these barriers place on the U.S. economy is staggering and a major factor in our record trade deficit. For this reason, I have invited U.S. Trade Representative Clayton Yuetter to appear before the Senate Foreign Relations Committee on October 16 to discuss these barriers and what plans the administration has to do something about them. Ambassador Yuetter will look at these barriers in a broad sense and give us an idea of the scope of the problem.

To try to understand the effects of these barriers on individual industries, I have also invited officials of the Aluminum Corp. of America and Reynolds Metals to give the committee a case study of one such barrier. The aluminum executives will address the Japanese aluminum tariff, Japanese Government subsidies to the Japanese domestic industry and the allegedly GATT illegal rebate scheme for Japanese-owned overseas companies.

Mr. President, given the critical nature of this issue for the American economy and our relations with foreign governments, it is my intention to report to the Senate the results of our inquiry. I believe it will well illustrate President Reagan's trade policy statement.●

WORLD'S YOUNGEST POLITICAL PRISONER

● Mr. ARMSTRONG. Mr. President, today a little girl is in Estonia, her parents are in Sweden, and there is a strong possibility that they may never see each other again.

Kaisa Randpere, at just over 2 years old, is often referred to as the world's youngest political prisoner. When her parents were able to escape from the Soviets a year ago, they had to leave Kaisa behind hoping that once they were free, Kaisa would be able to join them.

Unfortunately, those same Soviets who signed the Helsinki accords and the Universal Declaration of Human Rights have refused Kaisa permission to join her parents. Just a few weeks ago, Waldo Randpere, Kaisa's father was thrown out of the Soviet consulate in Sweden, followed by the words, "You will never see her again!"

Many here in the United States are not willing to allow Kaisa to become one of the nameless, faceless individuals who suffer under Soviet tyranny. Just recently, 19 of our colleagues here in the Senate joined me in a letter to Secretary Gorbachev, requesting his intervention on Kaisa's behalf. I understand that this week, that letter will be broadcast in Estonia by the Voice of America to show that we in America care about the welfare of those who are not allowed to speak for themselves.

Nor are we alone in our concern for Kaisa. Recently more that 70 Members of the House led by Representative MIKE LOWRY also wrote to Mr. Gorbachev, and Kaisa has become a central concern of many of the Baltic groups here in the United States. In

addition, Sweden, Great Britain, and Brazil are also organizing efforts on Kaisa's behalf.

Yet even with all of this support, there are grave doubts as to Kaisa's future. Therefore, I urge my colleagues, and those who may be listening, to request that President Reagan bring up the case of the Randperes during the upcoming summit meeting. If the Soviets cannot uphold their commitments under international agreements such as the Universal Declaration of Human Rights and the Helsinki accords, we have a right to be concerned about agreements they may wish to discuss in Geneva.●

SHOW-ME SERIES

● Mr. DANFORTH. Mr. President, last Saturday was a day of great joy to all Missourians, and it was a day that deserves the careful notice of all Senators. On that day both the St. Louis Cardinals and the Kansas City Royals ended long and exciting pennant races with victories to clinch their respective division championships.

Missouri could not be more proud of its two major league baseball teams. I am pleased today to congratulate managers Whitey Herzog and Dick Howser and their splendid teams. While we in Congress must be concerned with debt extensions, trade policy, and the like, beginning tomorrow the rest of the Nation will be more concerned with pitching duels, stolen bases, and home runs as the league championship playoffs begin.

Both the Royals and the Cardinals have benefited from spectacular performances by a variety of heroes, expected and unexpected. George Brett's incredible hitting and Dan Quisenberry's relief work for the Royals have begun to seem almost routine, while Bret Saberhagen's stellar starting pitching brought the team 20 wins. The Royals brought home their sixth division championship in the last 10 years, a standard of excellence and consistency no team in the league can match.

For the Cardinals, this season has been particularly rewarding. Picked by most preseason pundits to finish no higher than 4th or 5th place, the Cardinals combined the league-leading hitting of Willie McGee, the wizardry of Ozzie Smith, the speed of Vince Coleman, and the pitching of 21-game winner John Tudor to produce a 101-victory season that left no doubt who deserved the title.

The Dodgers and the Blue Jays will be formidable opposition in the division playoffs. I am confident, however, that St. Louis and Kansas City will come through victorious, and I look forward to savoring an all-Missouri World Series—one that surely will be dubbed the "Show-Me Series."

For those of my colleagues who are sad to see the baseball regular season come to an end, come on out to Missouri. We will be playing for a couple more weeks.●

REQUIRING ALL TELEPHONES TO BE COMPATIBLE FOR USE WITH HEARING AIDS

● Mr. D'AMATO. Mr. President, I rise today to cosponsor legislation, S. 402, that amends section 710 of the Communication Act of 1934 to require all telephones to be compatible for use with hearing aids. In addition, this legislation introduced by my distinguished colleague requires that common carriers provide specialized equipment for telephone service for use by persons whose hearing, speech, vision, or mobility is impaired.

The strength of this legislation is its encouragement of individual capability and productivity—factors which are key in fostering the development of individuals and this Nation as a whole. The handicapped are individuals who are quite capable of contributing. However, obstacles stand in their way to fully realize their productivity. I believe it is desirable that we encourage and foster this productivity, and that we help these individuals overcome the obstacles which exist.

Without consistent communications services, normal day-to-day activities are laden with serious obstacles for a handicapped individual. Imagine needing to make a phone call in an emergency situation when the nearby phone is not hearing-aid compatible. A barrier like this creates panic and frustration. There is no need for this type of frustration when a simple logistical measure could alleviate the difficulty.

The convenience of communication, a convenience which is easily taken for granted, is critical to the lives of everyone—including the handicapped. The importance of this convenience cannot be underplayed: It assures handicapped individuals of easy access to communication. Easy access allows easy mobility and conservation, and thus an individual has less anxiety to endure on a daily basis. Without a doubt, if we can free handicapped individuals from the daily difficulties of simple movement and communication, we greatly increase the likelihood of these individuals to be more active and productive.

I urge my colleagues to give this legislation their full support so that we can make access to communication available to all.●

CHRISTOPHER COLUMBUS DAY

● Mr. LAUTENBERG. Mr. President, today I want to commemorate not only the discovery of the Americas by Christopher Columbus, but also express my admiration for a man whose ideals and actions epitomize the American spirit.

Christopher Columbus was an adventurous man, a man who did not let society curb his ambitions or dreams. He was born in Genoa, Italy in 1451, the son of a weaver. From childhood, it was expected that as the oldest son, he would follow in his father's footsteps. Instead, Christopher looked to the sea, to opportunities that lay beyond the horizon. He heard stories of the wealth to be gained and the civilizations to be discovered in foreign lands. Inspired by these tales, Columbus left his home and a predictable career to sail to the Aegean and Ireland.

But traveling where others had traveled before did not satiate Columbus' desire for conquest. He learned about the Orient and dreamed of a westward route to Asia. Where others saw the edge of the Earth, Columbus saw a passageway and a breakthrough for trade. While others were content to continue trade by tedious land routes, Columbus anticipated a risky journey to the West. For such a journey, Columbus needed money, ships, and sailors. To achieve this goal, he persevered to find someone willing to take a risk on his vision.

After 3 years of rejection in England and Portugal, Columbus gained the backing he sought from the King and Queen of Spain. Within the year, he and his crew set off in three ships—the *Nina*, the *Pinta*, and the *Santa Maria*. During their journey, the crew was inspired by Columbus' strong will to reach the Orient. Once during the long 2-month journey, the crew tried to convince Columbus to turn back, but he resisted their entreaties. On October 12 they reached what they thought was the West Indies.

Above all, Christopher Columbus was struck by the beauty of this new land. In his journal he wrote:

> This island exceeds the others in beauty and fertility. Groves of lofty and flourishing trees are abundant, and also large lakes, surrounded and overhung with foliage, in a most enchanting manner.

Here was a man of ambition and insight, a man who appreciated the beauty of nature and the breakthroughs of progress. He knew what he wanted to achieve and was able to convince others to help him.

Since his time, other Americans have broken out of the mold made by society, and like him, their individuality has improved our country. It is fitting that such a bold and ambitious man discovered our great country.

Mr. President, today we honor Christopher Columbus and all the Italian Americans who have followed since his time. America is a land of ambition and opportunity, and as we celebrate Columbus Day let us keep the memory

of this man, who exemplified these traits, alive.

NATIONAL CHILDREN'S WEEK

● Mr. D'AMATO. Mr. President, I rise today to call attention to the fact that October 7 is both Child Health Day and Universal Children's Day, and that October 7, through 12 is National Children's Week. The purpose of these important dedications is to focus our hearts and minds on our most precious resource and our greatest hope for the future: our children. The future of our Nation rests in the hopes and dreams of our young people, but we must take major steps to ensure that these dreams reach fruition.

Children growing up today face many dangers. It is estimated that as many as 3 million children a year are either physically, emotionally, or sexually abused. Additionally, 1.8 million children are reported missing each year and 150,000 may never return home—never. Among teenagers, 5,000 American youths can be expected to take their own lives this year and almost 2 million will make the attempt. Thousands of children come home every day from school to lock themselves in an empty house and await the return of their parent or parents who have to work to make ends meet.

When I take a look at these statistics, I am dumbfounded. We have wiped out polio, controlled whooping cough, made leaps and bounds in the early detection and prevention of birth defects, and yet we have virtually ignored many important aspects of the physical and emotional safety of our children.

Child abuse crosses social, economic, racial, cultural, and occupational boundaries. As many as 80 percent of abused children may, in turn, abuse their children. The nightmare is self-perpetuating. Studies have linked child abuse to juvenile delinquency and adult criminal behavior. This link is costly, as well as tragic. The average cost to retain a juvenile delinquent in a public detention facility averages $16,500 per year, and $14,000 for an adult in a State penal facility. Studies have tied over half of the cases of teenage prostitution to family sexual abuse and subsequent running away.

Once these children run away, things do not get better. Furthermore, many of these children are not actual runaways—they are snatched off playgrounds, out of backyards, and from neighborhood streets. Sometimes they are taken by absolute strangers; sometimes they are taken by a parent. Figures are hard to come by, but it is believed that each year as many as 20,000 to 50,000 are taken by a divorced or separated parent; 20,000 to 50,000 are believed to be taken by complete strangers. About 5,000 are later found murdered and sexually abused.

It is astounding that we have allowed hundreds of thousands of children to slip through society's fingers to abuse and neglect, or even worse. To help combat this national epidemic, I have introduced the National Child Protection Act, S. 142. This legislation would establish child care center guidelines and a national information center on child abusers, so these most vile of criminals will no longer be able to move from State to State to continue preying on the innocent and the helpless.

I also cosponsored the Missing Children's Act to facilitate FBI assistance in pursuing missing children, and I cosponsored S. 2014, the Missing Children's Assistance Act. This legislation authorizes a national clearninghouse and toll-free hotline to centralize these pursuits. I am pleased that both measures have been signed into law. I also supported the Child Pornography Act of 1984 to strike back at those depraved individuals who defile our children.

As we pass tougher laws, we must also bring about better and more available child care supervision. Since the percentage of women in the work force with minor children at home rose from 47 percent in 1975 to 62 percent in 1985, the number of children with working mothers has soared into the millions. However, the availability of affordable child care has not increased as rapidly. Only 400 employers nationwide provide onsite child care, which is one of the most productive and cost-effective means to bring about lower turnover rates, reduce absenteeism, and improve morale. Dr. Deanne Tate of the University of Texas estimates that, for every $1 invested in onsite child care, the employer reaps a $3 to $6 profit.

That is why I introduced S. 1125, the On-Site Day Care Privatization Act. My bill is designed to use tax credits to induce businesses to establish onsite child care facilities to help working mothers and their children. It is my hope that this would allow more women to work and, at the same time, know that their children are safe and nearby.

Realizing that this may not provide immediate results for all those in need of such services, I also introduced S. 756, legislation to increase the dependent-care tax credit. This bill increases the maximum credit from 30 to 40 percent for those making $10,000 or less in annual adjusted gross income—those least able to afford child care.

All of these efforts are designed to upgrade the care we provide our children. When one considers the numbers involved here, it is heartbreaking. When one child is molested, one child beaten, one child placed on the street for prostitution, if one child commits suicide from the abuse he or she could no longer stand, then we have failed as responsible adults and have dashed the hopes and dreams of our future generations.

We must never forget that the innocence of a child is one of the world's few, true miracles, and we must not let it be defiled, no matter what the cost.

Thank you, Mr. President.●

JAMES C. MILLER III, DIRECTOR OF OFFICE OF MANAGEMENT AND BUDGET

● Mr. DURENBERGER. Mr. President, it was with genuine regret that I found myself unable to be present last Friday for the Senate's full executive session in which my colleagues considered the nomination of James C. Miller III, to be Director of Management and Budget.

However, I fully supported his appointment to that position. I am pleased that as a member of the Governmental Affairs Committee, I had the opportunity to vote in committee in favor of Jim Miller's confirmation.

His educational and professional credentials, in my view, superbly qualify Jim Miller for the position of OMB Director. The job calls for a special blend of skills and expertise, since it involves oversight duties in the areas of the budget, legislation, regulation, and Federal personnel. Jurisdiction over any one of these would exact formidable demands from the best of managers.

Jim Miller, I am certain, is equal to the tasks before him, and I am satisfied that the Senate has confirmed a talented and able man for the job. I am enormously pleased at his selection and confirmation.●

MRS. IRENE AUBERLIN

● Mr. RIEGLE. Mr. President, today, October 7, Mrs. Irene Auberlin is 89 years young. I can think of no better occasion on which to recognize her for her 32 years of unselfish service as the president and founder of World Medical Relief.

Mrs. Auberlin began World Medical Relief in 1953 after watching a television program on the plight of Korean war orphans. Moved by this program, Mrs. Auberlin began using her home as a collection center for diapers and medicine which were sent to Korea. As her operation expanded, it moved into a rundown building in Detroit and finally, in 1963, with the help of philanthropist Stanley S. Kresge, to World Medical Relief's current home on Rosa Parks Boulevard.

World Medical Relief is operated by a small, hard-working staff and over 200 volunteers. Mrs. Auberlin has worked tirelessly these past 32 years to establish the organization and to

serve the needy people of the world. In addition to the children of Korea, the people of Central Africa, Central America, China, and Vietnam have received supplies. Today, the bulk of World Medical Relief's shipments are sent to Poland and Central America.

As a result of Mrs. Auberlin's strong faith and drive, World Medical Relief has grown into a multimillion-dollar service organization. Last year alone, over $16 million of medicines and medical equipment were collected. In addition, World Medical Relief supplies about 500 low-income senior citizens in Detroit with free medicine.

Mr. President, Irene Auberlin retired last month but her work will be carried on by Mrs. Clara Kohn, who has been with World Medical Relief for the past 23 years. On behalf of the people of Michigan, I want to commend Mrs. Auberlin for dedicating her life to the people of the world. She has indeed proven that one individual can make a difference.●

CALL TO CONSCIENCE VIGIL

● Mr. HARKIN. Mr. President, once again, I am honored to join my distinguished colleagues in a "Call to Conscience Vigil" on behalf of Soviet Jewry. In particular, I commend my colleague from Minnesota, Senator BOSCHWITZ, for taking initiative in this area during the 99th Congress.

Conditions for Soviet Jews have worsened alarmingly over the last year. Recently, the persecution of Jews has become more systematic and ominously more efficient. Anti-Semitism is not a new phenomenon in Russian history but, in this latest phase of oppression, the very survival of Judaism in the Soviet Union is threatened. The formal distinction once made by the Soviet Government between anti-Semitism and anti-Zionism is now openly disregarded.

Persecution of Jews is no longer restricted to those who seek permission to emigrate, but now includes any individual attempting to practice Judaism. The Soviet Government has undertaken a systematic campaign to disrupt all Jewish religous and cultural activities. Official anti-Semitism has spread to include regular attacks against Jews in newspapers and television. Jews who try to emigrate customarily lose their jobs and are ostracized.

Let me cite the case of one Soviet family, the Terlitskys. Mark Terlitsky had a successful career as an architect with a leading government design firm in Moscow. He worked on a number of large projects, including historic restoration of ancient buildings in the Kremlin. In 1974, because Mark was going to apply for permission to emigrate to Israel, he transferred to another job where he worked on small residential and commercial projects and where he believed his work would be viewed as less sensitive.

Nonetheless, when the Terlitsky family applied to emigrate in 1976, Mark, his wife, Svetlana, their daughter and Mark's elderly mother were refused exit visas on the basis of Mark's alleged "possession of secret information." Mark was demoted to draftsman and, shortly thereafter, lost his job. Svetlana, an economic analyst, also lost her job.

The Terlitsky family has reapplied for visas many times over the last 8 years without success. Neither Mark nor Svetlana have been able to find permanent jobs since they applied to emigrate. On several occasions they have been detained, harassed, and beaten by the KGB.

Tragically, more than 380,000 Jews remain in similar situations, waiting for visas to leave the Soviet Union. We cannot remain indifferent. We must utilize all means available to effect a real change in policy within the Soviet Government toward its Jewish population.

On September 24, all 100 Senators signed a letter to the President urging him to discuss the status of Soviet Jews during the forthcoming summit with Soviet General Secretary Mikhail Gorbachev. We hope the President will use this opportunity to press for essential reforms such as the granting of exit visas to the thousands of Jews who wish to emigrate to join their relatives abroad or be repatriated to their historic homeland.

It is important to impress upon the Soviet leadership the importance to Americans of Soviet actions in this single area. Mr. Gorbachev must understand that human rights abuses will be a factor in ongoing arms talks, and in Senate consideration of any future agreements affecting relations between our two nations.

Human rights must be an issue of vital importance in our relations with the Soviet Union. To those in the Soviet Union and around the world who suffer religious persecution, we have a clear responsibility to work for their freedom.●

COSPONSORSHIP ON S. 1702

● Mr. D'AMATO. Mr. President, I rise today to clarify my cosponsorship and support for S. 1702, the Balanced Budget and Emergency Deficit Control Act of 1985.

I believe S. 1702 is a proper first step toward reducing Government spending. The approach is especially desirable because it exempts Social Security from the mandatory across-the-board cuts that would occur if annual deficit reduction targets are not met.

I do not believe that our senior citizens are responsible for this country's Federal deficit and, therefore, I do not believe that they should be forced to bear the burden of deficit reduction. I will continue to fight, as I have in the past, for the rights of senior citizens.

S. 1702 both protects the senior citizens from cuts in Social Security and reduces the Federal deficit, which, if left unchecked, would have a crippling effect on the economy. I reaffirm my support for S. 1702 and I urge my colleagues to pass this legislation.●

RECESS UNTIL 3:15 P.M.

Mr. DOLE. Mr. President, we are now engaged in a series of meetings. We just had one in my office. The distinguished minority leader will now have a meeting in his office, following which the two of us will meet. I suppose the upshot is that, without knowing for certain, there could be some movement on this issue. There would be more movement in the meetings than there would be in debating the matter on the Senate floor.

On that basis, Mr. President, in the hope that we can satisfy—if not everyone—a majority and move the debt ceiling with appropriate amendments, I ask unanimous consent that the Senate stand in recess until 3:15 p.m.

There being no objection, the Senate, at 2:12 p.m., recessed until 3:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. KASTEN].

The PRESIDING OFFICER. The Senator from Vermont is recognized.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

BALANCED BUDGET AMENDMENTS

Mr. LEAHY. Mr. President, yesterday I voted for cloture on the matter pending before us so that we might get on with it. There was a suggestion made by the distinguished majority leader, who is on the floor, that everybody who voted for cloture automatically was in favor of the Gramm-Rudman-Hollings, et al., package as it was before us.

I just want to note, Mr. President, that my vote was to get on with the Senate's business. I feel that we must take some action now to reduce these enormous deficits. Certainly, if we set aside other Senate business—and there can be no other Senate business as important as this—we could adequately discuss and vote on the various alternatives before us. And that is what I suggested by my vote and by my trip back from Vermont; just as many other Senators traveled back from their States to so vote.

I state this only, Mr. President, so there will be no question about our vote yesterday. I feel that we have the makings of a realistic package. It would be tough medicine, but it is imperative that we do something about these enormous deficits. I think we

should get on with the various proposals. I for one am prepared to do that, and to work with the leadership of both parties in an effort to do precisely that.

Mr. President, the majority leader is on the floor. I do not know if he is going to seek recognition, so I simply will yield the floor.

Mr. DOLE. Mr. President, I understand there is still a meeting going on with the distinguished minority leader and a number of his colleagues. After that meeting, I will be visiting with the distinguished minority leader. In the meantime, the clock is ticking. I have received yet another letter from the Treasury, a copy of which has been given to the assistant leader of the Democratic side, Senator CRANSTON. I will make a judgment whether we want to vote again today and, if so, when, and whether or not there will by any change. If we just have a vote to show that you have no more votes or you have fewer votes for cloture, I am not sure whether that accomplishes anything. If there is a vote, it will be within the next 45 minutes to an hour. But, of course, there could be other votes, too.

I think the American people understand the issue. We can dance around it for a couple weeks or 5 days, but from what I understand, from the reaction I have had from my State and from others—I was in South Carolina this morning—I think the people pretty much understand; they like what we are doing, but they do not understand all the details and they expect us to study it carefully. We have now spent about 25 hours on this issue which is more than we will spend on the whole reconciliation bill, which by law only has 20 hours. That deals with literally hundreds of programs. But we are told that we cannot act on this until everybody has a chance to look at it through a microscope and make certain that every little question has been answered. I commend that. I think it would be a great way to legislate, but I do not know whether we would ever pass anything.

Sooner or later, we have to decide that there will be someone who will want to do it. Some want to make speeches, put out press releases saying they are against the deficit; and when push comes to shove, they will not vote for anything except to cut defense and raise taxes. This has been demonstrated a number of times through the budget resolution vote, the line-item veto, the balanced budget.

So I do not think anybody should be naive enough to believe that we will ever have everybody on board. Obviously, some have good reasons not to vote for any package.

It is my hope that after the distinguished minority leader concludes his meeting, we can have a meeting to see what we can agree upon regarding the schedule.

I have a letter from the Treasury Department which I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. DOLE. The letter reads, in part:

This letter is to inform you of our latest cash projection—and to repeat our request for congressional action today.

As you know, we have already had to fail to meet certain requirements for the full investment of several trust funds costing them approximately $8 million per day. As of this morning, we estimated that cash balances may be zero or negative tomorrow, and will certainly be negative by Wednesday.

When we formally determine that the next day's balance is to be negative, we will need to notify the Federal Reserve. It is my understanding that, upon such notification, the Federal Reserve will then have to notify the banking system not to honor any Government checks or electronic fund transfers. (It is not appropriate or administratively practicable to attempt to distinguish among classes of payment obligations—favoring some at the expense of others.)

Accordingly, all those with Federal payment claims—whether social security recipients or defense contractors or holders of Government securities with interest payments due—would then be unable to have those claims honored.

Of course, they continue to hope that we will act promptly. The letter continues:

If the Congress acts today, we would inform the financial markets by noon tomorrow of our intention to offer Treasury bills for sale on Wednesday.

The problem is that they cannot borrow any money. They cannot sell any Treasury bills. So it is sort of operating day to day on whatever money may flow into the Treasury. So if it is not a negative cash balance today, it is very close to zero, and it will be negative tomorrow or Wednesday.

I think the string is running out, and if we cannot reach some agreement, I think we will have to make a judgment on whether we just continue to try to get cloture, vote every day on cloture, or whether we adopt some other strategy. I am prepared to work that out.

I may not have the consent of my colleagues on this side—it is not just a problem on that side of the aisle. As I indicated yesterday, there may be a problem on this side of the aisle. I am not certain that every Republican is prepared to say, "Whatever the leader wants to do is fine with me." So far, I have not found that it works that way.

So I suggest that we want to be reasonable, but we are not going to back away from trying to couple the debt ceiling extension with a meaningful amendment that would help us reduce the deficit and reach a balanced budget in the near future.

Mr. LEAHY. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. LEAHY. I appreciate that.

Mr. President, as I recall, the House vehicle to raise the debt limit came over here before the August recess, so that it is not just something upon us.

I remind the distingusihed majority leader that I was one who voted for cloture, so I am not looking for delay. But does the distinguished majority leader feel that it would be possible to work out—over a period of 1 or 2 days, whatever—an agreement so that the major alternatives or major amendment, all of which, I believe, have been pretty well identified, could be brought up and voted upon, with a realistic amount of time to debate them, and get on with this?

We really prove nothing by cloture votes, and I think we all agree on that. You do not prove support any kind of package by holding a series of cloture votes. In fact, we are wasting valuable time.

Does the majority leader think there is a possibility of reaching an agreement to bring the various amendments to the floor and vote on them?

Mr. DOLE. That is my hope. I trust that I am reasonable in that respect. I am prepared to reach an agreement of some kind; but if we are going to be cluttered up with 10, 15, or 20 minute requests and everybody gets the opportunity to offer an amendment, I do not have an interest in that.

If there are major amendments, if there are packages, whether it is the Chiles amendment or the Byrd amendment, my view is that I would be prepared, if I could have the consent of my colleagues on this side and some on the other side, to even have those votes come ahead of the bipartisan amendment.

Let us have the Chiles amendment and the Byrd amendment, unless they are identical and then agree to adopt the Gramm-Rudman-Hollings-Boren amendment.

As I have previously indicated if there are distinct amendments, it would be my feeling to have votes on those. Initially, that was the question: Could we not get votes on amendments on that side on which we could not reach an agreement? I think we can work that out. I hope that would be done before we leave here on Thursday night, if we can leave on Thursday night.

It must be noticed that if we cannot reach action on this on Thursday, we will probably be here on Friday.

So the answer is yes, I hope so.

I thank the distinguished Senator for voting for cloture.

I think it indicated the basic strengths at least for the idea, even with imperfections.

You may find imperfections. I may find imperfections. But the cloture vote indicated to me that 58 Members wanted us to do something. It was reported as only 57. That was because I changed my vote, so that I could offer a motion to reconsider, which is required under Senate rules.

My view is that there could be as many as 65 or 70 Members who would vote for some kind of package.

Mr. LEAHY. I thank the majority leader.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. BUMPERS. The majority leader has indicated that there are people on this side of the aisle who are meeting with the minority leader in an effort to work out some differences.

I talked to one of the principle authors of the Gramm-Rudman amendment, and he indicated that there was a meeting on that side, also, to try to verify some of the concerns that have been raised over here, particularly with regard to how you determine when a recession occurs and that sort of thing. Is that meeting also going on?

I was gratified to hear the Senator from Texas, for example, say that they were willing to address those concerns over here; and I think that if those are addressed, the ones he mentioned to me, you might get a vote on the whole package tonight.

Mr. DOLE. I indicated to the distinguished Senator from Arkansas that we had an earlier meeting at 1:15, a bipartisan meeting of Democrats and Republicans, in my office. There are some concerns, as I have been saying from the start in fact. Senator LONG raised one which I do not understand as well as he does.

Let us say that on military construction appropriation it just says 10 percent. Is that going to be across the board, or does that mean that the President can say, "Let's close up this base in Louisiana or Wichita, KS," which caught my attention.

As stated earlier, we may not be able to address all the problems that have been identified at this time. In fact, we may not find them all in the short run. They may have to be addressed in conference. There is no question that there are 34 areas in which there should be some modifications.

We have asked Senator DOMENICI who provided a lot of advice to the authors of the Gramm-Rudman amendment to go back and have his staff look at areas that they think may need some modification, not major modification, but to resolve some of the questions that have been raised by both Senators from Arkansas and other Senators in the Chamber.

So, yes, we are trying to accommodate some of those concerns.

Mr. BUMPERS. I appreciate that.

THE SECRETARY OF THE TREASURY,
Washington, October 7, 1985.

Hon. ROBERT DOLE,
U.S. Senate, Washington, DC.

DEAR MR. MAJORITY LEADER: In letters dated September 25, October 1, and October 3, Secretary Baker informed you of our projection that Treasury's cash balance would be virtually exhausted unless either the Congress acts to increase the debt limit by October 7, or we take unprecedented and questionable action to use Federal Financing Bank authority. This letter is to inform you of our latest cash projection—and to repeat our request for Congressional action today.

As you know, we have already had to fail to meet certain requirements for the full investment of several trust funds—costing them approximately $8 million per day. As of this morning, we estimated that cash balances may be zero or negative tomorrow, and will certainly be negative by Wednesday.

When we formally determine that the next day's balance is to be negative, we will need to notify the Federal Reserve. It is my understanding that, upon such notification, the Federal Reserve will then have to notify the banking system not to honor any Government checks or electronic fund transfers. It is not appropriate or administratively practicable to attempt to distinguish among classes of payment obligations—favoring some at the expense of others. Accordingly, all those with federal payment claims—whether social security recipients or defense contractors or holders of Government securities with interest payments due—would then be unable to have those claims honored.

We continue to hope that the Congress will act promptly to avoid such an unprecedented failure of the U.S. Government to honor its obligations. If the Congress acts today, we would inform the financial markets by noon tomorrow of our intention to offer Treasury bills for sale on Wednesday. In anticipation of this financing, we and the Federal Reserve would then be able to manage payments on Tuesday so as to avoid a default.

In sum, unless a debt limit is passed prompted by the Congress or we take the unprecedented and questionable measure of using Federal Financing Bank borrowing authority, the United States would be in the position of defaulting on its obligations for the first time in history.

Sincerely,

RICHARD G. DARMAN,
Acting Secretary.

Mr. BUMPERS. Mr. President, I just want to say for the record, and it has been said time and again, and I wish to reiterate it, as the majority leader knows there is as much support on this side of the aisle for this concept, in my opinion, as there is on that side.

I personally prefer the Chiles-Byrd amendment and it balances the budget over a 5-year period, also, and I think with a considerable degree of clarity.

But as we all know, the Chiles-Byrd amendment is not going to pass; we are going to wind up voting on the Gramm-Rudman amendment. Some of us want to get it in the best shape possible.

It is like going to the bank. If you have to have a fast answer, the answer is no.

We are dealing with a 31-page proposal here that is immensely complex and borders on being revolutionary.

We favor it, we think it is a good concept, creative and innovative, and I wish I thought of it myself, but it is also very complex and some of the questions have not been well answered.

As I say now that Senator GRAMM is being more conciliatory and saying yes, we want to address this, this and this, I think we have a good chance to get a strong bipartisan support to get this done in a hurry.

Mr. DOLE. I think the Senator is correct. I think there is a tendency that those of us who originate ideas sort of feel they do not need changing, but I think proposals go through fairly thorough review around here, as they properly should. Sometimes changes have to be made and should be made.

That is the attitude of the principal sponsors, including Senators GRAMM, RUDMAN, HOLLINGS, and BOREN, who attended the meeting. They want their package not only to pass but to work.

You can pass anything around here. If it does not work, we have not really achieved very much.

From that standpoint, I think that is the effort being made now. But I would hope we could have it resolved fairly quickly.

Mr. SASSER. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. SASSER. I thank the majority leader.

Mr. President, the majority leader yesterday indicated that those who voted for cloture were indicating that they supported the Gramm-Rudman initiative, and one could argue from that that those who voted against cloture did not support the Gramm-Rudman amendment.

I would say that perhaps the majority leader left an inference there that he did not intend to leave. This is one Senator who at this juncture does not know whether he supports the Gramm-Rudman-Hollings initiative or not, because I simply do not know enough about the details at this juncture to make an informed judgment.

The majority leader indicated a moment ago that the American people expect us to do something, that they do not understand the details, but they do expect us to study it carefully and make a decision.

Let me say that the American people are not alone in not understanding the details of this legislation. I do not understand it, and I dare say that a majority of the Members of this body do not understand the details at the present time.

I am reminded of a friend of mine who was an activist who used to have a

sign on his desk that said: "Do something even if it is wrong."

I fear, Mr. President, that we are moving ourselves too fast down the direction in doing something even though it may be wrong. Let me give an example.

I have asked three sponsors of this Gramm-Rudman-Hollings initiative how does it apply to farm programs, does it apply to farm programs? One said no. One said yes. And the other said he was not sure.

I see the distinguished Senator from North Carolina in the Chamber. He and I share an interest in what happens to tobacco farmers and growers in this country. I have 38,000 tobacco growers in my State of Tennessee. At the present time I have no clear idea how Gramm-Rudman will impact on the program that is their very livelihood.

Today, I received a telephone call from a friend of mine who has great interest in the Middle East, and he asked me how would this initiative impact on foreign aid, which goes principally, as we know, to two countries both in the Middle East: Egypt and the State of Israel.

I was compelled to answer I was not sure but, as I understood the Gramm-Rudman initiative, foreign aid would probably be one of those programs that could very well in the final analysis be zeroed out, but I was not entirely sure about that.

So my point is let us do not follow the admonition of my activist friend who was wrong as many times as he was right with his slogan "Do Something Even If It Is Wrong." Let us proceed carefully here. Let us proceed thoughtfully, and I would say to my distinguished friend, the majority leader, that if that is done, in the final analysis he may find that many of us who voted against cloture voting for this initiative in the final analysis if we fully understand it and if it is shaped properly and in such a way that we think it will be in the best interest of all of the people and all of the interests in the country.

Mr. DOLE. Mr. President, let me indicate again we certainly can all raise questions. I did not say those are not legitimate questions. From a farm State, I want answers also.

We did discuss that some in our bipartisan meeting. I think some of the concerns were addressed, but I am not certain we will be able to answer all the questions before it is implemented. There may continue to be a few things that will have to be addressed. I remember every time we pass a tax bill the day after the tax bill is passed, we start a corrections bill to correct all the mistakes we made, and sometimes those are longer than the tax bill.

So I do not know if we can stay here long enough to make certain that we can address every problem, and again I did not intend to infer that some were against the proposal except I thought the vote sort of indicated that. I mean, some voted for cloture and some did not. Some who did not so for good reasons. They did not like the proposal. That is good enough reason for me. They liked another proposal. That is good enough reason for me. But what it did indicate was that 58 Senators, a bipartisan group, thought we should move ahead on that proposal.

I agree with the Senator from Tennessee that if there are modifications we can make without changing the thrust of the amendment, then they should be made. I think that would pick up additional support on both sides.

Mr. PRYOR. Mr. President, will the majority leader yield?

Mr. DOLE. I am happy to yield to the Senator.

Mr. PRYOR. Mr. President, I walked in the middle of the majority leader's presentation a moment ago.

Was the majority leader putting a letter either from the President or the Treasury Secretary into the RECORD?

Mr. DOLE. Treasury.

Mr. PRYOR. That was from the Department of Treasury, Mr. Baker?

Mr. DOLE. No. Mr. Baker is not in town, the letter was Mr. Darman, the Acting Secretary. Mr. Baker is in Korea in a World Bank IMF meeting being held over there.

Mr. PRYOR. If we run out of money, we may not be able to pay his transportation back. We better be careful.

Mr. DOLE. I think the bipartisan group over there will work it out all right.

Mr. PRYOR. My question to the leader is this: Is that letter dated today?

Mr. DOLE. Yes, October 7, 1985.

Mr. PRYOR. Did it just dawn on the Treasury Department that we are going to be out of money tomorrow?

Mr. DOLE. No.

Mr. PRYOR. Has the Treasury Department not known that this increase in the debt ceiling has been in the custody of this body, unless someone has taken it away from the clerk, and I do not think they have, since late July or early August? Is the Treasury Department aware of that then?

Mr. DOLE. Pardon?

Mr. PRYOR. Has the Treasury Department not been aware that the debt ceiling increase has been here for a long time?

Mr. DOLE. Yes. They are very alert in the Treasury.

Mr. PRYOR. What date was the Senate to begin consideration of the debt ceiling?

Mr. DOLE. I am no longer chairman of the Finance Committee. I no longer keep track of all details. I think it was reported to the Senate floor on September 26. So it has not been hanging around very long.

Mr. PRYOR. It has been hanging around here a long time. I do not know why in the world here on the day before we run out of money and get to zero balance we are officially informed of that fact. It is really too late to do anything.

Mr. DOLE. I might say to the Senator from Arkansas I have asked for the letters. I want a letter every day to tell us how bad it is. Maybe that will prompt some people to vote right.

(Mr. DURENBERGER assumed the chair.)

Mr. HOLLINGS. Will the majority leader yield on that point?

Mr. DOLE. Yes.

Mr. HOLLINGS. Mr. President, I say to the Senator from Arkansas that we had 5 hours on Thursday, 7 hours on Friday, 7 hours on Saturday, and 3 hours again, and in a reconciliation bill, taking all the departments of Government with reauthorization and everything else, calling for tax cuts and what have you, we limit ourselves to 20 hours. We have had 20 hours on this one. So nobody has been rushing.

And we have had a wonderful debate over the weekend. The Senator was there.

Mr. PRYOR. I thought it was a good debate.

Mr. HOLLINGS. Apparently we have a few more hours, but we have had more than we give ourselves under the rules for reconciliation.

Mr. PRYOR. I think the debate has been very instructive. I think it has been informative. But my point is we have waited until the last hours, as always, when we are running out of money and scaring people half to death out in the country. That is my objection.

Mr. DOLE. Let me indicate, we are running out of money. I do not wish to frighten anybody. But I think it is going to be felt very quickly in the country. I assume there will be a lot of phones ringing; probably in our offices.

Mr. MELCHER. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. MELCHER. I thank the Senator for yielding.

On this very point, we have been debating this, but there are no amendments that can be offered. I wonder if I could inquire of the majority leader when we are going to have an opportunity to offer amendments to the Gramm amendment.

Mr. DOLE. After we adopt the second-degree amendment, the Senator can offer some.

Mr. MELCHER. The point is—do not get me wrong—while I think this might be a good step forward, and I am going to vote for it, I am not going to vote for it before we can have a

chance to correct some basic flaws in it. We talk about wanting to do this by the end of today, or the end of tomorrow, or the end of this week, and we still cannot get the amending process to find out why we cannot correct this, which obviously, protects the cuts in weapons systems procurements and takes it out of the basic industries.

Mr. DOLE. Let me just address a parliamentary inquiry, then we will have it straight from the Parliamentarian.

In the event the Gramm-Rudman-Hollings-Boren amendment should be adopted, is the amendment then open to further amendment?

The PRESIDING OFFICER. It would be possible to amend the first-degree amendment, as amended, by adding language at the end, or by striking a portion of the amendment, as amended, encompassing more than the language already agreed to.

Mr. DOLE. Is the answer "yes"?

[Laughter.]

Mr. MELCHER. If the majority leader will yield, the answer is absolutely yes, while it is cumbersome, it can be done.

But there are a lot of us that want to change that 1-year delay, which seems to be political.

Mr. DOLE. I do not believe there is a 1-year delay.

Mr. MELCHER. The 1-year delay before there is any payment of any consequence of this whole process.

Mr. HOLLINGS. It is right near, in November.

Mr. MELCHER. It really does not come about until next October. And while we have two of the distinguished authors of the amendment here, it will not have much impact until next October and, presumably for political reasons, not until after the election.

Mr. DOLE. This is bipartisan. I do not think politics ever figured into this for a moment.

Mr. MELCHER. No, of course not. I would never have thought it. But some might construe it.

The effect is that there is not much that happens under this whole procedure after it is adopted until next October.

Mr. HOLLINGS. We are trying to institute a process or a mechanism without prejudice right now this year.

Mr. MELCHER. This $2 trillion debt ceiling we have was accumulated in 5 years and, as it leaps forward, we might be over to $3 trillion. Some of us have rather strong feelings that this is one of the flaws in this whole scheme; that it delays too long doing what we ought to do by cutting these appropriation bills down some and by getting some tax revenue.

By the way, may I ask the majority leader whether we are going to have a chance to get a few billion dollars extra into the Treasury by offering an amendment to have it voted upon here to see whether we are not going to tax some of these profitable corporations that are paying absolutely no tax right now, to do that immediately so we start getting some revenue?

Mr. DOLE. I just walked in to see what was going on in here.

[Laughter.]

Mr. MELCHER. The majority leader is always ready for debate.

Mr. DOLE. I wanted to offer to the principals a chance to answer and then come back and do something else.

Let me indicate that we have a tax reform bill that is coming. Let us not get taxes mixed up with spending cuts.

Mr. MELCHER. One offsets the other, of course.

Mr. DOLE. But I think that there is a tendency around here for some to think that the only way to make the Government work is to raise taxes. That is not the intent of this legislation. The intent is to try to get a handle on spending, all spending.

But I did want to yield momentarily to the Senator from Texas.

Mr. MELCHER. Will the Senator yield for a question?

Mr. DOLE. Yes. I will then yield to the Senator from Montana, who wanted to ask a question, and then I will yield to Senator GRAMM to explain this in detail.

Mr. MELCHER. I thank the majority leader for yielding. But we would appreciate it if we could get to the amending process so we will not be taking up everybody's time toward the end of the week.

Mr. DOLE. If we vote for this, as the Parliamentarian has indicated, once this is passed, we can amend it. It is just that simple. That is why I would like to pass it this afternoon.

Mr. MELCHER. There may be some other ways, by cutting down on that amendment, that we could debate this. We could ask unanimous consent to get that kind of amendment where we cut down this $2 trillion and not go above the ceiling to where the debt ceiling is lower than $2 trillion. That, obviously, is an amendment that is in order and should be debated. And we could do that while we are waiting on all of this backroom negotiations.

Mr. EVANS. Will the majority leader yield for a question?

Mr. DOLE. We will be glad to do that later on.

Mr. MELCHER. We are ready right now.

Mr. DOLE. Let me yield to the Senator from Washington and then I will yield the floor.

Mr. EVANS. Mr. President, as the majority leader knows, I have been here and listened to a good deal of the debate on Saturday and listened to much of the rest of it from my office and have read what I have not heard in the CONGRESSIONAL RECORD. I thought the debate on Saturday was some of the best I have heard in the relatively short time I have been here.

But it seems to me, in adding up all of the debate on the substance of the amendment itself, compared with all of the debate we have had on how long we are going to take to debate, it is just about 50-50 so far.

It seems to me that the issue itself is too important to go back to a committee and depend on the committee for its action. It is an issue that involves all Members of the Senate. I have not heard anybody, the minority leader included, who did not suggest that 6 hours of debate on each of the three or four major amendments would not be sufficient.

I ask the majority leader whether it would not be worthwhile at this point, considering the limited time we have this week, to end this whole thing by spending our time debating the issue instead of how long we are going to take to get to the issue, and, if necessary, to set aside committee meetings and other activities and assemble here on the floor to engage in what should be and promises to be an important debate and get on with that debate and the votes.

Mr. DOLE. I think that would be an excellent idea, it seems to me. Again, I do not quarrel with that. This is important. This is a change. A big change is going to take place if it is adopted. I do not want to downplay the importance of the amendment.

But I do believe as I indicated the other day, we have the experts on the floor. We have members of the Budget Committee—the distinguished Senator from South Carolina understands this very well, has understood it for a long time, and has been working on it for a long time. The Senator from Texas has had it on his agenda ever since he came to the Congress. We have the distinguished chairman of the Budget Committee who just left the room. We have a number on the Finance Committee who are experts in some of these areas. So the experts are here. We do not need to have witnesses brought in from out of town, and all the special interest groups from here in town, to tell us how bad it is, and that we cannot do it. We will never do it. They are already starting to group. So I think it is a good idea to proceed on the legislation as quickly as possible.

If the distinguished minority leader would be willing to do that, we can ask committees to not meet for a couple of days. Again, I urge my colleagues. It is now 10 minutes of 4. October 7 will end here in about 8 hours. We will be one day closer to zero or a negative balance in the U.S. Treasury.

Mr. ARMSTRONG. Mr. President, will the Senator yield to me for a moment on that question?

Mr. DOLE. I am happy to yield.

Mr. ARMSTRONG. I have listened to a recent concern and a discussion about what happens when doomsday arrives. In glancing at the letter from the Under Secretary, Mr. Darman, I understand that it is his representation that as of some point—evidently tomorrow—there will be an insufficent balance in the accounts of the Government to meet the checks, and, therefore, we would not pay any checks. Is that what the Treasury Department represents to us?

Mr. DOLE. I am not certain they would not pay any. We have asked if they could just pay them as they come in. They have indicated that they could not try to choose among classes of payment. For example, we do not believe they could choose to pay Social Security first, price supports second, and defense contractors third. One would think they would honor all the checks that they are able to honor. But they would not attempt to create a priority list as I understand it.

Mr. ARMSTRONG. With respect to checks that might be written after tomorrow—that is, checks that are not already outstanding—what would be the practice of the Treasury Department? What would be the policy of the Government?

Mr. DOLE. They would have some money coming in all the time. We have asked if they could continue to write some checks. I do not believe, however, that they can write checks in excess of the amount of money coming in.

Mr. ARMSTRONG. I do not want to delay unduly the discussion of this. I want to again emphasize that I do not think we ought to take too gloomy a position on all of this. Obviously, if Congress were to fail to increase the debt limit, it would cause some dislocation. Indeed, it would cause some severe problems. But I do not think they are of the magnitude in nature that they have been portrayed. If not doomsday, it would be a very serious though in my judgment a manageable problem. I would say again I think there is an increasing body of informed thought that thinks that would be a pretty good solution—that if we just drew a line and say we are not ever going to increase the national debt that would not be too bad. It would not be easy. It would be tough. But the thought of just piling up all of this debt mindlessly year after year is not so good either. I think it would be useful. Indeed, I am going to ask the chairman of the Finance Committee at the right time to invite the Treasury to discuss with us some of the technical aspects. I have done a little research on this matter. I am personally persuaded that there are available to the President under his inherent powers ways in which even over a long period of time he could manage the cash-flow of the Government. We would be receiving money every day, and a substantial amount. We are not at a period of the year when we would be without daily revenues. We just would be on a cash basis. But I think we probably ought to have a better understanding of it, not only to handle this particular crisis, but actually over a longer period of time. If legislation is needed to clarify the President's inherent powers, perhaps we should consider that, too. But for the moment, my main thought is just to not let Senators be too concerned that a huge crack will open up in the face of the Earth, and America will slip into it if somehow we fail to raise the national debt limit.

Mr. DOLE. I think we do have an expert here. I just asked Mr. Buckberg. Once the Treasury announces a zero balance, the Fed and banks will not honor any Government checks. Is that correct?

Mr. ARMSTRONG. That would presumably be tomorrow.

Mr. DOLE. That would be tomorrow or Wednesday.

Mr. ARMSTRONG. Whatever day that occurred, I understand at that point checks could not be honored but I also believe that there would be the daily cash-flow coming in. So by the end of business on that certain date, then there would be a positive cash balance if presumably there would be an announcement to that effect, and on the following day checks could be honored. Do I understand that correctly?

Mr. DOLE. I am trying to determine whether it would happen.

Mr. ARMSTRONG. Let me not press the leader right now for an answer to that because there may be a way to work out the details which may not be in a floor colloquy. But I do want to indicate to Senators that it is not an all-or-nothing situation. There are ways in which the incoming cash could be managed, and at least in the opinion of some of us some priorities could be set for the writing of checks. So it would not be a catastrophe. It would be a serious problem but in my view at least a manageable problem.

Mr. DOLE. I will have Mr. Buckberg furnish some examples that I could recite because I guess the question is, if you have $2 billion in reserves and $3 billion in checks, how do you decide which ones to pay? They would have to develop some kind of a mechanism which, as I understand, they do not have now.

Mr. ARMSTRONG. I think the leader is correct. That mechanism has not been developed. It is my belief that the Treasury has deliberately not developed it because in the past on repeated occasions they have resorted to the crisis mentality, and had they prepared a plan for managing the cash in those circumstances it would have undermined their tactic which was to create the crisis. I do not fault them for that. But that has been the game.

We have been through this dozens of times. Every time there is a point where we are going to run out of cash they say the world is going to come to an end but it never does. On some occasions we have gone well beyond the deadlines which have been preordained and which were thought to be cast in concrete or something. We found out there is a way to get it. So I am confident that they will find a way to manage this problem. I do not underestimate the difficulty, the dislocation, or the discomfort. What I am convinced of is were Congress to make the policy decision not to borrow any more that we would find a way to work around it. That is not going to happen, in my opinion. But it might happen for a few days. It might happen for a week or two, and personally I do not think it would be such a bad thing.

Mr. DOLE. They could start selling Government assets. They could sell the Capitol and the Pentagon in a package deal. [Laughter.]

But in any event, there are a lot of things we can do. Let me now yield the floor to the principal sponsor of this amendment to respond to the question of the distinguished Senator from Montana so it will be in the RECORD.

Mr. GRAMM. Let me thank the distinguished majority leader for yielding.

Mr. President, I want to respond even though the distinguished Senator from Montana is not here. Our problem in trying to move into a mandated program of controlling spending is that the budget for this fiscal year was adopted before anybody knew that we were going to be shooting with real bullets. As a result, as we all agreed on that late night debate when we adopted it, the economic assumptions contained are very optimistic, and there are numerous questionable savings in that budget. So our objective in trying to get into a process that is binding and a process that will produce across-the-board reductions in automatic increases with controllable expenditures was to set out a realistic target—in other words, in getting this new suit of clothing on to be sure we had enough flexibility to assure we could fit into the process as we set it into place for 5 years. We, therefore, decided on a bipartisan basis—those who were involved—that we should raise the initial figure from $171.9 billion, and we should set out a 7-percent trigger for an overage that would trigger the across-the-board reduction instead of the 5 percent.

For those who want action, let me assure them, having looked at the numbers, that the $180 billion cap with a 7-percent trigger is going to be very difficult to live within. It will

mean the President will be vetoing every appropriation bill that is a nickle over budget. It will mean that the President will have to look at every new authorization, and every program creating an obligation to the Federal Government to expend money. So those who want to see us do something now, all you have to do is vote for this proposal because you are going to see more vetoes in the next 30 days under this legislation than you have seen in the last 5 years combined. Because to fail to do that the President will guarantee that we will have an overage, and then we will have our first sequester on November 1.

Quite frankly, I think it is advisable that we get into the process to set up a situation where the Congress and the President, by being responsible, by being frugal, with a budget that was adopted before we ever got into the process, can afford sequester the first year.

It is not going to be easy. It is going to take a lot of discipline. But the beauty of the proposal that is before us is that it imposes the discipline by imposing across-the-board reductions and automatic increases in controllables if we do not do our job.

(Mr. COCHRAN assumed the chair.)

Mr. BINGAMAN. Will the Senator yield?

Mr. GRAMM. I am happy to yield.

Mr. BINGAMAN. I have several questions I would like to ask to better understand the proposal which is before us. These are questions which may have been answered earlier. As the Senator knows, I was not here either Saturday or part of Sunday.

As I understand the proposal, as set out on page 11 of the amendment to House Joint Resolution 372, if as of next October 1 it is clear or there is agreement there is a midpoint between the projection of the Congressional Budget Office and the Office of Management and Budget that we are going to be over the target of $144 billion for that fiscal year, then the amount of that overage is to be split between the two sections, the one where we sequester and the one where the President issues an order eliminating half of the excess by modifying and suspending the operation of the automatic spending increases, on page 25. Am I reasonably accurate so far?

Mr. GRAMM. The Senator is totally accurate so far. Let me review the process very quickly. Under this proposal for the next fiscal year, we would be forced to reduce the deficit by $36 billion, and the mandate under this bill would give us the balanced budget in calendar year 1990. The President would be forced to submit to the Congress a budget with a deficit no bigger than $144 billion. We would have zero amendments so the deficit could not get bigger. The deficit would be binding down to the subcommittee level.

At the beginning of the fiscal year on October 1, the Congressional Budget Office Director and the OMB Director report directly to the Congress on their projections of a lot of economic data on the year that starts on that day. Included in that is the projected deficit. If that deficit is significantly above the maximum allowable amount, which is $144 billion, and we define significantly greater as 5 percent or more, then they would be forced to report to the President and the Congress the proportion of automatic increases that would have to be sequestered across the board and the proportion of all controllable expenditures that would have to be sequestered across the board proportionately so as to eliminate the overage. That would go into effect.

At that point the President would submit to the Congress on a highly privileged basis under the procedure of the Budget Act an alternative to save the money in a different way, or the committees of Congress and the Budget Committees could come forward with an alternative. But the sequester would be in order at that point. So the Senator is correct at that point.

Mr. BINGAMAN. Let me pick up there and say with regard to the fiscal year beginning October 1, 1986, would it be reasonable to think that we might come up with an overage of, say, $20 billion next year, and that this provision would then be triggered to bring in the control? Is that reasonable?

Mr. GRAMM. I would say that the odds are that with the process in effect while we are writing the budget, it would be unlikely that that would happen, the reason being that we would have had the presence of a budget with a deficit no greater than $144 billion. We would have had a budget come to the floor of the House and Senate with a deficit no greater. If adopted, that budget would be binding down to the subcommittee level and a point of order would lie against any authorization, appropriations, or entitlement bill to violate it.

So if we adopted a budget, only the following things could produce an overage: No. 1, the economic assumptions in the budget turned out not to be correct; we had savings that were judged to be unrealistic jointly by OMB and CBO, or if the projections then were different. So if we do our job under the procedures established, it would be highly unlikely that a sequester would occur.

In answering the question of the distinguished Senator from New Mexico, let me give a number that Senator CHILES received from the Congressional Budget Office about the possibility, assuming we did not adopt a budget, of what would things look like. This is from the Congressional Budget Office.

Mr. BINGAMAN. This is for the same fiscal year?

Mr. GRAMM. Yes, the fiscal year 1986. No, it is the fiscal year 1987, the one the Senator is talking about.

According to the Congressional Budget Office, under the budget we have adopted, the current services deficit would be $163 billion if Congress did nothing.

Obviously, that can change if economic circumstances changed. Just assume the worst case scenario, no budget adopted.

Mr. BINGAMAN. That would be $19 billion over.

Mr. GRAMM. $19 billion over. According to the CBO, $6 billion would be saved in automatic increases, requiring $14 billion in discretionary sequester. Of that, about $8 billion would be from defense and $5 billion from nondefense. In essence, you would end up with more or less a 50-50 split on defense versus nondefense.

But I emphasize to my colleague a point that has been lost in this debate is that few have focused in on the question that this never happens if we do our job.

Mr. BINGAMAN. Let me put another question and ask the Senator if the Senator would agree that the economic assumptions have to be right in order for this to occur, or at least overly optimistic.

Mr. GRAMM. I am not going to judge the assumptions. These are the figures that the Congressional Budget Office released in response to the inquiry of Senator CHILES based on the budget that was adopted by the Congress this year. Clearly, CBO's estimates depend critically on a series of assumptions. But my point is that we are talking about a manageable problem. When we went to 5 years to deal with it, we made the problem eminently manageable, in my humble opinion.

Mr. BINGAMAN. Let me ask a question with regard to a subject that I know the Senator knows a lot about since we are on the Armed Services Committee. I would be interested in whatever projections he has not as to the total figure—he indicated a CBO figure of $8 billion coming out of defense—as to where, in the defense budget, the cuts that he is contemplating here, or the trigger by this proposal, would come in that budget. Would they come in research and development? Would they come in the area of ammunition and supplies? Would they come in the area of procurement? Would they come in the area of manpower or pay increases? Whatever the Senator can tell me about that I would appreciate.

Mr. GRAMM. Let me give one startling figure first. With sequesters, there would be no cuts. Let me repeat.

Under CBO projections with a sequester order if we do not adopt a budget we will reduce from current services, but the absolute outlay of Government will not be reduced by sequester. The point is that revenues are growing by $70 billion a year. So in terms of defense, we have $18 billion current services outlay increase in the budget. This would mean a sequester of $8 billion of that increase. It certainly would have a substantial impact on new budget authority.

Getting to my colleague's question, within the defense budget the President would be forced on a line-item basis—and the line items in the defense budget are for a wide range of accounts ranging from the National Board for the Promotion of Rifle Practice in the Army to the research personnel for the Marine Corps, numerous accounts—for each of these to be sequestered across the board proportionately.

Clearly, there is a constraint under law, and that is this sequester order cannot invalidate a contract.

A problem that we have throughout the budget of the Federal Government is that where contracts are in place, the sequester order would apply only once that contract has expired. There are fewer, proportionally speaking, contracts in defense than there are in other areas. But in those areas where there are contracts, the sequester order would apply only when that contract expires. Contracts in defense are pretty short term as compared to HUD, for example.

Mr. BINGAMAN. Let me just ask, Mr. President, the Senator is suggesting that the $8 billion would be in outlays in the defense budget. Is that correct?

Mr. GRAMM. They would be.

Mr. BINGAMAN. I have always been advised in the couple of years I have been in the Armed Services Committee that if cuts are required in outlays, you necessarily require those cuts to come out of the defense budget in the areas that are generally referred to as readiness——

Mr. GRAMM. If I could stop my colleague, that is not correct. In our consideration of the budget, we have always made note of the fact that if you want any kind of close relationship between budget authority and outlay, you want to go for the fast spendout programs. But this would not occur under sequester.

The President would be forced to sequester on a line-item basis across the board and clearly, the slower spendout programs would have budget authority sequestered more than the faster spendout programs. But except for existing contracts, there would be nothing in this proposal that would tilt the reductions toward readiness or manpower.

Mr. BINGAMAN. Let me ask—on the general question of the extent of the impact, I have received a letter from Senator CHILES in which he is trying to summarize his understanding of the effects in fiscal year 1987. He says that Gramm-Rudman-Hollings would require a minus 5-percent real growth in fiscal year 1987 and an average negative real growth over the next 5 years in the defense budget.

Mr. GRAMM. If the Senator would suspend, I yield to the majority leader.

Mr. DOLE. Mr. President, let me indicate that if we want to move on proceeding to the motion to reconsider, I want to do it while the minority leader is on the floor, so I shall not make that motion until the minority leader comes to the floor. Whether or not there will be a rollcall vote on that, I am not certain. It there is a rollcall on the motion to proceed, we want to start that vote very quickly.

That could be followed by a vote on the motion to reconsider and I assume somebody could move to table that. Then finally, there would be another vote on cloture.

Mr. METZENBAUM. If the majority leader would yield to me for a moment, I just left a meeting. A number of us were in a meeting with the minority leader. It is my understanding that the minority leader was in that meeting for the purpose of arranging procedure to discuss with the majority leader. Obviously, I am not in a position to do that, but I want to assure the majority leader that the minority leader has not been indifferent to the conditions on the floor and I am certain he will be here very shortly.

Mr. DOLE. I know there has been a meeting. I do not want to interrupt a meeting, but it seems to me if, in fact, we have an emergency, then we ought to determine who believes we have an emergency. The only way to do that around here is to have a vote.

I apologize for interrupting the distinguished Senator from New Mexico and the Senator from Texas. We shall wait another few moments for the distinguished minority leader. I hope the Senator from Texas will proceed.

Mr. GRAMM. Mr. President, let me respond by saying I, too, have read the Chiles letter. It is correct to say that in reducing defense outlays, budget authority has to be reduced by some multiple and that that multiple is bigger on average than for other discretionary programs in the budget. But by the estimate of CBO in the same letter from Senator CHILES, if the Senator will look at it, he will see that the $8 billion reduction in outlays in fiscal year 1987 would still leave an increase in defense outlays.

That is my point, Mr. President. Remember, we are talking here about a worst-case scenario. Since we may proceed with the business at hand, I would like to reclaim my time for a moment, then I shall go back to questions. But now I would like to make a few statements.

First, I want to make it clear that as the author of this amendment and with all of those who have joined me in this effort—now almost 50 of us—we want to proceed with the debt ceiling. We want to raise the debt ceiling and be responsible in paying the Nation's bills. What we do insist on, however, is having an opportunity to vote on a motion that would call in the credit cards.

I am not saying that I would not vote to raise the debt ceiling if the amendment failed, but I do insist on having a vote.

What we have done with this amendment at this critical moment in our history as we are raising the debt ceiling to $2 trillion is that, for the first time in a long time, we have made the No. 1 issue in the country the No. 1 issue in the Senate. I think it is vital that we give the people of America a vote in the House and Senate and I intend to insist upon that.

Let me also say that I have, in the spirit of compromise in the last few hours, met with Members on the minority side to discuss concerns they had about this proposal, to attempt to work out those concerns in language that would be more specific, to work out a compromise measure that would make technical amendments, not to change the procedure or the goal, but simply to give greater guarantees to those who are concerned. Quite frankly, I think we are making progress. I think we are expanding the base of support for this amendment.

I think in the process, we are going to come up with an amendment that is going to get far more than 59 votes, the 59 votes we received yesterday. So, Mr. President, the issue here is not whether we are going to raise the debt ceiling. It is the distinguished minority leader who is holding back a vote on the debt ceiling. The issue here is whether or not we are going to give the people of America an opportunity to see a vote on the No. 1 issue in America.

Mr. ARMSTRONG. Will the Senator yield to me on that point?

Mr. GRAMM. I am happy to yield.

Mr. ARMSTRONG. I was quite surprised during the course of the debate on Friday that the majority leader was being assaulted from every direction for somehow delaying the process of voting on this debt limit bill. I did not speak up at the time because it was obvious that the majority leader was more than capable of defending himself, but I was really quite surprised at the curious twist of events, when those who were filibustering the pending amendment, delaying the action of the Senate, were at the same time accus-

ing the leadership on this side of slowing things down when, in fact, it was our leader who had propounded a cloture motion in an attempt to shut off debate to get a vote on the pending question.

Mr. GRAMM. It is one of those anomalies that occurs only in politics——

Mr. ARMSTRONG. I thought we had gone through the looking glass, or something.

Mr. GRAMM [continuing]. When those who are opposed to proceeding point the finger at those who are trying to proceed.

Mr. FORD. Mr. President, may I get in on this anomaly?

Mr. ARMSTRONG. Suppose we gave an anomaly and nobody came?

Mr. GRAMM. As far as I am concerned, I am eager to vote on the debt ceiling. All I want to do is give 59 Members of the Senate who have already indicated their support for this amendment an opportunity to vote for it. I am not saying if you do not adopt it, you are opposed to the debt ceiling. I may or may not do it.

Mr. FORD. The Senator just qualified it.

Mr. GRAMM. All I am saying is, just give us a vote. All I am saying is, I am in total agreement and I associate myself with the remarks of the Senator from Colorado, that it is unusual—in fact, would be laughable in any other forum on Earth—to have those who are delaying point the finger at those who are trying to proceed. It is we who are voting on a motion for cloture today, not the minority.

Now I would be happy to yield to our distinguished friend from Kentucky.

Mr. FORD. Mr. President, it is laughable. I heard that come from you and from the distinguished Senator from Colorado, that we are ready to vote up and down on the debt ceiling but you will not do that unless you get your amendment. Your amendment does not have to be on the debt ceiling increase. And so if we are holding up the debt ceiling increase, it is because you are trying to put an amendment on that you have already said in the last few hours you have tried to be amenable and agreeable to improve, and so the improvements being made in the amendment just indicate what those of us who are trying to slow the train down just a little bit are saying, so you will have the opportunity to change your amendment.

Mr. GRAMM. Let me reclaim my time to respond by saying that we have had this amendment and the basic idea that it contains out now for over 10 days. I am not saying that you have to attach my amendment to it, though I have every right as a Member of the Senate, as does every other Senator, to offer amendments.

Mr. FORD. You have two amendments.

Mr. GRAMM. All I am saying is that I want the Senate to have an opportunity to do its will. I am certainly willing and eager to proceed, but the fact that we are running out of money today is not because of my amendment; it is because we have not had that amendment in the past. I do not know of any amendment that could be more germane to this debate than an amendment which tries to deal with the very reason we have had a trillion dollar increase in the debt ceiling over a 5-year period.

Mr. FORD. Ever since the Gramm-Latta tax bill.

Mr. GRAMM. I yield to the majority leader.

Mr. FORD. Ever since the Gramm-Latta tax bill have we gone up $500 billion.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, I have had a brief discussion with the distinguished minority leader, and I now understand that he may be in a position to have a discussion, not detailed but at least some discussion, because it would seem to me that if in fact there are the seeds of an agreement, that is one thing. But if not, then we should vote and see what happens. So I would be very happy to yield to the distinguished minority leader and we could have an exchange on a possible agreement.

Mr. BYRD. Mr. President, do I have the floor in my own right?

Mr. DOLE. I will be happy to yield the floor.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. DOLE. I yield the floor.

Mr. BYRD. Now am I recognized?

The PRESIDING OFFICER. The Democratic leader is recognized.

Mr. BYRD. I thank the Chair.

Mr. President, earlier today I called the distinguished majority leader to tell him that I was going to have a meeting among those on our side who have amendments to offer. I told him that once we had completed that meeting I would be in touch with him and we would try to reach an agreement on the amendments and on the sequential order in which those amendments would be called up, and also suggested time limits on all of the amendments.

Now, I have met with my colleagues and we are prepared to present a proposal which would see final action on the Gramm amendment no later than Thursday of this week. So I am happy to discuss that proposal with the majority leader, if he will, privately. This would entail final action on the Gramm amendment, final action on all proposals by the close of business Thursday.

We have made every effort to condense the number of amendments to as minimal a number as possible. We stand ready to agree to time limits on those amendments, sequence them as to when they will be called up and with final action on all amendments—including the Gramm amendment—no later than Thursday.

Mr. DOLE. Mr. President, will the minority leader yield?

Mr. BYRD. Yes.

Mr. DOLE. Obviously, I would be very pleased to meet with the distinguished minority leader. I think it is better we discuss the details in private. It is sort of like the arms agreements; you can hardly make a deal in public. So I would be very pleased to sit down and do that. As I indicated earlier, if in fact there is a proposal—and I am certain it is made in good faith; I will not quarrel with that—then I do not really see any reason to have a vote right now. I think the best thing to do is for the minority leader and me maybe to go off and discuss it for awhile, and it may take a while. So it would seem to me that at least for the next 45 minutes to an hour there will not be any votes and maybe after that I can announce very quickly to my colleagues that we are on the threshold of some agreement.

Mr. BYRD. I think that would be the thing to do. I am not very sanguine about getting agreement on all sides within the next 45 minutes to an hour, but whatever the distinguished majority leader want to do, if he wants to recess the Senate for whatever time or continue to let Senators talk; I personally would just as soon we recess, so that if Senators who are involved in these proposals might want to, they may be heard.

RECESS UNTIL 5:30

Mr. DOLE. On that basis, I ask unanimous consent that we stand in recess until 5:30 p.m.

There being no objection, the Senate, at 4:26 p.m., recessed until 5:34 p.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. ABDNOR).

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank my distinguished friend.

RESPONSE OF THE EXECUTIVE BRANCH

Mr. MOYNIHAN. Mr. President, as this long day of negotiations goes forward with respect to how we will proceed in this body, I thought it might be useful to report on a series of conversations I had today with members of the executive branch who have not been consulted in this matter, save for certain cheers we have occasionally heard from the press office of the White House. We have never had hearings on the Gramm-Rudman pro-

posal. What I had this morning thought to be a rare limited edition of the printed first edition of the bill now turns out to be, at least generally speaking, now on our desks as we are about to rush into this judgment. But we have not heard from anyone in the Office of Management and Budget. We have not heard from any person whose career has been spent there or who are there presently and who might have a judgment about this particular proposal. So I took it on myself to make a series of telephone calls today. And I hope I can say without presumption that I have served in the Cabinet or the subcabinet of four Presidents and have some sense of the Office of Management and Budget and the very extraordinary quality of the men and women who serve there.

This afternoon, I asked for their general judgment about the Gramm amendment. Their response had to be, "We don't know what you are doing so we can't very well tell you what it is we think." They have not themselves seen a copy.

But two things did very much impress those who were asked a specific question. First, I repeated the calculations I made and offered the Senate this morning that this bill, far from being a deficit reducing bill, provides for an increase in the spending ceiling for this year of $21 billion. We agreed in our budget resolution to a deficit ceiling of $172 billion. This amendment provides for a $180 billion deficit ceiling. Then for this particular year, and this year only, it allows for 7 percent above that before automatic reductions occur. Only if we exceed a $193 billion deficit, would the provisions of the amendment be triggered. As a result, we could have $21 billion extra spending in this fiscal year—this fiscal year which ends 4 weeks before the next senatorial elections.

Talk about borrow and borrow and spend and spend. Under the guise of a measure that will reduce the deficit, the gentlemen opposite—and some here—are proposing to increase the deficit by $21 billion above that of the budget resolution. It is audacious, it is dazzling, but it is also deceptive. I wish one would come to the floor and admit as much, just as I have spent 4 days asking one of the sponsors to come to the floor and admit that they have completely excluded farm price supports from the bill. This is not to say we do not need farm bills any more than we need foreign aid bills, but what is so special about one sector of the budget that it has to be set apart? What is so special about another provision, added yesterday afternoon—I only ran into it about 11 o'clock in the morning reading the RECORD—that makes special provision for lesser populated areas?

I asked the Senate this morning, does that include Delaware County where I have the privilege to reside? We only in the last census reached the population of 1840, having given so generously of our young people to the Mexican War and then the War Between the States, but I leave that apart. The fact is this amendment increases spending limits.

But the second thing that the career officers of the Budget Bureau would say is that it violates the very principle of budgeting which is the establishment of priorities. It is one thing in a dazzling but deceitful measure to decide Congress can increase spending in some general way under the category of reducing a deficit. But in the long run, by providing across-the-board reductions of a percentage, it violates the first principle of choice, which is what budgeting is about. What takes first priority? What comes second? What are the options available? How do you decide between what is second and what is third?

We have been at the process of developing budgets on a professional basis since Warren Harding's administration. A third generation of persons are now working in that Bureau of the Budget, and they take it seriously. We get more work out of them than I suppose any other group of public servants in America, considering their anonymity and the rewards they get. They do an important job and try to do it well, and their first principle is priority.

Their second principle, Mr. President, is the acceptance of democratically elected political direction. The last thing these career officers want to do is to be told, "Take the political decisions of the Republic and you make them."

That is what this asks of them. It does further: It asks it of them in a kind of false academic gobbledygook.

If you will take those privileged few—which may extend now to the Press Gallery—who have printed copies of the legislation, you will find on page 23, under section (d) "Emergency Powers to Eliminate Deficits in Excess of Maximum Deficits Amounts," the requirement, in general, that the Director of the Office of Management and Budget and the Director of the Congressional Budget Office estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, and determine whether or not the resulting budget deficit is "statistically significant."

Mr. President, anybody who has ever gone to high school or college has gone through the experience of pretending to know more than he or she does, in writing a paper or an essay, in answer to a question. It is very easy for young people to get into the disease of using big terms they do not really understand, but with luck they might be given some credit for knowing the term, even though they do not know what it means, or it is always possible that the teacher does not know what the term means, either, and they will get away with it.

The term "statistically significant" has a very significant meaning.

The Director of OMB and the Director of the Congressional Budget Office, hereinafter referred to as the Directors, are asked to decide whether a dollar sum is statistically significant. That is a nonsentence.

The term "statistically significant" measures the probable accuracy of a measure taken from a sample. It is called the chi square test, which was developed if memory serves, by a mathematician at the turn of the century, and it is one of those common devices used in science, in medicine, and other such things.

It tells you that if you catch 100 rats around the Capitol basement, and they are there—they have been there for a long time—and you find that 7 have blue eyes, the question is, what is the statistical probability that 7 percent of the rats in the basement of the U.S. Capitol have blue eyes? A chi square test will tell you that, if you have carried out your effort with any degree of procedural rigor such that the test can be applied.

What is this gobbledygook in Federal legislation? Are we at the level where we pretend to be learned because it sounds learned? They will find out whether it is statistically significant at the degree of 0.05 to 0.01 or at the level where you can pass out medicines at 0.001.

Those are called degrees of confidence. The degree of confidence I have in this legislation diminishes with every line I read.

The career officers do not like the thought that the best-faith judgments of one bureau are going to be mixed with the best-faith judgments of another bureau to get an amalgam.

My distinguished friend is a farmer, and a good farmer—or was a good farmer until this administration came along. I am sure he is a good farmer. Whether he is successful or not cannot be determined any more. But if he estimates the amount of bushel of corn he is going to get from his farmland and I figure the amount of bushel corn he is going to get an acre from the same farmland, you do not find out the probable yield by averaging someone who knows the subject—his judgment—with the judgment of someone who does not know the subject.

Similarly, it is a useful and not uncommon practice in economics to make composite indices of people who make forecasts. It is good enough for stockbrokers, but it is not good enough for the U.S. Government. It is no way to proceed.

Finally, Mr. President, and of the greatest importance—of the greatest importance—in the Department of State, where, not to presume on anything more than my own experience, and I have twice served as an ambassador so I know something of the people there, there is genuine horror that we are putting in place a measure which, in the long run, will bring draconian, automatic reductions in the defense and foreign policy activities of the United States.

At this very moment, when our Secretary of the Treasury is in Korea, talking about increasing the lending provisions for the Third World nations, there is an international monetary crisis in every direction. We hear of rising difficulties with Marxist regimes around the world, or potential ones. We know perfectly well that our foreign aid programs have been reduced to a level which is barely sufficient to keep the commitments of the United States to pay the rent, as one might say, and we do say, for air bases, such as in Spain and the Philippines, and to provide the level of economic support to Egypt and Israel which was agreed to at Camp David, an important agreement for the Middle East that we sponsored.

We would start cutting that and defense, and would do so arbitrarily in response to a formula which is implicit in this legislation but has never been avowed, has never been subjected to the test of inquiry, question, and response.

There are those in the State Department—there is no such thing as the State Department, and I only speak for career persons; I do not speak for anyone else—who are convinced that this would be disabling to American foreign policy and to American foreign policy which in the first instance depends very much on the strength of the American Government.

I said this morning when you are the world's largest debtor, with a declining defense budget, do not expect to be the world leader.

We are going back into that same decline which we talked about in the 1970's and which I spoke about in 1976 running for the Senate—that long rundown of our defenses. Only now we go back into it as debtors and now we back into it under a budget regimen that requires us, first of all, to cut the capacity of the United States to act in the world at large.

We will be paying a very great deal for this, Mr. President, and we will pay for a long while.

First, we will increase spending to get by the 1986 election and then we will proceed to decimate the powers of the United States to conduct its foreign policy. Where are those who care about foreign aid, those who care about the military capacity of this country? This Senate is in session. This amendment is before us. Where are those we have heard from at such length about the perils of which our Nation faces? Where are they now? Why are they absent?

I started the day asking questions and asking would there be some sponsor from the other side to come to speak to us. There are also sponsors on this side to come to speak to us. None has come. Where are they?

Is it because they have nothing to say? Or are they concerned that what I have said is not statistically significant?

I thank the Chair.

Mr. ABDNOR. Mr. President, the Senate is considering historic legislation. It's my hope we will soon be able to vote upon, and pass, the so-called Gramm-Rudman-Hollings budget plan which will eliminate the problems of irresponsible deficit spending.

For years, Congress has been recklessly spending the country into what will soon be disaster. And all along we've heard the rhetoric about the need to cut deficits. Frankly the only thing Congress does better than talk about reducing deficits is spend money.

The one way to save the country from economic disaster is to hamstring Congress so it can't continue to spend billions more than it takes in. That isn't a very nice way to put it but Congress has demonstrated over and over again that it cannot be trusted to act in the Nation's best interest when it comes to managing the Nation's finances. When it comes to spending, Members of Congress are like little kids in a candy store.

If this amendment is enacted into law, we will have put a stop to this irresponsible way of doing business. In fact, it contains the same approach as my bill, S. 2516, which I introduced over a year ago and reintroduced this year as S. 57, the Deficit Reduction Act.

But frankly, I think the Senators from New Hampshire, South Carolina, and Texas have come up with a plan which is a definite improvement compared to my bill. For example, they have found a way to enforce savings at the subcommittee level. They have also taken Social Security off budget so it will no longer be a perpetual political football during the annual budget debate. These and other provisions are definite improvements and my colleagues have demonstrated remarkable leadership in mustering support for this legislation and bringing it to the floor of the Senate.

But, the thrust and the sound principles remain the same. Both my original bill and this amendment establish a mandatory schedule of deficit reduction goals which Congress must comply with until the budget is balanced. They both provide the President with the power to enforce the deficit reduction schedule if Congress refuses to abide by the law. Each provides for a midcourse correction to assure that Congress doesn't resort to unrealistic economic assumptions as an excuse to violate the deficit reduction targets. And finally, they both provide that as a last resort, spending will automatically be cut across the board if both the President and Congress refuse to do the job.

It's my hope that the Senate has finally realized the absolute necessity of adopting this sort of plan and I'm proud to be one of the cosponsors of this legislation. Last year only one other Senator was willing to join me in putting his name on the line as someone willing to do whatever is necessary to get deficit spending under control. The support this proposal is now gathering among Republicans and Democrats alike attests to how serious the crisis has now become.

This plan was a good plan when I first introduced It, and it's even a better plan now, both because of the improvements made by my colleagues and also because of the unfortunate fact that we are now over $200 billion closer to disaster. One way or another, if this amendment becomes law, our policy of government by deficit will come to a screeching halt—and none too soon.

Congress must be willing to commit itself to making steady progress toward a balanced budget and it must start now. The time for speeches about how we all want to cut the deficit is over. It's time to act in the best interests of all Americans and vote for this desperately needed legislation. The American people have a right to expect no less.

Mr. McCLURE. Mr. President, the exercise we are going through today is disgraceful. The U.S. Senate will most likely raise the debt limit to over $2 trillion. I am convinced that no one here understands the magnitude of this action.

Congress has raised the statutory debt ceiling 44 times in the last 58 years and 32 times in the last 24 years. Since 1981 alone, the debt ceiling has been raised 10 times. It is not difficult to understand why the debt limit has been raised so often in the last few years. If the Congress continues the fiscal irresponsibility it has demonstrated over the last decade, I am sure we will be back next year, and the year after to raise the ceiling to $3 trillion and then $4 trillion and on. At the current rate of growth, the Federal debt will exceed $3 trillion by 1990 if nothing is done.

Mr. President, I believe we are headed for economic collapse in this country if the trend of skyrocketing deficits is not curtailed. We spend time debating the strong dollar, the trade imbalance, and the farm crisis which

are the direct result of a lack of fiscal responsibility. Yet we have been unwilling to come to grips with the real problem—deficit spending.

In an October 2, 1985, Washington Post article entitled "OMB Official Stresses Large Deficits' Damage," OMB's associate director for economic policy was quoted saying, "It is sometimes argued that the budget deficit has done relatively little damage so far. That is not the case." She continued by saying, "the budget deficit is not only the biggest fiscal-policy issue facing us today, but it lies behind most other fiscal-policy issues." She pointed out that the value of the dollar, and the trade deficit are the result of deficit spending. "By some calculations, 1½ million to 2 million jobs have been wiped out in the manufacturing and mining sectors because of the trade deficit. Farm bankruptcies and farm bank failures have been growing and are expected to become a major concern over the next 12 to 18 months." She said.

I believe the budget deficit is at the heart of our economic problems. Until we are willing to face this question and have the political courage to take action, we will be faced with a growing trade deficit and compounded farm problems far worse than we have experienced to date.

Mr. President, deficit spending is bleeding the lifeblood from our economy. We are mortgaging our future with debt. Over one-half of all personal income taxes collected will be used to pay interest on the national debt. This breaks down to every taxpayer west of the Mississippi devoting their entire tax liability to service the national debt.

The net interest on the national debt has grown from a relatively small 7 percent of the total budget just 10 years ago to over 13 percent of the total budget today. Each year more and more of our Nations' productive capacity will be mortaged to pay for an uncontrollable debt.

We have all had the opportunity to make our statements about the evils of deficit spending. Today we will be given the chance to see how serious we really are about controlling the growth of spending. The Balanced Budget and Emergency Deficit Control Act of 1985, of which I am an original sponsor, will put us on the road to a balanced budget. This amendment is not a perfect solution to our problem, but it is a balanced reform package which is desperately needed.

I still strongly believe that we should adopt a constitutional amendment for a balanced budget, but since the Congress cannot agree on such an amendment, something must be done in the interim. I believe the Balanced Budget and Emergency Deficit Control Act of 1985 is the best solution at this time.

Mr. President, for many years I have expressed to this body my concern over the growth of the so called entitlement programs. Today they are one-half of the Federal budget. The Balanced Budget and Emergency Deficit Control Act of 1985 will begin to control the growth of automatic increases in these programs. However, I was disappointed when Social Security was exempted. Many Social Security recipients are better off than those who receive other entitlement benefits. As a matter of fairness, Social Security should have been included along with all other entitlement programs. I do not have anything against the old people in this country. That is obviously not the case. But because I believe that they are entitled to be treated fairly, the same as everyone else, but not necessarily better than everyone else, and I think they accept that.

This amendment will begin to slow the growth of automatic spending, but it will not solve the problem in the long run. I still believe the Congress should review all entitlement programs and make the necessary changes so they do not continue to run out of control as I believe they have for the last decade.

Mr. President, since the Gramm/Rudman amendment has been introduced, there are many who have said it is just a panacea and will not do what it is intended to do. I do not believe that anyone is being fooled by this amendment. We all know that we could amend the act again, but we also know that we must tell the American people in doing so that we are unwilling to deal with deficit control. That we are going to abandon existing efforts to return stability to our economy.

I am sure there will be counterproposals to this package which call for an increase in taxes. Some have said that we do not spend too much, but tax too little. Mr. President, we have been spending too much for too long. Our farmers are in trouble, our exporters are in trouble, our miners are in trouble, and many other sectors of our society are affected by the budget deficit. Yet many say we should tax more. Who are we going to tax? The farmers or the miners?

Mr. President, I strongly support the adoption of the Balanced Budget and Emergency Deficit Control Act of 1985. We need to work to keep the economy alive and growing. We need to act to get men and women who have been unemployed back to work. We need to curtail the growth of deficit spending to drive interest rates down, to drive the strong dollar back to normal levels, and to establish a stable economy.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GORTON). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, citizens may be surprised to learn just how they voted for this deficit debacle of a $2 trillion debt, but they did when they voted for us—including the President.

Now with the entire economy at stake as it skids into recession, it is imperative that grassroots America demand an accounting.

There are three reasons for blocking this rush to pass the debt ceiling bill with its $2 trillion in public debt, unless and until first, the amount of additional indebtedness the administration asks for is cut below the $2 trillion level; second, there is immediate action to collect taxes from those profitable corporations now paying no Federal income tax, and third, this Gramm-Rudman-Hollings amendment is made workable and not just a political football that continues to pump big money into favored areas but cripples basic industries, leaving agriculture, minerals, energy, and forest products high, dry, and dying.

It is self-evident but worth emphasizing that the budget process has failed to reduce deficits.

First, on the budget process. The President's budgets and the congressional budgets have been equally shabby, like a leaking rowboat taking in water faster than you can bail it out.

The Gramm-Rudman-Hollings amendment is an extension of the budget process which would focus public attention for the need of combining both the President's budget with the congressional budget.

For 5 years the budget process has followed this procedure on spending:

First. Early in the year the President submits a budget asking for less spending for programs affecting the average citizen but he urgently asks for increases in defense and foreign aid.

Second. Congress then finds all the domestic cuts are not possible but increased defense and foreign aid spending is possible.

Third. As a consequence, realizing that the domestic programs must have viability, the President increases his budget agreeing that some of his domestic cuts are impossible, but holding firm to the defense spending increases and, as the months go by, pressuring for more foreign aid.

Fourth. The Congress then agrees with the President and by majority vote in both the House and Senate has for the past 5 years appropriated excessive amounts causing deficit spending—too much going out from the Treasury's pay window and causing a constant borrowing, pressuring interest rates higher.

On the other side of the Treasury at the tax revenue window, for the past 5 years President Reagan has successfully argued for tax incentives or tax breaks for big business and high bracket taxpayers. By majority votes in the House and Senate, Congress has acceded.

Tax increases on a number of items such as everybody's telephone calls, insurance, and travel and tax increases through a variety of fees have only offset a small part of the revenue losses.

The stark, inevitable result of big spending and tax breaks for high bracket profits savages the Treasury with $200 billion per year deficits. That is real red ink. These past 5 years of mismanagement by the administration and the majorities of the House and Senate have doubled the $890 billion national debt to $1.8 trillion.

That is a disaster. All agree it must be rectified. After 5 years of piling up debt, all that one can hear is, "Stop it, change it."

The Gramm-Rudman-Hollings amendment is perceived to be a method of prompt correction.

It is a further budgeting requirement that will shatter either President Reagan's or Congress' blatant political posture that the Nation can write bad checks on the national checking account for more and more Pentagon and foreign spending.

There is equal bipartisan guilt with just as many Democrats as Republicans joining President Reagan in the untenable spending binge and revenue losses.

The $2 trillion debt deserves scrutiny and immediate change.

I am going to vote for the Gramm-Rudman-Hollings amendment, but there are corrections to be made. And those corrections are not mysterious or insignificant.

There first of all can be no fuzzy-minded process to delay in the actual curbing of big spending waste.

The appropriations bills are the real throttle to control cash outlays and those cannot be as high as the President wants in Pentagon or foreign spending.

Second, a bill must be enacted immediately, with no further delays allowed, to develop and to recoup the lost tax revenues from profitable corporations that pay no Federal income taxes. That must be paid into the Treasury.

Third, the trade deficits which have grown with the Federal deficits require immediate action for reciprocal bilateral agreements with foreign countries to save the jobs, businesses, and basic industries of the country. That requires taking the political drafting out of the Gramm-Rudman-Hollings amendment that tilts the timing for action until its impact is after next fall's election, tilts the spending cuts away from new weapons systems, and leaves the Nation's already gasping basic industries with a tightened noose around their necks. The improper tilts must be corrected.

If it takes more than 5 days to do all this—so be it. This stew has been simmering for 5 years or more.

This $2 trillion debt has to be reckoned with some common sense—not a half-baked rush job rammed down the Nation's throat by the Congress and the administration that has been the presiding morticians for the millions of liquidated jobs, businesses, and farms these policies have laid in the morgue.

Mr. President, I yield the floor.

Mr. EVANS addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, I have to disagree with a couple of points I have heard made on the floor during the last couple of days.

First, I should say that I am opposed to the development of a constitutional amendment to balance the budget. I guess while I may not be a fundamentalist in many things, I am a fundamentalist when it comes to the Constitution.

I believe we ought to go very carefully before we add something as complex, as dramatic, and as unchangeable as a balanced budget to the Constitution.

Instead, I think we ought to do precisely what we are, I hope, about to do in the Senate. That is to collect unto ourselves what we should have had a long time ago: Sufficient financial responsibility to bring ourselves to a balanced budget without a constitutional mandate or requirement.

Mr. President, I think the Gramm-Rudman-Hollings proposal will help us do precisely that.

I have three somewhat different points to make than my colleagues have made so far.

First, we have proven in the past to be rotten prognosticators when it comes to the size of a deficit each year.

Let me go back and refresh our memories. The President, in 1980, projected that the fiscal 1981 budget would be $34 billion in the red. It turned out to be $79 billion.

In 1981, the 1982 deficit was projected at $46 billion. It ended up at $128 billion.

In 1982, they projected the fiscal 1983 deficit at $73 billion; it was $208 billion. We are getting worse, not better.

Finally, in 1983, the projection of the fiscal 1984 deficit was $189 billion; it turned out to be $185 billion. It is hard to say whether we were really getting better or whether it was just the luck of the draw.

In 1984, we projected the fiscal 1985 budget at $195 billion. It now looks like it will come in at something over $210 billion. We have a large gap between expectations and reality. Our deficit realities, more time than not—in fact, almost always—continue to fall short of our economic expections.

I think this proposal will aid us markedly in making better and more realistic projections when the President presents a budget to the Congress at the beginning of each year. I suggest that the President and the Office of Management and Budget are less likely to be superoptimistic about the economic future of the Nation and, as a result, superoptimistic about the shrinking size of a deficit because they will now know that they almost assuredly then will come back in October of the same year, 10 months later, with a painful, difficult, politically unappealing job to do, to correct for overoptimistic projections made less than a year before.

Point No. 2. We have heard many of our colleagues talk about the drastic results of this proposal, the drastic results always on the side of shrinking programs, drastic cutbacks in both military and nonmilitary expenditures. But, you know, Mr. President, I think it is possible—just barely possible, perhaps but possible—that if Congress lives up to its responsibility and begins shrinking the size of the deficit, that message will be heard throughout the country—heard by individual taxpayers, heard by businesses, heard overseas by our trading partners, and heard by our financial institutions.

I think there is a very good chance that it will set in motion once again solid, strong economic growth which, after all, is the very best possible way to ensure shrinking deficits without having to unduly cut back on spending or programs in which we want to invest, nor having to go in and radically raise tax rates.

The Gramm-Rudman proposal suggests that we will reach zero in terms of a deficit in 6 years based on medium-growth economic projections. If we did not have the added pressure and push of the Gramm-Rudman-Hollings proposal, we would not quite make it in 6 years.

But if we had high economic growth, we would more than meet each of the targets for each of the next 5 years and, in fact, at the end of 5 years, we would have a balanced budget instead of the 6 years proposed under this amendment. I suggest that we are a lot

more likely to have high economic growth if we embark on fiscal responsibility, if we start down the track toward a balanced budget, than if we do nothing.

I suggest that the real economic growth, the real rate of growth in our gross national product under a medium growth projection, is about 3.5 percent a year and under high growth is 4.8. I think there is a reasonable chance at least to go somewhere between those two figures, especially if we have given ourselves some fiscal restraint.

In terms of unemployment, in terms of interest rate, in terms of cost of living, we have a chance to insure continued stability in prices, insure greater and more solid economic growth, hopefully by bringing the deficits down, and begin to shrink the abnormally high rate of interest which is now being charged.

Historically, we have never had real interest rates so high for so long a period of time. But I suggest that all of us—citizens, businesses, and certainly Members of this body—ought to realize that if interest rates are to come down, as we all hope, then all of us have to be willing to accept lower interest earnings on whatever investments we have. That is the only way you can get lower interest rates on what you borrow. I know most of the people of this country have become a lot more sophisticated in recent years on interest earnings. There are a lot more products out there and a lot more opportunities to earn higher interest rates on your savings and your investments. Those of necessity will come down somewhat if we are ever to have lower rates for what we borrow. But I suggest that that is going to be a real benefit, that tradeoff, for businesses as well as for individuals because, by and large, we tend to have more debt than savings.

We invest in a home, business invests in a new plant, and the interest they pay tends to be larger than the interest they earn. So if they both go down, they are likely to benefit.

I think this amendment should be considered for what it really is. That is a congressional safety net. We often talk about safety nets around here—safety nets for individuals, safety nets for organizations. I think it is about time to talk about a congressional safety net. This amendment will never be triggered if we are even reasonably accurate in our expectations of the economic future of the country and if we are responsible in the combination—and I emphasize combination—of spending and tax policies to get us the balance we believe is desirable between how much we ask from our people and how much we expect to give to them in services.

Senator RUDMAN, a few days ago, said it pretty well. He said no wonder all the polls show people are against taxes and they are for most of the services the Government provides. Why should they not be? They are getting 1 dollars' worth of services and paying only 72 cents for it. The rest, of course, we are racking up for some other generation. It is time to bring that difference down.

Many people have referred to States and their requirement for a balanced budget, most of them constitutional. I had a little different opportunity when I was Governor of the State of Washington. That was to have substantial discretion during times of fiscal emergency to reduce whichever budgets and whatever parts of budgets I thought were appropriate at the time in order to keep within that balanced budget rubric. Subsequent to my leaving office, the law changed and now that must be brought down across the board, without discretion, much as this amendment would provide. I do not know whether that came about because they either did not like how I had used discretion when I was Governor, or whether they thought it was best not to let any Governor have that kind of discretion. I suggest that in this amendment, very clearly, we have given the President no discretion.

We have specified precisely how that ministerial act will be carried out and how the budget would be reduced if in fact that is ever necessary.

A third point. We talk about cutting off the credit card, putting the Government on a cash basis and getting back to a balanced budget, but I think we have to be careful over the long run about worshiping at the altar of a balanced budget without knowing what it is we are talking about. This Government does not keep its books as a family keeps its books. We do not keep our books like a business or a corporation keeps its books. We do not each keep our books like a State or local government keeps its books. We make no allowance for capital expenditures. We make no allowance for long-term investment.

I think it is important to read through the report, the very fine and not too thick report, that came out in association with the raise in the debt limit proposal. All the talk so far has been about the increase in debt of the Federal Government. This table goes clear back to 1929. In 1929 the Federal debt was $16.5 billion, a figure that is almost too small to think of with today's $2 trillion request. But let us take the last 5 years from 1980 through 1984. The Federal debt went up from $742 billion to $1.376 trillion. That is $600 billion.

That is a big increase in debt, but it is not the only increase in debt. We have focused on deficits and debt as if they only applied to the Federal Government. Corporate debt during that same period of time went up from $912 billion to $1.307 trillion. That is a $400 billion increase, and that in itself is a significant amount.

Private debt is even larger, going from $2.7 trillion to $4 trillion, an increase of $1.2 trillion, and I do not think anyone is suggesting that that increase in debt of corporations or of individuals is necessarily bad in all respects. And finally, let us turn to State and local governments where we say there is a constitutional requirement to balance the budget, that every year these governments must balance their budgets. Well, it is interesting that in those same 5 years State and local debt went from $351 billion to $540 billion. That is a $200 billion increase.

Now, how in the world can those State and local governments, always required to have a balanced budget, end up with an increase in debt? Or for that matter, how can families, literally required to have a balanced budget where income and outgo have to equal out over at least a long period of time, end up increasing their debt by $1.2 trillion in 5 years? Or how can business do the same?

Well, there are a number of reasons. The most fundamental is that you do not count the total long-term investment you make in the year in which you purchase it. If any citizen bought a home and had to pay for that home in 1 year, few of us would own homes. Instead, we get a mortgage—a debt—but it is a mortgage we feel we can pay, and therein lies the Federal Government's problem. Because it is not precisely the balance in a budget which is ultimately important.

It is how well we can handle the debt we bear. Is the debt shrinking or growing? Is the debt service, the amount we have to pay each year, Mr. President, rising as a percentage of income or shrinking as a percentage of income? Well, currently and for the last few years, it has been rising as a share of income, it has been rising rapidly in total. We are simply out of control. It is simply to bring us back into control. I am an enthusiastic supporter of doing so because other methods have failed. I think it is worth trying for a time to shred the credit card until we regain control of our future.

Mr. President, at some time in the future I intend to work with a number of colleagues as a corollary to this proposal and bring before the Senate some ideas on how we better tell the full story on spending, on income, on capital investment—in other words, how to more accurately keep our books so that the true story of a balanced budget will be there for all to see.

Mr. DOLE. Mr. President, I suggest the absence or a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I want to indicate to my colleagues that we have been involved in discussions in the majority leaders office on the debt limit bill but first I wanted to clear up something. I read a wire story that said I made a statement the tax bill was dead for the year. I wanted to clarify that. What I probably should have said or did say was that unless there is some disposition on the part of the House of Representatives to give us that bill no later than November 1, it would be almost impossible to complete action on the tax bill this year.

If we cannot complete action on it this year, I think we have an obligation to the American people to indicate publicly that that is the case because it is my understanding there are millions and maybe billions of dollars out there waiting to be invested and the business sector is unsure of how to proceed.

So if in fact it seems that the House of Representatives would not be able to send us a bill until mid-November or later, then I believe that it is fairly certain that any action on the bill this year would probably not be completed. That does not preclude, of course, action in early 1986.

So I suggest that the President's proposal is very much alive. The question is whether it is going to be acted upon this year or next year.

So, in addition we have now had a meeting with the distinguished minority leader and a number of other Senators, Republicans and Democrats, in the minority leader's office. Since that time we have had a meeting in the majority leader's office with a number of Republican Senators and representatives of the White House, and I think it is fair to say the following:

First, we do not have an agreement. But we have a proposal by the distinguished minority leader outlining a number of ideas that we believe we should now take to our conference and I, therefore, request a conference at 9:30 a.m. in the morning, a Republican conference, and Members are now being notified that that will occur.

At that time we will discuss the outlines of the distinguished minority leader's proposal which in addition to laying out the general framework of voting on leadership packages and the Gramm-Rudman amendment and certain amendments thereto, or other amendments that will be offered to the debt ceiling, it would also incorporate an extension of the debt ceiling for a very brief period of time.

I think it is fair to say we had a brief phone conversation with the Speaker of the House, Congressman O'NEILL, and I have since talked with the Republican leader, Congressman BOB MICHEL. So we have touched base with all the leadership in Congress and hopefully when we conclude our conference tomorrow morning, I will be able to go back to the distinguished minority leader with results of that conference.

But as I have indicated, for the time being there is not any agreement. There is not any extension of the debt ceiling. I assume we will be under even more pressure tomorrow. But in any event, I will report results of the Republican conference at the earliest possible moment because if we are to complete action on this matter this week, we need to start voting and I think it is fair to say without getting details, which are probably already available, that the general thrust of the minority leader's proposal was to start voting tomorrow and hopefully complete action on everything, the debt ceiling, the extension, the amendments, and do all that by fairly early evening on Thursday.

That is essentially it.

Mr. BYRD. Go ahead.

Mr. DOLE. No; I am finished.

There will be no more votes this evening, I think I have indicated.

The PRESIDING OFFICER (Mr. WILSON). The minority leader is recognized.

Mr. BYRD. Mr. President, I heard most of what the distinguished majority leader said.

The distinguished majority leader and I did meet this afternoon. I briefly outlined what our proposal was and then those Senators with amendments on my side were called in and the distinguished majority leader had some of our colleagues on his side join us so that everyone could better understand the amendments.

Some of them could be disposed of, I think, simply by agreement on both sides. In other words, we would agree by way of modification rather than by amendment.

Such an amendment would deal with the waiver. Under the Gramm proposal, the waiver that we now have in the budget reform process, for example, on which I believe there is a 1-hour debate limit, would no longer be in existence, and in order to have a waiver both Houses would be required to enact a joint resolution which, of course, would go to the President and would be subject to his veto.

I do not want the President vetoing any Senate rule. I do not want the House of Representatives to tell the Senate what we can or cannot do with a waiver motion.

I am adamantly opposed to that provision. When it gets to the point where the House of Representatives cannot be the judge of its own rules and proceedings and the Senate, under the Constitution, cannot be the judge of its own rules and proceedings, and both Houses have to pass a joint resolution before the Senate can act or waive an action within the sole purview of its own authority, then we will have failed in our duty.

I believe Mr. GRAMM would be willing as I understand it, to resolve that matter so we would not have the President of the United States determining whether or not we could have a waiver rule in the Senate.

I have encouraged my colleagues over here to narrow their amendments to only a few in number, and I think we have done very well in that regard.

Then, we would hopefully have a short-term debt limit extension, which would go quickly to the House. Meanwhile, by the close of business Thursday, we would have completed all action on the Gramm and other amendments.

That seems to me to be a reasonable and responsible way to proceed, but I know that the majority leader has to discuss this with his colleagues just as I have had to discuss it with mine. Hopefully, tomorrow, after a good night's rest, we can reach an agreement and get on with the business.

We on our side want to reduce the deficit as much as do Senators on the other side and we are willing to work to that end. But we want it done in such a way that we are not compromising the national security, the health and economic growth of the Nation. We want to know what we are doing. We are willing to work with the distinguished majority leader in trying to arrive at a resolution of those concerns.

I thank the distinguished majority leader for yielding.

Mr. DOLE. Mr. President, as the minority leader has pointed out, there are certain areas that I think we can agree upon. They are not major modifications, but they are important modifications. If that can be done that would reduce the number of amendments. But there are a fair number of amendments, and we hope that even those could be reduced to some extent. That would not include the amendments on the Republican side. We are not encouraging amendments, but we have indicated to every office if there are amendments, we should be notified by 9:30 tomorrow. If we intend to complete action by Thursday night, the last thing we need is amendments.

Mr. BYRD. Will the distinguished majority leader yield for a question?

Mr. DOLE. Yes.

Mr. BYRD. On yesterday, the distinguished majority leader filed a cloture motion on the Gramm second-degree amendment to the Gramm first-degree amendment to the motion to recom-

mit. This would mean that, unless it is otherwise ordered, when the Senate comes in tomorrow, 1 hour following the convening of the Senate we would proceed to an automatic quorum and cloture vote. Does the distinguished majority leader want to stay on that track or what shall we tell our colleagues?

Mr. DOLE. What I thought might be possible is to come in at 11 o'clock and then at noon we could have our normal recess from 12 to 2 o'clock. I was hoping if, in fact, we came in at 11, we would have had a chance to have our conference and I would go back to the minority leader and we might use that 11 to 12 to work out some agreement.

Failing that, we would still have from 12 to 2 before we would be under the gun under rule XXII. Hopefully by then we will have an agreement, because, if we are going to start moving, we have to start voting.

So it seems to me 11 to 12 might be an appropriate time to try to work out some agreement on amendments and when we might vote.

Mr. BYRD. Yes. Would the distinguished majority leader consider stopping the operation of rule XXII until, say, 2 o'clock, let the hour start running then, or negating the vote on cloture tomorrow?

Mr. DOLE. I think I would be willing to start the hour running at 2. But I assume, if we cannot work out some agreement, we will have to go back and have another cloture vote.

Mr. BYRD. Well, if the leader would seek consent at this point to start the operation of the rule at 2 o'clock tomorrow or maybe he would want to say 2:30. Sometimes our conferences run a little over and the leader may wish, after his conference, to further discuss this matter for a few minutes at least. And if the operation of the rule could wait until, say, 2:30, that would give the leader a half hour in which he and I could get together and see what the products of our relative conferences may have been.

Mr. DOLE. Well, I believe we can work that out.

ORDERS FOR TUESDAY, OCTOBER 8, 1985

RECESS UNTIL 11 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 11 a.m. on Tuesday, October 8, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Mr. President, following the recognition of the two leaders under the standing order, I ask unanimous consent that there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS AND RECESS BETWEEN 12 AND 2 P.M.

Mr. DOLE. Mr. President, following the special order, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 12 noon, with statements therein limited to 5 minutes each, and that at 12 noon the Senate stand in recess until 2 p.m. for the weekly party caucuses.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, at 2:30 p.m., under the provision of rule XXII, a live quorum will begin, to be followed by a cloture vote on amendment No. 738 in the second degree to the motion to recommit House Joint Resolution 372, the debt limit bill. Additional rollcall votes can be expected throughout the day, possibly, in connection with the majority leader's motion to reconsider the vote by which cloture failed on amendment No. 730, as modified.

Mr. President, I ask unanimous consent that the automatic quorum under rule XXII be postponed to begin at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that there be special orders in favor of Senators GOLDWATER and NUNN for not to exceed 15 minutes each prior to the special order previously ordered for Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. DOLE. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 11 a.m. tomorrow.

The motion was agreed to; and, at 7:24 p.m., the Senate recessed until tomorrow, Tuesday, October 8, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate October 7, 1985:

THE JUDICIARY

David R. Thompson, of California, to be U.S. circuit judge for the ninth circuit vice a new position created by Public Law 98-353, approved July 10, 1984.

Bobby Ray Baldock, of New Mexico, to be U.S. circuit judge for the 10th circuit vice Oliver Seth, retired.

Robert E. Cowen, of New Jersey, to be U.S. district judge for the district of New Jersey vice a new position created by Public Law 98-353, approved July 10, 1984.

U.S. POSTAL SERVICE

J. H. Tyler McConnell, of Delaware, to be a member of the Board of Governors of the U.S. Postal Service for the remainder of the term expiring December 8, 1988, vice David E. Babcock, resigned.

Barry D. Schreiber, of Florida, to be a member of the Board of Governors of the U.S. Postal Service for the remainder of the term expiring December 8, 1992, vice Frieda Waldman.

Robert Setrakian, of California, to be a member of the Board of Governors of the U.S. Postal Service for the remainder of the term expiring December 8, 1993, vice William J. Sullivan, term expired.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, Section 601:

To be lieutenant general

Maj. Gen. John H. Moellering, xxx-xx-x... xxx-... U.S. Army.

HOUSE OF REPRESENTATIVES—*Monday, October 7, 1985*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore [Mr. WRIGHT].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
October 3, 1985.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Monday, October 7, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Ascribe to the Lord, O families of the peoples, ascribe to the Lord glory and strength!—Psalm 96:7.

We acknowledge, gracious God, that we have been greatly blessed. As individuals and as a nation, we have received the gifts of freedom and opportunity that have helped make our lives satisfying. Encourage us never to forget the wonderful blessings of our heritage and may we ever remember to begin each day with the spirit of thanksgiving and end each day with praise. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 2410) "An Act to amend the Public Health Service Act to revise and extend the programs under title VII of that Act."

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 274. An act to provide for the national security by allowing access to certain Federal criminal history records;

S. 1264. An act to amend the National Foundation on the Arts and the Humanities Act of 1965, the Museum Services Act, and the Arts and Artifacts Indemnity Act, to extend the authorization of appropriations for such acts, and for other purposes;

S.J. Res. 97. Joint resolution designating the Study Center for Trauma and Emergency Medical Systems at the Maryland Institute for Emergency Medical Services Systems at the University of Maryland as the National Study Center for Trauma and Emergency Medical Systems;

S.J. Res. 150. Joint resolution to designate the month of March 1986 as "National Hemophilia Month"; and

S.J. Res. 174. Joint resolution to designate November 18, 1985, as "Eugene Ormandy Appreciation Day."

CONSENT CALENDAR

The SPEAKER pro tempore. This is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

JAMES A. WALSH U.S. COURTHOUSE

The Clerk called the bill (H.R. 2698) to designate the U.S. Courthouse in Tucson, AZ, as the "James A. Walsh United States Courthouse."

There being no objection, the Clerk read the bill as follows:

H.R. 2698

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF COURTHOUSE.

The building located at 55 East Broadway in Tucson in the State of Arizona, commonly known as the United States Courthouse, hereafter shall be known and designated as the "James A. Walsh United States Courthouse".

SEC. 2. LEGAL REFERENCES TO COURTHOUSE.

Any reference in any law, regulation, document, record, map, or other paper of the United States to the courthouse referred to in section 1 hereby is deemed to be a reference to the "James A. Walsh United States Courthouse".

Mr. UDALL. Mr. Speaker, a good friend, a good man, a good judge and one of the kindest people I have ever known, James Walsh, retires this September as a U.S. district judge in Tucson.

It's been said of Judge Walsh that he is everything a good judge ought to be, and nothing that a judge shouldn't be. That's a pretty fair summation of the judge's character, but there is more to the story.

James Walsh was one of those adventurous young men who left his home in Massachusetts in the late 1920's to head West. With a law degree from Georgetown University, he doubtless could have a sterling career with any number of fine old eastern law offices.

But he settled in Mesa, AZ, instead; in those days, a hot and dusty little town, where he found his calling in a $25-a-week law job that became the foundation of James Walsh's Arizona roots.

In time, Walsh served as an assistant U.S. attorney, and as a Maricopa County attorney. In 1952, he became the last person to be appointed to the Federal bench by President Truman. He has been there ever since.

I know James Walsh as an absolutely tireless man, devoted not just to the mechanics of the law, but to the fairness of it. Many a lawyer—indeed, many a judge—will tell you that James Walsh set the standard for them all.

Some folks out in Arizona will tell you that James Walsh has a lot of gray matter up there—and they don't mean hair.

"He's a great judge," said former U.S. attorney William C. Smitherman. "I can say that without reservation."

It is with some pride that I have introduced legislation in this session of the Congress to rename the Federal building in Tucson in honor of this fine and humble man.

I wish Judge Walsh all the very best that he and his family seeks in the months and years ahead. And I know I speak for all of his friends when I say, not just thanks for a job well done, but thanks for letting each of us know you.

Mr. SHAW. Mr. Speaker, I am pleased to rise in support of the bill H.R. 1483 which would designate the U.S. courthouse in Tucson, AZ, as the "James A. Walsh United States Courthouse."

Judge Walsh was a distinguished member of the legal profession in Arizona for nearly 50 years.

During that time, he held numerous public positions at the local, State, and Federal levels which culminated with his appointment as the chief judge for the District of Arizona by President Truman in 1961.

Less recognized than his professional accomplishments, but far more important, were the human qualities extolled by Judge Walsh.

He valued hard work, human understanding, and devotion, and these virtues became a powerful influence in the lives of many people.

No books or other forms of publicity can adequately portray Judge Walsh's unselfish dedication and service to the citizens of Arizona and the Nation.

I believe it is a fitting tribute that the U.S. courthouse in Tucson be named in honor of Judge James A. Walsh.

Mr. HOWARD. Mr. Speaker, I rise in support of H.R. 2698, a bill designating that the U.S. courthouse in Tucson, AZ, be

51-059 O-86-28 (Pt. 19)

known as the "James A. Walsh United States Courthouse."

Mr. Speaker, James A. Walsh, born September 17, 1906, in Massachusetts, attended St. Anselm's College in Manchester, NH, and received his law degree from Georgetown University in 1928. He was admitted to practice in the District of Columbia and Arizona and opened a law office in Mesa in 1928 where he practiced until 1941.

Judge Walsh has proven himself a master in the legal profession. He held a number of public positions which included serving as city attorney of Mesa, administrative assistant to U.S. Senator Ernest McFarland, assistant U.S. attorney, Maricopa County attorney, and judge of the superior court in Phoenix. In 1947, he left the bench to join one of Arizona's leading law firms, now known as Snell & Wilmer. In 1951–52, he was chief counsel to the Arizona Code Commission which completely revised the statutory law of Arizona.

In 1952, President Harry S. Truman appointed Judge Walsh to the U.S. district court and he primarily sat in Tucson, AZ. He was appointed chief judge for the District of Arizona in 1961 and served in that capacity until 1973. Totally dedicated to the field of law, he carried a full workload until his retirement on September 1, 1981.

Less publicly noticed, but far more important than these formal accomplishments, are the human qualities that have enriched all those who have known him. Judge Walsh is recognized throughout the Federal judiciary as one of the finest trial judges in the United States. He has set an example for all Federal and State judges to follow due to his calm, judicious temperament. His diligence and impartiality in carrying out the duties of his office have earned him the respect of all who have appeared in his court.

Countless lawyers, both in Arizona and throughout the West, have learned from him the high values to be placed on hard work, thorough preparation, and the civility with which the work of lawyers and judges should be conducted.

It is fitting that the University of Arizona recognize the rich lifetime of service of this truly dedicated public servant by conferring on him the honorary degree of doctor of laws.

Judge Walsh dedicated his life to the law and touched the lives of many young lawyers. Honoring Judge James A. Walsh, by naming the U.S. courthouse in Tucson, AZ, as the "James A. Walsh United States Courthouse" is most fitting and appropriate.

Mr. GRAY of Illinois. Mr. Speaker, H.R. 2698 would designate that the U.S. courthouse in Tucson, AZ, be known as the "James A. Walsh United States Courthouse." Briefly, Mr. Speaker, Judge Walsh was appointed to the U.S. district court by President Harry S. Truman in 1952 and sat primarily in Tucson, AZ, since that date. In 1961, Judge Walsh became chief judge for the District of Arizona and served in that capacity until 1973. He continued to carry a full workload until his retirement on September 1, 1981. No books or other forms of publicity extoll the virtues of this truly modest and wise man who devoted his life to the law. The example he has set of human understanding and devotion to the rule of the law has been a powerful influence in the lives of many people, and particularly in the lives of the young lawyers he has touched. Mr. Speaker, naming this building in Judge Walsh's honor is a modest tribute in view of what he has given to the Nation as a whole.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAKE SUPERIOR BAND OF CHIPPEWA INDIANS IN MINNESOTA DISTRIBUTION OF JUDGMENT FUNDS ACT

The Clerk called the bill (H.R. 1903) to provide for the use and distribution of funds appropriated in satisfaction of judgments awarded to members of the Lake Superior Band of Chippewa Indians who are members of the Minnesota Chippewa Tribe in dockets numbered 18–S and 18–U before the Indian Claims Commission, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 1903

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Lake Superior Band of Chippewa Indians in Minnesota Distribution of Judgment Funds Act".

SEC. 2. ABROGATION OF ANY PRIOR PLAN TO THE EXTENT SUCH PLAN RELATED TO MEMBERS OF THE LAKE SUPERIOR BAND OF CHIPPEWA INDIANS WHO ARE MEMBERS OF THE MINNESOTA CHIPPEWA TRIBE.

(a) PLAN FOR DISTRIBUTION FOR MEMBERS OF BAND WHO ARE ENROLLED IN THE MINNESOTA CHIPPEWA TRIBE.—Notwithstanding the Act entitled "An Act to provide for the use and distribution of funds appropriated in satisfaction of certain judgments of the Indian Claims Commission and the United States Court of Claims, for other purposes." and approved October 19, 1973 (25 U.S.C. 1401 et seq.) or any plan prepared or regulation promulgated by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") pursuant to such Act, that portion of the judgment funds described in subsection (b) which were awarded for the benefit of the members of Lake Superior Band of Chippewa Indians who are enrolled in the Minnesota Chippewa Tribe shall be distributed and used in the manner provided in this Act.

(b) JUDGMENT FUNDS DEFINED.—The judgment funds referred to in subsection (a) are—

(1) the funds consisting of—

(A) two-thirds of the amount appropriated in satisfaction of judgment awarded the Lake Superior and Mississippi Bands of Chippewa Indians in Docket Numbered 18–S before the Indian Claims Commission, and

(B) the amount appropriated in satisfaction of judgment awarded the Lake Superior Band of Chippewa Indians in Docket Numbered 18–U before the Indian Claims Commission,

(other than funds appropriated for the payment of attorney fees or litigation expenses) which are held in trust by the Secretary for the use and benefit of such Bands of Chippewa Indians, and

(2) the amount of any interest or investment income accured or accuring (on or before any distribution by the Secretary under this Act) on such funds.

SEC. 3. DIVISION AND DISTRIBUTION OF FUNDS AMONG RESERVATION COMMUNITY GROUPS.

(a) DIVISION AMONG RESERVATION COMMUNITY GROUPS IN MINNESOTA.—The Secretary shall divide the funds referred to in section 2(a) among the community groups of the Lake Superior Band of Chippewa Indians affiliated with the reservations in the State of Minnesota which appear in the following list by multiplying the amount described in section 2(b) by the fraction appearing in the list in connection with each such group:

(1) Fond du Lac Reservation, 1,346/8,437;

(2) Grand Portage Reservation, 387/8,437;

(3) Nett Lake Reservation (including Vermillion Lake and Deer Creek (Bois Forte Band)), 704/8,437; and

(4) White Earth Reservation, 148/8,437.

(b) DISTRIBUTION OF FUNDS.—

(1) 20 PERCENT DISTRIBUTED TO EACH COMMUNITY GROUP FOR USE AT THE GROUP LEVEL.—Of the amount determined under subsection (a) for each reservation community group described in such subsection, 20 percent of such amount shall be made available to the appropriate governing body of such group for expenditure for programs approved by the Secretary.

(2) 80 PERCENT DISTRIBUTED PER CAPITA.—Of the amount determined under subsection (a) for each reservation community group described in such subsection, 80 percent of such amount shall be distributed in amounts as equal as possible to enrolled members of the Minnesota Chippewa Tribe who—

(A) are designated as members of the Lake Superior Band of Chippewa Indians and are affiliated with such group, and

(B) were born on or before the date of the enactment of this Act and are living on such date.

(3) PROCEDURES FOR PER CAPITA DISTRIBUTION.—The amount determined under paragraph (2) for each individual described in such paragraph shall be paid or distributed as follows:

(A) LIVING COMPETENT ADULTS.—If the individual is a living competent adult, the amount so determined shall be paid directly to such individual.

(B) LIVING MINOR CHILDREN AND LEGALLY INCOMPETENT ADULTS.—If the individual is a living minor child or legally incompetent adult, the amount so determined shall be treated in the same manner as any trust property of such individual is treated.

(C) DECEASED INDIVIDUALS.—If the individual is deceased at the time of distribution, the amount so determined shall be treated in the same manner as any trust property of such individual would be treated if such individual died intestate.

(c) TAX TREATMENT OF DISTRIBUTIONS.—No amount of any payment or distribution under this section shall be included in gross income of the payee or distributee for purposes of any Federal or State income tax. Payments or distributions may not be considered as income or resources or otherwise used as the basis for denying or reducing—

(1) any financial assistance or other benefit to which any individual described in paragraph (2), or the household of any individual, is otherwise entitled, or for which such individual or household is otherwise eligible, under the Social Security Act, or

(2) any other financial assistance, Federal benefit, or benefit under any program part or all of the funding for which is provided by the Federal Government to which such individual or household is otherwise entitled or for which such individual or household is otherwise eligible.

(d) SAVINGS CLAUSE.—No provision of section 2 or this section shall be construed as affecting the use or distribution of any funds described in section 2(b) which are not subject to this section.

SEC. 4. MEMBERSHIP ROLLS REQUIRED TO BE BROUGHT UP TO DATE.

Before the end of the -month period beginning on the date of the enactment of this Act, the roll of members of the Lake Superior Band of Chippewas who are members of the Minnesota Chippewa Tribe shall be made current under procedures adopted by such Tribe and approved by the Secretary.

With the following committee amendment:

Strike all after the enacting clause and insert:

SECTION. 1. Notwithstanding any other provision of law, the funds appropriated for the following Indian Claims Commission judgments awards (less attorney fees and litigation expense and plus all investment income and interest accrued) shall be used and distributed under this Act:

(1) Docket 18-S for the Chippewas of Lake Superior;

(2) Docket 18-U for the Chippewas of Lake Superior; and

(3) Dockets 18-C and 18-T funds apportioned to the Lac Courte Oreilles Band of the Lake Superior Bands of Chippewa Indians of the Lac Courte Oreilles Reservation of Wisconsin, the Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, the Sokaogon Chippewa Community of the Mole Lake Band of Chippewa Indians, and the St. Croix Chippewa Indians of Wisconsin.

SEC. 2. (a) DIVISION OF DOCKET 18-S.—The Secretary of the Interior shall divide the amount for Docket 18-S with two-thirds of the funds for the Chippewas of Lake Superior and one-third for the Chippewas of the Mississippi.

(b) The respective shares of the Chippewas of Lake Superior in Docket 18-S shall be divided as follows:

(1) Bad River Reservation, Wisconsin, 1259/8437;

(2) Lac du Flambeau Reservation, Wisconsin, 832/8437;

(3) Lac Courte Oreilles Reservation, Wisconsin, 1,691/8437;

(4) Sokaogon Chippewa Community (Mole Lake Band), Wisconsin 187/8437;

(5) Red Cliff Reservation, Wisconsin, 645/8437;

(6) St. Croix Reservation, Wisconsin, 299/8437;

(7) Keweenaw Bay Indian Community (L'Anse, Lac Vieux Desert, and Ontonagon Bands), Michigan, 939/8437;

(8) Fond du Lac Reservation, Minnesota 1346/8437;

(9) Grand Portage Reservation, Minnesota 387/8437;

(10) Nett Lake Reservation (including Vermillion Lake and Deer Creek), Minnesota 704/8437; and

(11) White Earth Reservation, Minnesota 148/8437.

SEC. 3. DIVISION OF DOCKET 18-U.—The Secretary shall divide the amount for Docket 18-U funds among the reservations or communities and in the same proportions as in section 2(b) of this Act.

SEC. 4. USE OF THE FUNDS IN DOCKETS 18-S AND 18-U.—Until part or all of them are needed for use or distribution under a plan of the governing body of the reservation or community that has been approved by the Secretary, the Secretary shall continue to hold in trust in separate accounts and invested under section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) the funds under sections 2 and 3 of this Act apportioned to each of the following:

(1) the Lac Courte Oreilles Reservation, Wisconsin;

(2) the Bad River Reservation; and

(3) the Sokaogon Chippewa Community (Mole Lake Band).

(b) The apportioned share of the funds under sections 2 and 3 of this Act of each reservation or community, except those in subsection (a) of this section, shall be used as follows:

(1) Eighty percent of each reservation's share (fifty percent of the Keweenaw Bay Indian Community) shall be held and administered by the Secretary for per capita distribution and the sums (including the investment income accrued) shall be distributed in a sum as nearly equal as possible for each individual born on or prior to and living on the date of enactment of this Act who is enrolled in the respective tribal membership roll brought current to such date of enactment under tribal enrollment procedures.

(2) Twenty percent of each reservation's share (fifty percent in the Keweenaw Bay Indian Community) shall be held in trust in separate accounts for the tribal organization of the reservation and invested by the Secretary under the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) until needed for use or distribution under the tribe's plan approved by the Secretary.

(3) The per capita distributions under this subsection from funds apportioned to reservations or communities of the Minnesota Chippewa Tribe shall only be made to those individuals enrolled with the historical band designation for which the award was made. Plans submitted by two or more of the reservation business committees of the Minnesota Chippewa Tribe may include joint investment and use programs.

SEC. 5. DIVISION OF DOCKETS 18-C AND 18-T.—Notwithstanding another law, the previously apportioned shares of the funds awarded by the Indian Claims Commission in Dockets 18-C and 18-T shall be distributed and used as follows:

(a)(1) Until part or all of them are needed for use or distribution under a tribe's plan approved by the Secretary, the Secretary shall continue to hold in trust in separate accounts and invested under section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) the funds under this section apportioned to each of the following tribes:

(A) the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of the Lac Courte Oreilles Reservation of Wisconsin;

(B) the Bad River Band of Lake Superior Tribe of Chippewa Indians of the Bad River Reservation; and

(C) the Sokaogon Chippewa Community of the Mole Lake Band of Chippewa Indians.

(2) If a tribe's plan under this subsection provides for a per capita distribution, the Secretary shall pay a per capita share to each individual born on or prior to and living on the date of the Secretary's approval of the plan and who is enrolled on the respective tribal membership roll brought current to such approval date under tribal enrollment procedures.

(b) Funds apportioned to the St. Croix Chippewa Indians shall be used as follows:

(1) Eighty percent shall be distributed by the Secretary in a sum as equal as possible to each individual born on or prior to and living on the date of enactment of this Act and who is enrolled in the tribe's roll brought current to such date of enactment under tribal enrollment procedures.

(2) Twenty percent shall be used in a land purchase or interest in land for the benefit of the four tribal communities. These funds shall continue to be held and invested by the Secretary under section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) until the tribal governing body develops specific program plans and tribal budgets, which shall be subject to approval by the Secretary.

SEC. 6. MISCELLANEOUS.—The per capita shares under this Act of competent adults shall be paid directly to them. The per capita shares under this Act of deceased individual beneficiaries, legal incompetents, and minors shall be determined and distributed under regulations prescribed by the Secretary which are generally applicable to funds distributed under the Act of October 19, 1973 (87 Stat. 466), as amended (25 U.S.C. 1401 et seq.).

(b) None of the funds distributed per capita or held in trust shall be subject to Federal or State income taxes or be considered as income or resources in determining the extent of eligibility for assistance under the Social Security Act or other Federal Assistance programs.

(c) Amounts remaining after per capita payments under this Act shall revert to the governing body of the respective tribals group for program purposes approved by the Secretary.

(d) No person shall be entitled to receive under this Act more than one per capita share from the same docket award.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to provide for the use and distribution of funds appropriated in satisfaction of judgment awarded to the Chippewas of Lake Superior in Dockets Numbered 18-S, 18-U, 18-C and 18-T before the Indian Claims Commission, and for other purposes."

A motion to reconsider was laid on the table.

MISSISSIPPI BAND OF CHIPPEWA INDIANS IN MINNESOTA DISTRIBUTION OF JUDGMENT FUNDS ACT

The Clerk called the bill (H.R. 1904), to provide for the use and distribution of funds appropriated in satisfaction of judgment awarded to members of the Mississippi Band of Chippewa Indians who are members of the Minnesota Chippewa Tribe in Docket Num-

bered 18-S before the Indian Claims Commission, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 1904

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Mississippi Bank of Chippewa Indians in Minnesota Distribution of Judgment Funds Act".

SEC. 2. ABROGATION OF ANY PRIOR PLAN TO THE EXTENT SUCH PLAN RELATED TO MEMBERS OF THE MISSISSIPPI BAND OF CHIPPEWA INDIANS WHO ARE MEMBERS OF THE MINNESOTA CHIPPEWA TRIBE.

(a) PLAN FOR DISTRIBUTION FOR MEMBERS OF BAND WHO ARE ENROLLED IN THE MINNESOTA CHIPPEWA TRIBE.—Notwithstanding the Act entitled "An Act to provide for the use and distribution of funds appropriated in satisfaction of certain judgments of the Indian Claims Commission and the United States Court of Claims, and for other purposes," and approved October 19, 1973 (25 U.S.C. 1401 et seq.) or any plan prepared or regulation promulgated by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") pursuant to such Act, the judgment funds described in subsection (b) shall be used and distributed in the manner provided in this Act.

(b) JUDGMENT FUNDS DEFINED.—The judgment funds referred to in subsection (a) are—

(1) the funds consisting of one-third of the amount appropriated in satisfaction of judgment awarded the Lake Superior and Mississippi Bands of Chippewa Indians in Docket Numbered 18-S before the Indian Claims Commission (other than funds appropriated for the payment of attorney fees or litigation expenses) which are held in trust by the Secretary for the use and benefit of such Bands of Chippewa Indians, and

(2) the amount of any interest or investment income accrued or accruing (on or before any distribution by the Secretary under this Act) on such funds.

SEC. 3. DIVISION AND DISTRIBUTION OF FUNDS AMONG RESERVATION COMMUNITY GROUPS.

(a) DIVISION AMONG RESERVATION COMMUNITY GROUPS IN MINNESOTA.—The Secretary shall divide the funds described in section 2(b) among the community groups of the Mississippi Band of Chippewa Indians affiliated with the reservations in the State of Minnesota which appear in the following list by multiplying such amount by the fraction appearing in the list in connection with each such group:

(1) Mille Lacs Reservation, 569/7,624;

(2) White Earth Reservation, 6,431/7,624; and

(3) Leech Lake Reservation, 624/7,624.

(b) DISTRIBUTION OF FUNDS.—

(1) 20 PERCENT DISTRIBUTED TO EACH COMMUNITY GROUP FOR USE AT THE GROUP LEVEL.—Of the amount determined under subsection (a) for each reservation community group described in such subsection, 20 percent of such amount shall be made available to the appropriate governing body of such group for expenditure for programs approved by the Secretary.

(2) 80 PERCENT DISTRIBUTED PER CAPITA.—Of the amount determined under subsection (a) for each reservation community group described in such subsection, 80 percent of such amount shall be distributed in amounts as equal as possible to enrolled members of the Minnesota Chippewa Tribe who—

(A) are designated as members of the Mississippi Band of Chippewa Indians and are affiliated with such group, and

(B) were born on or before the date of the enactment of this Act and are living on such date.

(3) PROCEDURES FOR PER CAPITA DISTRIBUTION.—The amount determined under paragraph (2) for each individual described in such paragraph shall be paid or distributed as follows:

(A) LIVING COMPETENT ADULTS.—If the individual is a living competent adult, the amount so determined shall be paid directly to such individual.

(B) LIVING MINOR CHILDREN AND LEGALLY INCOMPETENT ADULTS.—If the individual is a living minor child or legally incompetent adult, the amount so determined shall be treated in the same manner as any trust property of such individual is treated.

(C) DECEASED INDIVIDUALS.—If the individual is deceased at the time of distribution, the amount so determined shall be treated in the same manner as any trust property of such individual would be treated if such individual died intestate.

(c) TAX TREATMENT OF DISTRIBUTIONS.—No amount of any payment or distribution under this section shall be included in gross income of the payee or distributee for purposes of any Federal or State income tax. Payments or distributions may not be considered as income or resources or otherwise used as the basis for denying or reducing—

(1) any financial assistance or other benefit to which any individual described in paragraph (2), or the household of any such individual, is otherwise entitled, or for which such individual or household is otherwise eligible, under the Social Security Act, or

(2) any other financial assistance, Federal benefit, or benefit under any program part or all of the funding for which is provided by the Federal Government to which such individual or household is otherwise entitled or for which such individual or household is otherwise eligible.

SEC. 4. MEMBERSHIP ROLLS REQUIRED TO BE BROUGHT UP TO DATE.

Before the end of the -month period beginning on the date of the enactment of this Act, the roll of members of the Mississippi Band of Chippewas who are members of the Minnesota Chippewa Tribe shall be made current under procedures adopted by such Tribe approved by the Secretary.

With the following committee amendment:

Strike all after the enacting clause and insert:

Section. 1. Notwithstand any other provision of law, the funds appropriated for the Indian Claims Commission judgment awards in Docket 18-S for the Chippewas of the Mississippi (less attorney fees and litigation expense and plus all investment income and interest accrued) shall be used and distributed under this Act.

SEC. 2. The Secretary of the Interior shall divide the amount for Docket 18-S with two-thirds of the funds for the Chippewas of Lake Superior and one-third for the Chippewas of the Mississippi. The respective shares of the Mississippi Band in Docket 18-S shall be divided by reservation affiliation as follows:

(1) Mille Lac Reservation, Minnesota 569/7624;

(2) White Earth Reservation, Minnesota 6431/7624; and

(3) Leech Lake Reservation, Minnesota 624/7624.

SEC. 3. The apportioned shares of funds under section 2 of this Act of each reservation or community shall be used as follows:

(1) Eighty percent of each reservation's share shall be held and administered by the Secretary for per capita distribution and the sums (including the investment income accrued) shall be distributed in a sum as nearly equal as possible for each individual born on or prior to and living on the date of enactment of this Act who is enrolled on the respective tribal membership roll brought current to such date of enactment under tribal enrollment procedures.

(2) Twenty percent of each reservation's share shall be held in trust in separate accounts for the tribal organization of the reservation and invested by the Secretary under the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) until needed for use or distribution under the tribe's plan approved by the Secretary.

(3) The per capita distributions under this section from funds apportioned to reservations or communities of the Minnesota Chippewa Tribe shall only be made to those individuals enrolled with the historical band designation for which the award was made. Plans submitted by two or more of the reservation business committees of the Minnesota Chippewa Tribe may include joint investment and use programs.

SEC. 4. (a) MISCELLANEOUS.—The per capita shares under this Act of competent adults shall be paid directly to them. The per capita shares under this Act of deceased individual beneficiaries, legal incompetents, and minors shall be determined and distributed under regulations prescribed by the Secretary which are generally applicable to funds distributed under the Act of October 19, 1973 (87 Stat. 466), as amended (25 U.S.C. 1401 et seq.).

(b) None of the funds distributed per capita or held in trust shall be subject to Federal or State income taxes or be considered as income or resources in determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

(c) Amounts remaining after per capita payments under this Act shall revert to the governing body of the respective tribal group for program purposes approved by the Secretary.

(d) No person shall be entitled to receive under this Act more than one per capita share from the same Docket award.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to provide for the use and distribution of funds appropriated in satisfaction of judgments awarded to the Chippewas of the Mississippi in Docket Numbered 18-S before the Indian Claims Commission and for other purposes."

A motion to reconsider was laid on the table.

TRANSFER TO COLVILLE BUSINESS COUNCIL OF AMOUNTS AWARDED THE CONFEDERATED TRIBES OF THE COLVILLE RESERVATION

The Clerk called the bill (H.R. 2174), to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgments awarded the Confederated Tribes of the Colville Reservation before the Indian Claims Commission.

There being no objection, the Clerk read the bill as follows:

H.R. 2174

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TRANSFER OF CERTAIN UNDISTRIBUTED JUDGMENT FUNDS TO THE COLVILLE BUSINESS COUNCIL.

(a) TRANSFER OF UNDISTRIBUTED AMOUNTS TO GOVERNING BODY OF THE TRIBE.—Notwithstanding the Act entitled "An Act to provide for the use and distribution of funds appropriated in satisfaction of certain judgments of the Indian Claims Commission and the United States Court of Claims, and for other pruposes," and approved October 19, 1973 (25 U.S.C. 1401 et seq.) or any plan prepared or regulation promulgated by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") pursuant to such Act, any portion of the funds appropriated in satisfaction of judgments awarded the Confederated Tribes of the Colville Reservation (hereinafter in this section referred to as the "Tribe") in Dockets Numbered 161, 222, and 224 before the Indian Claims Commission which, on the date of the enactment of this Act, is held in trust by the Secretary for the benefit of the Tribe shall be transferred by the Secretary to the Colville Business Council.

(b) TRANSFER OF INTEREST, ETC., ACCURED ON FUNDS.—Any amount held by the Secretary on the date of the transfer required under subsection (a) which is attributable to interest or investment income accured or accuring on the funds described in such subsection on or before such date shall be transferred by the Secretary to the Colville Business Council.

(c) USE OF TRANSFERRED FUNDS AUTHORIZED FOR TRIBAL PURPOSES.—Amounts transferred under subsection (a) shall be used for purposes which—

(1) the Colville Business Council determines benefit the Tribe, and

(2) the Secretary of the Interior approves.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER pro tempore. This concludes the call of the eligible bills on the Consent Calendar.

GENERAL LEAVE

Mr. GORDON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

A LESSON FOR US ALL

(Mr. ROWLAND of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Georgia. Mr. Speaker, last Wednesday the entertainment industry lost one of its finest stars when Rock Hudson finally lost his battle to AIDS. I speak briefly here today about a lesson that we all can learn from Mr. Hudson's stuggle these last months. During this time, he was able to accept the nature of his disease and its inevitable outcome.

Rather than clinging to false hope and enduring unnecessary hospital procedures, he spent his last days in peace in his own home with the support of his friends. We should all learn that modern medicine and the high technology available in hospitals cannot cure every disease. In the case of terminal diseases, the best place for the care of the dying patient mas be in the bosom of his family at home. Rather than being subjected to institutional care, these patients need to feel the love and affection of friends and family in familiar surroundings, as they pass through this final phase of life. I believe that humans do not fear death, but rather fear the process of dying, which is an unknown experience.

Rock Hudson's ability to deal with his death should be one lesson we learn from his life.

IN SUPPORT OF BALANCED BUDGET LEGISLATION

(Mr. SAXTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAXTON. Mr. Speaker, I rise to express my strong support of the Balanced Budget and Emergency Deficit Control Act of 1985, being introduced today by the gentleman from Florida. I am pleased to be a cosponsor of this important legislation.

I have long maintained that the responsible way to reduce our Federal deficits was to estabish deficit reduction targets over a 5-year period, leading to a balanced budget.

In fact, earlier this year, I introduced a balanced budget amendment with similar phase-in provisions.

My bill, House Joint Resolution 267, waives balanced budget requirements in times of war or national emergency. But it also allows for re-implementation of the phase-in, should we emerge from such a situation with another deficit.

But for the moment, I would rather focus in on the similarities between House Joint Resolution 267, and the bill being introduced today. Both contain important phase-in provisions.

We all know that the budget can't be balanced in 1 or 2 years. That would require either the gutting of even the most worthy programs, or a major tax increase—or both.

But we can set a course to follow which, over 5 years, will lead us to a balanced budget. The emergency deficit control act sets that course.

It is bipartisan legislation which deserves the attention and support of everyone in this body.

BALANCING THE BUDGET

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, a proposal to balance the budget by 1991 has been subject to much debate in the other body over the weekend. The proposal is expected to be added as an amendment to the debt ceiling bill.

The plan would require the President and the Congress to keep their budgets within fixed amounts aimed at eliminating the deficit by 1991. If the joint effort fails, the President would be required to make across-the-board cuts to bring spending within fixed limits.

Authority for the President to make cuts in annual adjustments from benefit entitlement programs would exclude Social Security benefits, but no others.

If any balanced budget plan is to succeed, Mr. Speaker, no program can be exempt from cuts that may have to be made. All benefit programs must be treated equally. I'm not opposed to making an exception for Social Security beneficiaries, but if we do, we will have to make an exception for veterans as well.

Are we going to exclude any entitlement program and cut benefits for veterans who receive compensation for loss of limbs in World War II or who are paralyzed from the neck down because of gunshot wounds from service in Vietnam? I think not. I urge the leadership of the House to make certain that the proposal developed in this body does not attempt to balance the budget on the backs of our service-connected veterans. Veterans are willing to assume their share of the burden as long as it is placed equally upon all Federal programs and beneficiaries.

As one who has long advocated a balanced budget, I will support the House leadership's effort to help bring about a balanced budget, but my colleagues should know that the Senate proposal would treat veterans unfairly.

According to the Congressional Budget Office, if the proposal in the

Senate were implemented in fiscal year 1986, all 2.2 million veterans and all 300,000 of their survivors would lose at least 3 percent of their compensation and DIC benefits. By 1991, they would lose more than 20 percent of their benefits.

The Senate proposal would affect pension payments to needy, elderly, and disabled veterans and their survivors. All 676,000 veterans drawing compensation and all 71,000 of their survivors would be adversely affected.

Finally, Mr. Speaker, the veterans medical care program and its medical research program would suffer a severe cut—$320 million in medical care would be lost in the first year. Most of this cut would come from a reduction of medical personnel staff in VA hospitals and nursing homes. Again, accordingly to the Congressional Budget Office, a cut of this magnitude could mean a loss of 11,000 personnel in the first year in which the proposal is implemented. This would be 23 percent of all doctors, nurses, psychologists, and dentists now employed in the VA medical program.

Mr. Speaker, authors of the amendment in the other body should not put the Congress in the position of giving any group of individuals a higher priority than America's veterans. The Vietnam war ended a little more than 10 years ago. How quickly some people forget.

SAME OLD FARM BILL—NEW GIFT WRAPPING

(Mr. DAUB asked and was given permission to address the House for 1 minute and to extend his remarks.)

Mr. DAUB. Mr. Speaker today we are scheduled to cast a vote on final passage of the farm bill. The last time we did that was my first year in the House of Representatives. Unfortunately, the 1985 bill looks like a rerun of the 1981 bill.

What we have is the same old bill in new gift wrapping.

The 1981 bill with its rigid loan rate structure made mounting surpluses almost a certainty. It told our competitors in advance how much to plant and how much of our markets they can take. As a result, exports have fallen and the American farmer is swimming in a sea of grain.

Argentina, Paraguay, and Uruguay have 215 million acres of very fertile soil which are as yet unplowed. This is nearly half of all cropland in the United States. The bill we have before us is a signal to those countries to start up their plows.

We can't take much more of this kind of policy. An amendment I supported would have moved exports with competitive prices and targeted benefits to medium family farmers. Unfortunately it was rejected.

Failing a sensible farm bill, perhaps the most important vote for the farmer will be on the emergency deficit control of 1985 which I am introducing today with 97 of my colleagues. It mandates a balanced budget in 5 years. Substantially reduced spending will mean declining interest rates and a more realistic dollar value. The sooner we get spending under control, the sooner the farmer will see his commodities become more competitive overseas, his cost of production drop and the farm economy improve.

□ 1215

TINKER BELL TO THE RESCUE

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, over the weekend the chairman of the House Armed Services Committee released a study showing that despite $1 trillion in defense spending in the past few years there has been little gain in military capability. In some areas, we have even declined.

At the same time, there is a proposal afoot to mandate a balanced budget via the debt ceiling resolution. The mandate would exclude, among other things, 40 percent of the defense budget. Some mandate.

We spend $1 trillion on defense and have nothing to show for it. Then we are told we will balance the budget by exempting defense. I don't know whether this is "Peter Pan" or "Alice in Wonderland." I do know it's not the real world.

Yesterday the Denver Post described this balanced budget mandate as "the phoniest of this year's attempts to distract from the truth."

Amen.

GENERAL LEAVE

Mr. GRAY of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2698, the first bill on the Consent Calendar which was just passed.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from Illinois?

There was no objection.

CANADA TRADE TALKS

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, recently, Canadian Prime Minister Brian Mulroney announced his Government's decision to enter bilateral trade negotiations with the United States seeking "the broadest possible package on mutually beneficial reductions in tariff and nontariff barriers between the two countries."

I salute this action as an exemplary example of the ability of countries to work together to solve the trading problems of North America. The United States-Canada trading relationship is the largest in the world. Last year, the two-way trade totaled more than $120 billion, with Canada enjoying a surplus of roughly $16 billion on a balance-of-payments basis. Canada accounts for more than 21 percent of all United States exports, while we take some three-quarters of Canadian exports.

I recently traveled to Toronto with the Steel Caucus to discuss United States-Canadian trade imbalances and various inequities in our trading relationship. Among other points brought out at these meetings was the disparity in the tariff levels for United States and Canadian steel exports to the neighbor country.

It was also made clear in our meetings that Canada and the United States share additional problems in the trading arena. Solutions to these problems should be a joint effort between our countries. As Prime Minister Mulroney stated, "We need a better, a fairer and a more predictable trade relationship" between our countries. I applaud his decision to voluntarily enter these trade talks and ask my colleagues and the administration to support Canada's action in a spirit of partnership and cooperation.

A TRIBUTE TO COACH EDDIE ROBINSON

(Mr. DYMALLY asked and was given permission to address the House for 1 one minute and to revise and extend his remarks.

Mr. DYMALLY. Mr. Speaker, with less fanfare than was deserved, a sports milestone was passed Saturday at the Cotton Bowl when Coach Eddie Robinson's Grambling State University beat Prairie View A&M University 27 to 7. Pro football greats Willie Davis and Willie Brown members of the Hall of Fame, were on the sidelines to see it happen. So was Tank Younger, the first pro football player from a black school. Coach Robinson once coached them as he has coached more than 200 players who have gone on to pro football. Saturday night was the 324th time Eddie Robinson had coached Grambling State to victory. That makes Eddie Robinson the winningest coach in the history of football.

The win came too late at night for Eddie to receive an immediate congratulatory call from the President. That came Sunday. But Eddie probably was just as happy. He had a 4-hour bus

ride back to Grambling State ahead of him that evening, and he had to start planning for the upcoming game against Tennessee State.

Coach Robinson is a humble man. And characteristically he apologized to his team for becoming the center of attention. Of his Bear Bryant-surpassing 324th win he said, "That's not the record. Forty-four years at the same school, one job and one wife, that's the record." Coach Robinson, you are a record breaker in anyone's book. My friend Representative HAYES and I know that all our colleagues in the Congress join us in congratulating you on your spectacular accomplishment. May the next 44 years be as winning as the last 44.

EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. CHANDLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHANDLER. Mr. Speaker, there isn't a man or woman in this body who isn't committed to reducing the deficit, yet year after year out failure to come to terms with this problem adds to the unconscionable debt we are leaving to future generations.

Clearly, something must be done.

Clearly, business-as-usual isn't going to solve the problem.

That's why I've joined with a number of our colleagues in supporting a measure that would create a framework that will get the job done. Unlike many budget balancing proposals, this one has teeth in it.

The Emergency Deficit Control Act of 1985 would trigger mandatory across-the-board spending reductions if the President and the Congress fail to bring down spending.

It's simple; it's honest and it will do the job.

Mr. Speaker, we owe it to our constituents, and more importantly to our children and grandchildren, to enact the Emergency Deficit Control Act and to get our Nation's financial affairs in order.

FOOD IRRADIATION

(Mr. PRICE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE. Mr. Speaker, to help eliminate world hunger, and for a variety of other benefits nationally and internationally, I have been proud on past occasions to cosponsor with several of my colleagues proposed legislation supporting the development of beneficial commercial application of food irradiation to extend the shelf life of foods. This process will avoid any need to use potentially harmful fumigants, will destroy damaging insects, and kill undesirable organisms such as trichinae in pork which cause the disease trichinosis in humans.

H.R. 696, introduced in January 24 of this year, was the most recent bill I cosponsored on this subject.

Last Thursday, I introduced H.R. 3504, a somewhat revised version of H.R. 696, which contains several minor revisions and two substantive changes to H.R. 696 that I believe contribute to the principal objectives of that bill. One significant change is the elimination of the concept of establishing a new Commission within the Department of Agriculture. The bill I introduced last Thursday, H.R. 3504, does not disturb the authorities and functions now in the various Federal agencies that presently have responsibilities in this field; instead, the bill would expressly assign a coordinate role of the Subcommittee on Interagency Radiation Research and Policy Coordination of the Federal Coordinating Council for Science, Engineering, and Technology—an entity already in existence pursuant to applicable law.

The second significant change would leave undisturbed the balancing of criteria for fixing charges for byproduct material, which has been in effect since the 1954 Atomic Energy Act. Section 81 of that act provides in effect that for byproduct material distributed by DOE for a charge, the prices shall be established on such equitable basis as, in DOE's opinion: First, will provide reasonable compensation for such material; Second, will not discourage the use of such material or the development of sources of supply of such material independent of DOE; and third, will encourage research and development.

As in the cae of H.R. 696, this legislative measure is long overdue. Over the past 40 years, food irradiation has been studied more carefully than any other food preservation method. Many other countries are already using the irradiation technique, by research in this country. We need to move forward with the precedent measures espoused in this bill.

THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. BOULTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOULTER. Mr. Speaker, last Tuesday the United States passed another milestone, and it was a milestone we would all rather have avoided. Last Tuesday, at 12:01 a.m. fiscal year 1986 began with an inexcusable $2 trillion plus national debt.

Mr. Speaker, we have heard on this floor speech after speech after speech on the need to reduce the deficit, and balance the books. I think we all agree. No one, to my knowledge, supports an unbalanced budget.

But what, after all this jabber, has actually been done? Very very little. Until now. Now, we finally have the opportunity, spelled out in detail, to adopt a simple piece of legislation that will provide our Nation with what it wants, and desperately needs—a balanced budget by 1991. The Balanced Budget and Emergency Deficit Control Act of 1985 will do that.

There is no excuse, that I can see, for any Member of this body not to support this legislation. It is clear, to the point, and result-oriented. Beyond the rhetoric, beyond the lipservice, and beyond the political mudslinging involved in the budget debate—this legislation is real. It will provide long-term stability to financial markets, help reduce our swollen trade deficit, and allow the American people and our children the economic opportunities they deserve. I urge my colleagues to support this landmark legislation and am proud to be an original cosponsor.

SENATE BUDGET PLAN FLAWED

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. APPLEGATE. Mr. Speaker, according to Sunday's CONGRESSIONAL RECORD, the other body is considering a proposal to balance the Federal budget by 1991 by adding an amendment to the debt ceiling bill. The CONGRESSIONAL RECORD reports the amendment being offered would cut veterans' compensation and pension by more than 20 percent by 1991 as well as 23 percent of all doctors, nurses, and dentists now in the VA medical care system.

As chairman of the Subcommittee on Compensation, Pension and Insurance of the Veterans, Affairs, Committee, I feel obligated to let my colleagues know about this.

Social Security would get COLA's and disabled veterans would not. Don't the men who fought our wars deserve the same consideration as citizens who earned Social Security? I want you to know that if this happens, every dollar of Social Security increase a veteran or widow pensioner gets will be taken out of his VA pension.

Remember before 1979 how we each got thousands of letters complaining that what the Government gives with one hand in Social Security, it takes away with the other hand from VA pension? We changed the law so that Social Security COLA's would not cost a disabled veteran. Now the other body may propose going back to cutting veterans checks when they get a Social Security increase.

In the interest of fairness, we must deal with our citizens on an even-handed basis. What's fair for social security is fair for veterans. Give one a COLA, give the other a COLA. Deny one a COLA, deny the other, also.

I make these comments so that you will know and understand what would happen to veterans if their payments are capped but give full COLA's to Social Security. We will have some hard choices in dealing with the budget. I just hope when we make those choices, we do so knowing what the results will be. I am not willing to balance the budget on the backs of our disabled veterans.

LET US HEED THE WORDS OF CICERO, THE PROPHET

(Mr. COBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBLE. Mr. Speaker, I rise today in support of the Balanced Budget and Emergency Deficit Control Act of 1985. Cicero reprotedly addressed the Roman Senate just before the fall of Rome with these words of admonition:

> The budget should be balanced, the treasury should be replenished, the public debt should be reduced, the arrogance of the governors should be tempered and controlled, foreign aid should be restrained lest the threat of falling into bankruptcy, the populace should be obliged to work and not depend on the government for its sustenance.

These words were prophetic, and they are equally prophetic nearly 2,000 years after they were spoken.

The necessary ingredient that must be identified and exercised, Mr. Speaker, is discipline. This is the ship that can take us past the reefs and the shoals of reckless and fiscal irresponsibility.

Are we disciplined enough to climb aboard?

I thank the Speaker.

LET US CONSTRAIN OURSELVES, NOT BLAME OTHERS

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, $2 trillion is a trivial sum. I am sure that the Congress of the United States, if it really tried, could raise that national debt to $3 trillion by the next Congress, and all it has to do is continue down the path it has already hewn for itself and to continue on the spending programs and expansionist spending programs we have seen for the last decade. But it does no good for anyone to stand in this well and to blame the administration or anybody else for the events that have transpired. It is the Congress itself that is to blame for where we find ourselves today, and we must put constraints on ourselves and not put the blame on the White House or any other administration, past or future, for the situation.

So we are going to enter into a routine matter today of raising that national debt, and I am going to support it. We must support it.

But when we do so, we owe it to ourselves and to the American public to at least attach to it some semblance of a mechanism that will bring us back to reality and to respond to the American people's desire to curb spending and to reduce that deficit.

Oh, yes, we are going to raise the debt today, but let us raise the hopes of the American people that we are going to do something about it in the near future.

I thank the Speaker.

WE SHOULD COMBAT THE DEFICIT THROUGH PRUDENT SPENDING REDUCTIONS AND EQUITABLE TAX INCREASE

(Mr. FAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAZIO. Mr. Speaker, today the U.S. Treasury bumps up against its ability to borrow. The House, having acted in a timely manner, now awaits action by the other body. But a number of their Members are so fixated on the symbolism of raising the debt ceiling that they have been blinded by the real tangible fiscal impact delay will bring. It would be well for the Senators to keep in mind that delay itself has a cost right now to the taxpayers of this country. We all know that Treasury must inevitably go into the credit markets and borrow funds to meet our legal obligations, much of which are contract obligations with the private sector. According to one published report, the Treasury will have to borrow over $50 billion in the last quarter of this calendar year. The same people who wail about the squeeze this $2 trillion debt will have on interest rates are the same people who are leading the delay in the extension of the debt ceiling, jacking up rates even more today as we delay.

□ 1230

Why? Because the more we delay the increase in the debt ceiling, the shorter the period the Treasury will have to borrow these large sums; and that will drive the interest the Federal Government needs to offer in order to market so much debt in so short a period of time higher still.

The higher interest the Government offers will very likely drive up the interest rate in general, so the taxpayers get slammed twice. First, they will have to pay the higher than required interest to the lender sometime in the future through higher taxes. In addition, consumers who need to purchase goods will have to pay more in personal interest payments now.

We need to combat the deficit through prudent spending reductions. We do not need rhetorical sparring. Let us get on with our job of paying the bills we have already incurred.

THE FEDERAL BUDGET

(Mr. SWINDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SWINDALL. Mr. Speaker, before being sworn into this august body, someone described Washington, DC, to me as being 67 square miles surrounded by reality. After serving 9 months in this body, I have now come to the realization that his description was not intended to be tongue-in-cheek.

The fact that we spent more time debating what should be done in South Africa an issue over which we have little control than we did on our own budget confirms this fact. In reality this body has deliberately chosen to avoid addressing the deficit crisis in this country head on.

My colleagues will have an opportunity this week to demonstrate that this body is serious about doing something other than talk about deficit reduction.

My colleagues, who bring out these charts and are already trying to shoot holes into a proposal that will put teeth into the very budget we recently passed, recognize that it is the appropriations process, rather than the budget process, that can, in fact, reduce the deficits which are threatening to end our present economic recovery.

My point to the American people, Mr. Speaker, is this: It is very apparent that unless we pass the Emergency Deficit Control Act of 1985, thus putting necessary enforcement mechanisms into the appropriations process, it will be obvious that our recently passed concurrent budget resolution is little more than a fraud on the American people. In short, we have the opportunity to live up to our word and stick by the deficit targets for which we ourselves voted 2 months ago.

The American people are fed up with deficit reduction rhetoric that does not match this body's actions. We have an opportunity this week to match our actions with our rhetoric. I hope that this body will demonstrate the type of resolve which the American people demanded in the November 1984 elections.

CONSTITUTIONAL WIMPS

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONIOR of Michigan. Mr. Speaker, constitutional wimps are at it again.

First, some abandoned the duties given us by the Founding Fathers over the conduct of foreign policy. Now, some want to pass the buck on the deficit as well.

The President is to be given unprecedented control over the Federal budget. This House, the supreme body of the people, was not elected to cut press releases while leaving it to someone else to cut the budget.

How can we return to the people and say that we did not have the guts to face one of the preeminent tasks of our time. That we did not have the guts to live up to the responsibilities given to us by our Constitution.

THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT

(Mr. COMBEST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COMBEST. Mr. Speaker, recently, our Nation marked a milestone that is an historic low point in our fiscal and economic history. The fact that years of excess spending has forced the national debt beyond $2 trillion is both outrageous and inexcusable. This huge debt threatens to stop all economic growth and bankrupt our entire economy.

I don't think it is possible to overemphasize the danger by a debt of this magnitude. Today, legislation is being introduced that will force Congress to balance the Federal budget by 1991 and bring to a halt the annual addition of billions of dollars to the national debt.

The Balanced Budget and Emergency Deficit Control Act is a reasonable and realistic approach to finally eliminating our ever-increasing budget deficit. Recent history tells us that bold steps must be taken if we are ever to solve this problem. This bill is exactly such a step.

I am an original cosponsor of this measure and I urge all of my colleagues to join in a bipartisan effort to bring fiscal responsibility to the Federal Government by supporting this bill. The American people deserve a workable, hard-hitting program to bring a halt to these unending deficits and our future generations deserve to live in this country without being overcome by our excesses.

EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. MILLER of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of Washington. Mr. Speaker, I rise as a sponsor of the Emergency Deficit Control Act of 1985.

Last spring and summer, this body huffed and puffed at the Federal deficit, but that is about all we did. We ended up not with major deficit reduction but with budget by press release.

So next year, the average American family of four will pay $34 a week just to pay off the interest on the national debt. And that interest will consume an amount equal to 40 percent of the individual income taxes paid in our Nation.

Now along comes a deficit reduction proposal that offers an answer. It is not perfect. But it imposes some discipline on this body. It gets us from here to there. It brings the budget into balance over the next 5 years.

Let us do something constructive about the deficit now so that 10 years from now this land of opportunity is not turned into a land of misery. Let us vote for the Emergency Deficit Control Act of 1985.

COACH EDDIE ROBINSON

(Mr. HAYES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYES. Mr. Speaker, I appreciate the opportunity and privilege to join with my colleague, the gentleman from California [Mr. DYMALLY], in recognizing the achievement reached just last Saturday by Coach Robinson from Grambling University.

Mr. Speaker, in 1941, when Eddie Robinson began coaching football, no one had any idea that he would one day become the winningest college football coach of all time. All Eddie Robinson knew was that he had fulfilled a lifelong dream by becoming a football coach. He was the first and only coach that Grambling University, then known as Lousiana Negro Normal College and Industrial Institute, has ever had.

Well it seems as if Grambling University knew what kind of a coach Eddie Robinson would be. Because 45 years, 324 victories, 13 Southwest Athletic Conference championships, and over 200 professional football players later, Eddie Robinson and Grambling both have much to be proud of. Not only has he coached such notable NFL stars as Willie Davis, Willie Brown, and Charlie Joiner, but 95 percent of his players have eventually received their college degrees.

Eddie Robinson has said that records were never his goal, that he just wanted to make a contribution the way that other famous coaches like Stagg and Warner and Bryant did. Well, Eddie Robinson has more than made a contribution. He has won more football games than any other college football coach in history, and along the way he has set a standard of excellence that no one could have predicted, but that will be cherished forever.

THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. GOODLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOODLING. Mr. Speaker, today I join my colleagues in being an original cosponsor of a bill which will, hopefully, help put both Houses of Congress in order. This year I have become a member of the Budget Committee and had my vision unfavorably expanded. We are all guilty of abusing our power and overspending the taxpayers hard earned money. This bill which legally binds us to a debt ceiling and culminates in a balanced budget by the year 1991, will allow us to redeem ourselves before our constituency. We are too easy on ourselves, we pass measures and pat ourselves on the back, we meet with lobbyists and promise them everything they want, we preside over hearings and committee meetings and proclaim our jurisdictional programs deserving of more and more increases and we write our constituents letters of contempt for the burgeoning Federal deficit. We are hypocritical, Mr. Speaker, and this measure is giving us a second chance.

The Budget Committee members are busy now looking over the reconciliation packages sent by the various committees. It is a game. When a program is over the budget instructions, it is simply put off budget and not counted. This facade allows us to pass a deficit reduction package. If I sound angry and disgusted, it is because I am. I am frustrated at the constant rhetoric that is given in this hallowed Chamber and the real truth that is demonstrated by the votes on spending measures.

Today, I am given hope that this will no longer be the case. Today, I sense that we can act in the capacity we are honored to be put in by the American voters. We can be responsible, loyal, and dedicated to these people and manage the country out of bankruptcy. We must pass the Balanced Budget and Emergency Deficit Control Act of 1985.

THE DAMAGING COST TO NEW YORK STATE OF THE ELIMINATION OF DEDUCTING STATE AND LOCAL TAXES IN THE PRESIDENT'S TAX PROPOSAL

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, speaking on behalf of the entire New York delegation, I want to express my profound regrets that the President's tax proposal that has been offered eliminates the opportunity for residents of New York State or other States where State and local taxes are high to deduct them from their income tax returns as they have done over the years.

The general impression that has been made by the administration is that their tax reform really means lower taxes, that everybody is going to get a lower bracket. The impression is that you are going to go down to 35 percent or 25 percent or 15 percent instead of that 50-percent bracket that so many of us run up against.

But the fact of the matter is that, as long as this kind of provision is retained by legislation, it means that a lot of Americans are going to find that their taxes under this so-called tax reform program are going to be much higher than was the case before tax reform raised its head.

Let me point out to my colleagues the fact that in New York State the leaders on both sides of the political aisle are strongly opposed to the elimination of the deduction of State and local taxes. In fact, the very able Republican State comptroller of New York State, Hon. Ned Regan, not only has joined the opposition to the deletion of the traditional deduction for State and local taxes. He has done even more. He has calculated that in New York State the first year of the Reagan tax cut would cost New York taxpayers an additional $2.4 billion.

And even in succeeding years, New York would gain only a 1-percent tax cut, while the rest of the country would be getting a 7-percent cut. This is a devastating blow to New York State.

THE FEDERAL DEFICIT

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Mr. Speaker, the reason I became an original cosponsor of the Emergency Deficit Control Act mainly is because of the disastrous effects that the borrowed money and our Federal deficit is causing to our industry in this Nation. We are losing our jobs and our plants and our crafts offshore. If you have any doubts about the disastrous effects of bringing in that gold and silver from offshore, look at Spain in the 15th and 16th centuries. Before Spain put $2 on the dark horse named Christopher Columbus in 1492, Spain was the backwater of the old Roman Empire. But with the gold and silver from this New World flooding into Spain, her dollar became highly inflated, her currency was completely out of kilter. Spain lost her industry, lost her crafts. She became a hull of a nation. And when the gold and silver from offshore played out, Spain crashed, not to be heard of again.

Those who do not read history are doomed to repeat history is the preaching we have heard. America must control this offshore borrowing caused by a big Federal deficit. If we do not, we very well may be the Spain of the 20th century.

□ 1245

MEMBERS URGED TO SUPPORT SHORT-TERM DEBT EXTENSION

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, since entering the House, I have sponsored proposals to balance the budget by 1990. Today, the Gram amendment is pending before the other body. It represents a historic opportunity to move toward a balanced budget. It represents a historic change in our Nation's fiscal policies, and it represents a historic redefinition of the congressional and executive powers.

Mr. Speaker, it is clear, however, that no one, not even the major sponsors of this proposal have fully explained it to the American public and to the Members of Congress on either side of the political aisle. Serious questions remain. Fundamental choices lie before us on fairness, on priorities, and on our procedures. We need a commitment by the President and Congress; by Democrats and Republicans to reduce these deficits. There is enough blame to go around, and there is enough work for all of us to do if we are serious about getting the job done.

As someone who has fought for a balanced budget since I have been here for the last 3 years, I urge my colleagues to support a short-term debt extension so that we can work together to come up with the responsible legislation that we need to address this problem and require a balanced budget, statutorily, by 1990 or 1991.

SUPPORT URGED FOR BALANCED BUDGET AND DEFICIT CONTROL ACT

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTON of Texas. Mr. Speaker, the other body is currently considering the Balanced Budget and Emergency Deficit Control Act of 1985. I rise in the strongest possible support for this vital legislation.

This year, our national deficit will exceed the staggering sum of over $2 trillion. It took over 200 years for our Nation to reach its first trillion dollar deficit, and it has taken less than 7 years to get the second trillion. So far, we have been able to avoid the terrible effects of this huge debt because of our strong economy. But we cannot delude ourselves that we can continue to spend without any limits.

The recently concluded budget resolution efforts convinced me that the time has come for strong action. Despite the sincere efforts of many Members of Congress from both sides of the aisle, we have not been able to get our budget deficit under control. This last budget resolution that was passed in the House of Representatives contains a deficit reduction of theoretically $55 billion. In reality, it is going to be more in the range of $10 to $15 billion, and there is every probability that our deficit for the fiscal year that we are now in will be $200 billion.

The Balanced Budget and Emergency Deficit Control Act is an excellent means of forcing the Congress to make the necessary spending cuts. There is no doubt that this is strong action, but strong action is needed. Please support me and the 100 other Members who have already cosponsored this vital legislation.

LET US NOT REPLACE STAGNATION WITH STAMPEDE

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, in the last several weeks there has been a remarkable reversal of direction by the Reagan administration. First there was South Africa; the administration abandoned its claim that the only answer was "constructive engagement."

Next, the administration ended its do-nothing position on the huge trade deficit. Then the administration ended its long hybernation on the overvalued dollar. Now, the administration has abandoned its claim that America will grow out of record deficits. It is urging that we throw away the credit card that bears its own signature.

I welcome this latest administration reversal. The deficit indeed has represented and continues to represent an overriding threat to our economic stability and growth. It is so overriding that the remedy must be real and appropriate. It also must be swift. But we owe it to this country not to replace stagnation on the deficit with stampede.

THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT

(Mr. ARMEY asked and was given permission to address the House for 1

minute and to revise and extend his remarks.

Mr. ARMEY. Mr. Speaker, the Balanced Budget and Emergency Deficit Control Act is being debated on the floor of the other body even as I speak, and I can only pray that we have an opportunity to debate and pass this most important legislation. Although I'm new to this body, I'm not unfamiliar with the excesses which have led us to a doubling of our national debt in 5 short years. As the Congress considers raising our national debt limit to $2 trillion, it is most appropriate that we attach iron-clad deficit reduction language.

The Emergency Deficit Control Act is a straightforward approach to reducing spending. By establishing maximum levels for deficits for the next 5 years, and by empowering the President to enforce such levels, we can stop talking about cutting spending and start actually doing it.

I wish drastic actions like this weren't necessary; that Congress could exercise the fiscal responsibility the people demand. But the sad fact is, despite all the rhetoric, Congress is unable to run our Government in a fiscally responsible manner.

I can think of no better example of empty promises and smoke and mirror savings than those which were enacted with passage of the compromise budget for fiscal year 1986. The public was told this great compromise would save $56 billion next year. What wasn't mentioned was that our budget deficit would still be close to $200 billion. The truth is that the majority of these savings have already evaporated.

I voted against this budget compromise because I didn't believe it went far enough toward reducing the practice of deficit spending. As deep in debt as we are, this Congress was able only to agree on measures which barely, barely make a dent in our annual budget deficits and do nothing to curb our appetite for big spending.

Let's not deceive ourselves. Even if we pass the Emergency Deficit Control Act we will still be faced with tough choices and difficult tradeoffs. But we don't enter into the process of responsible government blindly. There is a blueprint from which we can operate. It's called the Constitution, and I believe it clearly defines what role the Federal Government should play in our lives and, subsequently, just how deeply the Federal Government should be digging into our pockets.

Even if the act fails, I'll continue to press for fiscal responsibility and to end deficit spending. It won't be an easy task, but I think it is one which the people demand and which I, as a Member of Congress, have a responsibility to deliver.

GRAMM-LATERAL

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, we are having a chance to watch the great scam. Set to music, I think it would be a big sellout. What is happening is this: Members of Congress who voted to triple the budget for star wars; Members of Congress who are voting this week and who will vote in the other body soon to continue to spend billions in agricultural subsidies; Members of Congress who gave you the National Endowment for Democracy, the charter travel service around the world for Members of Congress and their friends, are now pretending to be concerned about a balanced budget.

What we have brought forward is procedurally quite striking. A fundamental change in the American system of power being brought forward in a coercive way as an amendment to the debt limit bill in a way that does not allow anyone to look seriously at what is in it. The next time Members who are supporting this raise procedural objections to things going too fast in the House, I hope they will remember that.

But the fundamental point is that it is flawed substantively. It would cut equally medical care for desperately needed elderly ill people and the National Endowment for Democracy. It would protect part of defense while cutting vital services.

The people who are putting this forward did not put forward serious budget reduction matters. We had in the past what was known as Gramm-Latta in 1981. This is the sequel. This is the "Gramm-Lateral." It is an effort to get rid of the ball. It is an effort to have Congress avoid making the tough choices. People do not want to vote on reducing farm subsidies; they do not want to vote on tough ones, so they are playing this game.

LIVER TRANSPLANT PATIENT FINALLY GAINS ACCESS TO HOSPITAL CARE

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to extend his remarks.)

Mr. BILIRAKIS. Mr. Speaker, recently a young man from my district in desperate need of a liver transplant was refused admittance to one of the two hospitals capable of performing the procedure because he did not have private insurance and could not guarantee payment of the $200,000 bill he would incur.

This particular story fortunately had a happy ending, thanks to the caring attitude of Mrs. Pam Calamas, social worker for Tarpon Springs Hospital, and because, with the able assistance of Congressmen MARKEY and WAXMAN, I was able to get the hospital to relent and admit Gary for treatment.

While this represents a case of access to the most sophisticated technology, we are all aware of cases where even routine emergency care has been denied because of the patient's inability to pay.

I believe we should at least ensure that emergency medical services are available to all. For this reason, I have introduced House Concurrent Resolution 178, which states that hospitals should "provide an open door to patients regardless of ability to pay." There is no worthier piece of legislation to lend your name to than one which could help save lives, and I hope all my colleagues will join this effort by cosponsoring House Concurrent Resolution 178.

THE WILL THAT HAS BEEN BROKEN

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, I find it intriguing that my colleagues from the other side of the aisle are, one-by-one, getting up and talking about the wall that has been broken. We have, basically, for years been trying to convince the other side that Reagonomics does not work; is not working; and one-by-one today they are acknowledging that and we appreciate it.

They talk about the fact that it is important that the Congress be disciplined. As I understand the Gramm-Rudman proposal, that we have endorsed, would also tell the President that he must be disciplined. I find it intriguing that my colleagues continually avoid that part of the discussion. We want a balanced budget; we want the deficits reduced. I find it intriguing that all my colleagues are now saying that Reagonomics has failed.

I should tell them, an interesting thing happened in Hawaii on Saturday. A lot of people were focusing their attention, including the President of the United States, on the fact that three Democrats had switched and became Republicans.

□ 1255

And then there was a recall measure. Sixty-two percent of the people of the city of Honolulu voted, and those 62 percent decided to kick out those three Republicans who decided to switch parties. Now we are going to have a special election, and we will elect some Democrats and do what is right.

A STEP TOWARD A PERMANENT SOLUTION OF THE DEFICIT PROBLEM

(Mr. STRANG asked and was given permission to address the House for 1 minute.)

Mr. STRANG. Mr. Speaker, this body will have the privilege of telling our Nation that our commitment to balancing our budget is more than empty rhetoric. While a law passed in these Chambers must be recognized for its vulnerability to revocation by future impassioned and politically opportunistic Members, nevertheless we must all tell the American people that we are deadly serious about settling the Nation's accounts.

Mr. Speaker, upon passage of the Emergency Deficit Control Act of 1985, of which I am an original cosponsor, we will have started the first effective step toward the permanent solution to deficits and debts. That, Mr. Speaker, will be balanced-budget amendment to the U.S. Constitution.

COACH EDDIE ROBINSON OF GRAMBLING UNIVERSITY—A TEACHER OF MEN

(Mr. BREAUX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BREAUX. Mr. Speaker, I would like to join with thousands of others who have congratulated Coach Eddie Robinson of Grambling University, for Coach Robinson's achieving coaching immortality by recording his 324th football victory this past weekend, making him the winningest college football coach in all of America's history.

Coach Robinson is more than just a football coach, however; he is really a teacher of men. In typical Coach Robinson fashion, he said, that he was not going to quit coaching, that he had many victories left in him, and, that he wanted to spread the credit around, saying that the whole thing belongs to Grambling, that whatever the record is, it belongs to Grambling University.

We may talk about the win, lost record, but that is really not the story. The record is 44 years at one school, one job, and one wife. Coach Robinson is, like I said, not just a football coach but a teacher of men. He also said to his players:

> Anybody here in this room can do anything in the world he wants to do if he is willing to prepare himself. This is what we want you to do, to be better men for having played the game. I just want to tell you that you are living in the best country in the world.

Mr. Speaker, I would only add that those young men have the privilege of being coached by one of the very best men in America.

BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Mr. Speaker, the United States today is facing a crisis so urgent and so severe that it threatens to tear the very fabric of our economic and political life. Since taking office in January my number one priority has been to balance the budget and reduce the national debt—this is of paramount importance. With each vote I've taken, I've kept in mind our severe defict problem and my responsibility as a Member of Congress to cut unnecessary Federal spending. I believe that if I can do one thing for the future of this country, it would be to see the national debt reduced, to place the deficit on a declining path toward balance.

As an original cosponsor of the Balanced Budget and Emergency Deficit Control Act of 1985, I urge each of my colleagues to support its passage. It is a results oriented bill, it will balance the budget by 1991. This bill reaffirms Congress' commitment to all Americans and financial markets that we are serious about getting the long-term budget situation in order. It is realistic, responsible, and provides truth in budgeting but most of all it will get the job done?

VUCANOVICH SUPPORTS THE EMERGENCY DEFICIT REDUCTION ACT

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH Mr. Speaker, for the first time in a long-time, we have the opportunity to seriously reduce the deficit. The Emergency Deficit Reduction Act is a major breakthrough for reducing spending and achieving a balanced budget in the very near future.

This bill is identical to the Gramm-Rudman proposal which the other body has been debating all weekend. This legislation would require the President to cut spending by an across-the-board uniform percentage. These cuts would be achieved by reducing automatic spending increases by half and by reducing discretionary spending by half. A tax increase would not be necessary if these reductions are met.

If we are serious about eliminating the deficit, then the Emergency deficit Reduction Act should have unanimous support. This is a realistic and responsible way to cut the deficit once and for all without increasing taxes. I hope all my colleagues will support this innovative approach so that deficits can be eliminated for good.

HYPOCRISY SEEN IN EFFORTS TO BALANCE THE BUDGET

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, over the last several months we have heard the Democratic liberals come to this body with a lot of pious speeches telling us how they want to reduce deficits. But now the Democratic Party leadership in this city has shown us the party's true colors. They are big spenders, and they do not want anything to get in the way of their big spending.

Let us just look at the record. We have offered over the last several months an opportunity for this House to take up a balanced budget amendment to the Constitution. What has regularly happended to that? The Democratic leadership has buried it in committee.

We passed a law several years ago aimed at balancing the budget of this country by 1981. What happens? The Democratic leadership regularly has its membership voting to ignore that law in vote after vote after vote.

We passed a Budget Act in this body in the 1970's. What do we do? We pass the budget, and then when it comes to spending the money, we regularly bring rules to this House floor that waive the Budget Act, and we go ahead and spend the money. We have spent $150 billion more than our own budgets in the last 5 years.

Now there is a new approach aimed at balancing the budget within a 6-year period—the Balanced Budget and Emergency Deficit Control Act. What are the Democratic leaders trying to do with that? They are trying to delay it, and they are trying to scuttle it.

Well, there is a name for people who say one thing and do another. It is not a very nice name, but it is an accurate name for what the Democratic leadership is doing. That name is hypocrisy.

THE EMERGENCY DEFICIT REDUCTION ACT—MORE THAN JUST TALK

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to review and extend her remarks.

Mrs. BENTLEY. Mr. Speaker, many in this House and in the other body have spent almost the entire year wringing their hands and talking about the national budget deficit.

Unfortunately, that is almost all we have done—talk. Now we have an opportunity to do somethng positive to bring the deficit under control.

The effect of the massive deficit is acknowledged by everyone. It is a destroyer of jobs, of trade, of business expansion. It is the thief which robs

not just us, but our children and grandchildren.

The Emergency Deficit Reduction Act is a plan which finally goes beyond mere talk. If we really mean to do something to bring this cancer which is eating up our taxpaying citizens, under control, now is the time.

When we are about to consider raising the debt limit yet again to new unprecedented heights, we owe our citizens a ray of hope that the Congress can learn to live within its means.

Let us pass this plan and reaffirm our confidence in the future of our country.

AN ATTEMPT TO BRING ABOUT FISCAL SANITY

(Mr. CRAIG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, the issue is: A $2 trillion debt and a $200 billion deficit, historic marks for this country to debate.

The other body has been debating this for 2 days in its attempt to bring about a solution to develop a gradual process by which to bring the deficit into control and to slow the rate of the debt. Yet my farm boy ears from Idaho hear some very distinct squealing going on, not only in this body but in the body across the Rotunda. That squealing sounds like the little piglet whose nose was caught in the trough. That squealing comes from the big spenders who simply do not want to give up the opportunity to continue to spend and then return to their constituents and say, "Look at what I did for you yesterday." Well big spenders, what you did for taxpayer's yesterday was to give them unprecedented debt and unprecedented deficit.

Will the Balanced Budget and Emergency Deficit Control Act work? I do not know if it will work. I guess I am cynical enough to say the only thing that will work is a constitutional amendment to balance the budget. But let us try and let us give the American public the unique opportunity to measure this Congress and the votes of its Members against their rhetoric, because it will be a vote on this issue that will say whether we are truly sincere in reducing the deficit and bringing about fiscal sanity.

□ 1305

ELIMINATE GOVERNMENT DEFICIT SPENDING

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Mr. Speaker, the other body is currently considering deficit reduction legislation that if enacted, could balance our enormous budget deficit by the year 1991. If passed, we in the House, will have the opportunity to vote on this measure because it's attached to the debt-ceiling extension that will raise the Federal debt to over $2 trillion.

Mr. Speaker, I cannot in good conscience support raising the debt of this country unless we take sound, responsible action to eliminate our deficit spending. This deficit reduction measure is the first responsible action taken by this Congress to achieve, in an orderly manner, a balanced budget over the next 6 years. I cosponsored this legislation because the citizens in this country are demanding their Congress to tighten its' belt, and to make the kind of decisions that are necessary for us to move forward to securing a strong financial base for the future. This legislation will provide the impetus to reduce trade imbalances that are plaguing our Nation, and will create a sound foundation for investment and economic growth.

CONDOLENCES TO THE FAMILY OF ARKADY KATAKOV

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, I am here on the behalf of many of us to extend our sympathies to the family of Arkady Katakov.

Although the Soviet Union has not publicly sympathized with those families who have lost someone to the ranks of terrorism, I believe we should. As the counselor's secretary, he deserved the right of protection. We still, as a nation, have held by terrorists some of our citizens; now the Soviets have an additional three and one death.

For that the message should be clear. First, release all. Second, our hearts go out to those families we have across the ocean as worried as our families here. And third, that terrorism and the superpowers are dangerous adversaries, and that this is one area that the Soviet Union and the United States might find a route for cooperation to protect their own embassies and their own people.

STRAIGHT UP OR DOWN VOTE ON GRAMM-MACK DEFICIT REDUCTION PROPOSAL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, it is obvious that there is a serious national issue developing since the other body has been in session on Saturday and Sunday and we are actually here on a Monday. So it is clear that there is something brewing.

I found it interesting in this morning's 1-minutes that a number of liberal Democrats who were eager and excited about attacking the President for what they called Reagan's deficits are now very concerned that in fact the Gramm-Mack proposal may lead to a real change in deficits, may control, spending, and may bring this Government under control.

The challenge to this House will be to allow an up or down vote. I want to emphasize that. The key question for this House is whether or not the Democratic leadership will allow a straight up-or-down vote on the Gramm-Mack proposal and let everyone see once and for all where every Member stands on a serious and clear-cut plan that in 5 years would bring us to a balanced budget. That is the key question. Will the leadership allow us to have debate, and then to have a straight up or down vote, or will they in fact try by parlimentary maneuver to hide from the American people the unwillingness of the liberal wing of the Democratic Party to control spending?

RAISING ISSUE OF HUMAN RIGHTS WITH SOVIET UNION

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, the jockeying and positioning for the Geneva summit between the President and Prime Minister Gorbachev has started. There has been a flurry of press reports relating to both sides' positions. The President has drawn the line relating to star wars. The Soviet leader has made an offer of 50 percent in reduction of offensive weapons. He has urged a Soviet dialog with our British and French allies separate from the United States.

It is uncertain whether this summit, which is critically important to the future of our Nation and to the world, will be more propaganda than substance. In the positive lionization of Mr. Gorbachev by the Western News was a very regrettable omission: his very unrelenting stance on human rights. He waxed indignant and ranted and raved when he was questioned relating to the human rights practices of the Soviet Union.

Mr. Speaker, I will be circulating a letter to all my colleagues asking that the President raise the issue of human rights with the Soviet Union as a high level agenda item. The Soviet record is poor and gets poorer every day in this arena. Political prisoners are tortured and Jewish emigration continues to be stifled. This is one summit that should not be left to issues relating to strategic weapons and arms control. The United States should stand behind

arms control and human rights observance by the Soviets. I hope everyone signs the letter I will be circulating asking our President to raise the human rights issue at the summit with Mr. Gorbachev on an urgent priority basis.

STRAIGHTEN UP THE REPRESENTATION MAPS

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I rise as another cosponsor of the Balanced Budget and Emergency Deficit Control Act. Rather than repeat some of the excellent words of our colleagues who spoke before me on this, I would like to point out that there is a fall-back position to balance the budget if the Supreme Court rules correctly this session.

Today, the U.S. Supreme Court has taken up the case of Bandemar versus Davis. This case concerns gerrymandering in the State of Indiana. The Court ruling will affect at least 28 other States, including my own, where the mapping out of the districts we represent is so ugly, so nonsensical, particularly in California, that the voters still sneer in disbelief.

Mr. Speaker, you've seen those California maps. I ask the Chair, these maps are disgusting are they not? Nobody can believe this has happened to our country. It's outrageous. They look like Rohrsach tests—the late Phil Burton said the California maps were his contribution to modern American abstract art.

I hope it is a dawning of a new day with the 100th Congress. I hope in California we finally get a 50–50 representation in California, which would reflect the last three elections, not the 27 to 18, that we have now. Let's hope the Supreme Court doesn't abort justice on this one.

A footnote, Mr. Speaker, some Members may find it of interest that a young private nurse who had taken care of Rock Hudson these last few months said to her congregation at a church in Westwood, CA, yesterday, that on September 14 at 7 o'clock in the evening, Mr. Rock Hudson had accepted our Lord Jesus Christ as his Saviour. So in the last 18 days of his life, Rock found more riches than he had ever known in all his years as a star in the Hollywood motion picture community.

CONGRATULATIONS TO COACH ROBINSON

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, we take a lot of things very seriously in Louisiana, and one of them is football. As most of you probably know, one of our most esteemed coaches Coach Eddie Robinson at Grambling College, a coach there for 44 years, just became the winningest college football coach in history when he won his 324th game as head coach at Grambling. That is quite a record. He is guite an individual.

He only needs three more victories to have won more games than any professional football coach. He would be passing George Halas' record with just three more victories. That would make him arguably the finest coach in football history.

As one of his players said, and summed it up best, "Sometimes after practice, we just stand and look at him." They are that much in awe of him, and so are most of us sports fans.

Coach, congratulations. Here is hoping you have many, many more years of continued victories.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules of which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken later today.

MILITARY MEDICAL MALPRACTICE

Mr. GLICKMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3174) to amend chapter 171 of title 28, United States Code, to allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care, as amended.

The Clerk read as follows:

H.R. 3174

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLAIMS FOR IMPROPER MEDICAL CARE.

(a) COGNIZABLE CLAIMS.—Chapter 171 of title 28, United States Code, is amended by adding at the end the following new section:

"§ 2681. Certain claims by members of the Armed Forces

"(a) CLAIMS OF MEMBERS OF ARMED FORCES.—Subject to all the provisions of this chapter, claims may be brought under this chapter for damages against the United States for personal injury or death of a member of the Armed Forces serving on active duty or on full-time National Guard duty (as defined in section 101(42) of title 10), under the conditions prescribed in this section.

"(b) WHERE CARE PERFORMED.—The personal injury or death referred to in subsection (a) must have arisen out of medical or dental care furnished the member of the Armed Forces in a fixed medical facility operated by the Secretary of a military department or any other fixed medical facility operated by the United States.

"(c) DEFINITIONS.—For purposes of this section:

"(1) The term 'fixed medical facility' means a medical center, hospital, or clinic that is located in a building, structure, or other improvement to real property.

"(2) The term 'personal injury' does not include mental or emotional disability unless it is the direct result of a physicial injury.

"(d) REDUCTION OF CLAIMS BY OTHER BENEFITS.—The payment of any claim for personal injury or death of a member of the Armed Forces under this section shall be reduced by the present value of other benefits received by the member and the member's estate, survivors, and beneficiaries, under title 10, title 37, or title 38 that are attributable to the personal injury or death from which the claim arose.".

(b) CLERICAL AMENDMENT.—The table of sections for chapter 171 of title 28, United States Code, is amended by adding at the end the following new item:

"2681. Certain claims by members of the Armed Forces.".

SEC. 2. EFFECTIVE DATE.

Section 2681 of title 28, United States Code, as added by Section 1 of this Act, shall apply only with respect to personal injuries or deaths occurring on or after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. KINDNESS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Kansas [Mr. GLICKMAN] will be recognized for 20 minutes and the gentleman from Ohio [Mr. KINDNESS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3174 sponsored by a bipartisan group of 84 House Members extends jurisdiction under the Federal Tort Claims Act so as to allow members of the U.S. armed services to sue the U.S. Government for medical or dental malpractice that occurs in a fixed medical facility which is operated by the United States Government or by the Department of Defense.

In Feres versus United States, the Supreme Court held that active duty military personnel are precluded from suing the Government for medical or dental malpractice. However, civilians who have access to Government medical facilities are allowed to sue the Government for medical or dental malpractice. This includes dependents

of active duty service personnel and retired military personnel. In fact, even Federal prisoners who are the victims of medical malpractice in Government-operated medical facilities are allowed to sue in such circumstances. A child or spouse of an active duty service member has such right, a convicted felon in a Federal penitentiary has that right, it is only our people in uniform who don't.

I think that asking the men and women in the military to put their lives on the line for their country is enough. It is simply asking too much to expect them to suffer injuries as the result of medical malpractice and have no redress when others who use these same facilities do.

H.R. 3174 would add a new section to the Federal Tort Claims Act. This section, section 2681, will grant Armed Forces personnel the right to assert claims for medical or dental malpractice under the Federal Tort Claims Act. This section, however, is subject to the condition that the claim arise out of medical or dental care furnished to the military member in a fixed medical facility which is operated by the U.S. Government.

I want to make it clear that this legislation is subject to all the provisions in the Federal Tort Claims Act, which include not allowing suits for combat activities or claims which arise in Foreign Claims. The Federal Tort Claims Act also excludes suits for intentional torts. Additionally, the Federal Tort Claims Act limits attorneys fees to 25 percent, provides no right to a jury trial and imposes a 2-year statute of limitations. Furthermore, suits brought under this section are subject to the substantive tort laws of the State in which the injury occurs. Hence, since a number of States are making reforms in this area, adoption of this legislation would in no way undermine those changes.

Section 2681 also provides that any judgment awarded in the types of claims to be allowed under this section would be reduced by the present value of other benefits that are available from the Government. This section would prevent military personnel from being paid twice for the same injury.

The amended bill has several technical and clarifying changes. On page 2, line 18, the word "treatment" has been deleted. This change was made so as to be consistent with the definition in section (c).

Added to section (c) is a technical amendment, the purpose of which is to clarify what is not meant by the term "personal injury." In this legislation, personal injury does not include mental or emotional disability unless it is the direct result of a physical injury.

Another clarifying and conforming amendment is in section (d) on page 3 of the amended bill. This additional language is to make this section conform with section (a). Section (d) is the reduction of claims section and this additional language should make the intent of the legislation more clear.

The other amendment is strictly technical in that the words "the first section" have been changed to "section 1."

These amendments do not change the substantive provisions of the bill, but rather are technical changes which are meant to make the language of the bill more clear.

Mr. Speaker, I might add that the Subcommittee on Administrative Law and Governmental Relations held extensive hearings on this legislation and heard from several witnesses who have suffered horrible injuries due to military medical malpractice and who have no judicial recourse. These witnesses told a series of horror stories which I think point out the absolute necessity for the passage of this legislation.

I would like to commend my colleague, the gentleman from Massachusetts for having sponsored this bill and all the work and help he has been to the committee in getting this bill to the floor. I also want to thank my colleagues on the other side of the aisle for their participation and support of this legislation—especially the ranking member, the gentleman from Ohio, who has been a tremendous help in seeing this legislation proceed.

Mr. Speaker, I strongly urge, all my colleagues in the House to vote in favor of this legislation.

□ 1320

Mr. KINDNESS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to support H.R. 3174 and I shall begin by acknowledging that the position of the administration with respect to this bill is a position of opposition to it. An argument can be well stated that there is the possibility of additional cost being incurred by the Department of Defense as a result of the enactment of this measure into law. An argument may also be made with every bit as much weight that whatever that additional cost is that would represent recoveries for medical malpractice under this legislation, whatever that cost is, should not come out of the hides of our service people who are wronged in the practice of medicine in military medical facilities.

The gentleman from Kansas [Mr. GLICKMAN], the chairman of the subcommittee, has very well described and pointed out the characteristics of this bill and the way in which it would operate. It is carving out an exception to the Feres doctrine, which has been the rule with respect to members of the military services under the Federal Tort Claims Act, but there is such strong reason for it that I would urge that our colleagues support H.R. 3174 and hope that we will be able to create greater equity in the treatment accorded to members of the military services when there is that occasion of medical malpractice affecting them in military hospitals and facilities in the United States and not in combat situations.

Mr. Speaker, it would be difficult for me to underrate the efforts and abilities that have been put forward to bring this legislation to this point by the gentleman from Kansas [Mr. GLICKMAN], the chairman of the subcommittee, the gentleman from Massachusetts [Mr. FRANK], the author of the legislation, and others who have been involved in the support of this measure, who all see on a bipartisan basis the need for this equity to be created in our law under the Federal Tort Claims Act.

Mr. Speaker, I would urge support of H.R. 3174.

Mr. Speaker, I would reserve the balance of my time if the gentleman from Kansas has other speakers.

Mr. GLICKMAN. We have at least three additional speakers, I would say to the gentleman form Ohio.

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. I thank the gentleman for yielding time to me.

Mr. Speaker, I very much appreciate the support and the work that has been done by the gentleman from Ohio. I appreciate his acknowledging that the administration was opposed to the bill. I wish they had supported it. I guess in a way I am glad that they did oppose it because I am not sure my friend, the gentleman from Kansas, could stand the shock of seeing me and the President on the same side 2 weeks in a row. He is still assimilating last week's alliance..

Mr. Speaker, I want to also thank the gentleman from Kansas. When he assumed the chairmanship of this subcommittee, in a very brief time he brought to bear his very considerable skills on this legislation, intellectual and managerial, and has brought forward a very good bill. I mean to extend this as well to the gentleman from Ohio. Sometimes when we say this it is routine, but there were some serious questions about this bill. This bill is an amended version. The gentleman from Ohio was given some concerns by the administration, and I think we were able to work with them in a very reasonable way. We wanted to avoid the possibility which was raised to us that someone might sue for medical malpractice because he or she contested an evaluation that said he or she was not psychiatrically fit for a particular rating.

This bill is intended, and I think we have language that rules out that possibility. A psychiatrist or medical person who gives a good-faith evaluation of someone's capacity is going to be protected and the Federal Government will be protected, and we ought to make clear that this is not a bill to sue doctors. This is a bill that allows a person, as everybody else can do except people in the armed services, to sue the Federal Government, but it would not allow a suit against the Federal Government for psychiatric evaluation. It does say that if a person is mistreated, whether for a psychiatric or other illness, if that person is given any form of treatment involving medication or any other form of treatment and that results in unnecessary injury through negligence, that person may sue, and sue for pain and suffering and everything else. But there has to be that treatment that is given for the illness that is found to be negligent and the cause that triggers it.

We thank the gentleman from Ohio for helping us, I think, tighten the bill up.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Speaker, I would certainly concur in the gentleman's interpretation that he has expressed of the language that has been added in subsection (c). I think that is exactly what is intended, and I think it is an essential part of the equity of this measure.

Mr. FRANK. I thank the gentleman, because we believe it is important that we have this guidance for future interpretations for all parties.

Mr. Speaker, I also want to pay tribute to one absent, a former Member of this House. Sometimes we can be here for a while and have trouble getting a bill passed. Our former colleague, the gentleman from Arizona, Mr. McNulty, was the one who first introduced this bill and interested me and others in it, and I think without his efforts, even though he is no longer serving in this body, the bill would not have come forward.

I also want to pay tribute to an organization called the Committee Against Military Injustice. Candor compels me to say that they are not wholly satisfied with this bill. They would like it to go further. I think that underlines for Members that this is a very limited, carefully structured measure. It may be that in the future there will be a need to go further, but we may have some experience with that before. They would like it to have somewhat broader coverage.

What it does is very simple. Right now everybody in the United States who is the victim of malpractice in a military hospital or military facility can sue, except members of the armed services. What we say is that members of the armed services now have the same right as civilians. I do not think that that is a radical step. It excludes combat-type operations. No one is going to be suing Hawkeye under this bill. It is a fairly limited right.

I also want to add that we do not mean by this, and I know I speak for my colleagues here, to indict military medicine. This is not a statement one way or the other about the quality of military medicine. In fact, what we are saying is that victims of malpractice, and fortunately that is rare, if they are civilians can sue their civilian doctor. We are simply giving the members of the armed services the same right vis-a-vis military medicine that civilians have vis-a-vis civilian medicine, and that in itself can hardly be considered an indictment.

I am one who believes that the whole malpractice system probably ought to be revised. I am prepared to join with Members to the extent that there is a Federal role in this, and it is not a State role, in revising the malpractice system. I do not think that the tort liability system is the best way to handle it, but as long as that is the only method, it seems to us unfair to deny it to members of the armed services. We are simply giving members of the armed services the same rights as others.

It does not mean that doctors are at risk. It is the Federal Government, under the Federal Tort Claims Act, that can be sued. It is not the individual doctor. It is, I think, a fairly moderate response to an important problem, and in the end I think all of us regard this as a very promilitary decision.

We are saying to the young men and women who have volunteered to defend their country, "We do not want you to have less rights in a given situation than a civilian. We value your services. We want to protect you." We are not saying that military medical malpractice is rampant. We are saying in those few instances when it occurs, we do not want to discriminate against members of our armed services.

I thank the gentleman from Kansas again for his leadership, and the gentleman from Ohio for his cooperation.

Mr. KINDNESS. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. I thank the gentleman for yielding this time to me.

Mr. Speaker, my praise, also, goes to the chairman of the subcommittee and the ranking minority member for this legislation.

Mr. Speaker, I rise in support of H.R. 3174, which would amend the Federal Tort Claims Act to permit active duty members of the Armed Forces to sue the United States in certain malpractice cases.

For too long, men and women in American military services have been denied a basic right. Unlike all other citizens, military personnel have absolutely no right to sue for medical malpractice when they have been harmed by acts or omissions in military hospitals or clinics.

This situation must not be allowed to continue. Military personnel are now eligible for disability compensation when they are the victims of medical malpractice in military hospitals. But often that is not compensation enough to cover their injuries.

Under the Feres doctrine, military personnel are prohibited from suing the U.S. Government. There are no exceptions to this barrier.

This bill would exclude medical malpractice in military hospitals from that doctrine affording military personnel a legal recourse all other citizens enjoy. It also adds a measure of discipline for our military's medical personnel, holding them accountable for their actions.

It should be emphasized at the outset that this is a limited modification of the Feres doctrine. Suits for malpractice under the terms of H.R. 3174 could only be brought if the malpractice occurred at a medical facility operated by the Department of Defense inside the United States. Furthermore, the current exemptions from the Federal Tort Claims Act dealing with claims arising out of combat activities and claims arising in foreign countries would still be applicable here. See: 28 U.S.C. 2680 (j), (k). This means that malpractice actions could not be brought as a result of injuries occurring in combat or in instances where the asserted malpractice may have occurred at an Armed Forces facility overseas.

The phenomenon of medical malpractice is not unique to military facilities, and the terms of H.R. 3174 are not intended to be critical of medical or dental officers now serving in the Armed Forces. What is unique about the current situation is that a member of the Armed Forces who is a victim of malpractice does not have the normal legal recourse available to him or her. The existing compensation system is simply not an adequate financial response to the injuries and suffering that can be brought about by isolated medical malpractice situations.

This legislation does not undermine the very valid disciplinary and accountability concerns that were the basis of the Supreme Court decision in the Feres case. Again, combat situations and claims arising in foreign countries are excluded from the coverage of H.R. 3174. We simply should not allow a system to continue that seriously undermines the confidence that military personnel should have in their medical care.

I urge an "aye" vote.

□ 1330

Mr. GLICKMAN. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. I thank the gentleman from Kansas for yielding.

Mr. Speaker, I have the great honor of serving on both the Armed Services Committee and the Judiciary Committee. On the Armed Services Committee, I serve on the Personnel Subcommittee, and constantly worry about how this Government treats its military personnel.

So often in defense everybody gets so caught up in what we are procuring that we forget about the people who have to run it and are out there with their lives on the line all of the time. I do not think it is any great secret that those who have made lots of money out of the Defense Department are not the people in uniform, not the people who are really threatened and have their lives on the line.

Let us talk about the basic thing this bill does. This bill says that the people who are on call 24 hours a day to protect our rights and liberties will now get the same rights that their children and dependents have. Dependents' rights were derivative from military personnel but they have stronger rights than the people on active duty who were out there protecting us. Whoever heard of derivative right being better than primary rights. It does not make any sense. This bill says that military personnel are going to get the same rights that civilians get and the same rights that their own dependents get.

You know that is really a crazy way to treat people whose lives are on the line 24 hours a day protecting us. We give them less protection than everybody else.

This bill corrects that.

I really want to compliment the gentleman from Kansas [Mr. GLICKMAN] who just took over this subcommittee, and this is one of the first bills he has moved very rapidly and brought to the floor. He had very extensive hearings showing why this bill is so important. Everybody has worked so hard on this. It makes so much sense that it is almost embarrassing to stand up here and talk about it. It is incredible that it was not done long ago.

All of these people work for the same flag and all of these people live under the same flag, and it certainly seems that they ought to be treated the same. That is really what this is all about, and again I thank everyone and urge the passage of the bill as soon as possible.

Mr. GLICKMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. Mr. Speaker, I rise to speak in opposition to the suspension of the rules on H.R. 3174. I know that the immediate basis for this legislation, is the spate of tragic incidents that have been detailed at the Subcommittee on Administrative Law and Governmental Relations' hearing. Nevertheless, I am compelled to bring to my colleagues' attention the paradoxical situation we find ourselves in today.

While on the one hand, several bills have been introduced to reform medical malpractice as the result of a recognition that the Nation's liability laws are no longer responsive to the best interests of our society, we are being asked today to add to that societal problem by adding a whole new class of claims. To ask this body to take such an action today, with insufficient deliberation on this issue which has evoked such emotion in hearings and notice in the media, serves neither us nor the people we represent, well.

Let me tell you what this legislation does. Briefly, it permits active duty members of the Armed Forces to bring actions against the United States for medical and dental malpractice which occurs in a fixed medical facility that is operated by the United States or the Department of Defense under the Federal Tort Claims Act. By so doing, this very short bill overturns a legal precedent set 35 years ago. Instead of relying upon an established system which can be improved to work for the benefit of the injured party, H.R. 3174 potentially adds thousands of cases to an already overburdened civil court system.

As worrisome to me, however, is what this bill does not do. Does it consider the quality of medical care in the military medical system? No; does it look at consolidating medical authority? No; does it propose innovative recruitment methods to attract highly skilled physicians? No; does it recommend a monitoring of performance of medical personnel? No; it just does not address the real issue that should be of concern to us—the best medical care for the best military men and women in the world.

Mr. Speaker, I urge that it not pass, under suspension of the rules.

Mr. GLICKMAN. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. FRANK]

Mr. FRANK. Mr. Speaker, I appreciate the gentleman yielding, and appreciate the gentleman from Georgia [Mr. ROWLAND] sharing his expertise with us.

But I would like to point out with regard to doing this under suspension of the rules, the only amendment of any substance that arose has been accepted, it has been worked out.

That is to say, if you agree with this in principle, and you have some detailed question or subordinate question that arose in the process, it has been dealt with.

The questions the gentleman from Georgia has addressed could not be cured if we took this bill up under the regular calendar, because the questions he is raising are questions not within the jurisdiction of the Judiciary Committee. The Judiciary Committee has the jurisdiction over tort claims, and so even if this were not under suspension, I agree with the gentleman that there are things that ought to be addressed, and the gentleman from Oregon [Mr. WYDEN] who will be speaking in a moment has done a great deal to try to improve the quality of medical care and medicine in the military in general. But even if this were to be taken up and dealt with under the regular calendar, we could not take care of those problems under this bill in this committee, or even under amendment any of the items that the gentleman has raised because that is not a real issue, because to the extent that there were differences that came up, they have been worked out.

So we are not saying that military medicine is perfect or imperfect, or malpractice is good or bad. It is a single point: Do not discriminate against the marines. Do not let that soldier's wife and children or private citizens sue when he himself cannot.

Mr. GLICKMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon [Mr. WYDEN] one of the leaders on this issue of military health care.

Mr. WYDEN. Mr. Speaker, I want to commend our colleague from Massachusetts, [Mr. FRANK] for a tremendous job, and also the gentleman from Kansas, Chairman GLICKMAN, for their exceptional leadership.

If we pass the bill sponsored by the gentleman from Massachusetts [Mr. FRANK] we can create a new recruiting poster for the military. It would say: "Join the military. You won't lose your rights."

Unfortunately, that can't be said today. Military personnel injured as a result of medical malpractice have no recourse. The legislation before us today will change that, and give our servicemen and women the same rights as other Americans.

There are several things that must be done to improve military medicine. Earlier this year in response to a request from me, the Defense Department estimated that more than 20 percent of their physicians did not have a current medical license. This estimate was later confirmed by an analysis done by the American Medical Association.

Several weeks ago, an amendment I offered to the defense authorization bill requiring that all military physicians have a current, valid license was

accepted and later agreed to in conference. So we're making progress. The bill before us today will take us another step forward when it's adopted.

Even after this bill is passed, there will be more to do. The gentleman from Washington, Congressman DICKS, has led the effort to strengthen the quality of military personnel through the Appropriations Committee. We also should pass comprehensive legislation reforming our entire medical malpractice system.

The bill we are considering now holds military doctors accountable but not hostage. With it, we can assure our citizens that when they join the military, they do not lose their rights. That's why it should be passed.

Mr. GLICKMAN. I thank my colleague from Oregon and, Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. DICKS], a member of the Defense Appropriations Subcommittee, who has been working on this issue.

Mr. DICKS. Mr. Speaker, I want to commend Chairman GLICKMAN and the gentleman from Massachusetts [Mr. FRANK], as well as the gentleman from Oregon [Mr. WYDEN], who have been the leaders, along with their colleagues on the minority side. I think this is a very important piece of legislation. It is one aspect of our effort to do something about a crisis that exists today the quality of medical care that is being provided for our service people.

I serve on the Defense Appropriations Subcommittee in the House. I know the work that has been done by the Armed Services Committee.

Today we have major personnel shortages in our military hospitals around the country. I happen to believe that our military leadership has been negligent in not providing an adequate level of staffing. We do not have enough nurses, we do not have enough skilled personnel in these hospitals, and because of it, we are seeing an escalation in the number of lawsuits that are being brought each year by people who have been injured by that health care system.

My colleague from Oregon [Mr. WYDEN] has made a first step in trying to make sure that we get people with licenses, active State licenses. I have now made a step on the defense appropriation bill to get $40 million added so that we could start getting the personnel levels up to 80 percent of what they should be at military hospitals.

But my colleagues, this legislation is needed because I think it is wrong to take away an individual service person's right to bring a lawsuit when we have problems occurring because of understaffing. We in the Congress have got to insist that adequate personnel levels are met.

I agree with the gentleman from Massachusetts [Mr. FRANK] that this legislation is one part of the solution. But we have to deal with personnel, we have to deal with the quality of people that are providing these services. I am not going to rest, and I know the Members here are not going to rest until we get this problem corrected.

Mr. GLICKMAN. Mr. Speaker, how much time do I have left?

The SPEAKER pro tempore. The gentleman from Kansas [Mr. GLICKMAN] has 1 minute remaining.

Mr. GLICKMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. Mr. Speaker, I rise in support of H.R. 3174, legislation that will allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care.

Members of the U.S. Armed Forces who have suffered from medical malpractice in military hospitals have been barred from bringing negligence suits under the Supreme Court's interpretation of the Federal Tort Claims Act. I believe this is unfair. Currently, military dependents and retirees can bring lawsuits for malpractice which occurs in fixed medical treatment facilities which are operated by the Secretary of a Military Department or the United States.

Mr. Speaker, enactment of this legislation will result in improved morale among military personnel. Men and women who are on active duty with the U.S. Armed Forces should be afforded the same rights as a private individual who submits himself or herself to medical or dental care, even though that care is extended by the Government.

I commend the author of this legislation, Representative FRANK, and my distinguished colleague from Kansas [Mr. GLICKMAN] for the careful work they performed in the Subcommittee on Administrative Law while developing this legislation. I am proud to cosponsor this important legislation and I urge my colleagues to support it.

Mr. GLICKMAN. Mr. Speaker, I yield 30 seconds to the gentleman from Illinois [Mr. GRAY]

Mr. GRAY of Illinois. I thank my friend from Kansas for yielding and want to commend him as well as the gentleman from Massachusetts [Mr. FRANK] and the gentleman from Ohio [Mr. KINDNESS] for bringing forth this legislation.

As my colleagues know, C-SPAN televised the hearings, Mr. Speaker, on this very important matter. I cannot believe some of the horror stories that were alluded to by members of the families of people serving in the military.

The gentleman from Pennsylvania [Mr. KANJORSKI] and I have some concern, I would say to my friend from Kansas, that there is no limit as to how much a plaintiff can get in the way of a judgment under the bill, however I am strongly supporting the measure.

Mr. GLICKMAN. Mr. Speaker, I yield myself 30 seconds.

Again, Mr. Speaker, I point out that this legislation creates liability standards subject to State law; that is what the Federal Tort Claims Act is. The only thing I would tell my friend is under the Federal Tort Claims Act, you cannot get punitive damages, and that is prohibited under Federal law. Also, you are limited to the other aspects such as no right to a jury trial.

But I fully hope that the States will take some action with respect to medical malpractice, some steps that need to be taken.

But the basic issue here is fairness. Should active-duty people be given the same rights in noncombat situations as their spouses and their children, and even as Federal prisoners have.

Mr. GRAY of Illinois. I thank my friend and strongly support the legislation.

The SPEAKER pro tempore. All time of the gentleman from Kansas [Mr. GLICKMAN] has expired.

Mr. KINDNESS. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. I thank the gentleman very much.

What we are talking about, in my opinion, is the quality of medical care in the military.

I have not heard one person here say anything about this legislation improving the quality of medical care in the military. That is the thing that I am concerned about.

If someone can tell me how this will improve the quality of care, I will be grateful.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. ROWLAND of Georgia. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, based upon our hearing testimony, we heard from a lot of folks who use the services of the military as well as other witnesses that would indicate that the threat of a lawsuit against the Government for medical malpractice would act as one of many deterrents, not the only one, but one of many deterrents improving the quality of health care, and improving the quality of the type of physicians, improving the quality of the physical surroundings and all of those kinds of things.

The fact that the U.S. Government could be a defendent in a lawsuit is one of these things that generally would probably help as a part of many other things in terms of the quality of the medical care, so the deterrent effect is there.

That is not the only thing, but it would be a constructive help in my judgment.

Mr. ROWLAND of Georgia. That may have some effect, but the fact is that we are going to have to recruit better physicians into the armed services than we have had in the past. What we are really going to have to do is look for better physicians and try to get them into the armed services, physicians who are dependable.

As I understand it, at this particular point, the situation has improved considerably over what it was at one point in time, not nearly as bad as it was. So I am concerned that we are opening up the Federal Treasury here even more to lawsuits which are so unnecessary, and in my opinion, really will not improve the quality of medical care in the military.

Mr. WYDEN. Mr. Speaker, will the gentleman yield?

Mr. ROWLAND of Georgia. I yield to the gentleman from Oregon.

Mr. WYDEN. I appreciate the gentleman yielding.

We need to protect the service men and women while we are getting the better doctors. And the fact of the matter is that one way to improve care is to improve accountability, and that is why we support the legislation.

Mr. ROWLAND of Georgia. Does the gentleman think that being able to sue is going to improve the quality of care then?

Mr. WYDEN. If the gentleman will yield further, we certainly think it brings some accountability and some responsibility to the system where there is very little today.

Mr. ROWLAND of Georgia. Mr. Speaker, my concern is the fact that we do need to improve the quality of care that our military personnel are getting, but I am still very concerned about this being the way to go about it.

Mr. KINDNESS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to thank the gentleman from Georgia for injecting in this discussion a very constructive note. The bill, however, cannot address the rest of the problem. I think in response to the question that has been presented as to whether improvement in the health care services in the military will be brought about by reason of the passage of this legislation, I think there is indeed a great likelihood that the enactment of this bill into law would result in different judgments with respect to personnel in the health care systems within the Department of Defense.

I think that is a lever that needs to be applied. It is a part of the accountability factor mentioned by the gentleman from Oregon.

Mr. Speaker, before closing I would yield to the gentleman from Pennsylvania who asked that time be yielded to him.

Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. KANJORSKI].

Mr. KANJORSKI. I thank the gentleman for yielding.

Mr. Speaker, I rise first to compliment the gentleman from Massachusetts and the gentleman from Kansas for a very equitable piece of legislation that attempts to bring into balance the equities of all the parties involved with military medical treatment.

However, as a tort lawyer myself in the past, I think we are perhaps remiss in not looking at the potential liability to the Federal Treasury. I see that this bill offers no cap; that is, any amount of money could be recovered by these injured plaintiffs. I fully understand we should not discriminate against military plaintiffs any more than we would against civilian plaintiffs against the U.S. Government in a particular medical malpractice suit. Perhaps this particular piece of remedial legislation points up the fact that the Congress is missing a great opportunity here, a total reevaluation of the Federal Tort Claims Act, a total reevaluation of medical malpractice, and a total reevaluation of product liability law in the United States should be made toward examining the need for a cap.

The reason I say that is I have a personal experience in my district alone. The U.S. Government was defendant in a lawsuit in a vaccine case several years ago. The recovery by a single plaintiff was $19 million. The failure to put a cap on this type of legislation may subject the Federal Treasury of the United States to hundreds of millions, perhaps billions, of dollars of liability.

Now I am not opposed to that if we have the horrendous treatment as described by my colleagues from Massachusetts, Kansas, and Illinois.

I think we are missing the opportunity to not only address the Federal Tort Claims Act with a cap, but to look at medical malpractice across this country for its terrible expense and the need perhaps for remedial legislation, to put a cap on certainly product liability. I think if we do this piecemeal and then say that we have solved the problem, I want to suggest to the gentleman that you have not solved the problem. The fact of the matter is, by putting the Federal Treasury in the position of paying for the liability incurred, we are not going to make these doctors any better doctors. We are not going to make the Joint Chiefs of Staff any better overseers. It is the Congress of the United States that has to hold their feet to the fire.

Mr. KINDNESS. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentleman for yielding me this time.

First of all, I thank the gentleman from Pennsylvania because I think he raises an important point. As a matter of fact, we do have legislation before our subcommittee that tries to deal with the issue of medical malpractice on a more comprehensive basis, to establish the national standards medical malpractice both from a Federal and State basis. And I intend to pursue that. I am also a very strong advocate of looking at product liability. It has gotten out of hand. There do need to be substantive changes in the law in this country whether from a Federal or State basis. I do not object to that. The States have perfect rights under existing law, as the gentleman is well aware, to make some of these changes which are occurring and which, as the gentleman is well aware, the changes we are making today permit those recoveries to occur under State substantive laws.

Fourth, I would say, as the gentleman is well aware, the Federal Tort Claims Act does actually have some limits that State laws do not, a limit on punitive damages, a limit on lawyers' fees, those kinds of things.

Mr. KANJORSKI. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman.

Mr. KANJORSKI. I thank the gentleman for yielding.

Mr. Speaker, how would we be denying justice if we put a limit of $5 million on a medical malpractice suit?

Mr. FRANK. Mr. Speaker, will the gentleman from Ohio yield to me?

Mr. KINDNESS. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts.

Mr. FRANK. I thank the gentleman for yielding.

First, I just want to respond to my friend from Pennsylvania when he says to us, "If you pass this and say you have solved the problem you are wrong." Well, I do not know of anyone who has said this has solved the problem. Frankly, I do not think much of that as an argument against a substantive piece of legislation. No one piece of legislation solves all problems. We try to make some things better, we have committee jurisdictional problems, and so forth.

Second, I think he does the people a disservice when he says that this might cause billions of dollars in liability. The Federal Tort Claims Act and malpractice, as the gentleman from Pennsylvania pointed out, is a more limited right for everybody else already. We have not had any record of the Treasury—most people in the country can sue for malpractice against the Federal Government right now. The evidence simply is not there in this particular regard.

As I told the gentleman, yes, I am in favor of some kind of limitations. But when he asks us what injustice would be done if we put a cap on, simply this: I do not want the young men and women who volunteer to fight for this country and put their lives at risk to have one less whit right than other people do, and I do not like in principle saying to them, "Everybody else can do it but you." I am afraid where that might lead.

I will join him in sponsoring legislation that deals with limitations for everybody, but I do not think it is right in principle to finger out members of the armed services when we have not done it for anybody else.

Mr. KANJORSKI. If the gentleman would yield, I welcome the gentleman joining me in that. The only thing I would say is, I would not oppose this legislation, but let us not let it die here. Let us attack this issue and see what we can do about it.

Mr. HOWARD. Mr. Speaker, I rise in strong support of H.R. 1483, a bill to authorize the Smithsonian to construct new or upgraded facilities in Tucson, AZ and Panama. At this time I would like to highly commend the distinguished gentleman from California [Mr. MINETA], who is a regent of the Smithsonian, for his strong leadership and bipartisan efforts in bringing this legislation before the House today.

Mr. Speaker, the goal of the Smithsonian, founded in 1846, is to promote the increase and diffusion of knowledge. To accomplish this goal, the Smithsonian conducts a broad variety of programs alone and in cooperation with other institutions, universities, and government agencies in the United States and abroad. In a continuing effort to accomplish this goal, H.R. 1483 authorizes the Smithsonian Institution to plan and construct new or upgraded science facilities at two of its most significant research installations, the Fred Lawrence Whipple Observatory on Mount Hopkins in Arizona, and at the Smithsonian Tropical Research Institute in Panama. Passage of this legislation will help sustain and expand scientific leadership in two key areas, namely, astronomy/astrophysics and tropical biology.

The Smithsonian currently operates research facilities in each of these areas which are used not only by Smithsonian scientists and researchers, but by scientists, scholars, researchers, and students from all over the United States and other countries.

The proposals encompassed within the legislation are not new programs but rather ongoing programs in terms of simply upgrading current inefficient and inadequate facilities.

The Fred Lawrence Whipple Observatory [FLWO] is a major astronomical facility that is used by approximately 90 scientists a year for a wide variety of research projects, especially for studies of the large-scale structure and evolution of the universe. The observatory, which officially opened in 1968, is located atop Mount Hopkins in Tuscon, AZ, and is the site of the multiple mirror telescope [MMT], built and operated by the University of Arizona and the Smithsonian Institution. The MMT is the third largest optical telescope in the world, and the first of a new generation of giant advanced technology telescopes. The Smithsonian Astrophysical Observatory [SAO] also operates two smaller telescopes at Mount Hopkins, and a 10-meter diameter light collector which is the most sensitive in the world for ground-based searches for high-energy gamma rays from celestial sources.

Operations in support of the FLWO and MMT are administered from a base camp, presently located in Amado, AZ. The administrative offices are located in an old abandoned school building, which is rented from the local school district. Maintenance of the FLWO fleet of 76 vehicles, mostly obtained from Government surplus, is carried out in open sheds. Storage is primarily out in the open. Tour groups and visitors are assembled in a small inadequate room of the school building prior to ascending to the top of Mount Hopkins via surplus Government vans.

Access to the summit of Mount Hopkins from the present base camp in Amado is via a 18-mile dirt road, which requires continual maintenance by FLWO staff.

During the last decade, the Whipple Observatory has developed from a small field station into one of the Nation's foremost astronomical research facilities, attracting yearly to the Santa Cruz Valley tens of hundreds of public visitors and scores of professional astronomers from around the world.

The operation of a large astronomical observatory such as Whipple requires computation and drafting facilities, public display areas, tool shops, vehicle maintenance and storage areas, space for the receipt and transshipment of equipment and supplies, and administrative officers, all with access to major transportation routes in order to coordinate activities in several locations. The observatory is, in effect, a small scientific mountaintop town which must be supported from the base camp. Thus, this legislation would provide for replacement of present base camp facilities to a site closer to the summit of Mount Hopkins in the U.S. Forest Service National Forest at Montosa Canyon and an improved surface to the present 18-mile dirt road to the summit at a cost of $4.5 million.

In addition, the legislation provides for improved facilities at the Smithsonian Tropical Research Institute [STRI], located in the Republic of Panama, which is the principal United States center for tropical biology. Many of the easiest advances in tropical biology are behind us, yet continuing advances in tropical biology are essential to the economic and environmental health of both the developing and the developed worlds.

Beginning in the 1960's and continuing at an ever increasing pace, insights derived from experience in the tropics have revolutionized the biological sciences. STRI has played a decisive role in that development as a result of staff research and the productivity of visiting scientists. In addition to the direct advancement of science, STRI, through its educational programs, has played a major role in producing another generation of scientists. Students from both developed and developing countries such as the United States, England, Canada, India, Panama, El Salvador, Costa Rica, Mexico, Brazil, Ecuador, Colombia, Venezuela, Peru, and so forth, have benefited from STRI programs.

A viable scientific establishment is essential to maintenance of environmental integrity. For any institution, the foundations upon which scientific advancement depend are the quality of staff and the quality of the physical facilities to support that staff. While STRI has been able to improve its scientific staff in recent years, efforts to provide commensurate growth in physical facilities have been thwarted. For example, in 1983, 460 scientists from 194 institutions pursued independent research activities at STRI. Thus, facilities development must be given the highest priority or the reputation of STRI as a premier tropical research organization will be in jeopardy.

Expansion of facilities must focus on the solution of two problems. First, the need for facilities to do science, such as laboratories, offices, and conference facilities, and, second, the necessary support to insure efficient operation and use of scientists' time and energy. Four areas with current and projected STRI programs require design and construction of new facilities. Each of the apparently separate research programs at STRI, namely, the Pacific marine, Atlantic marine, and Barro Colorado Island stand on their own individual merits as highlighted by the distinguished gentleman from California [Mr. MINETA].

The Naos Island Laboratory located adjacent to the Pacific Ocean attracts habitats which include mud flats, mangrove swamps, rocky reefs, and sandy beaches. The location provides STRI the ability to study the Pacific tropical marine environment and to focus on the potential consequences of introducing Pacific species into the Atlantic. Most of the Smithsonian's facilities at Naos are hand-me-downs from the U.S. Navy which include marine cable tanks, a 1914/torpedo storage building converted into a lab and a large underground naval gun enplacement also used as a lab. Housing for scientists in close vicinity to this facility has posed a problem, therefore, the Smithsonian proposes to build a small dorm facility at Naos to accommodate approximately 12 scientists.

The Galeta Island Laboratory located directly on a Caribbean fringing coral reef platform provides access to mangroves, sandy beaches, lagoons, and beds of algae and seagrass. The main laboratory building is an inherited U.S. Navy facility originally built for World War II. The Smithsonian proposes to build two buildings at Galeta, a lab facility and a dorm for at least eight scientists at a cost of $3.5 million.

Barro Colorado Island was established as a nature reserve in 1923 and since custodianship of Barro Colorado Island was as-

sumed by the Smithsonian Institution in 1946, it has been a world center of research in tropical biology. The island is located by Gatun Lake and is fully covered by a developed tropical forest. In recognition of the value of the island and its isolation, the Government of Panama has added thousands of acres of the nearest surrounding peninsulas to the control of the Smithsonian, and the total land area is not 13,300 acres, constituting the largest tropical biological area under U.S. management. The island environment is as hostile to building and scientific equipment as it is valuable for biological research. Laboratory and office space are inadquate to support the pioneering research of staff, visitors, and students. Two areas of facilities require immediate attention, either because facilities do not exist or are profoundly degraded due to insect or fungal attack. The most urgent needs are a new scientific laboratory with attendant cages and growing facilities at an estimated cost of $2.8 million.

Their geographical proximity and presence in a single administrative program at Tivoli in Panama City strengthens each because of frequent interaction of staff and visitors. Construction of new facilities are warranted due to the fact that the institution has for many years maintained numerous wooden and other aged structures at the Smithsonian Tropical Research Institute at Panama. Most of these buildings are inadquate to sustain modern research activities, are badly deteriorated due to tropical weather conditions, and in some cases have suffered extensive damage due to termites. The careful planning by the Smithsonian for STRI would consist of a multiyear program beginning with a fiscal year 1987 request of $3.9 million to construct a terrestrial laboratory at the Tivoli site in order to vacate current inadequate leased space at Ancon, both of which are in Panama City. The entire plan is estimated to cost a total of $11,200,000 over several fiscal years and also would include construction at the Naos and Galeta sites, as well as on Barro Colorado Island.

Mr. Speaker, to conclude, I would briefly like to address the relationship between the Panamanian Government and the Smithsonian Tropical Research Institute. In January 1977, the Smithsonian Tropical Research Institution [STRI] entered into a contract with the Ministry of Health of the Republic of Panama. This contract provided a legal basis for STRI's activities as a legally incorporated entity in the Republic. The duration of this contract is indefinite and provides for STRI's activities beyond the life of the Panama Canal treaties.

The negotiators of the Panama Canal treaties recognized STRI's unique role in Panama by an exchange of notes covering its activities in the Republic, and by a separate note vesting custodianship duties to STRI on behalf of both nations for the Barro Colorado Island Nature Monument.

In the first diplomatic note, the negotiatiators vested land rights in the name of STRI, not the U.S. Government, and specifically referred the provisions of the STRI contract with its definite time clause. Provision was also made for the transfer of lands and properties from both the United States and the Republic of Panana to STRI under normal land transfer terms.

The after agreement provided for custodianship of the Barro Colorado Island Nature Monument by STRI under the provisions of the Convention on Nature Protection and Wildlife Preservation of 1940. Custodianship rights are automatically extended at 5 year intervals for the duration of the Panama Canal treaties. Provision is also made in this note for extension of this activity beyond the life of the present treaties.

In July 1985, the Republic of Panama provided STRI with international mission status in further recognition of its unique and significant activities in Panama.

The rights provided STRI under these various agreements is akin to those land rights provided to diplomatic missions in host nations. These rights clearly extend for an indefinite duration.

The United States has no comparable mainland tropical research area under its custodianship anywhere in the world. Both the United States and Panama are aware of the significant scientific research that is conducted at STRI and are desirous of continuing the mutually beneficial relationship without limit of time.

Mr. Speaker, I urge enactment of H.R. 1483.

Mr. HOYER. Mr. Speaker, I rise today in support of H.R. 3174, of which I am a cosponsor. Earlier this year I testified on behalf of this measure in the Subcommittee on Administrative Law and Governmental Relations because I believe that justice can be best served by allowing active duty victims of medical malpractice to file suit when the act occurs in a medical facility.

I have become familiar with the problems of activie-duty military medical malpractice victims because of a constituent of mine, Maj. David Brown of Seabrook, MD.

Major Brown served in the Army with distinction for 14 years. He was the recipient of the Bronze Star and the Purple Heart. His promising career was cut short when he became the victim of medical malpractice.

In May 1980, a healthy, active Major Brown entered Womack Army Hospital at Fort Bragg, NC, for a routine varicoselectomy. He left the facility several months later with irreparable brain damage and partial paralysis all caused by improperly administered anaesthesia.

Despite clear evidence that malpractice was present, Major Brown is barred from suing the Army because of the Feres doctrine. That doctrine holds that where the injuries were sustained as a result of treatment of injuries incident to service there is no right to sue. Major Brown's condition and the treatment rendered have nothing to do with his military service. These are not wartime injuries. He should have the right to seek compensation for the physical and emotional pain he and his family have suffered. Today cases like Major Brown's can only be remedied by private bills which would allow them individually the right to sue under the Federal Tort Claims Act. The gentleman from Massachusetts' bill properly restores this basic right to sue.

I commend him and the gentleman from Kansas, the chairman of the Administrative Law and Governmental Relations Subcommittee of the House Judiciary Committee for bringing this bill before the House of Representatives in a timely manner.

Mr. KOLBE. Mr. Speaker, I rise in support of H.R. 3174, a bill to allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care. This long-considered legislation deserves speedy passage by this Chamber.

This issue came to my attention primarily through the case of Mrs. Dorothy Meagher, a resident of Bisbee, AZ. Her son, Jerry, was admitted to Balboa Naval Hospital, San Diego, on January 17, 1984, for removal of a cyst from his arm. What should have been a relatively simple operating procedure turned into a nighmare for the Meagher family: Through negligence, Jerry emerged from the Balboa Hospital a severely brain damaged quadraplegic.

The Navy compensated the Meagher family—by giving them Jerry's 100 percent disability pay. To this amount, Jerry's family must add between $600 and $800 a month to take care of their son. The Meagher family is precluded from gaining meaningful compensation from the U.S. Government—indeed, precluded from bringing suit against the Government—by the Feres doctrine.

The Feres doctrine is the result of the 1950 Feres versus United States Supreme Court ruling that held that "the Government is not liable under the Federal Tort Claims act for injuries to servicemen where the injuries arise out of or are in the course of activity incident to service." The Court said that only an "express congressional command" would indicate that Congress intended to create such a right. This bill expresses that command.

It is unconscionable that this Nation asks young men to fight and die in lands far from our shores to preserve our system of government, but tells them that, if they are injured in a hospital by their own Government, they have no right of recourse. This bill removes that injustice. It will not help the Meagher family, for it applies only to injuries or death that occur after enactment. The Meaghers have already suffered because of the Feres doctrine. But we can, today, ensure that, in the future, families of members injured or killed because of military medical negligence have recourse to fair and equitable compensation from the Government.

Mr. GONZALEZ. Mr. Speaker, I commend the authors of this legislation for addressing a tremendous injustice in the treatment of military personnel. For years, these men and women have had inadequate recourse for being compensated for instances of substandard and negligent medical care they might have received in government military medical facilities.

Since I represent San Antonio, I have many Federal workers among my constituents. Included in this group are a large number of military personnel and also a large number of military medical personnel. I have studied the effects of the Feres doctrine in great detail, and have heard from many of my constituents about the issue.

What is rarely mentioned in the present-day discussions of the Feres doctrine is the effect the Feres doctrine had on military medical personnel. Once the Feres doctrine established that military personnel could not sue the Federal Government for medical malpractice, the only recourse left was to sue the individual doctors and other medical personnel. As I am sure we are all aware today, the compensation provided military medical personnel is not competitive with civilian medical personnel, yet our military doctors were forced to buy medical malpractice insurance out of their meager salaries in order to protect themselves and their families. This was an injustice, just as it was an injustice to prohibit recourse by malpractice victims against the Federal Government.

In 1976, legislation that I had introduced was signed into law to exempt the military medical personnel from personal liability, just as the Public Health Service and the Veterans Administration had done in earlier years for their medical personnel. This took care of the unjust financial burden placed on military medical personnel in their purchase of malpractice insurance. Nevertheless, the second part of the problem—that being the lack of any recourse of military personnel who received substandard medical care—was left unaddressed. Ironically, recourse is available to dependents of active duty personnel. This legislation takes the logical and necessary step of making that same recourse available to active duty personnel without exposing medical personnel to personal liability.

Today, I am very happy to see this further corrective legislation come to the floor, and I encourage my colleagues to support the measure in the interest of fairness toward our service men and women.

Mr. MATSUI. Mr. Speaker, I would like to voice my support for the bill H.R. 3174 which would authorize active-duty members of the Armed Services to sue the Federal Government for medical malpractice. Under current law our fighting forces can enter a Government medical facility, be scarred for life by negligent care, and find themselves without recourse. There is no purple heart for the victims of medical malpractice.

The bill before us is carefully crafted so that the Government is not liable for care administered in extraordinary circumstances. It applies only to medical and dental malpractice which occurs at a fixed medical facility.

There is no valid reason that the brave men and women who spend their lives in service to their Nation should be denied access to the very rights and freedoms they fight to protect.

I commend my colleague Mr. GLICKMAN for bringing this measure before the Congress.

Mr. KINDNESS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentleman from Kansas [Mr. GLICKMAN] that the House suspend the rules and pass the bill H.R. 3174, as amended.

The question was taken.

Mr. ROWLAND of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

PLANNING AND CONSTRUCTION OF FACILITIES FOR CERTAIN SCIENCE ACTIVITIES OF THE SMITHSONIAN INSTITUTION

Mr. MINETA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1483) to authorize the Smithsonian Institution to plan and construct facilities for certain science activities of the Institution, and for other purposes.

The Clerk read as follows:

H.R. 1483

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Board of Regents of the Smithsonian Institution is authorized to plan and construct facilities for the Smithsonian Astrophysical Observatory and the Smithsonian Tropical Research Institute.

SEC. 2. Effective October 1, 1986, there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution:

(a) $4,500,000 for the Smithsonian Astrophysical Observatory; and

(b) $11,200,000 for the Smithsonian Tropical Research Institute.

SEC. 3. Any portion of the sums appropriated to carry out the purposes of this Act may be transferred to the General Services Administration which, in consultation with the Smithsonian Institution, is authorized to enter into contracts and take such other action, to the extent of the sums so transferred to it, as may be necessary to carry out such purposes.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California [Mr. MINETA] will be recognized for 20 minutes and the gentleman from Florida [Mr. SHAW] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1483 would authorize the appropriation of $4,500,000 effective October 1, 1986, for constructing a new base camp and resurfacing the road at the Smithsonian's Whipple Observatory in southern Arizona and $11,200,000 for four new construction projects at the Smithsonian Tropical Research Institute in the Republic of Panama. The bill allows the transfer of funds to the General Services Administration in order to carry out the activities authorized.

As a member of the Smithsonian's Board of Regents and a member of one of the two committees to which the measure was referred, I am honored to bring this bill to the floor and to encourage its approval by the House. The bill consolidates in one legislative package planning and construction authority for facility development at two of the Smithsonian's most significant research installations and is in keeping with the Institution's long-range scientific expectations. Adoption of the measure now is necessary so that the Institution can seek funds for these projects, which are the Institution's highest construction priorities, in its fiscal year 1987 budget request.

Over the past year and a half, the Subcommittee on Public Buildings and Grounds of the Committee on Public Works and Transportation has held three hearings at which these projects were considered. I think it fair to say that there is wildespread understanding of the scientific significance of these facilities, as well as a high degree of admiration for the analysis with which the Institution has organized its overall construction priorities and the diligence with which it has pursued master planning processes for both units in the bill to ensure the effective application of the funds it is seeking.

The Fred Lawrence Whipple Observatory, located on Mount Hopkins, near Tucson, AZ, is the largest field installation of the Smithsonian Astrophysical Observatory. Since its official opening in 1968, the Observatory has been used as the site for experiments requiring extremely dark skies, dry climate, and good optical scene. The 8,550 foot summit of Mount Hopkins is the site of the multiple mirror telescope, a joint facility of the Smithsonian Institution and the University of Arizona. The MMT is the third largest telescope in the world and the first of its kind, combining six 1.8 meter telescope mirrors in a common support structure to produce the light-gathering capability of a conventional 4.5 meter telescope.

Other instruments are located on a half-mile long ridge at the 7,600 foot elevation. These include a 10 meter reflector for observations of extremely energetic gamma ray events and 1.5 meter and 61 centimeter reflecting telescopes for optical and infrared ob-

servations of distant stars and galaxies.

The administrative and support facilities of the observatory are located at Amado, AZ, which is about 35 miles south of Tucson and 18 miles from the scientific operations on Mount Hopkins. This base camp is the operational and logistical headquarters for anyone working at or visiting the mountain, its site consists of two adjacent leased parcels of land totaling approximately 4.25 acres; its facilities include a one-level school building and a one-level residence, both of which date from the 1930's and have been converted for office use. There are also vehicle service, repair, and storage sheds on the site.

The owners of the site have indicated a desire to sell the property. Because of its location near a flood-prone river that often makes access to the mountain very difficult, as well as other inadequacies of the site which serve only to promote operational inefficiencies, the Smithsonian is not a prospective buyer.

As the result of its master planning process, the Institution has selected a site on land under the control of the Forest Service that is across the river from and closer to the mountain than the existing one. Studies related to spatial analyses of the site and environmental documentation are underway, as are negotiations with the Forest Service. It is expected that arrangements can be made that will serve and protect the interests of both parties, and also provide a modest, but improved level of public education for visitors to the site.

If H.R. 1483 is enacted, the Institution expects to include a total of $4,500,000 for construction of the new base camp in its budget request for fiscal year 1987. It anticipates a period of approximately 27 months for design and construction.

In addition, the legislation provides for improved facilities at the Smithsonian Tropical Research Institute which is the principal U.S. center for tropical biology. Each year hundreds of Americans and international researchers join the permanent staff at STRI in undertaking fundamental studies on the tropics. Increasingly scientists and policymakers have recognized the need to understand how tropical ecosystems function in order to predict more accurately environmental changes in the temperate zones.

To capitalize on STRI's unparalleled data base of more than 60 years and use it effectively, it is necessary to undertake a program of facilities improvements. Existing STRI facilities fall into several categories:

Construction undertaken in the 1920's and 1930's;

Renovated structures obtained from the U.S. military; and

Renovated structures obtained from the Government of Panama.

With the exception of a new library building opened in 1984, these facilities are inadequate because of age, size, safety, and health standards. Construction materials used in the first half of the century are inappropriate to the region's high humidity and insect infestation, and renovation of surplus buildings has served only as a stop-gap measure to ensure continuity or research. The structures are inadequate for modern scientific purposes and require extensive maintenance.

Among the pressing needs for STRI is a new terrestrial laboratory to replace a small and obsolete leased structure. Originally built as a hospital morgue, the facility cannot adequately support current research purposes as it has severe deficiencies in its electrical systems, plumbing, load-bearing capacity, and parking, and in the widespread presence of arsenic and other health-related problems. Additionally, its hillside location makes extensive renovation and the addition of outdoor cages and plant-growing facilities impossible.

The construction of a new terrestrial laboratory at STRI's administrative headquarters, known as the Tivoli site, will allow the economy of logistics consolidation with the new library and existing offices. The Tivoli site also will allow proper space utilization for permanent staff, long-term visitors, and students. Better integration of computers, other communications devices, and modern scientific equipment will be afforded in the new facility, as will space for cages, green Houses, space for lectures, small meetings, and major conferences.

Construction and equipment for the new laboratory is currently estimated at $7.9 million. A gift of $4 million for construction has recently been received; an additional $3.9 million is required for completion of the project. If H.R. 1483 is enacted, the Smithsonian would include this amount in its budget request for fiscal year 1987.

Barro Colorado Island, located in the middle of Gatun Lake, a key component of the Panama Canal, has served as an important research center for tropical biology since 1923. Under the Canal Treaties, STRI was assigned custodianship of this 12,000 acre reserve on behalf of the United States and the Republic of Panama. The island serves hundreds of investigations annually, providing research space, as well as living and dining accommodations. Its physical plant includes many outdated wooden buildings which do not meet modern day building or health codes; as new scientific laboratory with attendant cages and growing facilities is a major requirement. Approximately $2.8 million is needed for this construction; funds would be requested in fiscal year 1989.

The geographical advantages of Panama to researchers interested in marine studies are incomparable: nowhere else in the world are two oceans so easily accessible for comparative research. Currently, renovated facilities are available on the Pacific, but no similar situation exists on the Atlantic where STRI research is conducted at Galeta Point in a small asbestos cement building acquired as surplus property from the U.S. Navy in 1965. The present laboratory has a severe asbestos problem in its walls and roof. Housing for researchers consists of a dilapidated trailer which does not meet safety and health codes; an inadequate sewage disposal system threatens the unique coral reef-mangrove swamp study site. A new laboratory, dormitory, and sewage system will require approximately $3.5 million which also would be requested in fiscal year 1989.

Finally, STRI is responsible for more than 60 vehicles, a major research vessel, and dozens of smaller boats, in addition to normal building maintenance requirements. At present, the maintenance needs of its geographically dispersed facilities are performed in the bottom of an old torpedo factory; the top floor houses research offices. In order to provide for adequate maintenance and to relieve the noise and congestion of the present site, a new central facility with modern equipment is required; the estimated cost of its construction is $900,000 and also would be fiscal year 1989 request.

Mr. Speaker, as you can see, H.R. 1483 reflects thoughtful and careful planning to meet the requirements of two of our Nation's small, but significant, scientific installations. The relatively modest total of the sums authorized—$15,700,000 spread out over several fiscal years—represents an important investment in basic science and in our need to understand the forces of nature and the relation of man and his universe.

I urge the adoption of H.R. 1483.

□ 1400

Mr. Speaker, I reserve the balance of my time.

Mr. SHAW. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to join with my colleagues from the House Administration Committee and the gentleman from California in bringing to the floor, today, the bill H.R. 1483.

This bill authorizes the Smithsonian Institution to plan and construct additional science related facilities at the Smithsonian's Tropical Research Institute located in the Republic of Panama and at the Whipple Observatory located near Tucson, AZ.

This science facilities construction proposal represents an effort by the Smithsonian to consolidate in one legislative package planning and construction authority for facility development at two of its most significant research installations.

The proposal is in keeping with the Institution's long-range scientific expectations and has been carefuly evaluated in the context of its overall construction priorities.

For many years now, Smithsonian scientists and staff, as well as visiting scientists from around the world, have been working in make-shift facilities which are unsuitable for carrying out their scientific research.

In Panama, where the Smithsonian has been given international mission status by the Panamanian Government, many of the facilities currently being utilized were constructed before the Second World War.

These buildings, after 45 years in the tropical jungle and being subjected to monsoons, blistering heat, termites, and countless other elements, have just simply reached the end of their useful life.

At the Whipple Observatory, the Smithsonian must replace its administrative and maintenance facilities which serves the astrophysical and scientific operations carried out on Mount Hopkins, and also serves as the staging area and orientation center for visitors.

This facility, or base camp, consists of a 50-year-old, one-level school building converted for office use and numerous vehicle service, repair and storage sheds; all of which are leased.

The base camp is too small to adequately support the increased scientific activity taking place on Mount Hopkins as well as the growing number of visitors visiting the Observatory every year.

Mr. Speaker, this bill would authorize funds for the construction of a new base camp for the Whipple Observatory which would be constructed on a site to be provided by the National Forest Service in the Coronado National Forest.

The Institution has already initiated site and an environmental impact studies to ensure the site is efficiently utilized and with minimal ecological impact.

The new base camp would include an administration building and visitor's center of approximately 10,000 square feet, a vehicle maintenance shop, and a warehouse building.

In addition, the dirt, one-lane access road to the site of the new base camp will be upgraded and paved.

In Panama, funds are authorized in the bill for construction at several of the Smithsonian's tropical research sites.

At the Trivoli site, a new 36,000-square-foot terrestrial laboratory and conference center will be constructed adjacent to STRI's existing library and administrative headquarters.

On Barro Colorado Island, the Smithsonian's Principal Research Center for Tropical Biology, a new 4,000-square-foot central field laboratory will be constructed to replace the outdated and decaying wooden buildings now being used and which no longer meet modern-day building or health code requirements.

And, at Galeta Point, the site of the Institute's Atlantic Ocean Marine Laboratory, a new laboratory of 7,000 square feet plus an ecologically sound sewage system will be constructed, as well as, a new dormitory facility capable of housing up to 15 people.

Numerous hearings have been held by the Public Works and Transportation Committee's Subcommittee on Public Buildings and Grounds on this legislative proposal both this year and last year.

Based on these hearings and careful evaluation of these projects, I would agree that these facilities are urgently needed, meritorious of our approval, and I would urge my colleagues in the House to support the passage of this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. MINETA. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio [Ms. OAKAR], a distinguished member of the Committee on House Administration.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Speaker, I first of all want to commend the gentleman from California [Mr. MINETA], along with the other Board Members, the gentleman from Massachusetts [Mr. CONTE] and the gentleman from Massachusetts [Mr. BOLAND] for the splendid work they do on behalf of Members of Congress serving on the Smithsonian Board of Trustees, and I rise in strong support of this bill, which would allow the Smithsonian to construct and plan for varieties of scientific activities for the Institution which is in the forefront of the World in its activities. I think we should certainly push forward these activities to give it a continued perspective on this area.

I also want to commend the gentleman from New Jersey [Mr. HOWARD], the chairman of the Committee on Public Works and Transportation, who had very, very thorough hearings on the issue. As the Members know, Mr. Speaker, the Committee on House Administration does have joint jurisdiction; but in view of the thorough hearings that were held, for this time we did waive our jurisdiction. We are going to have an oversight hearing in a week or two concerning the varieties of scientific activities of the Institution, but we were pleased to see the thoroughness of the hearings of the gentleman from New Jersey [Mr. HOWARD].

At this point I want to urge my colleagues to support the bill and support the Smithsonian in these activities, and I want to again commend my friend, the gentleman from California [Mr. MINETA].

Mr. Speaker, the Committee on House Administration through its task force on memorials and libraries has jurisdiction over policy and administrative matters relating to the Smithsonian Institution and shares joint referral, of H.R. 1483, with the Committee on Public Works and Transportation.

The Committee on House Administration will not have the opportunity to take further action on this legislation before adjournment and thus defers to the Committee on Public Works and Transportation for House consideration today.

This action, however, should not be construed as precedent for changing jurisdiction of the Committee on House Administration over related matters.

Mr. SHAW. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I rise in support of H.R. 1483, a bill authorizing construction at two science facilities of the Smithsonian Institution.

As a cosponsor of the bill and as a Regent of the Smithsonian, I want to thank Chairman HOWARD for bringing this legislation to the floor in a timely fashion. And my Smithsonian colleague, NORM MINETA, who is a member of the Public Works Committee, has also taken a leadership role on the bill and many other issues of interest to the Institution.

Mr. Speaker, I won't repeat the details of this bill, which have been eloquently explained by Representative MINETA. However, I do want to emphasize the importance of the Smithsonian's role as a scientific research institution.

The most familiar role of the Smithsonian is as a collector of objects, a museum or our Nation's attic. The museums along The Mall here in Washington are certainly the most visable and visited part of the Institution. But there is another, equally important role, the Smithsonian has played since its establishment over a century ago.

Through several facilities located around the country and across the globe, the Smithsonian Institution is sponsoring basic research in astrophysics, environmental sciences, archeology, zoology, and tropical biology. These facilities are designed to fulfill a basic mission of the Smithsonian to be a college of discoveries.

H.R. 1483 will enable the Smithsonian to maintain and improve two of its

most significant research installations: the Astrophysical Observatory and the Tropical Research Institute.

In 1890, with a $5,000 gift from Alexander Graham Bell, the Astrophysical Observatory was established and first housed in two sheds in back of the Castle. Since then, the facility has developed into the leading international center for the study of astrophysics.

This bill would authorize $4.5 million to plan and construct a base camp for the support of scientific operations at the Mount Hopkins, Arizonian Observatory.

This legislation also provides authorization for repair and improvement of facilities at the Tropical Research Institute in Panama. During the construction of the Panama Canal, the Smithsonian was first called to the area for biological studies. Since then, the Institute has developed into the principal U.S. Center for Tropical Biology Research—a center staffed by 25 leading scientists and visited by several hundred international researchers.

This legislation would authorize a 5-year facilities improvement program for $11.2 million.

Mr. Speaker, over several decades, the Congress and the Smithsonian have made a commitment to these research activities, and we have the responsibility to properly maintain these important facilities. I urge my colleagues to support this legislation.

Mr. SHAW. Mr. Speaker, I do not have any further requests for time, and I yield back the balance of my time.

Mr. MINETA. Mr. Speaker, I yield such time as he may consume to the very distinguished gentleman from Illinois [Mr. GRAY], a member of our Committee on Public Works and Transportation and a member who formerly chaired our Subcommittee on Public Buildings and Grounds.

Mr. GRAY of Illinois. Mr. Speaker, I thank my distinguished friend and Regent of the Smithsonian, the gentleman from California, for yielding, and I certainly rise in strong support of this legislation.

Mr. Speaker, sitting on the Subcommittee on Public Buildings and Grounds, we had three hearings on this subject, and I can assure my colleagues that this legislation is at the top of the priority list by the Regents and administrators down at the Smithsonian Institution.

□ 1415

Mr. Speaker, it was mentioned earlier by previous speakers about what a great job the Smithsonian is doing; not only up and down the Mall, but in the scientific community. This legislation will upgrade their work. I want to commend the distinguished gentleman from California [Mr. MINETA], the distinguished chairman of the full committee, Mr. HOWARD, and my friend from Florida, Mr. SHAW, who has put in a lot of time and effort on this legislation.

Mr. Speaker, I urge my colleagues to support this bill unanimously. Thank you.

Mr. BOLAND. Mr. Speaker, as one of the sponsors of H.R. 1483, I want to urge my colleagues to support this important legislation.

When most people think of the Smithsonian Institution, they think of the magnificent museums on the Mall in Washington. The Smithsonian, however, is much more than a repository of treasures of art, culture, and history. It is one of the world's foremost scientific research institutions, and Smithsonian scientists work not only in Washington, but in sites around the globe.

The legislation now under consideration, H.R. 1483, will authorize some much needed improvements at two of the Smithsonian's most significant research facilities, the Whipple Observatory in Arizona and the Tropical Research Institute in Panama. Opened in 1968, the Whipple Observatory covers more than 4,700 acres on and near Mount Hopkins. The Observatory houses a number of astrophysical instruments including a multiple mirror telescope, the third largest telescope in the world. Since it opened, the Observatory has used leased property as the site of its administrative and support facilities base camp. A new base camp is needed, both to correct certain deficiencies associated with the current site and because the lease on the current site expires in June of next year. The Smithsonian has identified a new base camp site which is closer to the Observatory than the current site. H.R. 1483 will authorize the construction of the new base camp, a facility which I believe is critical to the provision of a level of support services consistent with the quality of scientific research being done on Mount Hopkins.

Mr. Speaker, one of the least understood phenomena currently confronting the world, and one with potentially catastrophic consequences, is the deforestation of tropical rain forests. The Smithsonian, at its Tropical Research Institute in Panama, is studying this problem and hundreds of other puzzling questions in the field of tropical biology. The Tropical Research Institute, is our Nation's principal center for tropical biology. Despite its standing, scientists stationed at the Institute and those who visit it each year, live and work in facilities that are woefully inadequate. The Institute has many needs, chief among them the construction of a new terrestrial laboratory at Tivoli, a new scientific laboratory on Barro Colorado Island, a new laboratory and dormitory at Galeta Point and a central maintenance facility to handle the Institute's disparate maintenance needs. Fortunately, private resources will help meet some of these needs. H.R. 1483 will permit us to meet the remainder, and in so doing allow us to provide the Smithsonian's tropical research staff with the kind of equipment and facilities they need to do their important work.

I hope the House will approve this authorization measure. Scientific research, whether done at the Smithsonian or elsewhere, needs to be supported by modern instruments and facilities. H.R. 1483 will go a long way toward insuring that Smithsonian scientists at the Whipple Observatory and the Tropical Research Institute will receive that kind of support.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. MINETA] that the House suspend the rules and pass the bill, H.R. 1483.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MINETA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will announce that pertaining to the rollcall vote on the military medical malpractice bill, that vote will take place after the completion of the farm bill today.

FOOD SECURITY ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 267 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2100.

□ 1417

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2100) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Thursday, October 3, 1985, title XV was open for

amendment at any point on which debate had been limited to 1 hour, equally divided between proponents and opponents.

Fifty-two and one-half minutes of debate remain on title XV; 29 minutes for the proponents, and 23½ minutes for the opponents. Pending was an amendment offered by the gentleman from Missouri [Mr. EMERSON] and an amendment to the amendment offered by the gentlewoman from New Jersey [Mrs. ROUKEMA].

The Chair recognizes the gentleman from California [Mr. PANETTA].

PARLIAMENTARY INQUIRIES

Mr. PANETTA. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PANETTA. Mr. Chairman, I would like to make an inquiry with regard to the time allotment. As I understand it, an hour has been assigned for this particular section of the farm bill. The question that I have is whether that time has been divided equally between the minority gentleman, Mr. EMERSON, and myself, to control that time, or what is the approach taken with regards to that hour?

The CHAIRMAN. The Chair would state that the time has not been divided equally yet between Mr. EMERSON and Mr. PANETTA. But the Chair could so do.

Mr. PANETTA. Mr. Chairman, I would then ask unanimous consent that the hour, excluding obviously the time that has already been used by the gentleman from Missouri, that that time remaining be equally divided between the minority gentleman, Mr. EMERSON, the ranking minority member on the subcommittee, and myself.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from Missouri [Mr. EMERSON] will be recognized for 23½ minutes and the gentleman from Califronia [Mr. PANETTA] will be recognized for 29 minutes.

As the Chair recalls, the last amendment that was read was the amendment to the amendment offered by the gentlewoman from New Jersey [Mrs. ROUKEMA], and at this point she should be recognized.

Mr. DE LA GARZA. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DE LA GARZA. Mr. Chairman, did I understand the Chair to state that the gentlewoman from New Jersey would receive her time?

The CHAIRMAN. Since we have divided the time between Mr. PANETTA and Mr. EMERSON, she should get her time from Mr. EMERSON.

Mr. DE LA GARZA. Mr. Chairman, I appreciate that because my concern is that I offered her that her time would be protected and that I would see to it that today she would have her time available. If that can be coordinated within the time yielded, then I would appreciate it in order that we might carry out our commitment to her when we last adjourned.

Mr. EMERSON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. EMERSON. Mr. Chairman, we have an hour equally divided between the chairman and myself, but does not someone who has an amendment get 5 minutes on their own, separate and apart from the hour that we have?

The CHAIRMAN. The amendment by the gentlewoman from New Jersey was not printed in the RECORD, and is an amendment to the Emerson amendment. Now that all the time on title XV has been allocated equally, her time should come from the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. I thank the gentleman for yielding me this time.

Mr. Chairman, the amendment has been read, and I would simply like to say that the amendment, as a point of clarification, is an amendment to the gentleman's amendment, and it retains the provisions in the committee bill to assist low-income elderly and disabled participants who have high medical expenses.

It is my understanding that the gentleman from Missouri has accepted the amendment.

I yield to the gentleman from his response.

Mr. EMERSON. Mr. Chairman, I accept the gentlewoman's amendment.

Mrs. ROUKEMA. I thank the gentleman.

Mr. Chairman, I have an amendment to the gentleman's amendment. This amendment retains the provisions in the committee bill to assist low-income elderly and disabled participants who have high medical expenses.

As the ranking Republican on the Hunger Committee, I have studied the issue of elderly participation in the Food Stamp Program. Elderly poor with high medical expenses do not receive as high a benefit level as they need because the medical deduction threshold is too high. The poor disabled have the same problem. My amendment would provide higher benefits to approximately 130,000 elderly and disabled households per month at minimal cost to the Federal Government.

Most people do not realize that the Food Stamp Program is the country's largest elderly nutrition program. Every day, millions of older Americans rely on food stamps to pay their grocery bills. About 20 percent of all food stamp households have one elderly member. The program is also important in a similar manner for the disabled.

My amendment will assist low-income elderly or disabled citizens by lowering the medical deduction threshold used to determine food stamp benefits. Currently, an elderly or disabled household must spend at least $35 per month on medical needs before this cost is deducted for the purpose of determining food stamp benefits. My amendment would lower this threshold for these households from $35 a month to the lesser of 5 percent of gross income or $35 per month.

Because the average income of an elderly household is currently about $360 a month, the $35 threshold constitutes almost 10 percent of its income. Since many households have incomes far below the average, this $35 threshold works as a particular hardship on them. In addition, you should understand that this change will bring the Food Stamp Program more into line with the Federal Income Tax Code in terms of determing eligibility for a medical hardship deduction.

I urge my colleagues to support my amendment which will be beneficial to many elderly and disabled households.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New Jersey [Mrs. ROUKEMA] to the amendment offered by the gentleman from Missouri [Mr. EMERSON].

The amendment to the amendment was agreed to.

Mr. PANETTA. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in opposition to the Emerson amendment, as amended. I rise because I believe this is a key test amendment for the House of Representatives on the hunger issue in this session of Congress.

It is a test of whether we indeed recognize or hide from the facts about hunger. It is a test about whether we intend to only speak about the problem of hunger in our society or whether we intend to do something about it. It is a test of whether we stand by the commitment that the House of Representatives made last year in adopting H.R. 5151, the Hunger Relief Act, by a margin of 364 to 39.

The principal provisions of H.R. 5151 are contained in this section of the farm bill. These are the provisions that the Emerson amendment seeks to strike out. I would urge all Members to look at the facts regarding this amendment and its impact.

First of all, let me make clear to the Members that the provisions of this

bill relating to nutrition are within the budget resolution adopted by the Congress—adopted by the House, adopted by the Senate, and put into effect by this Congress. Indeed, Chairman GRAY has made clear that the food stamp authorizations contained in this bill are fully consistent with the 1986 budget resolution adopted by the Congress.

□ 1425

As a former member of the Budget Committee, I recognized that in order to provide for needed authorizations to address the hunger problem in our society it was important to account for these programs in the budget resolution. That was the battle we fought on the House side. It was fought in conference between House and Senate conferees on the budget, and was ultimately adopted by the conference and included in the fiscal 1986 budget resolution. This resolution was adopted on the basis that we can indeed justify the minimal restorations included in H.R. 2100 when it comes to a program that impacts on hunger.

Make no mistake about it, the food stamp program has received more than its share of cuts over the last 4 years. This program was cut almost $2 billion in each year for 4 years as a result of the 1981 reconciliation proposal. What we seek to accomplish here comprises only a minimum restoration, somewhere in the vicinity of $400 million in fiscal 1986 for nutrition programs, and indeed even our proposal falls below that figure per year.

As I said, the budget resolution adopted by the House and the Senate allows for the provisions incorporated in H.R. 2100.

Second, this amendment offered by the gentleman from Missouri has been portrayed as one that does not undercut current services. That is simply not so. Adopting this amendment will cut benefits by $550 million over 4 years; it will cut benefits that flow to job-training programs, benefits that help poor families confronting the tough decision of heating or eating, and benefits for nutrition assistance program recipients in Puerto Rico. Make no mistake about it, this amendment does not maintain current services; it cuts domestic food assistance programs below current services by almost $550 million.

The amendment would also eliminate a key provision of H.R. 2100 that provides for a thrifty food plan that keeps pace with food prices, by adding 2 to 3 cents to the cost of the average food stamp meal now totaling a meager 42 cents. The amendment would also eliminate a provision that helps the working poor, by increasing the income deduction from 18 to 20 percent of earnings. The amendment deletes a provision that helps working mothers by providing a child care deduction. If we are concerned about employment, the provisions of H.R. 2100 are essential to keep people working while providing some minimum benefits.

The amendment also removes ajustments in the assets limitations for the unemployed, and eliminates modest increases in the shelter deduction for the elderly and for many others who face the dilemma of heating or eating.

The facts about hunger are clear to everyone in this House.

The CHAIRMAN. The time of the gentleman from California [Mr. PANETTA] has expired.

Mr. PANETTA. Mr. Chairman, I yield myself 5 additional minutes.

Mr. Chairman, the facts on hunger, I think, are clear to everyone. I believe there is no one in this House who does not understand the full impact of the hunger issue in our society. We have conducted some 16 hearings in the subcommittee. Witness after witness in hearing after hearing confirms the fact that hunger is a problem that is on the increase in our society, doubling and tripling the services provided by soup kitchens and food pantries in recent years. The increase of hunger has been confirmed by the Conference on Mayors, it has been confirmed by the Governors Association, and it has been confirmed by the President's 1984 Task Force on Food Assistance.

The 1984 task force was established by the President to look for solutions to the hunger problem. And what did they recommend? They said that current food assistance are not enough; they said we need to provide additional benefits to the hungry in this country. It is important to note that many of the task force's recommendations have been incorporated in this legislation.

Let us look at the facts. What we are seeing today is increasing infant mortality, particularly in the first 12 months of life. We are seeing increasing symptions of anemia time and time again, reflecting the fact that nutrition benefits are not reaching our children. One out of every four children in this country currently lives in poverty, and that is having a tremendous impact on our future.

These facts warrant taking some action. I recognize that it is nice to talk about the hunger problem. We hold concerts to bring attention to the hunger problem, we have a Select Committee on Hunger, and we declare days of fast and abstinence to deal with the hunger issue. And all of those are good. I do not want to undercut the sincerity of all who are interested in pushing forward those particular ways to show a proper concern about hunger. But it does not help the people who are hungry. This is the legislation that helps people who are hungry, and if we are seriously concerned about that problem, now is the time to provide assistance.

Last year, we made that commitment. The Members who voted for the 1984 Hunger Relief Act in the 98th Congress made a statement, and that statement was overwhelming. By a vote of 364 to 39 we said that we would adopt basic provisions to our domestic food assistance to help solve the hunger problem in our society. Since then, no legislation has been enacted into law. Nothing has changed. Only the problems has grown worse, if anything.

I ask Members to remember the commitment that was made last year, and request, at the very least, that we make the commitment again this year by adopting these provisions. We are talking about helping the poorest of the poor. If we are concerned at all about safety net issues, that is good reason to support food stamps. I ask Members to recognize that 95 percent of those receiving food stamps live below the poverty line and receive 98 percent of the benefits. These benefits serve the poorest of the poor.

The food assistance provisions of H.R. 2100 are not going to solve hunger in our society. They are not going to relieve the problem that still face millions of Americans in our society. If you vote for these provisions, it is not likely that you are going to receive recognition from a lobbyist or in the from of a campaign contribution, but at the very least voting for these provisions will provide a few cents to those who are hungry in our society.

So, Mr. Chairman, it is out of that sense of compassion that I ask the House to reject this amendment and to stand by the provisions contained in the bill.

Mr. GLICKMAN. Mr. Chairman, will my colleague, the gentleman from California, yield?

Mr. PANETTA. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I thank my colleague for his excellent statement.

One of the provisions that the amendment offered by the gentleman from Missouri [Mr. EMERSON] speaks to is the thrifty food plan which is in the committee bill, and this is one of the things that allows people who are needy a more recent computation of food costs for the purposes of buying their food stamps. That is one of the things that strikes me as being at the heart of the amendments that the gentleman has brought before us today, that is, to give people an opportunity to value their food that they are buying with food stamps at as close to today's food prices as possible, rather than several months ago, which is where we go back to if the Emerson amendment is adopted.

Am I correct in that statement?

Mr. PANETTA. Mr. Chairman, the gentleman is correct. The gentleman is a member of the subcommittee and has followed this issue closely.

The CHAIRMAN. The time of the gentleman from California [Mr. PANETTA] has expired.

Mr. PANETTA. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from California.

Mr. PANETTA. Mr. Chairman, to explain further, what we tried to do is we retain the cost-of-living increase provided with the thrifty food plan, but the problem is that the present cost-of-living index is somewhere between 3 and 15 months behind. It is not that we are increasing the cost-of-living index; what we are trying to do is update it so that it does reflect what the cost of food is in a judicious and reflective way.

So this formula change would provide that update, and it would provide at a minimum something around 2 cents per person per meal in addition to what is currently being provided. Let me make it clear that if the cost of food goes down and if the thrifty food plan goes down, then the benefits go down. We have not changed that trigger in any way.

Mr. GLICKMAN. Mr. Chairman, I thank the gentleman, and I reserve the balance of my time.

Mr. EMERSON. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the distinguished chairman of the subcommittee, the gentleman from California [Mr. PANETTA], says that my amendment makes significant cutbacks in food stamp benefits, and he cites two examples—energy assistance and the Job Training Program. What the gentleman fails to state is that my amendment does not make any reference to these two provisions. The cutbacks the gentleman from California mentions are in the committee bill. They are his provisions, not mine.

In addition, the gentleman from California talks about over $500 million in cutbacks as a result of my amendment. Any savings attributed to my amendment result from paper savings due to the manipulation of the Puerto Rico grant. My amendment continues the current law of providing $825 million for Puerto Rico for food assistance—more than for any State except New York.

□ 1435

Yet this is described as a savings of over $500 million by 1990.

The committee bill adds $370 million for Puerto Rico, and yet this is described as a savings of $208 million.

Now this is not a freeze amendment. Benefits and deductions increase according to current law. The thrifty food plan for a family of four is now set at $264 a month. The Emerson amendment does not change the COLA which will allow an increase up to $295 a month by 1988, which is a 12-percent increase in benefits.

The standard deduction will increase from $95 a month to $107 a month, or another 12-percent increase.

The shelter dependent care deduction will rise from $134 a month to $152 a month, or by over 13 percent.

So this is not a freeze amendment.

The committee bill increases deductions and benefits over and above the cost-of-living adjustments. The deduction for shelter dependent care is separated creating two deductions and the shelter deduction continues to rise.

The committee bill provides for an increase from the present level of $134 a month to $328 a month by 1988 for shelter and dependent care deductions. This is almost a 150-percent increase.

You have heard that these increases in food stamp spending are accommodated in the budget resolution. However, this is only half the story. Increases were accommodated only if the deficit was not increased. This was the agreement reached in the conference of the 1986 budget. The only reductions in spending in H.R. 2100 are for farm programs. Over $7 billion over a 3-year period was saved from farm programs. Are we in fact reducing farm income so that we can increase food stamp spending over and above the cost-of-living adjustment?

You have heard some Members say that my amendment cuts benefits. It does not. It simply does not. I eliminate additional spending. That is what we are doing.

The committee bill does provide for some savings in the Food Stamp Program. Remember it is the committee bill that saves money in some few areas and not this particular amendment.

This bill before us today is not H.R. 5151 that passed last year. It is significantly different. There was no permanent change to the thrifty food plan in H.R. 5151. There is one in H.R. 2100 at a cost of almost $500 million by 1988. The shelter dependent care deduction was not separated in H.R. 5151, and was allowed to more than double.

In H.R. 2100 there is almost a 150-percent increase in these deductions.

H.R. 5151 did contain a provision to require States to repay misspent Federal money over and above the 5-percent error rate tolerance level. This provision saved $205 million by 1988. Now this is missing from H.R. 2100.

Over 8 percent of the food stamp funds are spent in error. Over 8 percent of the food stamp funds are spent in error at a loss to the Federal Government of over $900 million a year. Only one State has ever repayed any money to the Federal Government.

The real cost of H.R. 2100 is masked. In reality, the committee bill will cost almost $600 million more than is described in the committee report. Puerto Rico is provided an additional $370 million, and yet the committee report shows this is a savings of $208 million.

You have also heard that the President's task force recommendation was cited as a basis for the committee bill. However, there are some important missing pieces. Where is the task force recommendation to allow States to have the option of running a State-designated Food Stamp Program? It is not in H.R. 2100. Where is the task force recommendation to require States to repay the value of benefits issued in error in excess of 5 percent? It is not in H.R. 2100. Where is the task force recommendation to cash out food stamps for elderly and disabled participants? H.R. 2100 allows this for Puerto Rico, but for nowhere else. That task force recommendation is not in H.R. 2100.

The true costs of the food stamp expansion in H.R. 2100 are masked. In reality, Puerto Rico is provided additional money over and above the $825 million included in the Food Stamp Act. An additional $370 million over the life of the bill is provided, and yet this is counted as a savings.

Look at the bill. Section 1527, the money going to Puerto Rico is increased by $37 million in 1987 up to $149 million in 1990. That is almost $600 million more over the life of the bill that is described, $600 million more.

Mr. Chairman, I reserve the balance of my time.

Mr. PANETTA. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from California, the chairman of the Select Committee on Aging [Mr. ROYBAL].

Mr. ROYBAL. Mr. Chairman, I rise in strong opposition to the amendment offered by Mr. EMERSON deleting provisions from the food stamp portion of H.R. 2100. The Emerson amendment, even as amended by Roukema, would threaten the basic nutritional needs of hundreds of thousands of low-income older Americans throughout the country.

Presently, nearly 6 million older Americans—or 23 percent of those over age 65—have incomes below 125 percent of the poverty standard. For many of these poor, ill, or isolated individuals, geriatric malnutrition has been found to be a severe problem. National surveys by the Human Nutrition Center on Aging have found that close to 50 percent of elderly Americans consume insufficient levels of cal-

ories, vitamins, and nutrients. What is more, much evidence has been accumulated showing a strong link between weakened disease resistance and poor nutrition.

Over 1½ million households with a member aged 60 or older participate in the Food Stamp Program. Yet, only half of those elderly persons who are eligible for food stamps actually receive them.

Information provided to the Select Committee on Aging indicates that many older persons mistakenly do not believe they are eligible for the program, or simply do not understand the procedures for receiving this assistance. The amendment offered by Mr. EMERSON even as amended by Roukema would compound this serious problem by deleting the provision which allows States to provide public information to elderly, disabled, or unemployed individuals who are potentially eligible for food stamps.

Another provision freezes the assets limitation, which has not been updated since the first time national standards were set in 1971, thereby excluding many truly needy persons from the program. This action would also prohibit single elderly persons from maintaining a minimal reserve of resources for burial.

Other provisions prevent benefits from remaining current with actual food prices, prohibit recipients from receiving the USDA's minimal nutritional diet, freeze the excess shelter deduction, reduce assistance for those on low-income energy assistance, reduce benefits for participants in the Job Training Partnership Act, and freeze for 5 years the nutrition block grant for Puerto Rico. Cumulatively, these changes would force hundreds of thousands of frail and low-income older Americans to choose between essential food, shelter, medicine, and heating needs.

Mr. Chairman, the impact of these provisions on low-income Americans is substantial. By lessening the availability and accessibility of basic nutritional assistance to older Americans and other needy individuals, we would be threatening their very health and well-being. I strongly urge my colleagues to reject this amendment.

Mr. EMERSON. Mr. Chairman, I yield 4½ minutes to the distinguished gentlewoman from New Jersey [Mrs. ROUKEMA], the ranking member of the Select Committee on Hunger and a member of the Education and Labor Committee, which has extensive nutrition jurisdiction of its own.

Mrs. ROUKEMA. Mr. Chairman, I thank the gentleman from Missouri, the author of this amendment, and I rise in support of it.

Mr. Chairman, I would like to stress, first of all, that the gentleman from Missouri [Mr. EMERSON] has made the case, not only forcibly, but with great clarity that this bill is not H.R. 5151, on which we voted last summer. It has significant differences.

I should also like to stress at the beginning that my amendment to the amendment of the gentleman from Missouri [Mr. EMERSON] removes the limitation on assistance for low-income elderly and disabled in the medical expense area, so we can put that one aside; but I would also like to say to the distinguished chairman of the committee, the gentleman from California, who asked the question in his presentation, at least two questions. What is different here than when we discussed the issue of H.R. 5151? Well, there are a number of things that are different, but in the brief time that I have left to me, I would like to make two points. One is that I, as the ranking member of the Select Committee on Hunger, would not now or ever suggest that we withdraw our commitment to food spending for the poor, and I want to stress that this bill does not withdraw our present commitment. It does not in any way reduce current spending levels. In fact, it does allow for the cost of living indexing, both in food stamps as well as in shelter and in dependent care, but it maintains our present commitment.

It does, in fact, do exactly what some moderate Republicans had suggested in the 92 Group budget, which was to maintain current services with the cost of living increase, so we are not withdrawing a commitment; but, Mr. Chairman, I think it must also be recognized that now we are speaking in the climate of a deficit crisis. Indeed, the airwaves and the print media were filled this weekend with the thought that we might have to adopt some extraordinary measures for a 5-year plan to reduce the budget deficit.

So I say, no, we should not withdraw one dime of our commitment to the poor and their food needs, nor is this the time to increase significantly, as the committee bill does, spending in this particular area.

Because the facts are, as the gentleman from Missouri [Mr. EMERSON] has laid out, this is a costly additional program. In fact, the USDA estimates that if this indexing proposal to the 100-percent thrifty food plan were applied over the past 3 years, there would have been costs overpaid by $381 million in 1982, $307 million in 1983, and $119 million in 1984.

So the point is that shifting to this kind of an indexing, as proposed by the committee, would have in fact resulted in cost overruns, if you will, above and beyond the cost of inflation.

So I would conclude by stating very graphically that the budget deficit crisis has gotten to this extent, that right now, this year, we are paying $155 billion in interest on the debt alone—$155 billion in interest on the debt alone, and that interest has not provided a dollar's worth of food stamp money nor a meal for a needy child.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mrs. ROUKEMA. I yield to my colleague.

Mr. PANETTA. Mr. Chairman, I thank the gentlewoman for yielding.

That has been taken into consideration in terms of the budget resolution. The budget resolution allows for exactly what is incorporated in here, and if the gentlewoman voted for the budget resolution, she essentially was voting to in fact provide this additional amount for nutrition.

Mrs. ROUKEMA. The fact is, I did not vote for the budget resolution because I felt that the numbers were fictitious, that the estimates were not real and that it was not a genuine step in the direction of a downpayment on the deficit.

Mr. PANETTA. Mr. Chairman, I yield 4½ minutes to the gentleman from Texas [Mr. LELAND], the chairman of the Select Committee on Hunger.

Mr. LELAND. Mr. Chairman, let me first commend my colleague, the gentleman from California [Mr. PANETTA] for his outstanding leadership in this matter.

Mr. Chairman, I rise in support of titles XV and XVI as they are intact and in opposition, for sure, to the Emerson amendment. I support the domestic food programs of H.R. 2100. I intend to support these provisions with all my heart and everything that I have got.

The Select Committee on Hunger, which I chair, has been investigating the adequacy and availability of existing food services in both urban and rural parts of the community throughout this country. At each of our hearings we have received testimony indicating that current services are inadequate. We have been told over and over again of families who are repeatedly forced to do without food because their benefits do not last through the months.

We hear horror stories about how some of our senior citizens have to sell their food stamps in order that they can pay their rent or pay their utilities, horror stories like this from poor people who cannot afford the sacrifice because of the so-called fiscal conservatism that we hear rampant throughout this Congress.

A few months ago we received poverty statistics from the Census Bureau which reported that 14.4 percent of the American population lives in poverty. That is about 35 million people in this country. We know there is a definite link between poverty and hunger and these census figures confirm that a consistently high number

of low-income Americans remain vulnerable to hunger. In a country like ours, we cannot afford to not feed people, we cannot afford to cut programs.

In fact, we need more. I would like to come here and advocate more food stamps; but within the fiscal constraints of our budget that we have already dealt with, and I happened to vote against it, too, because we spend $10 billion more for military expenditures than we did for human services, than we did trying to feed and house the poor of our Nation; little children that we have benefited in the Mississippi Delta that the gentlewoman from New Jersey and the gentleman from Missouri both visited with me, when we went to Mississippi and we saw those poor, desperate children. We saw them suffering.

We heard from doctors who said that there was rampant anemia, which is the first sign of hunger and malnutrition. We heard from the people in the programs saying that we just do not have enough food. We heard from the white poor senior citizen who said to us that she had to sacrifice certain things because she did not have enough food stamps to last her through the months.

Mr. Chairman, I envision a day when there is no more hunger in America, a day when no child or adult in the United States need face the prospect of going without food. This is not a fantasy for me. When I go home to my district, I see poor people. I live with them.

The infant mortality rate in the black community in this country is twice as high as it in the white community. Why is that? It is because we have a disproportionate number, a higher poverty rate in the black community. We do not have adequate food to feed those young potential mothers in the WIC program and in the food stamp program. These people are suffering.

Our children in the black and Hispanic and native American communities throughout this land and even the poor white communities are suffering from the ramifications of this hunger. Eventually their minds are affected and they become burdens on our society and we pay for them in billions of dollars in the future.

This amendment is not even cost effective. We might save a few million dollars here, but in the long term we are going to pay for it.

We have got to feed the hungry of this Nation and we cannot do it by claiming that we are going to save this amount of money because we are paying so much on our debt, so much interest on our debt.

This hurts me. I have an empathetic perspective on hunger. I grew up in a poor community. Now, I do not want to tell a good "old boy" story, but my people are suffering. People in Appalachia are suffering and we have got to do something about this.

We cannot afford to have this amendment pass. We have got to help our chairman, the gentleman from California [Mr. PANETTA] to save these titles. Too much fiscal concern is overshadowing the real human concerns that we ought to have for the people in our country.

Mr. EMERSON. Mr. Chairman, I yield myself such time as I may require.

I want to first of all say to my dear friend, the gentleman from Texas, the chairman of the Select Committee on Hunger, that I do not disagree with anything the gentleman has said abut the problems that need to be addressed; the problems of infant mortality and the other problems that the gentleman raises, I share his concern for them, but they are not going to be cured any more by what the gentleman from California [Mr. PANETTA] has in the committee bill than they would be by my amendment.

More money for food stamps is not the answer or the cure for infant mortality and the other socioeconomic problems that the gentleman from Texas raises, and while I appreciate his impassioned plea, I do not think they really speak to the subject of my amendment.

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. I yield to my friend, the gentleman from Texas.

Mr. LELAND. Mr. Chairman, does the gentleman understand that feeding pregnant women feeds the child that that pregnant woman is bearing and that in fact is the very essence of how we solve problem of low birth weight and eventually the problem of infant mortality?

Mr. EMERSON. Mr. Chairman, if I may reclaim my time, indeed I do; but what I am saying is that the solution to that is not simply an increase in food stamps. It is a matter of education and a lot of other factors relating to nutrition that need to be addressed.

The gentleman and I have explored also in the Select Committee on Hunger the need for the one-stop shopping for people who are in need.

□ 1450

Mr. LELAND. But when they stop, then they cannot find the adequate food stamps that they have and it does not help at all, does it?

I understand the gentleman's concern for trying to streamline programs in the Government.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. If I may reclaim my time, I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. I thank the gentleman for yielding.

Mr. Chairman, I would simply like to say, in consideration of my dear friend, the gentleman from Texas, and the point that he is making, but also the point that the gentleman from Missouri is making, of course, we are not solving the total problem of hunger here, but the two particular issues that the gentleman referred to, one in Mississippi and specifically the WIC Program, are not under this food stamp bill.

We most generously funded the WIC Program in reauthorization just within the last month. The problem of AFDC is as much a State problem in the particular situation. They are interrelated, of course, but they are not this gentleman's amendment.

Mr. LELAND. If the gentleman will yield further, I would just like to clarify my position on the issue.

When we went to Mississippi, the people talked about the need for more WIC funding and the need for more food stamp funding. They were talking about inadequate services to the little children in particular, if the gentlewoman will remember. I am not confused on the issue.

Mrs. ROUKEMA. For our colleagues, I want them to know that we are not talking about WIC and we are not talking about AFDC in the amendment of the gentleman from Missouri [Mr. EMERSON]. We are talking about food stamps.

Mr. LELAND. We are talking about food stamps.

Mr. EMERSON. Mr. Chairman, if I may reclaim my time, let me say that my amendment does permit a COLA increase. We are, with my amendment, going to permit a full COLA increase in food stamps. My amendment does not cut anything. Nothing.

Mr. PANETTA. Mr. Chairman, will the gentleman yield on that point?

Mr. EMERSON. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, the gentleman has said it over and over again, and it is simply not true. What he has done is selectively chosen between the pluses and the minuses in the legislation. He got rid of the pluses, he accepted the minuses, and what he has are cuts.

Mr. EMERSON. Let me say to the gentleman, they may be cuts from the budget adopted by the House but they are not cuts from the program. We have to keep our terminology straight here.

What we do not do is add the add-ons in my amendment. We do not cut. We just do not add the add-ons that are in the committee bill.

In response to the gentleman from California [Mr. ROYBAL] I want to say that the elderly are provided a maxium asset allowance of $3,000. In addition to the $3,000, the food stamp

participants may, this is all included, keep their home and their property regardless of acreage, household goods, furniture, appliances, cash value of life insurance policies, pension funds, all cars used for producing income, and irrevocable trust funds.

This amendment does not cut. It is like the old argument going back to 1981 when they said we were cutting. We were not cutting anything. We were restraining the rate of growth and that is what my amendment does right here. We permit the COLA but we restrain the rate of growth.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. EMERSON. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. I thank the gentleman for yielding.

Mr. Chairman, I have asked the gentleman this question before since it was of concern to me.

Suppose the economy gets worse, I ask the gentleman from Missouri. What will happen to those additional people that will be in need, not presently on the food stamp rolls but who will be in need? Is it not correct under the gentleman's amendment that they will be entitled and included under his amendment?

Mr. EMERSON. That is absolutely correct. If you qualify, you qualify, and in that case which the gentlewoman suggests, I suppose the ultimate result would be that we would have to ask for a supplemental.

Mr. PANETTA. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. FAZIO] a member of the Select Committee on Hunger.

Mr. FAZIO. I thank the gentleman for yielding this time to me.

Mr. Chairman, in addition to the Select Committee on Hunger, I also happen to serve on the Committee on the Budget and I want to begin my brief remarks by attesting to the fact that this was a clearly and fully debated issue in the conference that we had with the other body. In the adoption of the budget resolution, we clearly left this one domestic initiative contained in the House resolution, intact.

In concert with the Senate, we decided that the hunger problem that is so clearcut in our country needed to be attacked. It is understood that there would be a small increase in this year's domestic spending agenda for this purpose. In fact, the amendment offered by the gentleman from Missouri [Mr. EMERSON] would reduce below the current services baseline, and that is what I think he is referring to when he talks about COLA's, spending for food stamps over 5 years by $543 million. We are not keeping pace here. We are cutting below the level required to keep on doing the same job—moderate as it may be—next year.

□ 1500

We are cutting below the level projected for 1986 by $200 million. That is the total reduction in the Emerson amendment, a $200 million reduction over the legislation that passed this floor overwhelmingly, authored by the gentleman from California [Mr. PANETTA] and cosponsored by a broad, bipartisan consensus in this body. And these numbers are attested to by the Congressional Budget Office.

Why were we so much together on this issue? Because the data is clear. In Chicago, in Massachusetts, in Minnesota, not the poorest places in this country, studies show a clear increase in infant mortality, low birth weight children, tremendous health problems with cost implications for the taxpayers of this country in the years ahead. The gentleman from New York [Mr. GILMAN] can make this point more clearly.

But I want everyone to understand that half of the people who get food stamps are children. We are currently finding that only 19.8 million people use food stamps when, in fact, there are 33.8 million Americans living in poverty. You can assume that half of the 14 million people who are eligible and not receiving food stamps today are children.

If we want to make a good investment in the future of our country, let alone in the future of the taxpayers who support it, we should begin by adopting the bill as adopted last year and again this year.

As a member of the Select Committee on Hunger and chairman of the Budget Task Force on Income Security, I have heard testimony from State and local health and welfare officials attesting to the growing numbers of American families whose daily diets are nutritionally deficient. Hunger in our country does exist and if we do not take steps to ensure that low-income families are provided with the means for adequate nutrition then hunger will persist in America.

The amendments proposed by the gentlemen from Missouri to maintain the Food Stamp Program under current law and to allow each State to operate its own food stamp program will drastically push back efforts to end hunger in this country. Food stamp eligibility determination would not be updated to reflect the real cost of living for the poor and many needy American families could be cut off the Food Stamp Program.

The President's Task Force on Food Assistance (1984) reported that:

The recessions of the past have resulted in an increase in the number of "new" poor families, many of whom are needy but have assets which disqualify them from eligibility to the food stamp program.

H.R. 2100 includes provisions recommended by the Task Force for providing food stamps to the new poor. The proposed amendment goes against the President's Task Force recommendations.

Millions of needy Americans are, under current law, unserved by the Food Stamp Program: Participants in the Food Stamp Program total 19.8 million, however, right now 33.7 million Americans are living in poverty.

If the Federal Government were to relinquish its national responsibility for the Food Stamp Program to the States—the Emerson optional block grant proposal—then those States unable to absorb the burden of the program due to unsteady economic conditions would be forced to reduce benefits and/or cut needy persons from the program.

Food is a basic human need. Access to adequate food should remain a right for every American. Any effort to reduce the Federal Government's commitment to this right would be an immoral catastrophe in our land of plenty.

Mr. EMERSON. Mr. Chairman, I have no further requests for speakers at this time and would reserve the balance of my time.

Mr. PANETTA. Mr. Chairman, I yield 2½ minutes to the gentleman from New York [Mr. GILMAN], a member of the Select Committee on Hunger.

Mr. GILMAN. Mr. Chairman, I rise in opposition to the Emerson amendment and I commend the gentleman from California [Mr. PANETTA] for his efforts in support of the Food Security Act.

Mr. Chairman, as a member of the Select Committee on Hunger, I have become acutely aware of the long-term consequences of hunger and malnutrition at home and abroad. I do not believe we can support a more worthy policy than assuring minimum nutrition to American families.

I am objecting to the Emerson amendment and urging my colleagues to vote against it for several reasons: First, the amendment eliminates the slight benefit increases adopted by the Agriculture Committee that will help the poor and unemployed feed their families. Second, the Emerson amendment would cut the Food Stamp Program below current services by approximately $550 million in fiscal year 1990. Third, it would seriously affect poor children, single parents, the frail elderly, and other vulnerable groups by not recognizing extraordinary expenses for energy assistance, for child care, shelter, or burial savings in computing benefits against a meager budget.

The Agriculture Committee bill is modeled after the recommendations of the President's 1984 Task Force on Food Assistance and is similar to the Hunger Relief Act which passed with overwhelming bipartisan support in the House in 1984. The Emerson amendment deletes those provisions that was designed to ensure basic food benefits to keep pace with the costs of food in the next 4 years.

There is significant evidence that the problem of hunger in the United States is not new, nor is it diminishing. Health indicators such as infant mortality and low-birth weight are on the rise in rural America. Growth stunting among urban, poor children due to inadequate nutrition is also common today. The postneonatal death rate is on the upswing nationally for the first time in 20 years, and it is largely attributed to inadequate prenatal nutrition and care.

The overall affect of this vote will determine whether we make progress in combating hunger, malnutrition, and related health problems in our own Nation in the future. Accordingly, I urge my colleagues to vote against gutting the antihunger effect of H.R. 2100 and to vote in opposition to the Emerson amendment.

Mr. EMERSON. Mr. Chairman, I yield 1 minute and 30 seconds to the gentleman from Texas [Mr. COMBEST].

Mr. COMBEST. Mr. Chairman, I appreciate the gentleman yielding. As I supported the amendment in committee, I will support the gentleman's amendment on the floor. I think it is important.

I do not look at defense spending or spending for farm programs or others in comparison with the Food Stamp Program. I do not feel we are taking money from the Food Stamp Program and giving it to the Defense Department or any other agency. I think we have got to look at spending levels as they are and as they appear under each program.

This amendment does not call for a freeze at last year's level. It allows for cost-of-living adjustments. We are allowing for cost-of-living adjustments in other programs. It allows it to go up and it allows new increases of participants to come onboard.

I strongly support the amendment of the gentleman. I would have to look closely at it if it froze at last year's levels, but in fact, it does not. And I thank the gentleman again. I would like to reiterate the fact that it is not a freeze, it is not a cut, it is simply allowing the program to continue as was and not add those additional increases on.

I think while I did vote for the budget, there are many areas that under that budget resolution I may vote to cut the funding below that level. I do not believe we have got to limit it to that level, and if we can cut and save additional spending, I think we should do so. I do not believe we are cutting this program, or adding it to defense, or cutting this program and adding it to something else. I think we have to look at every potential program and to cut in the areas where we can. I think we can potentially make some changes here that will allow this program to still operate efficiently.

I appreciate the gentleman's amendment and will support it.

Mr. EMERSON. I thank the gentleman for his comments.

Mr. PANETTA. Mr. Chairman, I yield 1½ minutes to the gentleman from Maryland [Mr. MITCHELL].

Mr. MITCHELL. Mr. Chairman, I rise in opposition to the amendment, of course. Everybody, everybody wants spending cut, and I want it cut, too. But I do not not want it cut on the backs of those who are the least powerful in this Nation. It is just not decent, it is not right.

Today the U.S. Catholic bishops issued a statement trying to call the attention of this Nation to poverty in our midst. While I am glad they did that, I am somewhat ashamed that here in this House, where we should be representing all of the people, we did not take the initiative on this. We did not take the initiative in addressing poverty.

No, we took the initiative in banging it on the backs of the poor, those who are the poorest, the more powerless, those without a voice, time and time again in the budget process over the last 4 years, those who have suffered the most, not the military budget, not those favored programs of people, but you bang on the poor, and the alienated, and those in desperate straits in this country.

The other thing that annoys me so much is that we have the gift of glib words to try to cover over with words the real things that we are doing. This is a cut. Spell it out any other way you want to, it is a cut.

The argument has been raised that somehow or another all that we are doing is preventing some add-ons. Well, even if that were true, when the condition changes and the need arises, is it not the responsibility of this House to address that need?

No, let us just kill this amendment, for the Lord's sake. It is time to stop banging and flogging the poor of this Nation in the name of deficits. Let somebody else contribute to the deficit reduction.

Mr. EMERSON. Mr. Chairman, I yield myself such time as I may require.

You know, it strikes me that we can call a duck a giraffe, but that does not make it one.

Now, all I hear is cut, cut, cut. This is not a cutting amendment. We do not permit the increase for Puerto Rico. We stabilized the grant for Puerto Rico at a set amount per year over the next 5 years, and somehow that is construed as a savings of $208 million.

But the fact of the matter is my amendment would permit a COLA, it would permit increases in the cost of deductions. We just do not add the add-ons. It is not cutting.

As I said earlier, it is like the argument back in 1981 when we were not cutting, we were restraining the rate of growth essentially, and that is what we are doing here.

I reserve the balance of my time.

Mr. PANETTA. Mr. Chairman, I yield 2 minutes to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Chairman, I rise in opposition to the amendment. I know that it is well-intentioned and that it is offered in the hope of saving money.

I think it is important to realize what we are doing here. There were tradeoffs made, in this bill this year. Some things were cut which I did not exactly agree with in order to provide funds for other purposes.

What does this amendment do after those tradeoffs have been made? It takes the benefit side of the tradeoffs and eliminates them.

Depending on how you look at it, that may or may not be a cut in spending. If you make a deal in which you are going to give something, and take away something, and then you take away what you have given, it is not a very good deal. This is particularly true for those who are trying to see some improvements in the Food Stamp Program in this bill.

As already pointed out, this bill as reported by the committee is substantially the same as the Hunger Relief Act of 1984. Anybody, in this body concerned about consistency who would like to say what I voted for last year when it comes time to implement it, I did what I said I was going to do, should be very concerned about were they in favor of this amendment.

Also, it has been pointed out that there are a lot of confusing statistics being bounced around here. Let us take a look at a family of four, with income at the poverty level, average benefit, not the overall average benefit. There is a big difference. Let's take a look at what has happened to the average family. Such a family of four over the last 4 years has fallen behind relative to current services. In fact, the CBO says that this year we are about $2 billion behind current services when compared to 1981.

Furthmore, the Physicians Task Force on Hunger did a recent study showing that up to 20 million Americans go hungry each month. This is an intolerable situation.

In H.R. 2100, we have authorized slight increases in the Food Stamp Program to help stem the rising tide of hunger. This bill makes adjustments in the thrifty food plan formula so that it better reflects the true cost of food for our neediest citizens. It authorizes the first increase in the overall asset limitation level since it was established in 1971 and provides greater incentives for food stamp recipients to work by returning the earned income deduction allowance to 20 per-

cent. This bill also extends the authorization for pilot projects allowing seniors in several States, including Vermont, to continue cashing out their food stamps.

During the Agriculture Committee markup of this bill the committee joined with me to correct a longstanding inequity in the eligibility determination process. As you know, a high proportion of seniors living alone are below the poverty level. In 1982, 15 percent of all elderly were below the poverty level. Twenty-eight percent of the seniors living alone had incomes below the poverty level. Even higher proportions of elderly women and a majority, 66 percent, of black women living alone were below the poverty level. In Vermont, over 70 percent of the elderly poor live alone or with unrelated individuals. Clearly the elderly living alone are in need of assistance.

In recognizing that seniors have special concerns and expenses, higher resource limitations for food stamp eligibility purposes have been established. In existing law, the asset limitation level for households with two or more members, one of whom is age 60 or over, is $3,000. All other food stamp households have a far lower asset threshold. In other words, seniors living alone are currently ineligible for the higher elderly asset level. A very simple provision in H.R. 2100 corrects this inequity.

All in all, H.R. 2100 authorizes an additional $155 million for the Food Stamp Program in 1986. There is no doubt in my mind that his increase is both necessary and fully justified. In my home State of Vermont I see families who must regularly tap the resources of emergency food shelves and soup kitchens because they are unable to feed their children during the final week of the month. A recent report released by the U.S. Conference of Mayors shows that the number of families and children requesting emergency food aid increased by over 35 percent in 1984. I have constituents who call my district offices, literally in tears, when they find that, due to a weekend or holiday at the end of the month, their stamps will arrive a day or two late. I am particularly concerned about seniors and disabled individuals, unable to leave their homes, that have little access to outside food resources once they have exhausted their food stamps. Living on the edge in this way has become all to commonplace across the country. I urge my colleagues to join me in supporting the important increases in food stamp benefits contained in this bill. Action is needed now to help mend the growing holes in this vital safety net program.

While I support this bill, there are problems that this legislation does not address. One area where I have a great deal of concern is in our current food stamp quality control system. As you know, in 1980 Congress established, and in 1982 stiffened, a quality control system that makes States financially liable for errors resulting in benefit overissuances. Starting this year, fiscal year 1985, States have a 5-percent target error rate. Errors in excess of 5 percent will result in fiscal sanctions that will take a hefty chunk out of many States' administrative budgets. In fact, if error rates for 1985 remain at 1983 levels, most recent data available, almost every State would be faced with a sanction. Even if error rates continue their downward trend as projected by both the CBO and USDA, States will still be assessed $69.5 million for fiscal year 1984 and over $198 million for fiscal year 1985.

There should be no complacency over errors in any Federal program and it is imperative that we continue to work to improve the administration of the Food Stamp Program. If our goal is indeed to improve quality however, imposing higher and higher fiscal sanctions at the same time that States are lowering their error rates just does not make sense. Shifting administrative costs from Federal to State coffers under the guise of quality control is at best irresponsible and at worst could actually jeopardize adequate administration of the Food Stamp Program in States that cannot afford to pick up this slack.

This is a problem that is not going to go away by itself. I believe that reforming our current quality control system should be a priority for the Agriculture Committee and the House as we continue to work on improving the Food Stamp Program.

As a final point, I strongly support the purposes outlined in the food stamp title of this legislation.

I would urge Members to carefully weigh this bill and to vote against this amendment. The bill as it stands is an attempt to balance the needs of people in urban areas as well as people in rural areas. If we adopt this amendment, we will unbalance this bill.

Mr. EMERSON. Mr. Chairman, I yield 1 minute to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. I thank my colleague. I just wanted to comment on the consistency aspect of this.

I do not view the issue the same as H.R. 5151, but I do know that when the 92 group of moderate Republicans adopted their budget this year, this was the precise program for food stamps, current services plus an allowance for inflation. That is what the basis of the 92 group budget was.

So if we are looking for consistency, that is one area we should look at. It was very precise.

Mr. PANETTA. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair would state that the gentleman from Missouri [Mr. EMERSON] has 4 minutes remaining, and the gentleman from California [Mr. PANETTA] has 2½ minutes remaining.

Mr. EMERSON. Mr. Chairman, I reserve the balance of my time.

Mr. CHAIRMAN. The Chair would state to the gentleman from Missouri that the gentleman from California [Mr. PANETTA] has the right to close the debate.

The EMERSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in closing, I would say that the bill before us today simply is not H.R. 5151 that passed last year with my support. It is very significantly different.

There was no permanent change to the thrifty food plan in H.R. 5151. There is one in H.R. 2100 at a cost of almost $500 milion by 1988.

The shelter dependent care deduction was not separated in H.R. 5151 and allowed to more than double. In H.R. 2100, there is almost a 150-percent increase in these deductions.

So I would just repeat for emphasis that my amendment is not a cutting amendment. It just does not add the add-ons, and it is a responsible amendment that gives a full COLA for the cost of food as anticipated under the law, and a full COLA for allowable deductions.

It just does not add the add-ons, and I think Members ought to be critically aware of that fact. It is not, as it has been described, a cutting amendment at all.

I would go back to repeat that in the debate in the budget over Social Security, it was not, are we going to expand Social Security or are we going to have a COLA. It was, is there going to be a COLA or is there not going to be a COLA.

The debate here today is, is there going to be a COLA or is there going to be a vastly expanded food stamp program. I submit that we ought to vote for the Emerson amendment, permit the COLA and the deductions, but not expand the program at this critical time, considering the deficits that we face.

I reserve the balance of my time.

□ 1515

The CHAIRMAN. The gentleman has 2 minutes remaining.

Mr. PANETTA. Mr. Chairman, I yield 2 minutes to the chairman of the Committee on Agriculture, the gentleman from Texas [Mr. DE LA GARZA].

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Chairman, I respectfully ask my colleagues, once again, to stay with the committee. I want to mention something very briefly about food stamps; that there is still some talk and some insinuation that somehow

they are bad, that there is too much fraud and abuse. I want to categorically state to you that if any person receives food stamps that he is not entitled to, only two things could have happened: The person did not tell the truth, or someone made a mistake. Otherwise, we have got the rules drawn so tight that no one can categorically state that they can abuse the program.

Second, we are getting bogged down too much with figures here, but I think I can simplify the numbers: Had it not been for the cuts of 1981 or the change in the legislation in 1981 and 1982, we would be at 100. But we are at 50. So we add on trying to get to about 80. The gentleman from Missouri says that the amendment does not cut. We are not cutting; but we are not at the 100 I spoke of. What the committee bill does is try to get up to the 80 and the amendment keeps us at the 50, COLA and everything. That is the gist of it.

The fact is also that we cannot legislate in a vacuum on this type of legislation. We made our cuts, nearly $8 billion, in the committee. The whole bill saves a net of $7.9 billion; but we balance spending and savings; we balance the bill. We add here on the food stamp, but cut in another area. Our bill is balanced. You cannot strike out solely at the poorest of the poor just because the committee added a little bit. It is true that we added, but we add to bring the program back up to 80, we did not try to go to the whole 100, to restore the program to 100 percent of pre-1981 levels. I wish that somehow we would not even need food stamps. This is the greatest country in the world. We should not be talking about feeding hungry people, but they are there, they are out there in my area, in rural America, and in your area, in the inner cities. That is where they are at. We should not say, "No," to them at this time.

Mr. EMERSON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. Does the gentleman yield back the balance of his time?

Mr. EMERSON. No; I reserve my time, Mr. Chairman.

PARLIAMENTARY INQUIRY

Mr. EMERSON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. EMERSON. Mr. Chairman, my understanding is that this division of time relates to the entire title of the bill and there may be other amendments. Would my reservation of time apply to the other amendments?

The CHAIRMAN. As the Chair stated a few minutes ago, the gentleman managing the bill on behalf of the committee has the right to close debate on the amendment.

Mr. EMERSON. I understand.

The CHAIRMAN. Is the gentleman's question that if he reserves the 2 minutes, he will have an additional 2 minutes on an amendment that may be forthcoming?

Mr. EMERSON. Yes, Mr. Chairman.

The CHAIRMAN. That is appropriate.

Mr. EMERSON. Mr. Chairman, I reserve the balance of my time.

Mr. PANETTA. Mr. Chairman, I rise to close on this amendment, and I yield myself the remaining time.

The CHAIRMAN. The gentleman from California [Mr. PANETTA] is recognized for 30 seconds.

Mr. PANETTA. Let me say very simply this program has taken its cuts; $2 billion a year were cut from the program over 4 years. What we try to restore here is about 20 percent in terms of many restorations that were recommended by the President's Commission on Hunger.

Let me also say that the people that we hurt will involve long-run costs in the future. If we do not provide adequate nutrition now, we will pay for it in increased Medicaid costs, in increased costs in terms of education.

Vote against this amendment. We need to invest in the future.

Mr. FUSTER. Mr. Chairman, I rise in opposition to Congressman BILL EMERSON'S amendment to H.R. 2100 which would have a very detrimental and discriminatory effect on the needy American citizens of the Commonwealth of Puerto Rico whom I represent in Congress. This amendment would, among other things, freeze for an additional 5 years the current funding level of the Nutritional Assistance Program of Puerto Rico [NAP], which was established in 1982 in lieu of food stamps and which has been frozen since then at a level that represented a cut of 25 percent of the amount Puerto Rico was getting under the National Food Stamp Program.

My opposition to the Emerson amendment stems from my concern that the growing erosion in actual buying power of the poor in Puerto Rico due to the accumulating effects of inflation over a 9-year period will have a very adverse and highly discriminatory impact upon my already very disadvantaged constituents.

Right now, the maximum nutrition assistance benefit to needy families in Puerto Rico is only 72 percent of what is paid to a food stamp family on the mainland, this in spite of the fact that Puerto Rico has substantially higher food costs, and despite the fact that needy families in Puerto Rico have substantially lower incomes and lower levels of other Federal assistance than comparable families on the mainland. The Emerson amendment would, in effect, result in a further, severe cutback of the food assistance benefits in Puerto Rico, since it would keep the 1982 cap through 1990, and deny us even a nominal increase to partially offset rising food costs.

According to CBO estimates, if the Puerto Rican program remains frozen indefinitely, as Mr. EMERSON proposes, the overall benefit reduction for my needy constituents will reach about 40 percent by fiscal year 1990. In other words, two of every five food assistance dollars will have effectively disappeared in the Puerto Rican program if the Emerson amendment prevails. While the National Food Stamp program has been enjoying yearly increases to account for inflation, the Puerto Rican program has been suffering yearly reductions. There is a very large gap between what needy Puerto Ricans get in nutrition assistance and what their counterparts in the mainland get yet the Emerson amendment would keep that unfair gap growing. The poor in Puerto Rico get an increasingly inadequate amount of funds for food assistance and yet the Emerson amendment would further cut back the benefits they receive.

This is why the Agriculture Committee of the House, in providing for an update in NAP funding levels to partially reflect increased food costs, stated, and I read from its report on H.R. 2100 (Rept. 99–271, part 1)

The Committee believes that a continued freeze in authorized funds for the NAP would impose an inequitable burden on the poor in Puerto Rico. Without an increase to reflect changes in food prices, Puerto Rico would be forced to further reduce benefits and limit eligibility. In the view of the Committee, Puerto Rico has already borne significant reductions in its primary food assistance program. Any further cuts in spending authority could impair the nutritional status and long-term health of its population. The Committee thus supports nominal increases in the authorization ceiling for the Puerto Rico Nutrition Program to reflect changes in food prices.

Mr. Chairman, let me stress the multifaceted nature of our predicament: First, we begin with a lower level of nutrition assistance; second, then, in addition, we have had no indexing for inflation even though food prices go up every year in Puerto Rico just as they do in the mainland; third, our food costs are much higher in Puerto Rico than in the mainland, and further, the poor in Puerto Rico are in fact not only poorer than those in the mainland, but also have less access to other sources of help than those in the mainland. Currently, for example the maximum income allowed to a needy family to qualify for NAP is $8,000 a year while a comparable mainland family may qualify for a higher food stamp benefit even with income as high as $13,260 a year. Likewise, my constituents are either not eligible or else receive substantially less amounts of funds in Federal programs such as the Supplemental Security Income, AFDC, Medicaid, and other programs that help the disadvantaged.

The bottom line, Mr. Chairman, is that poor American citizens who live in Puerto Rico are not only much worse off than those in the mainland, but also that the food assistance they get is grossly inadequate to meet their nutritional needs.

The nominal increase in funds authorized by the Agriculture Committee which Mr. EMERSON opposes will help insure that the nutritional status and long-term health

of the Puerto Rican needy will not be further impaired by more cuts in the actual buying power of their food assistance program. Its defeat will prevent that large gap which already exists between the needy in Puerto Rico and those on the mainland from further disproportionate widening.

I urge you to oppose Mr. EMERSON's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. EMERSON], as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. EMERSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 171, noes 238, not voting 25, as follows:

[Roll No. 338]

AYES—171

□ 1530

The Clerk announced the following pair:

On this vote:

Mr. McCandless for, with Mr. Barnes against.

Ms. MIKULSKI changed her vote from "aye" to "no."

Messrs. GROTBERG, DELAY, NICHOLS, and VOLKMER changed their votes from "no" to "aye."

So the amendment, as amended, was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Was the amendment printed in the CONGRESSIONAL RECORD of September 24?

Mr. JEFFORDS. The amendment was printed in the RECORD, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 388, beginning on line 7, strike out "Low Income Home Energy Assistance Act (42 U.S.C. 8621 et seq.)," and insert in lieu thereof "Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.) other than energy crisis intervention assistance provided under section 2604(a) of such Act,".

Page 390, beginning on line 1, strike out "Low Income Home Energy Assistance Act (42 U.S.C. 8621 et seq.)" and insert in lieu thereof "Low-Income Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.)".

Page 390, beginning on line 17, strike out "Low Income Home Energy Assistance Act (42 U.S.C. 8621 et seq.)," and insert in lieu thereof "Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.) other than energy crisis intervention assistance provided under section 2604(a) of such Act,".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

The CHAIRMAN. Under the agreement, the gentleman is entitled to 5 minutes for his amendment. If there is opposition, the opposition is entitled to 5 minutes.

The Chair recognizes the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Chairman, let me explain what will occur. These are relatively important matters and they deal with the jurisdictions of more than one committee. First of all, I am offering this amendment for the sole purpose of entering into a colloquy with respect to the intent of certain provisions of the food stamp bill relative to an employment training program.

I then intend to offer three other amendments, one dealing with low-income home energy assistance and two dealing with the Job Training Partnership Act. I would ask the in-

dulgence of the Members for these amendments.

I would like to enter into a colloquy with the chairman of the subcommittee and the ranking Republican of the subcommittee, to clarify some of the issues relative to cooperation between the Job Training Partnership Act and the programs as set forth in this bill relative to training under the Food Stamp Program.

I would like to clarify an issue regarding the Employment and Training Program, section 1514 of this bill. I agree with the gentleman that one objective of this program should be to assist individuals who are receiving food stamps to become gainfully employed. It is clear that this section of the bill is necessary to implement effective and innovative training and job search programs for food stamp recipients in order to facilitate their move into unsubsidized jobs.

Am I correct in assuming though that the gentleman intends that these programs should not duplicate, where feasible, existing programs that could serve this population?

Mr. EMERSON. The gentleman is correct.

Mr. JEFFORDS. Is it also true that the gentleman intends that where feasible there should be coordination, not duplication of effort, between other available employment and training programs such as the Work Incentive Program, the Job Training Partnership Act, and the Employment Services?

Mr. EMERSON. The gentleman is correct.

Mr. JEFFORDS. Additionally, under other employment and training programs, labor market information is collected. Does the gentleman intend that this program utilize that information as it relates to this program?

Mr. EMERSON. I expect that States will use all available information in setting up employment and training programs in food stamp participants.

Mr. JEFFORDS. Further, if the services of other employment and training programs are utilized, does the gentleman intend that funds available under this section be used to provide these services?

Mr. EMERSON. States will make appropriate reimbursement to other agencies when employment and training services are utilized.

Mr. JEFFORDS. Finally, it is my hope that the report from the Secretary regarding the findings from these programs be made available to the Committee on Education and Labor in the House and the Committee on Labor and Human Resources in the Senate.

I thank the gentleman for his answers, and look forward to working with him during the conference on this bill to further refine these concepts, and to strengthen the intent of this program.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Missouri.

Mr. EMERSON. I thank the gentleman for yielding to me.

Mr. Chairman, the purpose of this program is to help certain food stamp participants move into regular employment by providing training and experience and improving the employability of the participants. It also allows the State to coordinate employment and training activities under both the Food Stamp and AFDC Programs.

A State will have considerable latitude in designing its program. State flexibility is important if the program is to succeed. Each State can designate other agencies to administer parts of its program, such as those agencies administering the Job Training and Partnership Act [JTPA] programs or State public employment offices. The program itself may encompass, at the discretion of a State, job search training and support programs, such as job finding clubs, training in employment techniques, job placement, or other training and support activities aimed at improving the employability of participants.

It is my intention that programs set up to help food stamp participants return to full-time employment be coordinated with all other employment and training programs for this group of people, including WIN, Job Training Partnership Act, and the Community Work Experience Program. In addition, should the food stamp agency use the services of these programs, appropriate reimbursement would be made. Should there be any further issues of coordination that need to be worked out, I am confident that these can be accomplished in conference.

Mr. JEFFORDS. Mr. Chairman, it is also my understanding that the chairman of the subcommittee has no objection to this colloquy.

Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the CONGRESSIONAL RECORD of September 24?

Mr. JEFFORDS. The amendment has been printed, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 388, strike out lines 6 through 10.

Page 388, line 11, strike out "(ii)" and insert in lieu therof "(i)".

Page 389, line 7, strike out "(iii)" and insert in lieu thereof "(ii)".

Page 390, strike out lines 9 through 20, and insert in lieu thereof the following:

(5) effective February 1, 1986, in clause (A) of the last sentence, striking out "$35 a month" and inserting in lieu thereof "the lesser of $35 a month or 5 per centum of monthly household income after any exclusions and before any deductions provided for in this section".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, I offer this amendment on behalf of myself, the chairman of the Education and Labor Committee [Mr. HAWKINS] and the chairman of the Energy and Commerce Committee [Mr. DINGELL]. I rise to offer a small amendment to correct what I think is a serious problem with the bill as it was reported by the Agriculture Committee.

The bill as written would fundamentally alter the treatment of energy assistance payments for food stamp purposes. In stark contrast to congressional intent in reauthorizing the energy assistance program only last year, the bill before us would require, in some cases, that some people have their food stamp benefits cut because they received energy assistance benefits.

Congress never intended for this to happen, and I do not think that we should permit it to happen now. My amendment would simply strike the energy assistance language from the bill.

We often hear of people faced with the "heat or eat" dilemma. I can think of no instance when this dilemma has been clearer. I certainly do not think we should be in the position of sanctioning it.

Moreover, I am concerned that the Agriculture Committee's action strays into the jursidiction of the other committee on which I serve, Education and Labor, and into that of the Committee on Energy and Commerce. I am joined in support of the pending amendment by my distinguished colleagues, Chairman HAWKINS and Chairman DINGELL, and the chairmen of each of the three subcommittees with jursidiction over this issue. I am also joined by ranking Republican TOM TAUKE, who is lucky enough to serve on both the Education and Labor and Energy and Commerce Committees.

As I mentioned, Congress only last year reenacted the Energy Assistance Program and again included the language prohibiting energy assistance benefits from being counted as income or resources for any purpose under any Federal or State law. Despite this clear intent, the Department of Agri-

culture is currently trying to include energy assistance payments in the calculation of food stamp benefits.

To date, USDA's policy has been challenged in three courts. USDA has lost each case, and is prohibited in those States affected from enforcing this policy. I think the court's interpretations are correct, and I think they should ultimately be adopted nationwide. My purpose here is to allow the courts to continue to decide this issue, rather than allowing one committee, which is not the committee with jurisdiction over the energy assistance program, to decide the issue.

The amendment I am offering is not costly—only $5 million in 1986 and $20 million over 3 years—but it will correct a serious inequity in the bill. It has broad support, not only within Congress, but outside it as well.

Let's not force people to heat or eat. Let's continue to recognize energy assistance as a supplemental program. And let's not undo what we did only last year and what we will probably do again next year. Mr. Chairman, I urge my colleagues to give their full support to this amendment.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. PANETTA. Mr. Chairman, we have reviewed this particular amendment. This is obviously a complicated area in dealing with vendor energy assistance payments, but it would help clarify the situation with regards to those payments. I would like to accept the amendment, at least for the purpose of bringing it into conference in the hopes of clarifying this issue.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. EMERSON. Does the gentleman have a cost estimate on this amendment?

Mr. JEFFORDS. Yes. The first year cost would be $5 million, and $20 million over 3 years.

Mr. EMERSON. If the gentleman would yield further, this title currently has a price tag of $22 billion over the life of the bill, and the gentleman wants to add $20 million to that?

Mr. JEFFORDS. I want to put the law back where it is now which would result in a loss, and if you want to put it that way, of savings of $20 million.

Mr. EMERSON. So this is another add-on to the committee bill?

Mr. JEFFORDS. If you want to put it that way, the gentleman is correct.

Mr. EMERSON. I thank the gentleman.

□ 1550

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment which is identified as "JEFFORDS 006."

The CHAIRMAN. The Chair will inquire if the amendment has been printed in the RECORD.

Mr. JEFFORDS. Yes, the amendment has been printed in the RECORD, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 387, line 16, insert "for more than 6 months" after "participating".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, although I do not believe that this amendment will be accepted, I want to explain it and make sure Members know what we are doing. I do not intend to ask for a record vote on the amendment, but I do believe it is important that we let everyone know what is happening here.

Three years ago we passed the Job Training Partnership Act. This bill is currently in force. It is working well. One of the provisions of that law is that if someone goes into training, for example, an on-the-job training program, the small amount of money that person receives while being trained is not counted as income for the purposes of determining food stamp eligibility. The reason for this provision is to insure that we do not discourage people from going into training in order to obtain employment. In H.R. 2100, one of the savings included in the bill changes this policy to now say, that if you do receive on-the-job training funds, you may lose your food stamps.

My amendment to H.R. 2100 is straightforward. It provides for a grace period of 6 months before the earnings of an individual participating in an on-the-job [OJT] training program under the Job Training Partnership Act [JTPA] are considered earned income for the purposes of the Food Stamp Program.

What is my intent in offering this amendment? To reduce the disincentive for participation in OJT programs that the current language in the bill creates for disadvantaged individuals.

This is an important concept, and I hope that the Members will pay attention, because this is really establishing a barrier in front of people who want to participate in job training. They will be faced with the situation of knowing that if they participate in on-the-job training, they may well lose food stamp benefits.

First of all, this seems somewhat ironic and contradictory for the food stamp bill this year, to create a whole new training program to be run by the States. I have some problems with this contradiction. I hope we can work these differences out so that there will be coordination between Federal and State programs. But if the emphasis of this bill remains to put people to work on the one hand, and on the other hand to place a barrier for those same people to participate in on-the-job training programs, we are working at cross purposes which makes no sense. I would like to provide some perspective on the language contained in H.R. 2100.

The Job Training Partnership Act was enacted 3 years ago with the purpose of providing job training to economically disadvantaged individuals. Under the act, the private sector and local governments working with schools, employment service agencies and community based organization for example, develop programs that train program participants for unsubsidized employment. A local plan is developed which reflects the labor market needs, the education needs and the training needs of the area. From this assessment programs are provided to enable economically disadvantaged individuals to enter unsubsidized jobs. To date, 95 percent of the participants in JTPA programs are disadvantaged. The overall placement rate for those individuals who complete training is 68 percent. Secretary Brock recently stated, "JTPA has been the centerpiece of this administration's commitment to meaningful job training."

On-the-job training is one type of JTPA training program. It actively involves the employer in training and placement. Under JTPA, just about 25 percent of the participants are placed in OJT positions with a 78 percent, or nearly 4 out of 5, placement rate.

As a member of the Education and Labor Committee, I worked closely on the authorization of the Job Training Partnership Act. The section of that law—section 142(b)—that H.R. 2100 seeks to supersede was discussed thoroughly and included in JTPA for specific reasons. Those reasons include:

First, the rigorous limits placed on the percent of funds that can be utilized for support services and administrative costs under JTPA. The law mandates that 70 percent of the funds be used directly for the provision of training. There are no wages for trainees. This requirement is a radical departure from previous Federal employment and training programs. It was in part accepted by the members of the conference committee because JTPA was developed as a training bill, and other programs were available to pro-

vide the necessary support services to the program participants. I do not believe that the Members who worked on JTPA would have been so willing to adopt the strict limitation on support services if the participants were not going to be able to receive benefits from other Federal programs.

Second, the recognition that the participants in JTPA programs would continue to rely upon other sources of support while they were being trained. Language was included in section 142(b) to assure that allowances, earnings and payments under JTPA shall not be considered as income. We did not want to penalize individuals by their participation in training programs, and we did not want the threat of the loss of other forms of support for the whole family of these participants to be a disincentive to their participation. After all, the objective of participation in JTPA was to place the individual into an unsubsidized job—to become a productive, taxpaying citizen.

The current language in H.R. 2100 ignores the basic assumptions that we used in writing JTPA. Further, it ignores them with respect to the one training program—OJT—that most directly involves the private sector in the training process and that has the highest placement rate.

The language does not differentiate between adults and youth who participate in OJT. H.R. 2100 as it now stands would penalize the whole family of an economically disadvantaged youth who participate in OJT. How can we in good conscience create such a disincentive for participation in OJT when youth unemployment continues to be more than twice that for adults?

According to CBO, this provision in H.R. 2100 saves the Food Stamp Program $28 million. This figure does not take into account the loss we will experience if fewer individuals participate in OJT programs. That loss cannot be measured.

My amendment allows participation in an OJT program under JTPA for 6 months before any earnings would be considered as income. This period of time would accommodate the timeframe during which most individuals are learning on the job. The 6 months is really not a working period, but rather a training period. They are not as productive in their jobs and they are utilizing employer time by requiring training and greater supervision. The employer is experiencing a loss in productivity, absorbing 50 percent of the costs of the program and providing necessary guidance. After this initial period, most trainees are contributing to the company rather than taking from it. They have learned the job and are productive workers. Without the incentive of the OJT funds, many employers would not take the risk of hiring the disadvantaged. To penalize an individual for participating in a training program goes against the very purpose of JTPA. Without this amendment, H.R. 2100 may provide some short-term savings, but the long-term consequences could wind up being much more expensive.

I urge you to support this amendment.

Mr. PANETTA. Mr. Chairman, I reluctantly rise in opposition to this amendment, for several reasons.

One, because we try to apply consistent standards here. The fact is that while these are earnings, these earnings are counted against AFDC, and they are counted with regard to other programs as well, and that was the reason that we now count these full-time earnings with regard to food stamps.

In addition to that, these are as I stated full-time earnings. We do provide exceptions with regard to stipends, training allowances, and other education benefits..

And last, the full cost of this amendment would be about $83 million over 3 years, and for all of those reasons, we would oppose the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

The amendment was rejected.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment, which is identified as "Jeffords 007."

The CHAIRMAN. The Chair will inquire, has the amendment which the gentleman is now offering been printed in the CONGRESSIONAL RECORD as of September 24?

Mr. JEFFORDS. The amendment has been printed in the RECORD, Mr. Chairman, and I ask unanimous consent that the reading of the amendment be dispensed with and that it be printed in the RECORD at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. JEFFORDS: Page 387, strike out line 19 and insert in lieu thereof the following:

food stamp program, except in the case of any individual who is a youth, as defined in section 203(c)(1) of the Job Training Partnership Act, participating in any such program for a period not to exceed 6 months.".

Mr. JEFFORDS. Mr. Chairman, I understand the rationale as to why my previous amendment could not be adopted. Although it was costly, I think what remains in the bill is bad policy.

I have a second amendment which may overcome some of the objections to my last amendment dealing with the JTPA deduction from income under section 1508. To date, youth constitute 40 percent of the 1,125,000 participants served under the Job Training Partnership Act [JTPA]. Fourteen percent of those youth who participate are in on-the-job training programs [OJT]. The unemployment rate for youth continues to remain unacceptably high at 17.3 percent.

The language in this bill under section 1508 with respect to the income deductions and OJT participation under JTPA does not differentiate between adults and youth in its application. That is, if a youth participates in an OJT program under JTPA, the income earned is considered part of the family income for the purposes of determining food stamp eligibility. Therefore, by participating in an OJT program, a youth may trigger family ineligibility.

We should not place those young people who desire to participate in an on-the-job training program, in the position of having their families say, "You cannot go to work because if you go to work, your income will cut our benefits or deny us food stamp benefits."

This is not the kind of barrier that we want to put in front of our young people who want to learn how to work and obtain a job.

This amendment will make the bill consistent with the way we handle AFDC income under the summer youth employment program. I would hope that since this amendment is a relatively inexpensive one—$8 million per year, $24 million over 3 years—the Members would accept this amendment so that we do not deny an opportunity to young people who want to work.

My amendment has two purposes:

First, to specify that the definition of youth, for the purposes of this income deduction, is the same as that under JTPA.

Second, to allow participation in an OJT Program under JTPA for 6 months before any earnings received by a youth would be considered as income.

Without this amendment, we are discouraging young people from participating in OJT programs. Three out of four disadvantaged youth who complete training under OJT enter employment. To discourage their participation in training programs at this stage of their lives only assures that as adults these youth will be among those unemployed and dependent on Government assistance. Rather than discouraging participation in training programs, we must provide ways by which disadvantaged youth can become productive adults.

I encourage your support for this amendment.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I am happy to yield to the chairman of the subcommittee.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, on this particular amendment, it does deal with young people from age 18 to 21 who are in the Job Training Partnership Act, and that is one of the reasons I take a slightly different view of it, because it does involve young people who are trying to get jobs for the first time. This would give them that opportunity to be able to make it without having this count in terms of food stamp benefits.

There is some question as to whether it is consistent with AFDC, but there is some record that indeed this may be the practice with regard to AFDC and other benefits as well.

It does involve young people. There is a cost here of approximately $24 million over 3 years. For that reason, I can assure the gentleman that it is going to be retained in conference, and I would like to take this amendment into conference, and then hopefully it would be helpful in terms of negotiating with the other body on the whole Food Stamp Program.

For that reason, Mr. Chairman, we would accept this amendment.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I am happy to yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, could the gentleman give us a cost estimate on this amendment?

Mr. JEFFORDS. Yes. It would be $8 million in the first year and $8 million each year for 3 years altogether. So the amount is $24 million.

Mr. EMERSON. So this is another $24 million.

Mr. Chairman, I thank the gentleman from Vermont.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

The amendment was agreed to.

□ 1600

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire of the gentleman, has the amendment been printed in the RECORD as of September 24,

Mr. JEFFORDS. Yes, Mr. Chairman, this amendment has been printed in the RECORD as of September 24.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 390, line 8, insert the following before the close quotation marks.

A State agency shall consider payments made on behalf of a household under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.) to be pro rated over the entire heating or cooling season, regardless of the frequency with which such payments are made.

Mr. JEFFORDS. Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. RAHALL TO THE AMENDMENT OFFERED BY MR. JEFFORDS

Mr. RAHALL. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. RAHALL to the amendment offered by Mr. JEFFORDS: Section 1509(a) of H.R. 2100 is amended by adding the following new paragraph at the end thereof:

(6) After the last sentence insert the following: "All households shall be allowed a deduction for the actual and reasonable expenses. other than expenses paid on behalf of the household by a third party, paid for transportation of members of the household to and from school and for the purchase or rental of school books for such members.".

Mr. RAHALL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. EMERSON. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. A point of order is reserved on the amendment. There is no debate in order on the amendment.

Mr. PANETTA. Mr. Chairman, I ask unanimous consent that the gentleman from West Virginia [Mr. RAHALL] may have 2 minutes to explain the amendment to the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from West Virginia [Mr. RAHALL] is recognized for 2 minutes on his amendment.

Mr. RAHALL. Mr. Chairman, I appreciate this opportunity to offer my amendment which will alleviate, to some extent, the burden that has been placed on food stamp recipients. My amendment, which will be effective as of October 1, 1986, will allow a deduction for the actual and reasonable expenses, other than expenses paid on behalf of the household by a third party, paid for transportation of members of the household to and from institutions of higher education in which such members are enrolled and for the purchase and rental of school books for such members, but not to exceed $25 per month for each such member. I would like to note that it is my intent that this expense deduction be prorated over the school term that the student is enrolled for, just as other income for Pell grant recipients is prorated. While the terms of this amendment are quite restrictive due to my desire to comply with the cost restraints placed on the Agriculture Committee and the entire House of Representatives, I believe that this amendment is much needed means of addressing a flaw in the Food Stamp Act of 1977 which penalizes low-income families when student loans are provided to pay for book and transportation costs incidental to attending school. I thank the distinguished chairman of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, Mr. PANETTA of California, and the ranking minority member on the subcommittee, Mr. EMERSON of Missouri, for their assistance in this effort.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from California.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding.

This is an issue that we intend to take a look at in the subcommittee. It does involve some consistency with other benefits, but it is an area that frankly we have not looked at closely enough. It does involve about a $73 million cost figure and for that reason we cannot accept it, but I appreciate the gentleman offering to withdraw the amendment at this time.

The CHAIRMAN. Does the gentleman from West Virginia [Mr. RAHALL] wish to withdraw his amendment?

Mr. RAHALL. Yes, Mr. Chairman. I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia [Mr. RAHALL]?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

The CHAIRMAN. Are there further amendments to title XV?

AMENDMENT OFFERED BY MR. GINGRICH

Mr. GINGRICH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the RECORD as of September 24?

Mr. GINGRICH. Yes, Mr. Chairman, it was printed prior to the deadline.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. GINGRICH: Beginning on page 396, strike line 24 through line 5 on page 404, and insert in lieu thereof the following new section:

EMPLOYMENT AND TRAINING PROGRAM

SEC. . (a) Section 6(d) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)) is further amended by—

(1) amending paragraph (1)(ii) to read as follows:

"(ii) refuses without good cause to participate in an employment and training program under paragraph (4) of this subsection, to the extent required under paragraph (4), including any reasonable employment requirements as are prescribed by the State agency in accordance with paragraph (4): *Provided*, That the period of ineligibility shall be two months;";

(2) adding at the end of paragraph (1) the following new sentences: "Any period of ineligibility for violations under this paragraph shall end when the household member who committed the violation complies with the requirement that has been violated.";

(3)(A) striking out "eighteen" in the material preceding clause (i) in paragraph (d)(1) and inserting in lieu thereof "sixteen"; and

(B) in paragraph (d)(2)—

(i) striking out "a work registration requirement" in clause (A) and inserting in lieu thereof "requirements for employment related activities";

(ii) striking out in clause (B) "a dependent child under age six" and all that follows to the end of the clause and inserting in lieu thereof "(i) a dependent child under age six, except that a State agency may, at its option, require such parent or guardian to comply with the work requirements if the child is age three or over and adequate child care is available, or (ii) of an incapacitated person;"; and

(iii) adding a new clause (F) at the end of the paragraph to read "(F) a person between ages sixteen and eighteen who is not a head of household or who is attending school on a full-time basis; and

"(4) adding at the end thereof the following new paragraph:

"(4)(A) Each State agency shall implement an employment and training program designed by the State agency in accordance with guidelines established by the Secretary for the purpose of assisting members of households receiving benefits under this Act in gaining skills, training, or experience that will increase their ability to obtain regular employment. For purposes of this Act, an "employment and training program" means a program, approved by the Secretary, that shall contain a job search program with terms and conditions comparable to those prescribed in subparagraphs (A) and (B) of section 402(a)(35) of part A of title IV of the Social Security Act, except that a State agency shall have no obligation to incur costs exceeding $25 per participant per month, as provided in subparagraph (B)(vi) of this paragraph, and a State agency shall be required to apply employment requirements prescribed under this clause to program applicants at the time of application, and shall also contain one or more of the following components:

"(i) job search training programs that include reasonable job search training and support activities that may consist of jobs skills assessments, job finding clubs, training in techniques for employability, job placement services, or other direct training or support activities, including educational programs, determined by the State agency to expand the job search abilities or employability of those subject to the program;

"(ii) programs designed to improve the employability of household members through actual work experience or training, or both, and to enable individuals employed under such programs to move promptly into regular public or private employment. The facilities of the State public employment offices and agencies operating programs under the Job Training Partnership Act may be used to find employment and training opportunities for household members under the programs. Employment or training experience assignments shall be limited to projects that serve a useful purpose in fields such as health, social services, environmental protection, education, urban and rural development and redevelopment, welfare, recreation, public facilities, public safety, and day care. To the extent possible, the prior training, experience, and skills of the participating member shall be used in making appropriate employment experience assignments. An employment or training experience program established under this clause shall—

"(I) not provide any work that has the effect of replacing the employment of an individual not participating in the employment or training experience program;

"(II) provide the same benefits and working conditions that are provided at the job site to employees performing comparable work for comparable hours; and

"(III) reimburse participants for actual costs of transportation and other actual costs that are reasonably necessary and directly related to participation in the program, but not to exceed $25 in the aggregate per month; and

"(iii) as approved by the Secretary, other programs, projects, and experiments, such as a supported work program, aimed at accomplishing the purpose of the employment and training program; and

"(iv) workfare programs operated under Section 20 of this Act.

"(B)(i) Each State agency shall place all persons subject to employment and training requirements under subsection (d)(1) in a job search program or in an alternative employment and training program authorized under subsection (A) (i), (ii), (iii), or (iv) of this section.

"(ii) Each State agency shall place in employment and training program activities authorized under subsection (A) (i), (ii), (iii) or (iv) of this section not less than twenty-five percent of the persons subject to employment and training requirements under subsection 6(d)(1) for any month in the fiscal year beginning October 1, 1986, fifty percent of such persons for any month in the fiscal year beginning October 1, 1987, and seventy-five percent of such persons for any month in the fiscal year beginning October 1, 1988 and each fiscal year thereafter.

"(iii) The Secretary shall use State agency reports in conjunction with findings of the quality control system to monitor the compliance of State agencies with the requirements of this paragraph. If it is determined that a State agency has failed to comply with such requirements, the State agency shall be subject to penalties as determined by the Secretary which may include a reduction in the funds provided to the State agency under subsection 16(a) in accordance with the procedures set forth in subsection 16(d). If such procedures are applied, the State agency shall be considered to have issued erroneous payments for the number of households by which it failed to meet the appropriate standard established in subsection (B)(1) or (B)(2) of this section, with each such erroneous payment being equal to the average allotment for all households containing a member who is required to participate in employment and training program activities."

"(C)(i) The State agency may provide that participation in an employment and training program may supplement or supplant other requirements imposed on those subject to the program.

"(ii) In complying with the performance standards established in subsection 6(B) and subject to guidelines established by the Secretary, each State agency may exempt from participation in any program under this paragraph categories of household members to which the State agency determines that the application of such requirements is impracticable as applied to such categories due to factors such as, but not limited to, the availability of work opportunities and the cost effectiveness of the employment requirements. In making such a determination, the State agency may designate a category consisting of all such household members residing in a specified area of the State. The State agency may also exempt or suspend from such requirements individual household members not included in any such category but with respect to whom it determines that such requirements are impracticable because of personal circumstances such as, but not limited to, lack of job readiness and employability, the remote location of work opportunities, and unavailability of dependent care.

"(iii) The total hours of work in an employment and training program carried out under this paragraph required of members of a household, together with the hours of work of such members in any other program carried out under section 20 of this Act, in any month collectively may not exceed a number of hours equal to the household's allotment for such month divided by the higher of the applicablg State minimum wage or Federal minimum hourly rate under the Fair Labor Standards Act of 1938. The total hours of participation in such program required of any member of a household, individually, in any month, together with any hours worked in another program carried out under section 20 of this Act and any hours worked for compensation (in cash or in kind) in any other capacity, shall not exceed one hundred and twenty hours per month.

"(iv) Each State agency shall establish requirements, determined by the State agency to be appropriate, for participation by individuals not exempt under clause (ii) of this paragraph in one or more employment and training programs under this paragraph (which requirements may vary among participants), but may operate programs under this paragraph in which individuals elect to participate. The State agency shall permit individuals not subject to the requirements described in the previous sentence or who have completed or are in the process of complying with such requirements to participate in any program under this paragraph.

"(v) The Secretary shall promulgate guidelines that, to the maximum extent practicable, enable a State agency to design and operate an employment and training program under this paragraph that is compatible and consistent with similar programs operated within the State.

"(vi) A State agency shall reimburse participants for actual transportation costs and other actual expenses incurred by participants in the employment and training program, except that the State agency may limit such reimbursement to each participant to $25 per month.".

(b) Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended by—

(1) striking out the period after paragraph (21) and inserting in lieu thereof "; and"; and

(2) adding at the end thereof the following new paragraph:

"(22) the manner in which the State agency will carry out the employment and training program under section 6(d)(4) of this Act.".

(c) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by adding at the end thereof the following new subsection:

"(h)(1) Effective October 1, 1984, the Secretary shall allocate in each fiscal year, from funds appropriated for such fiscal year under section 18(a)(1) of this Act, the amount of $40,000,000 for the fiscal year ending September 30, 1986, $50,000,000 for the fiscal year ending September 30, 1987, $60,000,000 for the fiscal year ending September 30, 1988, and $75,000,000 for each of the fiscal years ending September 30, 1989, and September 30, 1990, which amount shall be used to pay to each State agency the full cost (except as otherwise provided in this subsection) of carrying out the employment and training program under section 6(d)(4) of this Act.

"(2) If, in carrying out such activities, a State agency incurs costs that exceed the amount payable to the State agency under paragraph (1), the Secretary shall pay such State agency an amount equal to the 50 per centum of such additional costs in accordance with subsection (a).

"(3) The Secretary shall, in accordance with subsection (a), reimburse each State agency in an amount equal to 50 per centum of the total amount of payments made or costs incurred by the State agency in connection with actual transportation costs and other actual expenses reasonably incurred by participants in the employment and training program, except that such total amount shall not exceed an amount representing $25 per participant per month.

Mr. GINGRICH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. GINGRICH. Mr. Chairman, let me say first of all that I appreciate very much that the gentleman from California and the gentleman from Missouri have made major progress in developing a transition to a workfare program; however, it is my intention with this amendment to offer an amendment which is much closer to the Reagan administration proposal on workfare.

This amendment is designed to ensure that an increasing number of recipients will indeed be required to participate in a workfare program.

In particular, this amendment sets a series of stages, year by year, by which the program would move toward a workfare provision and it provides that the Secretary can enforce those transitions by withholding funds from those States which he or she finds to be not in compliance.

This is a discretionary power that the Secretary can use. I think it means that the States would be required and would be under pressure to make real changes toward a workfare program at a faster rate than in the committee bill.

The Congressional Budget Office estimates for the Federal Government are that this program would save money. It would candidly require more money at the State level for administration, but even under the Congressional Budget Office provisions, it is clear that this program would save the Federal Government money and would speed up the process of moving toward a workfare program.

Finally, the amendment also makes several changes in the pool of work registrants, subject to the employment and training program.

The amendment extends the work registration and new employment training program to 16- to 17-year-old heads of households, unless they are full-time students. In other words, it says if you are going to be getting food stamps and you are the head of a household, but you are not in school, then you need to have the work experience.

This change establishes consistency with the AFDC Program and recognizes that such young heads of households who are not in school and not working would especially benefit from such activity, work experience, assignments, and job search training.

Now, the essence of what I am saying here is that if you vote "yes" for this amendment, you are voting for a much closer approximation of the Reagan administration proposals on workfare. You are voting for a much more rapid transition to a workfare program in this country and you are voting to give the Secretary discretionary power.

It does not mandate that in an impossible situation any State would have to make that transition, but it would put considerable pressure on every State to have that kind of transition at a much faster rate than the committee requires.

Mr. PANETTA. Mr. Chairman, I rise in opposition to this amendment, for several reasons. One, the gentleman from Missouri and myself carefully worked out a provision in this bill which for the first time requires all States to set up a work program to provide relief to those who are on food stamps.

It is the first time we have required of the States that they set up these programs; but the difference between what we have done and what the gentleman offers is that we allow the States to design work programs that fit their particular needs.

The problem is that if we just mandate a certain program for all States, what this becomes is a full employment program for bureaucrats. It adds paperwork. It adds bureaucracy and it fails to allow the States to develop a program that is most meaningful for their particular States or for their food stamp recipients.

In addition to that, I would point out that the CBO indicates that while there are some minimal savings at the Federal level, the cost of this proposal to the taxpayers, to the States, would be over $240 million above the costs of H.R. 2100.

So it is for those reasons that we would oppose this amendment. We think that we have developed a work program which makes sense, which is efficient, and which meets the needs of the States and the people involved in the food stamp programs.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I am pleased to yield to the distinguished chairman.

Mr. HAWKINS. Mr. Chairman, may I rise in support of what the gentleman from California has said.

The Gingrich approach would deviate completely from the accepted approach under the Job Training Partnership Act. Under that act, as we well know, and I would submit it would work much better under this provision as a provision under this act. JTPA leaves up to the States to decide the approach which best suits them. What works in Massachusetts does not necessarily work in California, and vice versa.

I think the flexibility provided under the committee bill retains the best provision of the job search provision for the recipients of food stamps.

I do not think we should tamper with it by some novel new approach that imposes on the States an added burden which certainly we should not do at this time.

Mr. Chairman, I greatly recommend that we follow the approach as submitted by the committee and stick with that, rather than deviate from the accepted provision under the Job Training Partnership Act.

I thank the gentleman for yielding.

□ 1610

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Missouri.

Mr. EMERSON. I thank the gentleman for yielding.

Mr. Chairman, I reluctantly rise in opposition to the amendment offered by the gentleman from Georgia because I think we do share the very same objective. I think we probably all do.

State flexibility is an essential part of this program because the best employment and training programs are those to which the State administrators are committed and which they design themselves. For example, the program operating in San Diego, CA, which the chairman and I have, personally, inspected and held extensive

hearings about, is one very good example of an innovative program designed to meet the needs in that area.

We believe that most States will welcome this program and will operate efficient and effective employment and training programs. That is why State flexibility and program grants are a part of this program. Nevertheless, we do expect that the Secretary will use the authority the act provides to insure that all States design a program that is in keeping with the purposes of the act. I think if they do not, it would be at that point that we would consider the language of the gentleman from Georgia.

Mr. GINGRICH. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. GINGRICH. Mr. Chairman, as I mentioned earlier, the Secretary has the discretionary power if, in his judgment, a State is not moving rapidly enough. It is not automatically mandated and our purpose in offering this, and I concede that it is a new legislative proposal but a very good idea, I say to my friend, the gentleman from California, is to simply move on a nationwide basis to have us move more rapidly toward workfare.

Mr. Chairman, I move the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. GINGRICH].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GINGRICH. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count for a quorum. One hundred seven Members are present, a quorum.

RECORDED VOTE

Mr. GINGRICH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 183, noes 227, not voting 24, as follows:

[Roll No. 339]

□ 1630

Mr. KLECZKA and Mr. SAVAGE changed their votes from "aye" to "no."

Mr. PETRI and Mr. CHAPMAN changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any further amendments to title XV?

The Clerk will designate title XVI.

The Clerk designated title XVI.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the RECORD as of the 24th of September?

Mr. SKELTON. Yes, Mr. Chairman.

The text of the amendment as printed in the RECORD is as follows:

Amendment offered by Mr. SKELTON: Insert in Section 1605 (which amends Section 204 of the Temporary Emergency Food Assistance Act) a new paragraph:

(4) Funds from section 204(c)(1) shall be available to the extent that they are matched on an equal basis by State appropriated funds. The provision shall apply to a State beginning October 1 of the calendar year in which the State legislature next meets.

Mr. SKELTON. The amendment has been printed, Mr. Chairman. However, I ask unanimous consent to modify the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The CHAIRMAN. The Clerk will report the modification to the amendment offered by the gentleman from Missouri [Mr. SKELTON].

The Clerk read as follows:

Modification of amendment offered by Mr. SKELTON: Page 425, line 19, strike out the close quotation marks and period following such marks.

Page 425, after line 19, insert the following:

"(4) It is the sense of the Congress that, if there is appropriated to carry out this subsection for a fiscal year an amount in excess of the amount authorized to be appropriated for such fiscal year, no part of such excess amount should be made available to a State unless the aggregate value of the in-kind contributions and services provided, and the funds appropriated, by the State and units of local government of the State for such fiscal year for the distribution of such commodities is not less than the amount of funds made available under this subsection to the State for such fiscal year.".

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the modified amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, I will not take a great deal of time.

I have discussed this substitute amendment at length with the gentleman from California [Mr. PANETTA] and also with the gentleman from Missouri [Mr. EMERSON].

What it does is, it expresses the sense of Congress that States which, together with their local government entities, fail to make contributions for the operation of their TEFAP Programs equal to the amount of Federal administrative funds they receive under title XVI should not receive any additional administrative funds that are made available through a subsequent supplemental appropriation. The purpose is to provide a stronger incentive than exists at the present time for any State to contribute its share toward administration of the TEFAP Program.

Mr. Chairman, I yield to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. Mr. Chairman, I thank the gentleman for yielding.

As the gentleman knows, we have discussed this amendment. It is my view that this $50 million ought to go to the States for purposes of TEFAP and if any more is going to go to the States, the States have to show some signs of good faith that they are trying to work on their end to provide additional supplements and help with regard to the Emergency Feeding Program.

Mr. Chairman, I appreciate the amendment of the gentleman. It does provide a sense of urgency here that the States have to help cooperate with regard to this program.

I thank the gentleman, and we would accept the amendment.

Mr. SKELTON. The gentleman is correct. It does not prohibit the $50 million going to the various States, but it does give them incentive should there be a supplemental. There may not be, but should there be, it gives them incentive to do the best they can in good faith.

Mr. Chairman, I yield to the gentleman from Missouri.

Mr. EMERSON. I thank the gentleman for yielding.

Mr. Chairman, I want to associate myself with the remarks of the gentleman from California in accepting the amendment and say further that both the gentleman from Missouri and I are aware of food banks in Missouri and other States that are very active in distributing surplus commodities to the poor. The people operating these food banks would like to initiate a system in which they would receive surplus commodities directly from the Federal Government. This plan is being forwarded to us, and I intend to look at it very carefully to see if we can implement such a concept.

Those running these food banks indicate they can pick up and distribute these commodities at no cost to the Federal Government, and this is an idea that I look forward to pursuing with my colleague from Missouri.

Mr. SKELTON. Yes; I think it is an excellent idea, and we are thinking of the same thing.

I think that is an area to explore that would save the taxpayers money in the long run.

I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. SKELTON], as modified.

The amendment, as modified, was agreed to.

The CHAIRMAN. The Clerk will designate title XVII.

The Clerk designated title XVII.

The CHAIRMAN. The Clerk will designate title XVIII.

The Clerk designated title XVIII.

AMENDMENT OFFERED BY MR. JONES OF OKLAHOMA

Mr. JONES of Oklahoma. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Oklahoma: Immediately after section 1895 of the bill as reported on September 18, 1985, insert the following new section (and conform the table of contents accordingly):

SEC. 1896. STUDY OF LEADED FUEL IN AGRICULTURAL MACHINERY.

(a) STUDY.—The Secretary of Agriculture shall conduct a study of the use of fuel containing lead additives in gasoline engines which—

(1) are used in agricultural machinery, and

(2) are designed to combust fuel containing such additives.

The study shall analyze any mechanical problems (including but not limited to valve recession) which may be associated with the use of other fuels in such engines.

(b) CONTRACTS AND OTHER ARRANGEMENTS.—For purposes of the study under this Act, the Secretary of Agriculture is authorized to enter into such contracts and other arrangements as may be appropriate to obtain the necessary technical information. All testing of engines carried out for purposes of such study shall be reflective of actual agricultural conditions to the extent practicable, including revolutions per minute and payloads.

(c) FINDINGS AND REPORT.—The Secretary of Agriculture shall publish in the Federal Register not later than January 1, 1987, his proposed findings pursuant to such study. After notice and opportunity for hearing, but not later than January 1, 1986, the Secretary shall submit to Congress a final report containing the results of the study under this section, together with any public comments received and recommendations on the need for lead additives in gasoline to be used by agricultural machinery.

(d) AGRICULTURAL MACHINERY.—The Secretary of Agriculture shall specify the types and items of agricultural machinery to be covered by the study under this Act.

(e) REGULATION OF LEAD ADDITIVES DURING STUDY.—No regulation under any provision of law regarding the control or prohibition of lead additives in gasoline may require an average lead content per gallon which is less than 0.1 gram per gallon until the date 3 months after the report required by subsection (c) has been submitted to Congress.

SEC. 1897. AUTHORIZATION OF APPROPRIATIONS.

For fiscal years beginning after September 30, 1985, there is authorized to be appropriated $250,000 to carry out section 1 of this Act.

Mr. JONES of Oklahoma (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JONES of Oklahoma. Mr. Chairman, in just a minute, I wish to yield to my colleague, the gentleman from Iowa [Mr. TAUKE], who has a substitute amendment which has the same aim as my amendment: to ensure a plentiful supply of leaded gas for farm machinery. I commend the gentleman for his work in this substitute, and urge its adoption.

Very simply, our amendment prohibits the Administrator of the Environmental Protection Agency from promulgating any regulation which would require the use of gasoline with less than 0.5 grams of lead additive in farm machinery, until an official study of the effects of unleaded gasoline on farm machinery can be carried out.

With the catastrophic financial situation facing our farmers today, we feel we must do everything possible to see that they are given the breaks needed to continue their struggle to preserve America's agriculture industry.

Currently, the EPA plans to reduce lead levels to zero over the next 3

years. Tests conducted by Phillips Petroleum yield conclusive proof that older farm machinery will suffer extensive damage if farmers are forced to use unleaded fuel.

We are not disputing the EPA regulation of lead additives in a general sense, but we feel today's farmers are in a unique economic position and this is one available means we have to help ease their plight.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. TAUKE AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. JONES OF OKLAHOMA

Mr. TAUKE. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. TAUKE as a substitute for the amendment offered by Mr. JONES of Oklahoma: Page 509, after line 13, insert:

LEAD ADDITIVES IN FARM FUEL

SEC. 1896. (a) Except as provided in subsection (f), any regulation issued under any provision of law before or after the date of enactment of this section regarding the control or prohibition of lead additives in gasoline shall be amended to provide that the average lead content per gallon of gasoline distributed and sold for use on a farm for farming purposes shall not be less than 0.5 grams per gallon. The purpose of such amendment shall be to ensure that adequate supplies of gasoline containing sufficient lead additives to protect and maintain farm machinery will be available in all States for use on farms for farming purposes. Nothing in this section shall affect the control of lead or lead additives in gasoline distributed and sold for other uses. For purposes of this section, the term "gasoline used on a farm for farming purposes" has the same meaning as when used in section 6420 of the Internal Revenue Code of 1954.

(b) The President, acting through the Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall promptly initiate a study of the use of fuel containing lead additives in gasoline engines which—

(1) are used in agricultural machinery, and

(2) are designed to combust fuel containing such additives.

The study shall analyze any mechanical problems (including, but not limited to value recession) which may be associated with the use of other fuels, including fuels without lead additives in such engines.

(c) For purposes of the study, the appropriate lead agency designated by the President is authorized to enter into such contracts under applicable law and other arrangements as may be appropriate to obtain the necessary technical and other information. All testing of engines carried out for purposes of such study shall be reflective of actual agricultural conditions to the extent practicable, including revolutions per minute and payloads.

(d) The results of the study shall be published in the Federal Register not later than January 1, 1987 for written comments, and shall be submitted to Congress within 90 days after such publication. The report shall contain the results of the study under this section, together with a summary of any public comments received, and recommendation on the need for lead additives in gasoline to be used by agricultural machinery. The report shall also be transmitted to the Committees on Agriculture of the House and Senate and the Committee on Energy and Commerce of the House and the Committee on the Environment and Public Works of the Senate. Such report shall be submitted only while both Houses are in session.

(e) The Secretary of Agriculture shall specify the types and items of agricultural machinery to be covered by the study under this Act.

(f) Effective not earlier than 4 months after the date on which the report is submitted to Congress under subsection (d), in lieu of subsection (a) of this section, the regulations which (beginning on January 1, 1986) are generally applicable to the control the level of lead additives in gasoline shall apply to gasoline used on farms for farming purposes whenever the administrator of the Environmental Protection Agency publishes a notice thereof unless it is determined by such Administrator on the basis of the study under this section that a level of 0.5 grams per gallon (or some other level) is appropriate in the case of gasoline used on a farm for farming purposes to protect and maintain agricultural machinery specified by the Secretary of Agriculture.

(g) There is authorized to be appropriated such sums as may be necessary to carry out the study required by this section and such sums shall remain available for such purposes until expended. In order not to delay such study the agencies referred to in this section should take immediate action with available funds to initiate such a study.

Mr. TAUKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. DINGELL. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Michigan reserves a point of order on the amendment.

Mr. DINGELL. Mr. Chairman, I do not have any reason to believe it will be necessary for me to insist on the point of order. I make the reservation of objection for purposes of a colloquy with my three distinguished friends, the gentleman from Illinois [Mr. MADIGAN], the gentleman from Iowa [Mr. TAUKE], and of course my dear friend from Texas, the chairman of the Committee on Agriculture, Mr. DE LA GARZA.

I understand when this matter reaches the conference stage that you have agreed to keep the Committee on Energy and Commerce——

The CHAIRMAN. The gentleman, Mr. DINGELL, will suspend for 1 second, please.

The Chair would respectfully advise the gentleman that he cannot proceed with the debate on a reservation of a point of order. If the gentleman from Iowa wishes to yield to the gentleman for that purpose, he has the time.

The gentleman from Iowa [Mr. TAUKE] is recognized for 5 minutes.

Mr. TAUKE. If I could explain the amendment first, then I will yield to the gentleman.

Mr. DINGELL. Mr. Chairman, then I withdraw that portion.

The CHAIRMAN. The gentleman from Iowa [Mr. TAUKE] is recognized for 5 minutes.

□ 1640

Mr. TAUKE. I thank the chairman, and I thank the gentleman from Oklahoma for his cooperation in developing this amendment, and all of the others who have participated in this effort.

Mr. Chairman, this substitute is designed to prevent an impending crisis in the farm community. Recent tests conducted by a major fuel refiner indicate that a substantial number of farm engines, primarily older farm engines, will suffer extensive damage—and require expensive repairs—if run on unleaded gasoline. Currently, we are phasing out leaded gasoline, and this substitute requires us to look at this issue before it becomes a problem. This substitute takes a commonsense approach and does, basically, two things: First, it requires the Department of Agriculture and the Environmental Protection Agency to study the impact of eliminating leaded gasoline on the farm economy; and second, until this study is completed this substitute maintains the current lead content in leaded gasoline today—which is 0.5 grams of lead per gallon.

According to this substitute, the level of lead in leaded gasoline will remain at 0.5 grams per gallon for farmers while this study is conducted. The results of the study must be printed in the Federal Register not later than January 1, 1987, and shall be submitted to Congress within 90 days after such publication. Four months after the report is submitted to Congress, the lead level in gasoline used for farming purposes may change to an appropriate level as determined by the EPA.

Mr. Chairman, this is a straightforward amendment. It has been worked out with the assistance of Mr. MADIGAN, Mr. WAXMAN, Mr. DINGELL, and Mr. JONES. In addition, this approach is supported by the American Farm Bureau and the National Council of Farmer Cooperatives. I urge my colleagues to support this substitute.

Mr. Chairman, I would be pleased now to yield to the distinguished chairman of the Energy and Commerce Committee, the gentleman from Michigan [Mr. DINGELL]

Mr. DINGELL. I thank the gentleman for yielding to me.

Mr. Chairman, my purpose is a brief colloquy with my three dear friends, the gentleman from Iowa, the gentle-

man from Texas and, of course, my dear friend from Illinois [Mr. MADIGAN].

Gentlemen, I understand that when this matter reaches conference stage, the Committee on Energy and Commerce will be kept informed of amendments to this provision from the other body and that our good friends on the Agriculture Committee will not agree to such amendments without consulting our committee, am I correct in that appreciation?

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Chairman, I would like to inform my colleague that we will be very happy to keep him informed of the process should this amendment be enacted and be an item in conference.

Mr. DINGELL. I thank my dear friend.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from Illinois.

Mr. MADIGAN. I thank the gentleman for yielding.

Mr. Chairman, I would assure the gentleman from Michigan, the chairman of the Committee on Energy and Commerce, that we not only will stay in touch with him, but if an attempt would be successfully made in the conference to expand this provision beyond what the gentleman is agreeing to on behalf of the farmers and ranchers of America, that I will join with the gentleman from Michigan in opposing the adoption of the conference report.

Mr. DINGELL. I thank my dear friend.

Mr. Chairman, I am sure my colleagues understand the concern that I utter here today, and that is the question of jurisdiction of the Committee on Energy and Commerce over the matter of clean air, leaded gasoline, and matters that relate to that. I am sure here that there is no attempt by my good friends and colleagues to impair that. With that understanding, I will raise no objection to the amendment, and indeed I find the amendment has merit. I commend the gentleman for offering it.

Mr. Chairman, Mr. JONES of Oklahoma and Mr. TAUKE have consulted the Committee on Energy and Commerce concerning the amendment now offered by Mr. TAUKE. It is, as just noted, a matter that rests solely in the jurisdiction of our committee and normally, I would object to its consideration in this matter. But subcommittee Chairman WAXMAN, the ranking minority member on the subcommittee, Mr. MADIGAN, and the ranking minority member on the full committee, Mr. BROYHILL, and myself are persuaded that this limited amendment is needed and meritorious. We believe it will not deter the need, for health reasons, to reduce lead in gasoline. But it will redress a problem, pending a study, by assuring a supply of leaded gasoline for agricultural machinery.

It is designed to deal with this issue for all farmers in all States. It recognizes that EPA must work out gasoline refining and distribution problems with the refiners and pipelines and others to provide leaded gasoline for all farmers in all States, including farmers who may not have bulk supplies on their farm but buy gasoline at the local gas station. It does not open the door for all vehicles.

I am concerned that the amendment only deals with farmers, because others in Michigan and elsewhere have expressed concern about this matter. But I realize that they have special problems and this is a farm bill. I am concerned because I fear the issue will not go away in the case of some other users, like the recreational boat owner users. In this regard, I have recently written to the Environmental Protection Agency asking questions about its consideration of all such uses and the impacts on engines operating safely and properly with little or no lead. That correspondence follows:

ADMINISTRATOR'S STATEMENT

Today, we are taking actions to substantially decrease the amount of lead emitted into the environment.

First, I have signed a final regulation requiring a two-stage reduction in the amount of lead permitted in leaded gasoline. The current lead standard allows 1.10 grams of lead per gallon of leaded gasoline. On July 1 of this year, the limit will be reduced to 0.50 grams per gallon. Beginning January 1, 1986, the standard will drop again to 0.10 grams per gallon. These steps will bring a 91 percent reduction in the amount of lead used in gasoline.

There is no doubt in my mind that lead in the environment is still a national health problem and that gasoline is a major contributor to lead exposure. These standards will significantly reduce the adverse health effects that result from using lead in gasoline and will reduce the misuse of leaded gasoline in vehicles designed for unleaded fuel.

In addition to these reductions, we are issuing a supplemental notice inviting public comment on information now available relevant to a total ban on lead in gasoline.

Leaded gasoline is responsible for about 80 percent of all lead emissions into the air. There is a direct relationship between lead in gasoline and the amount of lead in human blood. Lead impairs the physical and mental health of our children, especially those who live in the large cities. Recent studies indicate that it might also contribute to high blood pressure in adults. The evidence continues to mount demonstrating adverse health effects from lead at levels previously thought to be below the threshold of risk. Just last month, the Centers for Disease Control lowered the level of blood lead it deems to indicate a need for treatment.

The lower standard of 0.10 level was chosen because it would achieve significant health benefits while still allowing a lead level adequate to protect engine valve seats. The change was also intended to curb the illegal use of lead fuel in cars designed for unleaded by changing the cost relationship between leaded and unleaded gasoline.

After reviewing over 1,500 substantive comments on the proposal made either at our public hearing or in written submissions, we are convinced that such a standard is both necessary and achievable.

Since our proposal last summer, EPA also has carefully considered comments concerning the refining industry's ability to meet this standard. We have reviewed our analyses of the industry capacity to meet these standards in light of these comments and remain convinced that the standard is attainable. We also agree with those who said the standard can be strengthened by requiring a two-step approach which includes the 0.50 grams per gallon standard beginning July 1, 1985.

EPA has also reviewed in detail the issue of the amount of lead needed as a valve lubricant in older cars and engines. We have evaluated the many comments from vehicle, truck, boat, and farm equipment owners concerned that a tenth of a gram of lead per gallon is insufficent to lubricate valves in these engines. Our research indicates that this level of lead is sufficient for these engines when operated at reasonable speeds and loads. In fact, there are several studies that have come to our attention during the rulemaking that suggest that lead may not be required at all for these engines. Therefore, we remain convinced that 0.10 grams of lead per gallon leaded gasoline will furnish adequate protection for vehicles and engines which may need it. We will, however, continue to study this issue with respect to a total ban—as I'll discuss in a minute.

EPA's latest survey of vehicles in the field has shown that fuel switching continues to be a persistent problem despite an active effort to stop it. In fact, latest survey results show a 16 percent fuel switching rate, compared to 13 percent at the time of the proposal.

For all these reasons, EPA is proceeding to issue these stringent final rules today. We are eager to reap the health benefits of the standard and we are optimistic that the level of fuel switching will be substantially decreased as a result of its implementation.

I'd like to take a moment now to discuss the economics of this final rule. EPA has conducted an extensive evaluation of the costs and benefits of the new rule. The net benefits of the 0.10 gallons per leaded mile standard are predicted to be over a billion dollars per year for the period of 1986 to 1992, with the 0.50 grams per gallon standard for the second half of 1985 alone resulting in over $250 million dollars in net benefits. These analyses included the benefits of savings from reduced health problems from lead and other automotive pollution as well as reduced vehicle maintenance compared to the cost of the additional refining needed to furnish adequate gasoline to the market. A billion dollars a year is substantial savings, and these estimates are likely to understate the true benefits. If the new information concerning the relationship between blood lead and blood pressure in fact holds true, the value of these regulations could increase by several billion dollars more per year. This is a good regulation then from both the health and economic point of view.

The second of the two packages we are announcing today is a supplemental notice soliciting future comments on implementing a total lead ban as early as 1988. In the August 1984 rulemaking the Agency proposed consideration of a ban on lead in gasoline during the mid 1990's. During the inter-

vening period, studies analyzing the relationship between blood lead and blood pressure were published. These studies suggest a strong correlation between blood lead and blood pressure, and that reductions in blood lead levels would result in substantial additional health benefits. Further, several studies of fleets of vehicles in actual use indicated that vehicles might not need any lead as a value lubricant. Finally, we are concerned that the 0.10 grams of lead per gallon standard might not be fully effective in eliminating the fuel switching problem.

These facts suggest that a ban on lead in the near term might be both desirable and feasible. We are interested in having the scientific and medical communities review the information relating blood lead and blood pressure.

We also are soliciting additional comments on the need for lead as a value lubricant for engines and on the extent of a continuing fuel switching problem. We intend to work with chemical manufacturers to ascertain the possibilities of alternative additives, should they be necessary, as well as working with other interested groups on ways to prevent valve damage should we find a ban appropriate and necessary.

One additional point is worth noting. We recently proposed a rule which would allow banking of lead rights, retroactive to January 1, as a way of enhancing the flexibility to meet the new standards. We expect the rule to be made final within the next few weeks.

In summary, we believe today's final rule will have a marked and positive impact on the nation's health, and we will continue to study the desirability and feasibility of a total ban on the use of lead in gasoline.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, July 15, 1985.

Hon. LEE M. THOMAS,
Administrator, Environmental Protection Agency, Waterside Mall—West Tower, Washington, DC.

DEAR MR. THOMAS: Enclosed are letters I received from my constituents who are concerned about the impact of your agency's recent actions concerning lead in gasoline. Their concerns are real. While I recognize the health effects of lead on people and the apparent need to curb such lead as quickly as possible, I am concerned about the adequacy of your agency's consideration of the impacts of your actions.

I request that you address the questions raised in the letters concerning motor vehicle, marine equipment and lawn mower equipment that use leaded gasoline. What studies did you conduct concerning the impact on already purchased vehicles, boats, and equipment? What were the results?

Also, enclosed is a July 8, 1985 letter from the Chairman and Ranking Minority Member of the Committee on Agriculture concerning the impact of your actions on agricultural equipment. What studies did you conduct regarding the impact on this type of equipment? What were the results?

With best wishes.

Sincerely,

JOHN D. DINGELL,
Chairman.

JUNE 17, 1985.

Hon. JOHN D. DINGELL: I wish to express my protest of the reduction of regular grade gasoline.

I am a senior citizen living on a fixed income.

My car, lawn mower, and outboard motor are old and need the regular gasoline, other fuel would damage them.

To replace them would be a real hardship.

Yours,

JAMES REA.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, August 14, 1985.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your July 15, 1985 correspondence forwarding letters from your constituents concerning our proposal to ban leaded gasoline as early as 1988. They are concerned that operation on low-lead or unleaded gasoline may be harmful to engines designed for leaded gasoline.

We are certainly aware of your constituents' concerns. However, we believe that the low-leaded standard of 0.10 gram per leaded gallon offers sufficient valve protection to those engines which may need lead under reasonable speeds and loads.

In response to your request, I have enclosed the Federal Register notices, regulatory impact analysis, responses to comments document, summary of comments document, and a final contractor report entitled, "The Effects of Low-lead and Unleaded Fuels on Gasoline Engines." These review the studies we evaluated and the data we have on the effects of lead phasedown on a number of different engine types. We believe that these data are representative of the effects that can be expected. However, we do not have extensive information on some of the specific types of engines (e.g., outboard motors) or uses (e.g., agricultural) that are referenced in your letter.

We are continuing to investigate the need for lead in some engines and the possibility of alternative additives that are less environmentally harmful than lead. We are paying particular attention to the concerns of the agricultural community and are investigating thoroughly the use of unleaded gasoline in farm machinery that was designed for leaded gasoline. We have reviewed information from eight additive manufacturers claiming to have developed additives which would act as valve lubricants should lead be eliminated from gasoline. Several of these look promising. We are working to get the farm community and these additive manufacturers together for in-use demonstration programs to test the efficacy of their additives.

Please feel free to contact me or Charles L. Elkins, Acting Assistant Administrator for Air and Radiation, at (202) 382-7400, if you have any further suggestions.

Sincerely,

LEE M. THOMAS,
Administrator.

COMMITTEE ON AGRICULTURE,
Washington, DC, July 8, 1985.

DEAR COLLEAGUE: On March 4, 1985, the Environmental Prctection Agency issued final regulations to reduce the permissible amount of lead in gasoline by 90 percent by January 1, 1986. The new standard will limit the lead content of gasoline in two stages. The first stage was a reduction to 0.5 gram per leaded gallon (gplg) required on July 1, 1985. The second stage is a reduction to 0.1 gplg to be accomplished on January 1, 1986. The current lead standard is 1.1 gplg.

As part of its March 4 announcement, EPA also extended a system that allows refineries to "bank" lead credits if they can reduce lead below allowable limits this year. They can then use these credits in 1986 or 1987 when the limit of 0.1 gplg is imposed. As a practical matter lead banking will result in gasoline with an average lead content of 0.2 gplg being marketed through 1987.

However, EPA appears to be moving toward a total lead ban, perhaps as early as 1988. Our concern is that they are taking this step without a clear understanding of the impact it will have on machinery used on the farm.

We are writing to invite you to be a cosponsor of legislation we have introduced to require the Environmental Protection Agency to study the effect a lead ban will have on agriculture machinery before such a ban can be proposed.

The American Farm Bureau is currently conducting a survey, but their preliminary reports are that there are an average of ten engines in use on the farm today that require the use of leaded gasoline. Deere & Company estimates that there are more than two million large farm tractors, built before the 1970's and equipped with gasoline engines designed to run on leaded fuel, still in use on farms today.

The legislation we have prepared will require the Environmental Protection Agengy, in cooperation with the Department of Agriculture, to conduct a study on the effect a lead ban will have on engines used in agriculture. The study must reflect typical farm work. The completed study would be published in the Federal Register by January 1, 1987. EPA will also be required to hold public hearings and file a final report to Congress by January 1, 1988. Lead could not be banned until EPA's study and recommendations are complete. This legislation has been developed in cooperation with the American Farm Bureau and the National Council of Farmer Cooperatives.

To date we have a bipartisan group of 24 cosponsors of H.R. 2795. If you would like to add your name to the list, please contact Judy Dungan at 5-2371, or Glenda Temple at 5-2171.

Sincerely,

E (KIKA) DE LA GARZA,
Chairman.
EDWARD MADIGAN,
Ranking Minority Member.

ROCKWOOD, MI.

Hon. JOHN D. DINGELL,
U.S. Representative.

Retirees nightmare: When you take all the leaded gasoline off the market or reduce it so low 0.1 grams of lead per gallon, what are we to do with our investments?

Example No. 1: I purchased a 1979 Pace Arrow motorhome in 1982 price 22 thousand, I'm still making payments on this vehicle, it was purchased as a retirement home to travel the U.S.

Example No. 2: In 1973 I purchased a fishing boat 120 hp mercruiser on the engine it specifies use leaded gas only, another investment down the drain. I have also a riding lawnmower a push mower all use leaded gasoline. If there's not enough lead in the gasoline we will burn up the valves and valve seats of these engines. Who's to blame for this disaster? The automobile manufacturer, the gasoline companies or our own government? How do I and millions of other people get reimbursed? Those purchases were made in good faith. If this ban goes on

leaded gasoline and we have to run on gasoline not suited for our engines then I feel the government, automobile manufacturer and gasoline company's should compensate us for our losses.

It makes sense to me to stop manufacturing of all engines that take leaded gasoline also we probably can live with 0.5 grams per gallon but not with 0.1 grams per gallon as proposed by the E.P.A.

I don't know how many vehicles and engines the government and armed forces are going to be affected but I suspect many of them will still take leaded gasoline. What a cost to the taxpayers if all of them have to be destroyed or replaced. If the E.P.A. bans leaded gasoline also millions of boaters will be affected plus recreational vehicles.

I think the state of Michigan will be hurt in the tourist industry if nobody can travel who already owns vehicles that take leaded gas.

Can you do anything about this ban on leaded gasoline?

Respectfully,

ROBERT W. HUFF.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, September 30, 1985.

Hon. LEE M. THOMAS,
Administrator, Environmental Protection Agency, Waterside Mall—West Tower, Washington, DC.

DEAR MR. THOMAS: Thank you for your August 14, 1985, reply to my July 15 letter concerning the Environmental Protection Agency's (EPA) rule reducing lead in gasoline to 0.10 grams per gallon in January and your proposal to ban such lead entirely in 1988. Your reply was interesting, but it raised more questions than it answered.

1. You state that the EPA "data" are "representative of the effects" of the phasedown "that can be expected". What does EPA mean by "representative" insofar as the engines mentioned in my July letter are concerned? What are those data? How and when were they acquired?

2. You state that EPA does "not have extensive information on some of the specific types of engines (e.g., outboard motors) or uses (e.g. agricultural)". What does that mean? What information do you have? What safety problems exist regarding gasoline and gasoline mixtures for recreational boats and what is being done about them?

3. You state that the 0.10 gram standard "offers sufficient valve protection to those engines which may need lead under reasonable speeds and loads." What is the basis for this statement? Does the term "engines" include the engines referenced in my letter? What evidence do you have that gasoline at this level will, in fact, be produced, distributed, and sold after January 1 in the rural agricultural areas of Michigan and other States, taking into consideration the pipeline distribution system in these areas. For example, is this view shared by such groups as the National Petroleum Refiners Association? If you are wrong, what will be the impact after January 1 on the agricultural community, taking into account the enclosed survey by the Farm Bureau. Please explain banking and its impact.

4. You state you are "paying particular attention to the concerns of the agricultural community and are investigating thoroughly the use of unleaded gasoline in farm machinery that was designed for leaded gasoline." When was this investigation begun? What is its status? When will it be completed? Please describe the investigation. Does it cover gasoline at a level set for January 1?

5. Your letter also indicates that you are examining the "possibility of alternative additives" and that some "look promising." You mention a demonstration program. Your letter suggests that such additives are not expected to be readily available soon. But if leaded gasoline is not available in January and additives are also not available, what will be the results? When will additives be ready?

I share your concern about the health effects of lead from gasoline, paint and other sources. Reduction is clearly wise. But it is not clear to me that EPA has done a sound job in understanding the impacts of the January 1 reduction or a ban before reaching these conclusions. It appears that your research was once again incomplete. That concerns me. It should concern you as well.

I request your reply to the above matters by October 18, 1985.

Sincerely,

JOHN D. DINGELL,
Chairman.

RESULTS OF FB SURVEY ON LEADED GAS
(3,166 RESPONSES)

1. Of the total gallons of fuel used on your farm in farm equipment (trucks, tractors, mowers, etc.) what percentage would you estimate you use of each? This includes fuel purchased off the farm at a station for farm use.

Farm Unleaded Gasoline: Average: 16% (464 est. gallons/year).

Farm leaded Gasoline: Average: 84% (2,372 est. gallons/year).

2. How much equipment on your farm was orginally designed to burn leaded gasoline and is still burning leaded gsoline?

Average farm	Number of units		Percent of time units run at 80 to 100 percent of maximum rpm	Estimated cost to buy all this equipment new today
	1972 and newer	1971 and older		
30 HP and up	2.1	3.4	70%	$90,604
29 HP and under	2.9	2.1	81%	7,577

3. How much equipment on your farm was originally designed to burn no-lead gasoline and is still burning no-lead gasoline?

Number of Units 30 HP & Up—0.8, Number of Units 29 HP & under—0.5.

4. How much longer would you expect your leaded gas-burning equipment to remain in service on your farm if leaded gas continues to be available?

2% less than 2 years, 10% 2 to 5 years, 39% 5 to 10 years, 49% use indefinitely.

5. Could most of the lead burning equipment on your farm be modified to burn unleaded gas?

5% Conversion could be accomplished, 56% Conversion would not be economically feasible, 39% Don't know.

6. Have you burned unleaded gasoline in an engine designed to burn leaded?

5% It worked fine, 12% It would not burn quite right without adjustment to engine, 8% Didn't work at all, 75% I have never tried unleaded fuel in an engine designed for leaded fuel.

7. (The current EPA standard is 1.1 grams of lead per gallon). What amount of lead would be required for satisfactory operation of your lead burning engines?

82% Don't know, 14% Need greater than 0.5 grams of lead per gallon, 3% Reduce allowable amount of lead to 0.5 grams/gallon, 1% reduce allowable amount of lead to 0.1 grams/gallon (as EPA's new rule).

8. How would the total elimination of leaded gas affect your farming operation?

70% It would really disrupt our fuel situation, 15% It would cause a few problems, but we would cope, 3% It wouldn't bother me at all, 12% Other.

9. What is your preferred method of keeping leaded gasoline available to agriculture?

32% Exemption, 25% Keep at 1.1 grams, 28% No answer, 15% Other.

I want to protect the public health through lead reduction in gasoline. But that must be done wisely and on the basis of sound research by EPA. I am not satisfied that in the case of some engines like agricultural machinery, EPA has conducted that research. Thus, I think the issue will not go away merely by passage of this amendment. Our committee may still have to address it by oversight at least.

Mr. TAUKE. I thank the gentleman, and I want to emphasize to the gentleman from Michigan and the gentleman from California that if for some reason some change will be made in the agreements that have been made, I, too, would be compelled to oppose any changes in conference on this issue.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from California.

Mr. WAXMAN. I want to commend the gentleman from Iowa and the gentleman from Illinois for raising the issue that is embodied and resolved, I think satisfactorily, by this particular amendment. It is narrow; it deals with a very real problem which you have brought to our attention. I appreciate the commitment, should others see this as an opportunity to expand it in ways that will be adverse to public health, to join us in opposing it. But for this limited purpose, I want to commend you for working out this amendment and I join in support of it.

Mr. TAUKE. I thank the gentleman for his cooperation.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, I commend the gentleman for the initiative he has taken in offering this amendment. It could prove to be a vital step in changing our current policy, which is dependent upon petroleum products entirely, to switching to an alcohol fuels economy.

I continue to be concerned about the need for our Nation to shift to a greater reliance on alcohol fuels as a way of reducing the burgeoning trade deficit. This year, the trade deficit is expected to reach a record $150 billion. One-third of that deficit is due to the cost of imported oil. If the United States could exploit the vast amounts of grain and corn that our farmers

produce, we could make a significant dent in the trade deficit and help our economic position at home and abroad.

We can reduce the trade deficit if our Government would only follow the recommendations of the U.S. National Alcohol Fuels Commission and the example of Brazil.

The Alcohol Fuels Commission issued an important report in 1981 which discussed in great detail how a coordinated public and private national effort to produce alcohol fuels would move the United States toward energy independence. It issued sensible recommendations to achieve this. Unfortunately, those recommendations have been ignored.

The Brazilian experience demonstrates how alcohol fuel can be an effective alternative to petroleum fuels. I recently saw firsthand that Brazil's public and private sectors have already established widespread production and distribution systems for alcohol fuels. They have in place automotive manufacturing operations which devote more than 90 percent of their production to alcohol fueled automobiles. They have in place a system for converting older vehicles to alcohol fuel operation. One-third of Brazil's automobiles currently operate on alcohol fuels. In 1984, our southern neighbor shaved $2 billion from its import bill through use of alcohol fuels.

The United States can and should follow Brazil's example. We should vigorously promote alcohol fuel development. By doing this, we would not only reduce our trade deficit by reducing substantially the importation of foreign oil, but we would put the farm surpluses being produced at a record rate to productive use.

Currently, the U.S. alcohol fuels industry produces approximately 500 million gallons a year. This is insufficient to meet our needs. Last year, we imported $100 million worth of alcohol fuels. The demand in our country will be even greater as lead is phased out as an octane enhancer from gasoline consumed in the United States.

Mr. Chairman, the time is late but we must start now to make alcohol fuels an integral part of U.S. energy policy and of our assault on the trade deficit.

Mr. TAUKE. I thank the gentleman.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from Illinois.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. TAUKE] has expired.

(On request of Mr. MADIGAN and by unanimous consent, Mr. TAUKE was allowed to proceed for 1 additional minute.)

Mr. MADIGAN. I thank the gentleman for yielding, and I wish to commend the gentleman from Iowa and the gentleman from Oklahoma for their initiatives in this regard. But especially I want to thank the gentleman from California and the gentleman from Michigan, the subcommittee chairman of the Health and Environment Subcommittee and the chairman of the Energy and Commerce Committee, for their assistance in letting this committee deal with this very serious problem for the farmers and ranchers of America.

Mr. TAUKE. I thank the gentleman.

The CHAIRMAN. It is the Chair's understanding that the gentleman from Michigan [Mr. DINGELL] withdrew his point of order.

Mr. DINGELL. Mr. Chairman, I withdraw my point of order.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words, only to repeat again that the Committee on Agriculture, the gentleman from Illinois, and the gentleman from Texas, are cognizant of the problem that we face with this amendment. It had been addressed in proper form. A bill was introduced by the gentleman from Illinois, and the gentleman from Texas, and it was not our intention to burden the farm legislation with amendments of this nature in respect for the jurisdictional concerns of the gentleman from Michigan. But we have no control over amendments that might be introduced, and we appreciate now the gentleman reaching this agreement with us. But in the beginning, when the issue was addressed, it was not intended to in any way interfere with the jurisdiction of the committee which the distinguished gentleman leads.

Mr. BEREUTER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Iowa. I have just one point that I wish to clarify for the record.

After the Environmental Protection Agency announced its intention to phase out lead in gasoline, many of my constituents in Nebraska expressed concern to me about the effect that a total ban on leaded fuel might have on their farming operation. Because of this concern, I support the amendment which the gentleman offers today.

I would point out that this same study was introduced as legislation in the House, earlier this year and I commend the gentlemen for moving the intent of that legislation forward by offering it as an amendment to this farm bill.

Unfortunately, some of my constituents in Nebraska and the representatives of some farm organizations have incorrectly perceived any study such as this as an effort to halt the increased use of ethanol in gasoline. I think it is the clear intention of this body, and I think I speak particularly for Members from agricultural districts, that we do support the increased use of ethanol in gasoline not only because it creates an additional new market for grain, but also for environmental and health reasons. However, before the Environmental Protection Agency makes any move to completely ban lead in gasoline, we must have a clear understanding of the impact such a ban would have on farmers and the machinery they use on the farm. Given the current state of our agricultural economy, it is indeed desirable that we examine whether a ban on all unleaded gasoline would further exacerbate conditions on the farm.

A recent study of the American Farm Bureau shows that on average, there are as many as 10 to 14 motors requiring leaded fuel on every farm. Unless there are adequate means for adopting the use of unleaded gasoline in these motors, an average farmer could spend thousands of dollars in replacement costs. Before farmers are forced to abandon the vehicles they are using now, we must consider the cost to the farm economy, and if necessary, continue to make some leaded gasoline available for older motors.

Again, I would stress that this amendment is not intended to preclude the future use of ethanol in gasoline, or stunt the development of the ethanol industry. Instead, this study will help guide both Congress and the administration to implement a lead phaseout policy which does not impose an unreasonable burden on our already financially strapped agricultural economy.

I urge adoption of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. TAUKE] as a substitute for the amendment offered by the gentleman from Oklahoma [Mr. JONES].

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. JONES], as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

Mr. CHAIRMAN. Has the amendment been printed in the RECORD as of September 24?

Mr. GLICKMAN. It has been, Mr. Chairman.

Mr. CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 503, after line 7, insert the following new section:

"NEW GRAIN CLASSIFICATIONS

SEC. 1873. The Secretary shall direct the Federal Grain Inspection Service and the Agricultural Research Service to cooperate in developing new means of establishing grain classifications taking into account characteristics other than those visually-evident and shall report to the House Committee on Agriculture and the Senate Committee on Agriculture and Forestry not later than December 31, 1985, on the status of those cooperative efforts as they relate to

more accurately classifying types of wheat and other grains now in use."

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, this amendment is offered by Mr. ROBERTS and myself. The title is "New Grain Classifications." We have a serious problem out in wheat country with respect to classifying grain. With new technology we have been able to come up with new classes of grain, which functionally are the same, for example, as hard winter wheat, a classification called ARCAN, but visually, since it looks like soft wheat, it has been classified as such, which results in a lower price for Kansas farmers. This amendment would just merely direct the Federal Grain Inspection Service and the Agriculture Research Service to cooperate in developing new means of establishing grain classifications, taking into account characteristics other than those visually evident and reporting back to the committee of Congress as to the status of those cooperative agreements as they relate to more accurately classifying types of wheat and other grains now in use.

I yield to my colleague, the gentleman from Kansas [Mr. ROBERTS].

Mr. ROBERTS. I thank my colleague for yielding to me.

Mr. Chairman, I rise in support of the amendment. This amendment addresses a problem we are having in wheat country that today is only a problem but could turn into a crisis at harvest time next year.

The Federal Grain Inspection Service was created by Congress over a decade ago to grade and insure that buyers of U.S. grain are receiving a uniform standard quality of grain. The cornerstone to this process is grain grading based upon visual determinations of hardness or softness of the kernel. Visual examination of the kernel of wheat is currently the only acceptable method for identifying a class of wheat for grading.

However, through the miracle of modern science and advances in plant breeding, high yielding varieties have been released for farmers to grow. Many of these varieties commonly exhibit kernel characteristics of more than one class of wheat thereby causing difficulties in wheat classing. Some of the new varieties released by the plant breeders in the Great Plains have kernels that display both hard red kernels and soft red kernels.

The percentage of hard red winter wheat varieties exhibiting nontypical kernel characteristics is expected to increase in 1986 as more of the hybrid wheat varieties are released and grown. This means that a larger percentage of the 1986 wheat crop could fall under the wrong classification. The current system, in place since 1914, is totally inadequate for the modern wheat varieties that are being developed.

It is time for Federal Grain Inspection Service to develop a new testing and grading system that will address the problems created by the new varieties of wheat. This amendment would require that FGIS and the Agricultural Research Service report back to Congress on what they are doing to address this problem. While this amendment is a good first step there are those who feel that we should mandate that Federal Grain Inspection Service and the Agricultural Research Service be given a specific time limit in which to come up with a new testing procedure. I won't advocate that at this time but I do want to serve notice we will have hearings on that subject.

I urge my colleagues to support this amendment. It is time we let the folks at Federal Grain Inspection know that Congress is serious on this issue. FGIS must come up with a new testing procedure that is in step with the technology of the eighties. Relying on a seventy year system of visual inspection is totally unacceptable to the grain trade, farmers, and our customers.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Texas.

□ 1650

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Chairman, I would like to inform the gentleman that the chairman of the Grain Subcommittee, the gentleman from Washington [Mr. FOLEY], informs me that they have no objection to this amendment. Accordingly, on this side, we would have no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas [Mr. GLICKMAN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Title XVIII, page 509, after line 13 insert the following:

FARMLAND PROTECTION

"SEC. 1986. (a) Section 1546 of the Farmland Protection Policy Act (7 U.S.C. 4207) is amended by striking out the words "Within one year after the enactment of this subtitle," and substituting therefore "On January 1, 1987, and at the beginning of each subsequent calendar year,".

(b) Section 1548 of the Farmland Protection Policy Act (7 U.S.C. 4209) is amended by striking the words "any State, local unit of government, or" and inserting before the period at the end of the sentence ": *Provided*, That the Governor of an affected state where a state policy or program exists to protect farmland may bring an action in the Federal District Court of the district where a federal program is proposed to enforce the requirements of section 1541 of this subtitle and regulations issued pursuant thereto".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, I do not believe this amendment has any controversy. I have talked to the ranking members of the subcommittees and the committee and the chairmen of the subcommittee and committee. It is a much scaled-down version of what I offered in committee to take care of the objections that were raised at that time

What it merely says is that those States, of which there are 11, that have a farm land protection act, can if necessary, get the Federal Government to enforce their own regulations on farm land protection which merely state that they should consider the loss of farm land in implementing Federal programs. It does not have any teeth in it really.

This says that if they even refuse to do that, that the Governor of a State can get the courts to force them to at least do their own regulations.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. JONES of Tennessee. I thank the gentleman for yielding.

Mr. Chairman, I have no objection to this amendment. The Department of Agriculture has been uncooperative and unresponsive to the Congress in administering the Farmland Policy Protection Act and this amendment would at least force them to report to us.

Additionally, I believe this amendment provides some authority to Governors of States which are trying to assist themselves to be more active in forcing Federal cooperation.

Mr. JEFFORDS. I thank the gentleman. I would point out that the other part of the amendment is only to have a report annually.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. BEREUTER. I thank the gentleman for his initiative. I certainly support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BENNETT

Mr. BENNETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the CONGRESSIONAL RECORD of September 24?

Mr. BENNETT. Yes; it has, Mr. Chairman.

The clerk read as follows:

Amendment offered by Mr. BENNETT: Page 509, after line 6, insert the following:

STRATEGIC STOCKPILE AUTHORITY

SEC. 1896. Of the commodities in the Commodity Credit Corporation or otherwise under the Department of Agriculture stores, one-half thereof as of January 1, 1986, shall be available for sale or barter with the proceeds to be used to furnish materials for the Strategic Stockpile without further appropriations therefor. Such sales or barter can be made within the United States or abroad and may be undertaken between the United States and other sovereign countries. To the extent that the assets of the Commodity Credit Corporation are reduced by this process, the full faith and credit of the United States shall be substituted therefor. The Commodity Credit Corporation shall take appropriate action to protect fully the assets of the Commodity Credit Corporation on the basis of the established value at the time of transfer of the assets for sale or barter. In such sales or barter the commodities need not be sold or bartered at a profit and no such sale or barter shall be effected which in the judgment of the Commodity Credit Corporation will seriously adversely affect production or prices in the United States or elsewhere.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT. Mr. Chairman, this amendment is needed to put directly into the National Defense Stockpile—of strategic and critical materials—all such strategic and critical materials acquired by barter or sale of agricultural commodities owned by the Commodity Credit Corporation. The language in the bill allows sales and barter for such defense materials but places the warehousing, ownership, and management of such acquired defense materials in the Agriculture Department. With this amendment the bill can go to conference in a way in which all of these warehousing, ownership, and management matters will be in, and with, the established strategic stockpile authorities without duplication, bureaucracy, and waste. And the Commodity Credit Corporation will be protected by the full faith and credit of the Government, this being substituted for the materials and values otherwise owned by that corporation. In the bill in conference this will allow a better result than the bill now provides. I sincerely hope the amendment will be approved.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. BENNETT].

The amendment was agreed to.

AMENDMENTS OFFERED BY MS. SNOWE

Ms. SNOWE. Mr. Chairman, I have two amendments at the desk to title XVIII, and I ask unanimous consent that the two amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Maine?

There was no objection.

The CHAIRMAN. Have the amendments been printed in the CONGRESSIONAL RECORD of September 24?

Ms. SNOWE. Yes; they have, Mr. Chairman.

The Clerk read as follows:

Amendments offered by Ms. SNOWE: Page 437, after line 2, insert the following:

POTATO INSPECTION

SEC. 1805. The Secretary of Agriculture, in order to achieve a significant reduction in the volume of substandard imported Canadian potatoes entering through ports of entry in the northeastern United States, shall require the Agricultural Marketing Service to perform random spot checks in accordance with other law and on a continuing basis on a significant portion of potatoes entering through those ports of entry. The Secretary of Agriculture shall periodically report to the public and to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives the results of such spot checks and increase their frequency or take other actions as necessary to achieve and maintain the significant reduction of such substandard imported potatoes.

Page 509, after line 13, insert the following:

POTATO ADVISORY COMMISSION

SEC. 1896. It is the sense of Congress that—

(1) the Secretary of Agriculture should take actions based on the recommendations of the potato advisory committee established by the Secretary on an ad hoc basis;

(2) such actions should address industry concerns including trade, quality inspections, and pesticide use;

(3) such committee should meet biannually; and

(4) the recommendations and actions of such committee should be reported to the Chairmen of the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives, and to the public.

Ms. SNOWE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Maine?

There was no objection.

Ms. SNOWE. Mr. Chairman, my first amendment simply instructs the Agricultural Marketing Service of the Department of Agriculture to continue current efforts to reduce the volume of substandard quality Canadian potatoes from entering United States markets through Maine and other Northeast ports of entry.

This amendment is intended to reinforce the demands of Maine's potato industry that imported potatoes meet grade and marketing requirements, and be certified as such when these imported loads come into the country. Last year, at my request, the Agricultural Marketing Service began to perform random spotcheck inspections on Canadian imported potatoes. From mid-December until mid-May, the end of the shipping season, 20 percent of the 370 loads inspected were found to be substandard.

My amendment is simple. The Agricultural Marketing Service would be instructed to perform an adequate number of inspections, and take other steps as needed, to significantly reduce the volume of loads found to be in violation of U.S. marketing standards. My amendment contains no time limit or specific requirements other than the requirement that the results of these inspections be periodically reported to the public and to the House and Senate Agriculture Committees.

The purpose of this amendment, Mr. Chairman, is to give Maine's potato industry greater assurance that imported potatoes are meeting the same quality requirements that they are now required to meet. Judging from the results of last year's inspections, an obvious quality problem exists. I believe this is a problem which merits more concerted attention from the Agricultural Marketing Service.

My amendment requires the Department to make more of an effort to assure that the quality of the potatoes imported through Maine meets existing standards. I urge my colleagues to support this amendment to improve the Maine potato industry's ability to compete fairly with our Canadian neighbors.

Mr. Chairman, my second amendment will require the Department of Agriculture to take actions based on the recommendations of the Potato Advisory Commission to assist this industry.

This commission, an ad hoc group composed of representatives of the potato industry and representatives of the Department of Agriculture, was formed earlier this year to address the concerns of the potato industries in Maine and other States, and to bring potato industry officials in closer contact with the Secretary and other department officials on economic and trade issues.

Secretary Block announced the formation of this Advisory Commission in December 1984, to bring industry representatives here to Washington on a periodic basis to develop policies to better assist potato producers. The Commission has met on three occa-

sions—in March, June, and most recently on September 25.

My amendment is a sense-of-Congress resolution that the Secretary of Agriculture should act, based on the concerns and recommendations of the Advisory Commission, to provide greater assistance to the potato industry. In addition, my amendment states that the Commission should meet at least twice a year, and that the results of these meetings should be reported by the Department to the House and Senate Agriculture Committees.

Potato producers, nationally, and especially Maine potato producers, are facing difficult problems on account of cheaper, subsidized imports, which are underselling our potatoes in our own markets. The Potato Advisory Commission has begun to look at these issues, and to make recommendations to the Department of Agriculture. In addition, the committee has been concerned about gaining a better understanding of pesticide regulations in Canada and the United States, and about differences between the two countries on systems of quality inspection. Through this exchange with the Department on issues of specific concern to the potato industries, I think we can make great strides in helping our producers make a living on the farm.

Despite the demonstrated value of the Commission over the past 12 months, there is room for improvement. Being strictly advisory, however, doesn't give this Commission an opportunity to recommend policy changes and to see the Department take real concrete steps to respond to their recommendations. My amendment simply urges the Department to take advantage of this forum to address the real concerns of an important agricultural sector: the potato industry.

My amendment does not make this advisory panel a permanent body, or place undue restrictions on the format or conduct of their actions. What my amendment will do is reinforce the importance of the Commission, thereby bolstering the efforts of the Department and Congress to address the needs of this industry.

Mr. PANETTA. Mr. Chairman, will the gentlewoman yield?

Ms. SNOWE. I yield to the gentleman.

Mr. PANETTA. I thank the gentlewoman for yielding.

Mr. Chairman, we have discussed these amendments. It is my understanding that these amendments basically say to the Department, "Do what you are supposed to do under the law. Do the random checks; implement the protections that are built into the law as it exists now.

For that reason, we would have no objection on this side to accepting those amendments and reemphasizing what indeed the law says in the potato area.

Ms. SNOWE. I thank the gentleman for his comments with respect to the amendments. That is precisely what they would do. The Potato Advisory Commission, again, is to take actions based on the recommendations of that Commission because there are a number of problems not only facing the Maine potato industry but also our Nation's potato industry. I think this kind of exchange is the best way to go about it in addition to having the inspection services as well.

Mr. EMERSON. Mr. Chairman, will the gentlewoman yield?

Ms. SNOWE. I yield to the gentleman.

Mr. EMERSON. We on this side have examined the gentlewoman's amendments and find them perfectly acceptable and commend her for her efforts and are glad to accept the amendments.

Mr. GILMAN. Mr. Chairman, will the gentlewoman yield?

Ms. SNOWE. I yield to the gentleman.

Mr. GILMAN. I thank the gentlewoman for yielding.

Mr. Chairman, I rise in support of the amendments offered by the gentlewoman from Maine [Ms. SNOWE] assisting our beleagured vegetable farmers in their continuing efforts to remain competitive with our trading partners. I commend the gentlewoman for her thoughtful approach to this sensitive trade issue, and for her hard work on behalf of our domestic agricultural industry.

Importation of certain vegetable commodities into American markets has had a devastating effect upon our domestic producers. In that regard, I introduced legislation once again in this Congress, imposing a temporary surtax on certain of these commodities in the event that they enter the United States in such volume and at such reduced prices as to cause injury to American farmers. My bill, H.R. 110, requires the Secretary of Agriculture to monitor cabbages, carrots, celery, lettuce, red and yellow storage onions, potatoes, and radishes to determine from volume and benchmark prices the extent of economic impact on our domestic growers. I am pleased to note that my legislation enjoys the support of the gentlewoman from Maine [Ms. SNOWE] as well as several other concerned Members of Congress from the afflicted Northern States. The fight to save our domestic vegetable market from continued erosion is a cooperative effort—I am pleased to be able to speak in support of Ms. SNOWE's amendments.

The gentlewoman's amendments will reinforce our efforts to keep the U.S. vegetable industry competitive. This past December the Secretary of Agriculture John Block, recognized the unfair trade situation facing our domestic producers when he established the Ad Hoc Potato Advisory Committee. Comprised of industry representatives drawn from across the United States, the ad hoc committee has met three times over the past 10 months to discuss the continuing problem of imports undercutting our domestic product. While I commend the Secretary for his December initiative, I would like to take this opportunity to express my strong support for the extension of this program to embrace other troubled commodities.

I represent an area of New York known as the "black dirt region." Some of this country's finest onions are grown in this sector of Orange County. I can assure you that my farmers are hurting and that they would benefit immeasurably from the creation of an Ad Hoc Advisory Committee on Onions. Accordingly, I strongly urge the Secretary of Agriculture to consider extending this model program.

The amendment offered by the gentlewoman from Maine clarifies the role of the Ad Hoc Potato Advisory Committee by requiring that: First, the Ad Hoc Potato Advisory Committee meet at least twice a year; second, the Secretary of Agriculture take action to relieve the burden on our domestic producers based on the ad hoc committee's recommendations; and third, that the Secretary of Agriculture should report publicly to both the House and Senate Agriculture Committees on actions taken by the ad hoc committee.

Compounding the difficulties facing our American farmers in their constant battle to remain competitive with imported commodities, is the importation into his country of substandard products bearing USDA approvals. The Agricultural Marketing Service has been conducting random spot checks at the U.S. border to ensure that potatoes entering this country are up to prescribed standards. The second amendment offered by Ms. SNOWE expresses the support of Congress that the Agricultural Marketing Service should continue these random spot checks and that they should increase the frequency of these checks in an effort to maintain significant reductions in the movement of substandard product into this country. I encourage the Secretary of Agriculture to enlarge the scope of the random check program to include other affected commodities.

Events of the past several weeks have made clear to all of us that U.S. trade policy needs to be reviewed and reformed. The time to act is now. Accordingly, I urge my colleagues to support the Snowe amendments.

Ms. SNOWE. I thank the gentleman for his comments. I think both of

these endeavors certainly can complement what the gentleman is suggesting in trying to address other commodities that are facing similar problems with respect to imports from Canada. I think the kind of advisory commissions established by the Department of Agriculture for the potato industry could be extended to other commodities as well.

The CHAIRMAN. The question is on the amendments offered by the gentlewoman from Maine [Ms. SNOWE].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. DASCHLE

Mr. DASCHLE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the RECORD of September 24?

Mr. DASCHLE. Yes; it has, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. DASCHLE: Page 434, line 3, insert "(a)" after "SEC. 1803.".

Page 434, after line 23, add the following:

(b) Section 20(f) of the Federal Meat Inspection Act (21 U.S.C. 620(f)) is amended by adding at the end thereof the following:

"(g) The Secretary may prescribe terms and conditions under which cattle, sheep, swine, goats, horses, mules, and other equines that may have been administered an animal drug or antibiotic not approved for use in the United States may be imported for slaughter and human consumption. If the Secretary determines that the use of an animal drug or antibiotic in any of such livestock is harmful to the health of man and that it is impossible to determine the livestock being imported do not harbor any residue of such animal drug or antibiotic, the Secretary may issue an order forbidding the entry into the United States of such kind of livestock from any country that allows the use of such animal drug or antibiotic in the production of such livestock in such country. No person shall enter cattle, sheep, swine, goats, horses, mules, and other equines into the United States in violation of any order issued under this subsection by the Secretary.".

Mr. DASCHLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

□ 1700

Mr. DASCHLE. Mr. Chairman, the amendment I am offering today will strengthen our meat inspection laws with regard to the importation of live animals, by providing the Secretary with direct, discretionary authority to deal with imported slaughter animals suspected to be unfit for human consumption. This amendment addresses the question of the use of nonapproved animal antibiotics in the production of imported slaughter animals.

Current statute allows the Secretary the authority to ban the importation of carcasses, meat or meat products that are considered to be "adulterated." While it is not impossible for the Secretary to broaden this section to include live animals, no specific reference is made to live animals, and how these products might be considered to be adulterated. Herein lies the problem.

My amendment gives the Secretary the direct, discretionary authority to address this issue by prescribing the terms under which live animals may be imported for slaughter and human consumption. Under my amendment, this authority extends to imported slaughter animals which may have been administered an animal antibiotic not approved for use in the United States.

If the Secretary determines that it is impossible to detect residues of such nonapproved drugs or antibiotics in the live animals, and that the use of that nonapproved drug is harmful to the health and welfare of the consuming public, the Secretary may ban the importation of that class of animal. This ban would apply to every country allowing the use of this drug in the production of that class of animal, until such time as that country no longer permits the use of that drug in the production of that class of animal.

Livestock producers in this country have a legitimate complaint. On one hand, our Government forbids the use of a particular drug or antibotic in the production of our domestic slaughter animals. Many times the use of these drugs is not approved because of the severe health hazards their use may cause to consumers of these meat products. At the very same time, this same Government permits live animals to be imported from countries which permit the use of the very same drugs we prohibit our own producers from using because of health reasons.

Producers ask, and rightly so, why the use of these drugs are not a health hazard in foreign imports, but is in our own domestically produced animals. This amendment will give the Secretary the unqualified authority to answer those producers.

Concern with the use of nonapproved animal drugs is as much a consumer issue as it is a producer issue. Consumers have every right to know that their meat products are safe for human consumption. By providing the Secretary with the clear authority to ban those imported animals that might be suspect to contain hazardous drugs, we are ensuring that he has the legal authority to make certain that consumers are, in fact, enjoying the safest possible meat products. I urge the inclusion of this amendment in the 1985 farm bill.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I appreciate the gentleman's yielding, and this is to advise him that we have examined the amendment on our side and would have no objection to its adoption.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I appreciate the gentleman's yielding. I am looking at the amendment, and I just do not find any basis upon which to raise an objection to it, so I think we are going to accept it on this side.

I thank the gentleman for yielding.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in support of the amendment offered by my colleague from my neighboring State of South Dakota, Mr. DASCHLE.

As my colleague has pointed out, this amendment is needed to extend the authority of the Secretary of Agriculture to impose limits on the importation of live animals that contain levels of chemicals that could cause a health hazard to our consumers. As the gentleman points out, current authority allows for addressing problems with processed products, and this added authority is needed, as well.

Earlier this year, live hogs were being imported from Canada into the United States that may have contained dangerous levels of chloramphenicol and other substances that have been banned in this country. It places our producers on a particularly unlevel playing field when we import live animals from countries that do not have high environmental and cleanliness standards, and yet do not allow our own producers access to these same chemicals and technologies.

Mr. Chairman, I strongly support this amendment to level the playing field for America's agricultural producers.

Mr. DASCHLE. Mr. Chairman, I thank the gentlewoman, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota [Mr. DASCHLE].

The amendment was agreed to.

Mr. LOTT. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman from Mississippi is recognized for 5 minutes.

There was no objection.

Mr. LOTT. Mr. Chairman, America's cattlemen are facing their worst market in 17 years. Since January, feed cattle prices have dropped 25 percent, and many producers, from cow-

calf operators to feedlot owners, are being forced into bankruptcy.

Despite these hard times, cattlemen are not asking for Government assistance. Instead, they are asking us to give them the opportunity to help themselves. The Beef Promotion and Research Act would give them that opportunity.

By enabling cattlemen to initiate a $1 per head checkoff, we allow them to raise the money for much needed research, education, new product development and promotion programs. But this bill does not supercede existing State and national beef promotion programs. In fact, Mr. Chairman, up to one-half of the funds collected could be under State control. And rather than create a new bureaucracy, this bill utilizes and reinforces the existing industry structure.

Cattlemen desperately need, and want, the Beef Promotion and Research Act. A recent survey by an independent research service showed that more than three-fourths of the Nation's cattlemen believe that a checkoff is an important investment in their business. The average checkoff recommended was just over $1 per head—the same amount that the Beef Promotion and Research Act calls for. And this bill has strong, industrywide support.

The cattle industry has served us well through the years in providing a safe and wholesome source of nutrition. It's time for us to help the industry through these trying times. Mr. Chairman, the Beef Promotion and Research Act does not solve all the industry's problems, but it is a start. We owe them that much.

Mr. CONYERS. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Without objection, the gentleman from Michigan is recognized for 5 minutes.

Mr. CONYERS. Mr. Chairman, I rise to ask if Willie Nelson is around and can rush to our assistance. I think we may need some aid before the evening is over or before this farm bill is disposed of or the small farmer is disposed of completely.

I would like to ask the distinguished chairman of the Committee on Agriculture, what has happened to all the amendments that were put in to assist the family farmer, whom I have joined with an urban-rural coalition to help save? Could the committee chairman respond briefly to that question, please?

Mr. Chairman, I yield to the gentleman for that purpose.

Mr. DE LA GARZA. Mr. Chairman, I would be very happy to respond to the gentleman and point out that we have addressed that issue. As a matter of fact, we accepted a series of amendments offered by our distinguished colleague, the gentleman from Brooklyn, NY, Mr. TOWNS, that addressed that issue in part.

Our concern extends beyond that. As we work through this legislation, we do not depart in any way whatsoever from the fact that we must address the issue of the family or the small farmer.

There have been attempts to divide or to strike at the big farmer or strike at the small farmer. But I think the gentleman should be proud of the way our committee has addressed that issue. Specifically, again I go back to our colleague, the gentleman from New York [Mr. TOWNS]. I point out that the gentleman from Brooklyn, the inner city of Brooklyn, has developed enough expertise to offer amendments to this legislation.

Mr. CONYERS. Mr. Chairman, is the gentleman saying, then, that I should be able to face in public the small farmers in America, because if they understood what the gentleman knows is in this bill, they would be proud of my support for this measure?

Mr. DE LA GARZA. I would assert to the gentleman in the affirmative, that certainly he should support it, and if he would, I would stand alongside him.

Mr. CONYERS. Then let me ask the committee chairman another question.

I am one who has been troubled in this House for many years about these several conditions in food: First of all, we have 35 million people living in poverty in America, many of them suffering from malnutrition. Second, we pay billions of dollars to farmers not go grow. Third, we are now faced with the world's worst famine, the worst famine in history, where 21 nations in Africa are in peril.

Is there some way I can explain to reasonable Americans why we are still paying people for being too efficient, why we are still driving thousands of small farmers into bankruptcy and into the cities, and why people are starving not only in America but in the world? Does this measure in any way address those questions?

Mr. Chairman, I yield to the distinguished chairman of the committee, my friend, the gentleman from Texas [Mr. DE LA GARZA].

Mr. DE LA GARZA. Mr. Chairman, if I were to address the question of the gentleman in its proper form and give the answer which it merits, it would take hours. All I can attest to the gentleman is that we have addressed the issue and know that we do not specifically pay billions of dollars for someone not to plant. But there is a combination of very intricate but yet troubling problems of legislation.

The problem with famine is not that the food is not there; it is that it is in the wrong places, and sometimes the problem is with the government, like with the famine in Sudan and Ethiopia. It is not that we were not willing to send. They have problems with their governments. They have marketing problems, storage problems, and transportation problems.

Here in America it is the same way. There is food, but something else went wrong. It was not the fault of the farmers. It is that the man does not have a job, there was a disaster in the inner city, or there was unemployment, low employment, and underemployment. That is the problem.

But the gentleman should be proud of the fact that our legislation has afforded the American constituency food at the least amount of disposable income per family for food. It is only 1 percent of the total budget. It is not all those billions; it is 1 percent of the total budget. But something else went wrong. If a fellow does not have a job, then we need to address that issue in other legislation, not here.

For 1 percent of the total budget we have given the American people the best-quality food in the world for the lowest amount of disposable income of any country in the world. But there are other things that impact it, and we cannot handle it all in this legislation.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. CONYERS] has expired.

(On request of Mr. ALEXANDER, and by unanimous consent, Mr. CONYERS was allowed to proceed for 1 additional minute.)

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to my colleague, the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman for yielding, and I thank the gentleman for sponsoring the bill which he and I joined together to introduce and which is designed to save the family farm and to also save the American taxpayer from the enormous burden placed upon the taxpayer by the current farm policy which the bill under consideration tends to continue.

I advise the gentleman, together with all the other Members, that at the conclusion of the debate on titles I will offer the farmers' solution to the farm bill as an amendment in the nature of a substitute and give to the gentleman, together with all other Members, the opportunity to save the family farmer in America.

Mr. CONYERS. Mr. Chairman, I am glad to know that, and I will be there cheering and rooting for you. But does that turn upon a unanimous-consent request?

The CHAIRMAN. The time of the gentleman from Michigan [Mr. CONYERS] has again expired.

(On request of Mr. ALEXANDER, and by unanimous consent, Mr. CONYERS was allowed to proceed for 1 additional minute.)

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield further?

Mr. CONYERS. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, there is a perfecting amendment that will be offered to the amendment in the nature of a substitute which will seek permission from the House to adopt all of the actions heretofore entered into during deliberations by the Committee of the Whole on the State of the Union, so that the only provision that will be under consideration as presented by my amendment in the nature of a substitute will be Provision No. IV-A, which will achieve the goals that the gentleman from Michigan wishes to achieve to save the American farmer.

□ 1710

Mr. CONYERS. I thank the gentleman.

Mr. Chairman, did the chairman, the gentleman from Texas [Mr. DE LA GARZA], wish to respond? I yield to the gentleman.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for yielding.

I just wanted to advise the gentleman that apparently the legislation which the gentleman has cosponsored will increase the cost to the consumers, to the poor in the neighborhoods throughout urban America.

Mr. CONYERS. In other words, we are going to cut the consumer and the inner city——

The CHAIRMAN. The time of the gentleman from Michigan [Mr. CONYERS] has again expired.

(By unanimous consent, Mr. CONYERS was allowed to proceed for 1 additional minute.)

Mr. CONYERS. Mr. Chairman, in other words, the gentleman is telling me that if I support small farmers, the family farmer, through the substitute legislation that has been referred to, that I will then be in some concert to raise the price of food for consumers and people in the inner city.

Let me just say to the gentleman that as I understand it, as the family farmer is being driven off the land, it is the corporate farmer that is taking up huge acreages and they in concert, as corporate farmers are given to do, are going to be in control of the prices, and no matter what we are going to pay through this amendment, we are going to pay more ultimately when farming becomes a corporate enterprise in its totality.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman.

Mr. ALEXANDER. Mr. Chairman, the gentleman is entirely correct. But on the question of increase in consumer prices, under the gentleman's——

The CHAIRMAN. The time of the gentleman from Michigan [Mr. CONYERS] has again expired.

(At the request of Mr. ALEXANDER, and by unanimous consent, Mr. CONYERS was allowed to proceed for 30 additional seconds.)

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman.

Mr. ALEXANDER. Mr. Chairman, the increase in consumer prices projected by my amendment which I will offer, which the gentleman sponsored, will be 1 percent of the Consumer Price Index. That translates into a 2-cent increase in the price of a loaf of bread.

Mr. CONYERS. Mr. Chairman, I thank the gentleman.

AMENDMENT OFFERED BY MR. BADHAM

Mr. BADHAM. Mr. Chairman, I offer an amendment that was printed in the RECORD as of September 24.

The Clerk read as follows:

Amendment offered by Mr. BADHAM: Page 432, strike out line 18 and all that follows thereafter through page 433, line 4, and redesignate the succeeding sections accordingly.

Mr. BADHAM. Mr. Chairman, this amendment which I have offered has been played in the press, to be modest about it. It is an amendment that has had a great deal of smoke put forth around it. This is the so-called egg-breaking amendment. It is not very complicated, but it has been made somewhat complicated.

A constituent of mine woke up some weeks ago one morning and found out by reading the newspaper, without any prior knowledge or information or request to testify, that the company that he started some 5 years ago to produce an egg-separating or egg-breaking machine had been put out of business by a two-line amendment in the agriculture bill that had been marked up, without hearing, without debate, and by a voice vote. He sought properly to get redress for this action, which he considered not too politic or congressional, with the Congress of the United States and for this purpose he called on his Congressman. For that purpose then, being his Congressman, I have learned more about eggs and salmonella and egg-breaking machines and the USDA and the content of eggs, their transport and processing of eggs, than I honestly ever wanted to know; but I do want to take the time of this House to set right the wrong that has been perpetrated on the consumer, on progress, on technology, and the agriculture producers of our great country.

There are at least two or three different kinds of hen eggs. Eggs sold into commerce can only be grade B or better, which means that they must be sanitized. They must be whole. They cannot have any cracks or chips or smells. They cannot have any manure on the outside of them. They are able to be sold into commerce and they are clean and they are fresh.

The problem comes when people in restaurants, people in bakeries who go for higher quality produce merchandise, want to use eggs that are fresh, wholesome and grade B or better in their cooking and in their baked products.

One of the catches in there that enables people to use whole fresh grade B or better eggs is the difficulty and the length of time and the cleanliness involved by breaking eggs by hand in a restaurant or a bakery, both of which are governed or licensed or inspected—not by the USDA, but the Food and Drug Administration for cleanliness and handling.

Just recently, 50 people in the local area got sick from salmonella poisoning, 50 people. They traced it—where, to a restaurant. To a machine? No, to hand-breaking eggs, because the hands of the people breaking the eggs were dirty and it caused disease.

Now comes a man who invents a machine, call it Egg King, Egg Master or whatever. This machine is a centrifuge that operates with perforated cylinders inside and going at 3,400 r/min's, a pretty fast machine, and will break literally scads of eggs per minute. All of a day's production can be broken in about 1 hour and perfectly separated and therefore there is no shell remaining in the egg liquid. The egg liquid is cooked, and I stress that, because it is pasteurized in accordance with the instructions on the machine and the egg material, the egg liquid, is pasteurized. It is removed from the shell and any salmonella that could possibly be present, and these go from refrigerator to separation to liquid within literally seconds. There is no salmonella because it has been pasteurized or cooked or baked, according to the instructions on the machine.

The State of Hawaii tested this machine time after time. They discovered that it was not only good, it saved money and ended up with a cleaner product.

The CHAIRMAN. The time of the gentleman from California [Mr. BADHAM] has expired.

(By unanimous consent, Mr. BADHAM was allowed to proceed for an additional 5 minutes.)

Mr. BADHAM. The State of Hawaii is somewhat at stake at this amendment because it has put its whole department of health on the line in saying that this machine is good.

The Food and Drug Administration, again which I reiterate is the only outfit that licenses, inspects, and regulates the kinds of industries that use the machine: namely, bakeries and restaurants. There are some 700 of these machines in operation throughout the country, some 700 over the past 5 years.

Mr. Chairman, there has never been one complaint or one showing of any salmonella coming up in these, because you just cannot get salmonella poisoning material that is grade B or better, sanitized on the shell, and it has been pasteurized or cooked.

It may come up in the debate, if there is a debate against this very simple bill, to allow progress to go ahead in this country by technology, lowering prices to consumers and lowering prices to restaurants and bakeries for higher quality products. It may come up that the University of Nebraska ran some sort of a test. I talked to the people at the University of Nebraska. The test that they used that might be shown in their letter was done on a grade lower than B that could have dirt on the shell. There is a less polite word for dirt on an egg shell, but that is what we are talking about, dirt on an egg shell lower than grade B. The eggs were not sanitized. It was also done in a manner that the eggs were left standing, and naturally salmonella being an airborne virus, can do it.

It did not say the eggs had to be cooked, so you can get salmonella that way in laboratory testing; however, at the same time that the people at the University of Nebraska were talking to us, the head of the food services at the University of Nebraska called us and said, "Please, don't let them do anything. We use this machine and it is a wonderful labor saving device. Please don't let the science department tell you something that just isn't plain true. We see no salmonella."

□ 1720

The USDA somehow got into this act. In October 1983, the machine was approved by USDA. On March 29, 1984, the approval was rescinded. On March 13, 1985, the machine was again reinstated as approved by USDA. On June 18, 1985, the USDA offered a paper saying they agreed with the so-called Thomas amendment that I am trying to remove.

On September 12, 1985, the Assistant Secretary, Mr. Ray Lett, was met with and he said the Department should withdraw its support of the Thomas amendment. Sometime shortly after that they went back to supporting the amendment. On October 3, 1985, conversations with my office indicated that they were formally withdrawing support of the amendment and were so advising Mr. THOMAS. On the same day, after 6:30 that night, they flipflopped again, according to a Wall Street Journal reporter.

So there is a little something going on here. But ladies and gentlemen, however you vote on my amendment to allow a machine to be used that is used in USDA-licensed egg-breaking plants, that I will get into in a moment, do not think for a moment that the subject is health or salmonella. It just plain is not. This machine, as used in an authorized and regulated-by-USDA establishment, has to use grade B or better, the material has to be pasteurized, no salmonella, no doubt.

The USDA does come up with one argument, because they say that the shell can commingle with the liquid and, therefore, can be subject to salmonella. Again, it cannot if it is pasteurized, and cooking pasteurizes it. But I want my colleagues to know that in the regulations involving USDA-licensed egg-breaking plants, where eggs are broken by human hands, separated, the shells go one way in just about all cases and the liquid goes another way, until they find out, just like you do at home and just like you do at Denny's, you get little pieces of shell in there. The USDA recommends that to remove those segments of shell from an egg-breaking plant licensed by USDA which do not use grade B or better, they use C or lower, which have egg dirt on them, that that liquid, before it is frozen or powdered, if you like frozen or powdered eggs, be run through a separator, a clarifer, or a centrifuge before it goes into the freezer or powder, be purposely run in there to what—to commingle with the egg shell and get them out.

The CHAIRMAN. The time of the gentleman from California [Mr. BADHAM] has again expired.

(On request of Mr. BROWN of California and by unanimous consent, Mr. BADHAM was allowed to proceed for 2 additional minutes.)

Mr. BADHAM. Just a couple more points.

Remember, colleagues, we are not talking about salmonella. We are talking about progress and the restriction of it by somebody who does not want a machine in competition. We are also talking about the bakers of our country, the restaurant people, the hotel people of our country, who want this machine because it allows them to give a better and higher grade product.

So we are talking about an amendment that was slipped into the bill by voice vote, without hearings, and I am asking my colleagues in the name of progress and justice to undo that wrong that was done.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I would be happy to yield to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

Mr. Chairman, I commend the gentleman for bringing this matter up. I recall it being discussed in the committee and being adopted. I raised some questions in the committee at the time as to what the purpose behind this was. I have certain objections to restrictions on technology myself. I believe I was reassured by what I thought was the position of the Department of Agriculture at that time. I did not realize that the matter had gone through several variations, as the gentleman has indicated here.

It seems to me this subject is an idea candidate for further study and hearings by the full committee.

The CHAIRMAN. The time of the gentleman from California [Mr. BADHAM] has again expired.

(By unanimous consent, Mr. BADHAM was allowed to proceed for 4 additional minutes.)

Mr. BROWN of California. Mr. Chairman, will the gentleman yield further?

Mr. BADHAM. I would be happy to continue to yield to the gentlemen from California.

Mr. BROWN of California. I think obviously from what the gentleman has said there are factors behind this that warrant further investigation. There may be a legitimate case for the language, but it has not been demonstrated to me yet and I hope that the House will see the wisdom of the gentleman's amendment and allow the committee to study this further before bringing back a more desirable amendment in the future.

Mr. BADHAM. I thank the gentleman for his contribution. I think the U.S. Department of Agriculture might even have the good sense to want to study this device. They have flipflopped on it so many times, it is about time they decided whether it was good or whether it was bad. I am satisfied to stand by the operation of this machine in any test that anyone can devise, using the method of operation as instructed on each and every machine, which is made of stainless steel and has to be cleaned every 4 hours.

Again, ladies and gentlemen, let me stress that this is not a matter of salmonella. There is not going to be any salmonella in a pasteurized egg. The breadth of this amendment also is such that no matter what USDA says and whatever the proponents of the amendment might have us believe, the amendment prohibits any egg use in a public place, inspected by the USDA, unless the insides of the egg are examined before cooking.

Ladies and gentlemen, there go our hard-boiled eggs, our solt-boiled eggs and our pickled eggs.

Mr. STRANG. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I would be happy to yield to the gentleman from Colorado.

Mr. STRANG. I thank the gentleman for yielding.

Mr. Chairman, does this mean a restaurant would have a problem in serving a hard-boiled egg?

Mr. BADHAM. If they did not want to go afoul of USDA or FDA, absolutely.

Mr. STRANG. I mean under the gentleman's amendment would this create a problem?

Mr. BADHAM. Under my amendment, things would be exactly as they are now in the 37,000 restaurants, I believe, that are using the 700 machines licensed by FDA. They would continue just as they are now, no salmonella, grade B or better eggs.

Mr. STRANG. I am sure the gentleman, like me, has been in restaurants where the only thing one felt safe eating was a hard-boiled egg which one peels himself. Would this affect that?

Mr. BADHAM. Not in any way if my amendment passes.

Mr. THOMAS of Georgia. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California [Mr. BADHAM].

Certainly I admire my colleague for speaking out on behalf of his constituents, but I must oppose my distinguished colleague on this issue because there are several points that I believe the House must consider and then reject this amendment.

Let me say very loud and clear that the technology that we are talking about is a hazard to public health. The U.S. Department of Agriculture said so and the egg producers themselves say so as well. It is a hazard to public health because it is an egg-crushing processor, not an egg-breaking process. Eggs are literally dumped into the machine along with traces of blood, chicken manure, dirt, rot and fragments of paper egg cartons.

The USDA says that there are now safeguards that can prevent that. Let me say that again: Eggs can be dumped into the machine along with traces of blood, chicken manure, dirt, rot and fragments of paper egg cartons. The entire mess has been crushed together and mixed together before the shell fragments are removed. That is what USDA has said and that is why this technology has been banned from egg processing plants since 1970.

If my colleagues have any doubts about USDA's opinion on this issue, then I would simply point out one other fact. The more this process is used, the more eggs will be used and the more money the egg producers will make, but guess what, the egg producers themselves are opposed to this amendment and to the use of this egg-crushing machine. They are opposed because they know that is it just a matter of time until someone gets seriously ill or perhaps dies from salmonella poisoning as a result of the use of this very process.

Let me say that again: The issue here is that it is just a matter of time before someone gets seriously ill or perhaps dies from salmonella poisoning as a result of the use of this process that, follow me closely, was outlawed in 1970.

Let me get something straight here. Hearings were held. They were held in 1970 on this very issue, more than 15 years ago, and that is why, my friends, Congress passed the Egg Producers Inspection Act and that is why this egg-crushing process was outlawed by USDA in egg processing plants.

This type of egg-crushing process was not then used in businesses such as bakeries and restaurants and hotels, and so forth, and so the regulations were not extended into such establishments. Thus, the loophole that allowed this dangerous, old technology—it is not new technology—to be extended into new uses was not banned. Now we must act, in my opinion, to close this loophole.

I respect my distinguished colleague from California, but I must call for the position of USDA itself and the committee to be upheld in order to protect the public health.

Let me conclude my comments with a couple of other remarks. Those standards that were set there some 15 years ago provided first for one thing: that it was in the best interest of the public, for sanitary reasons and health reasons, that in the process of cracking eggs that the shell and the interior of the egg not be mixed and, of course, this is exactly the way the machine works, to crush the entire egg and shell in the process.

□ 1730

It presents a second and very important thing that was set down in those provisions in 1970, and that was after all the steps that could have been taken and had been taken to put a clean egg there before the cracking machine, that there was one last step, and what it was was simply to crack the egg and look at it, to separate the shell and the egg and to visually observe, and from what is called organoleptic inspection of sense, of smell, and sight, to determine at last phase if there were no rot, or bloods, or any other imperfections in the egg, or for that matter, any matter on the outside of the shell of the egg, and to give it that last inspection. Of course, this machine, where plates of eggs are dumped into the machine at the rate of 360 a minute, that is 6 per second, that, therefore, that process is totally precluded.

Now let me tell you, FDA has not rendered any position on this machine as to its being acceptable. USDA has, and I want to read, since my colleague has brought about some question of USDA's position, let me read you USDA's position from their own hand.

The CHAIRMAN. The time of the gentleman from Georgia [Mr. THOMAS] has expired.

(By unanimous consent, Mr. THOMAS of Georgia was allowed to proceed for 5 additional minutes.)

Mr. THOMAS of Georgia.

DEAR CONGRESSMAN THOMAS: This is to reaffirm our support for your amendment to the Egg Products Inspection Act.

Now listen closely:

We want to emphasize that we have never waivered on our support of your amendment as it relates to plants operating under our jurisdiction. There did arise the question as to the propriety of our taking a position on that portion of the amendment under the jurisdiction of FDA. In reviewing our position more closely, we fully support your amendment.

One other letter that I would like to submit from the Department of Agriculture is dated October 4:

This is to clarify the impact your amendment to the Egg Products Inspection Act would have.

I want to read this because my colleague would have you believe that possibly this is the end of ordering a hard-boiled egg or a pickled egg in a restaurant, and of course, this provision as it stands in the committee at this time would have absolutely no effect on that. Cooked eggs are not considered processed eggs and, therefore, are totally out of this provision.

Let me go back and again read this letter:

This is to clarify the impact your amendment to the Egg Products Inspection Act would have on firms that hard-boil, soft-boil, and pickle eggs.

Your amendment would have no impact on the processing and marketing of these eggs. The EPIA specifically regulates the "processing" of liquid, frozen, and dried egg products. "Processing by definition in the EPIA, means "manufacturing egg products, including breaking eggs or filtering, mixing, blending, pasteurizing, stabilizing, cooling, freezing, drying, or packaging egg products." "Processing" does not include "cooking." Therefore, the EPIA is not amenable to the processing of cooked shell eggs.

This concludes my comments. I would ask the Members of this body to consider very carefully those points that I have made, and at this time I would be happy to yield back my remaining time.

Mr. REID. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

(Mr. REID asked and was given permission to revise and extend his remarks.)

Mr. REID. Mr. Chairman, I rise to speak in support of the amendment offered by my colleague from California. We have worked together as members of the Congressional Travel and Tourism Caucus and I appreciate his bringing this amendment to the floor of the House.

I must admit that I am somewhat perplexed as to the intent of the language in the bill. For example, the bill states:

No person shall process for commerce, any eggs for human consumption that (1) does not allow examination of the content of individual eggs being processed.

Does this mean that a customer may not go into a restaurant and order a hard or soft-boiled egg? Certainly the content of such an egg cannot be examined unless the proprietor is to stand and watch each egg as it is cracked by the customer. I can imagine the problems this would create in the case of room service.

Additional language states:

No person shall process for commerce, any eggs for human food in any manner that allows egg content to comingle with the egg shell or shell membrane during the process.

What is the problem? Is it the personnel or the equipment? In either case, I submit it is not a problem for the Federal Government. It is a matter more appropriately handled by the business and the public health services of the local governments who inspect health conditions of commercial establishments, including facilities, equipment, and personnel.

In my home State of Nevada, we have over 20 major hotels currently using automated egg cracking processors. The processors are efficient, time-saving, labor-saving, economical devices. As in any business, the hotel industry is constantly looking for ways to reduce costs and avoid waste. The egg cracking processor can crack up to 900 eggs per minute. The hotel industry is extremely concerned and careful about the health of their customers. Nothing can be more devastating to the food service industry than a case of food poisoning. This equipment is safe and can only become unsafe if it is improperly maintained, which is the case with any equipment. Keeping it clean is the job of management.

In closing, let me say not only is this equipment safe, but I submit that the safety and health of the customer is so critical to the hotel and food industry in my State, that they would not use it if it were not. Further, it is not only safe, economical, labor-saving, but it allows the food service industry to bring to the customer what he or she wants most—a product made with fresh eggs.

I urge the adoption of this amendment.

Mr. THOMAS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. REID. I yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. Mr. Chairman, just for brevity's sake, I think I just finished reading in my remarks there from the EPIA the fact that cooked and processed eggs have absolutely nothing to do with this amendment, and that the committee's position on this would in no way affect cooked or processed eggs.

Mr. REID. I think that is debatable.

Mr. BADHAM. Mr. Chairman, will the gentleman yield?

Mr. REID. I yield to the gentleman from California.

Mr. BADHAM. Mr. Chairman, the author of the amendment in committee, the distinguished gentleman from Georgia [Mr. THOMAS] would have you believe that the law as he proposes it to be really does not mean what the law really says. It means what the Department of Agriculture might say it means in a letter. But they have flip-flopped every few days on this, and the gentleman knows that.

I would like to correct the gentleman and thank him for yielding, that you do not have dirt or blood spots or cracks. A grade B or better egg cannot be sold in commerce unless it is free of all of those things. It cannot be sold into commerce if it does, so there is no salmonella because it is pasteurized.

Mr. REID. Reclaiming my time, I would also state, Mr. Chairman, I think if you read the letters as they were written, they talk about not processing the foods at the retail level, as I am concerned about, in a hotel or restaurant. I think it could be read that it only applies to that in a commercial venture such as processing eggs prior, and that they were meant to cover this in the amendment before the committee.

Mr. THOMAS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. REID. I yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. I simply would like to make this point here that I think we need to review. Certainly there are requirements for certain grades of eggs, and the requirement that they must meet in order to get that grade standard. But you must realize there is absolutely no guarantee that that can be carried out to 100 percent. Everyone works, of course, to the best of their ability to do so, and that is what this machine does, in my opinion. Its great danger is that it precludes what could be the last saving inspection, that organoleptic inspection by eye and sense of smell.

The CHAIRMAN. The time of the gentleman from Nevada [Mr. REID] has expired.

(On request of Mr. THOMAS of Georgia and by unanimous consent, Mr. REID was allowed to proceed for 3 additional minutes.)

Mr. THOMAS of Georgia. If the gentleman will continue to yield, my point is that this is what we must understand. Certainly everyone does everything they can to deliver a clean egg. But the normal sanitization process that is used does not result 100 percent, or even close to it in the destruction of salmonella bacteria that can be embodied deeply in the pores of the egg.

□ 1740

And that can occur even on an egg that appears to be very clean and very sanitary. But when you dump it into that large hopper, the centrifuge-type machine, without having inspected or separated it, then you expose the entire content of those eggs and all the eggs in the hopper to that salmonella bacterium. That is a real and prevalent thing.

Mr. REID. Reclaiming my time, I think the point made by the gentleman from Georgia amplifies the points that have been made in support of this bill. Namely, this is something that should be maintained by local governments, and I would also state that it appears quite clear that the Committee on Agriculture should have hearings on this matter. I do not think it should go forward on the basis it has been presented to this committee.

Mr. Chairman, I yield to the gentleman from California.

Mr. BADHAM. Mr. Chairman, I hope the gentleman from Georgia did not misspeak himself gravely when he said that if you have salmonella bacteria which are airborne, which can come to roost on an eggshell, if the eggshell is left out in the ambient air, as they are at some fast food restaurants for a long time, they cannot burrow into the shell; the fact is, if the liquid is pasteurized, cooked, or baked, no salmonella. The gentleman implied that there would be. I believe he is wrong on that point.

Mr. THOMAS of Georgia. Mr. Chairman, will the gentleman yield on that point?

Mr. REID. I yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. I thank the gentleman for yielding.

Certainly that is the case, but my point is that if the salmonella bacteria is embedded in the porous surface of the egg and the egg is cracked without that final visual inspection, it is then mixed and it is not cooked for some reason, and there are certain recipes that do not require cooking till 140 degrees in a restaurant, then certainly the salmonella bacteria would not be destroyed. That is my very point.

Mr. REID. Mr. Chairman, I yield back the balance of my time.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, you know, a Supreme Court Justice once said that government is to be feared the most when its purposes are benevolent.

This case illustrates that maxim very well.

Pity the lot of the producer of class C eggs in America today; can't sell them commercially, he is relegated to selling them for the purpose of making egg powder.

Now if you are in the restaurant business, you always seek to build a better mousetrap to have people come to your restaurant. That is competition. To the extent that you have fresh eggs in your products to attract customers. If you are seeking to buy class A and class B eggs and crack them one by one, your labor goes out of sight. So what do you do? You get a machine that somebody has invented that permits the machine cracking of the eggs in the shell and utilization of it to give the product that people eat the flavor of fresh eggs as opposed to powdered eggs. If you are in the business of selling powdered eggs, you find that machines are beginning to take your business. You do not like losing your business. So what do you do? You come to this distinguished Member of the House representing his area, and you get an amendment offered, but you need a plausible reason as to why this should fly. So you erect a flag flying under protecting the public health by alleging the name of salmonella. Never mind the fact that the instructions on the machine say that you heat the product after mixing the egg in the shell to 140 degrees for 3½ minutes, which every biologist says kills the salmonella. Nobody is claiming here that anybody has ever consumed or contracted salmonella as a result of eating this food product. This flag of flying under the public health flag sounds pretty good, but it just won't wash. If we want to have progress in our culture, if we want to have our system evolve where somebody can build a better mousetrap to answer the need of a commercial situation, I think we should permit the producer of this machine to stay in business. There is no damage to the public health. Let competition work its way as to whether or not the restaurant owner is going to use a machine with eggs to put into his product or whether he wants to use powdered milk. I do not think we should be attempting to resolve that on the floor of the House.

I yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. I thank the gentleman for yielding.

Certainly we all represent our own interests as best we can; but I do want to point this out, that if it was a matter of selling grade A eggs which are the eggs that the user, the maker of this machine, recommends, the egg producers in this country make more money from the sale of grade A eggs than they do from the sale of grade C eggs. It would be greatly to their advantage. And I must say, the one person who has introduced the economic factor really has been the manufacturer of the machine.

Mr. DANNEMEYER. I withdraw my time and conclude with this point: The producer of the class C eggs is the one that feels the competition from this machine. This machine is being properly utilized, nobody is claiming otherwise that I am aware of. The seller of powdered eggs is feeling the loss of business, the threatened loss of business. Otherwise, we would not be discussing this. I think the seller of the machine ought to have a chance. There is no damage to the public health.

Mr. Chairman, I yield back the balance of my time.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I really did not intend to get into this, but as the author of the original Egg Inspection Act I would like to point out a few things. Right after we passed the Wholesome Meat Act in 1967 we started looking at eggs and poultry.

What we found was not very appetizing. I will not even describe some of the nauseating conditions. They were breaking dirty eggs and cracked eggs into 5-gallon cans, letting them sit around where the temperature was improper. It was just really a bad situation. So we developed an Egg Inspection Act.

Now to start with, one should assume that every egg laid might have salmonella on the shell. You can assume that because it is transferred in the feed. The same thing with beef. It only takes a searing on the outside of a steak to take care of that problem. But if it is mixed into the eggs, it takes 140 to 143 degrees for 3 or 3½ minutes to pasteurize it.

What is involved here in the subject matter before us is not a health problem with salmonella. If they pasteurize the egg, that solved that danger.

When I go to the restaurant, if I buy scrambled eggs, I make them crack 2 grade A eggs and mix them right there. I do not buy scrambled eggs made from liquid eggs. But a lot of restaurants buy liquid eggs. They buy them in a 5-gallon can.

Now these big egg handlers like it the way it is because the whites bring more than the yolks and they sell whites to bakers. When you go to a restaurant, did you ever notice how yellow the scrambled eggs are sometimes? Some liquid eggs they purchase are mostly yolk. That is the reason. Big egg handlers like it this way. They do not like for people to buy whole eggs, run them through this machine, because that reduces the opportunity for handlers to sell liquid eggs that are mostly yolk and they cannot have the opportunity then to sell them all those yolks for the price of class B eggs.

So I think there is a lot to be said here about the amendment to strike the prohibition in the bill. That is why I think the Committee should look into this carefully before acting.

To start with, there is not a salmonella problem. But there is a wholesomeness problem.

The one thing I agree with, with the gentleman from Georgia, is I would like to see each one of them cracked separately so one could see whether or not there is a blood spot in any of the eggs or something like that. I like that idea. That is the reason why we originally proposed the language that is in the act. On the other hand, it is not because it cannot be pasteurized to keep it from having salmonellosis.

So I think that there is more involved here than what you can deal with just by eliminating the right to use this machine. The Committee should look at what the industry is doing now as well as whether or not this machine ought to be used, and people ought to know what the consequences are.

Mr. THOMAS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. Yes, I will yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. I thank the gentleman for yielding.

I do not understand how the gentleman can make the statement that there is no danger from Salmonella poisoning in view of some of the recent real instances which have just occurred. One that the proponent of this amendment pointed out where 50 people became ill from salmonellosis from eating cooked eggs in a restaurant.

□ 1750

The incident of the processed cheese out in California was a tragic event of Salmonella poisoning.

Mr. SMITH of Iowa. Here is one way that can happen: The egg, if it were cooked, the Salmonella was destroyed. But if they had a plate there that had Salmonella on it or the cook had Salmonella on his or her hand and put the egg on the plate, then you can get salmonellosis from it.

Mr. THOMAS of Georgia. If the gentleman will yield again, would not the gentleman agree that when you go through a process where you mix the eggshell, which is a prime carrier of Salmonella bacteria, when you intentionally throw egg and all together in the same vat and crush it, you are certainly extending the chance.

Mr. SMITH of Iowa. If it was washed and sterilized, as it is supposed to be, the answer is "No."

Mr. THOMAS of Georgia. Well, the gentleman disagrees with the USDA and the FDA.

Mr. SMITH of Iowa. No, I do not disagree with them. I do not think they disagree with that.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from California.

Mr. BROWN of California. I appreciate the fact that he has had the experience that he has on this subject and makes the statement, which I think is quite correct, that there is no possibility of salmonella here. The statement just made by the gentleman from Georgia about salmonella in cheese in California happens to be true but it is utterly irrelevant. What happened in that particular plant was, they did not pasteurize.

Mr. SMITH of Iowa. They did not pasteurize it.

Mr. BROWN of California. And that, therefore, allowed salmonella to enter. That was milk, not eggs, anyway; so it is hardly relevant to this debate.

Mr. SMITH of Iowa. There is a difference between saying it is a health problem and talking of wholesomeness. We called the Meat Act passed in 1967 the Wholesome Meat Act because it involved wholesomeness. One can take meat out of a dead animal and cook it long enough and it will not hurt one to eat it, but I do not want to eat it. It's not a matter of just health, but also wholesomeness.

I really urge the Committee to look at the whole subject matter, look at what the egg processors and handlers are doing at the present time, in addition to what should be done about this machine.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. SMITH] has expired.

(On request of Mr. BADHAM and by unanimous consent, Mr. SMITH of Iowa was allowed to proceed for 1 additional minute.)

Mr. BADHAM. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from California.

Mr. BADHAM. I thank the gentleman for yielding.

Mr. Chairman, I really do not want to see the gentleman from Georiga end up with egg on his face on this. The problem in the recent thing where 50 people were made sick, I stress, was not from the eggs, not from the liquid; it was from the hands of the workers.

Mr. THOMAS of Georgia. If the gentleman will yield, has that been documented?

Mr. BADHAM. If the gentleman will yield, that is the way it is, that the people were infected by the workers' hands, not by the eggs.

Mr. SMITH of Iowa. In virtually all kitchens there is salmonella. It can come from the meat, it can come from polutry or eggs, but if they do not keep their hands clean, if they do not wash the block or table off that they are using, if they do not wash and sterilize everything, the customer can get salmonellosis. But this is not a health problem here. There are a lot of other things involved. For that reason I really urge the Committee to go back, take a look at what the egg handlers are doing at the present time, in addition to any problems with this machine, and determine what really needs to be done in the way of an amendment to this Egg Inspection Act.

Mr. BEDELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I agree we want to get to a vote. But as a Member of the Committee on Agriculture who has tried to support the committee all the way through, I think we should understand that this was something that was added to the bill where at least some of us were not real knowledgeable about the full consequences. At least this gentleman did not know we would put a small businessman out of business if we passed this particular amendment.

It is my understanding, also, that you are required under this machine to use grade A or B eggs which have to, first of all, be pasteurized; is that correct?

Mr. THOMAS of Georgia. It is recommended that you use these, but you must remember that these requirements on the machine in a restaurant are not laws, they are not statutes, they are merely suggestions by the manufacturer.

Mr. BEDELL. Is there any reason in the world that the FDA could not, if they saw that there was any danger, require, if they were to use this for purposes other than cooking, that they had to use grade A or B eggs in this machine?

Mr. THOMAS of Georgia. It is my understanding that the FDA does not set the regulations. They are without regulations at this time. This is precisely my point, that we have allowed something to come up that has circumvented the very findings of the hearings held in 1970 to discuss every issue we have discussed right here, and we have allowed a machine now to come up through a loophole.

Mr. BEDELL. If I might say so, many of us are not real privy to what may have happened in hearings in 1970. This is 1985. That is 15 years ago.

The gentleman wants to do whatever is correct here, but I do think that before we go ahead and say we are going to legislate this small businessman out of business, that maybe we ought to be darn sure of what we are doing. I was not darn sure that that was going to be the effect of an amendment that was passed by a voice vote in our committee.

It would seem to me that if there is a problem that the FDA should be in a position to answer that problem without putting this guy out of business, that they ought to be able to say that if you are going to use the processed product of this machine that you have to then pasteurize it if you are not going to cook it in an area that would kill salmonella.

Mr. THOMAS of Georgia. Will my good friend yield?

Mr. BEDELL. I yield to the gentleman from Georgia.

Mr. THOMAS of Georgia. I would simply say—and this is why I have been as serious and ardent in my endeavor to understand this issue as I have been—I have known full well the implications on this businessman, but I also know the dangers. And I must say that it should have been the responsibility of the manufacturer of this machine to look very closely and carefully at the regulations before the machine was perfected. Certainly I would not have perfected a machine that did something in a maner that went totally against regulations and laws tha were in place. We are setting a double standard. We are requiring the USDA grading plants to go by one standard and allowing those standards to be totally circumvented through the use of this machine in another area.

Mr. BEDELL. I want to understand, what is it of the machine that is violating the law now? If it was violating the law now, you would not be able to sell it and there would not be that problem.

Mr. THOMAS of Georgia. No, you are wrong. This machine has been perfected and put on the market since this law was written in 1970. At that time the machine was not being sold in bakeries and hospitals and restaurants, and so there was no provision in there to provide for this. This is a matter of a simple loophole we are talking about. I really appreciate the indulgence of my friend, but let me make one last comment, and then I am going to sit down on this. When we come up here and we have one day what can be a very real tragedy as a result of this, the Members here, rather than talking about a businessman who has obviously sustained some lumps, are going to be talking about a loss of human life, and that is what this body better weigh very carefully.

Mr. BEDELL. I know we are taking too much time, but certainly this gentleman does not want to endanger human life. On the other hand, I believe we do need to know what we are doing when we move forward.

Mr. BROWN of California. If the gentleman will yield briefly, I wanted to speak to that point about the danger to human life.

This machine has been in use for roughly 5 years. There is about 1 million eggs a day being cracked with this machine. By an stretch of ordinary arithmetic, I calculate there are several billions of eggs that have been processed through this machine. There is

not yet one substantiated case of danger to human health, not one case of salmonella, not one problem, and yet the whole basis of the argument of the gentleman seems to have been that this is a threat to public health. If he has evidence that it is a threat to public health, that should be brought before the Committee and we can act accordingly.

Mr. BEREUTER. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California.

I oppose the amendment because it appears to make a mockery of the Egg Products Products Inspection Act. In my district an egg producer called to inform me that even if they wanted to use a machine such as the EggKing, or the Egg Master centifuge separater, they are precluded from using one even though they have four USDA inspectors on duty, full-time inspecting the eggs that are cracked and processed at the plant.

This amendment if adopted would continue to prohibit the use of centrifuge separators in egg processing plants, but permit their continued use in such places as hotels, restaurants, and other food processing industries where hundreds, if not thousands of eggs are used each day with no Government inspection whatsoever.

In other words, if we adopt this amendment, we would continue to penalize those egg processors who have inspectors, and yet do nothing to ensure sanitary or safety standards in those businesses or industries that currently use these machines, but who are not subject to USDA egg inspections.

Mr. Chairman, I would suggest to this body that what is sauce for the goose, is sauce for the gander. If we are going to prohibit the use of these machines by egg processors, then we should not circumvent the Egg Products Inspection Act law by permitting their use by food processors or if the sanitary and safety record of the centrifuge egg separator is as good as the gentleman from California has stated today, then its use should be made available for egg processors as well as food processors and others who use large numbers of eggs.

I urge the defeat of this amendment and I yield back the balance of my time.

Mr. RINALDO. Mr. Chairman, I rise in opposition to the Badham amendment which would strike section 1801 amending the Egg Products Inspection Act. this is a major provision of the Farm bill, and it is extremely important that we followup on the work of our colleagues who passed the Egg Products Inspection Act in 1970. We are being asked to close a loophole in that act which has arisen as a result of a technology which has been adapted for use in an unanticipated way.

It is clear that eggs should not be broken by a centrifuge machine. The practice is unequivocably unsafe even under the best of circumstances.

In actual use, the centrifuge egg breaker permits you to dump the whole egg, shall and all, into a drum to be crushed and then separated. Mixing the shell with the egg liquid is a disaster waiting to happen. As Congressman THOMAS pointed out in his recent "Dear Colleague," USDA and FDA have documented cases of centrifuge users dumping broken, leaking, low grade, and otherwise inedible eggs into the centrifuge for processing. In fact, one internal USDA document quotes one bakery manager as saying he knew of instances where he had dumped rodent droppings, rotten eggs, and miscellaneous filth into the machine by following instructions from the manufacturer to invert the trays of eggs intact.

In voting to prohibit the use of these unsafe practices we are not requiring additional regulatory resources from USDA, FDA or any other State or local agency. This provision is budget neutral. Restaurants and bakeries, etc. are currently routinely inspected by USDA, FDA, and State and local health departments. Should the provision prohibiting these egg breaking practices be enacted, violations would be detected easily and dealt with in the course of routine inspections. Food manufacturing establishments would simply be put on notice—use of the centrifuge for egg breaking is prohibited. There would be no need for additional manpower or money.

Finally, USDA is joined by the egg industry in opposition to this amendment. The egg industry spends approximately $5 million per year to promote a wholesome image of their product. Egg producers have worked diligently to earn and preserve consumer confidence in their product. Egg producers oppose the use of centrifuges for egg breaking because producers are well aware of the health hazards associated with their use and feel that the continued use of these practices and the potential consequences constitute a threat to the wholesome image of the egg. This is a legitimate concern.

I urge you to consider USDA's position and the egg industry's concerns and vote to defeat Mr. BADHAM'S amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. BADHAM].

The question was taken; and the chairman being in doubt, the committee divided, and there were—ayes 29, noes 20.

Mr. THOMAS of Georgia. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. FRANK

Mr. FRANK. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Has the amendment been printed in the CONGRESSIONAL RECORD?

Mr. FRANK. It was, Mr. Chairman, on September 24.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. FRANK: Page 509, after line 13, insert the following:

HONEY LOAN MAXIMUM

SEC. 1896. Notwithstanding any other provision of law, the Secretary of Agriculture may declare that, with respect to nonrecourse loans a person may receive for honey under a program under the Agricultural Act of 1949 for a crop year, the outstanding principal balance of such loan shall not exceed $250,000, and that any outstanding balance exceeding that amount shall be a recourse loan in nature. The Secretary shall make rules to carry out this section and such rules shall conform as nearly as practicable to the rules made to carry out section 405(b) of the Agricultural Act of 1949. The Secretary shall not make a declaration under this first sentence of this section if the Secretary determines that the application of this section upon such declaration would have an undue ill effect on the structure of the honey industry or on agricultural interests that depend on commercial bee colonies for pollination.

Mr. FRANK (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. FRANK. Mr. Chairman, this is an amendment that was originally filed in the CONGRESSIONAL RECORD by the gentleman from North Dakota. He has decided not to offer it, but I decided to offer it, which is permitted under the rule.

I think the honey subsidy is one of the least useful expenditures of Federal funds. At a time when we are talking about far-reaching changes in the entire structure of our Government affecting the distribution of power between the President and Congress, to continue to spend money on the honey subsidy does not seem to me to be a very good idea.

□ 1800

I believe this amendment would be better than the present situation, but I am informed that my good friend, the gentleman from Massachusetts, the senior member on the Republican side of the Appropriations Committee, has an even better way to deal with this. At this point, I am going to yield back the balance of my time, because it is my understanding that the gentleman from Massachusetts has an amendment to the amendment.

AMENDMENT OFFERED BY MR. CONTE TO THE AMENDMENT OFFERED BY MR. FRANK

Mr. CONTE. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE to the amendment offered by Mr. FRANK: At the end of the amendment offered by Mr. Frank, strike the "." and insert the following in lieu thereof: ": *Provided*, That (1) Section 201 of the Agriculture Act of 1949, 7 U.S.C. 1446, is amended by striking in the first sentence the word "honey." and (2) Subsection (b) of such section is hereby repealed.".

Mr. DE LA GARZA. Mr. Chairman, I reserve a point of order on the amendment.

I yield to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. I would say to the gentleman, in order to save time, can the gentleman make his point of order? I have another amendment in case the point of order is sustained.

Mr. DE LA GARZA. I wanted to allow the gentleman to offer it.

Mr. CONTE. That is all right. I have another amendment.

Mr. DE LA GARZA. Mr. Chairman, under the situation, I would not want to preclude the gentleman from offering his amendment.

Mr. Chairman, I withdraw my reservation; I will not make a point of order.

The CHAIRMAN. The gentleman from Massachusetts [Mr. CONTE] is recognized for 5 minutes.

Mr. CONTE. Mr. Chairman, is the gentleman reserving his point of order?

Mr. DE LA GARZA. No; I am not making a point of order on the gentleman's amendment.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Massachusetts.

Mr. FRANK. I believe the time for a point of order has now passed, the gentleman having withdrawn his reservation. So no point of order will lie.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. DE LA GARZA. I hope I do not make the gentleman nervous. No, I did not object to the gentleman proposing his amendment. I think it is a bad amendment, and I will argue in due time. I was just here stretching because I was tired of sitting.

Mr. CONTE. I will get you a Coca-Cola box next time. I thought you were sitting.

Mr. Chairman, a tiny, little bee lit on my shoulder on my way back from the floor last week when my amendment to strike the honey program went down on a point of order. This little bee buzzed in my ear and said "Don't give up SILVO—you stick right in there because the good name of bees is being besmirched all over this great country—especially in North Dakota where one honey producer got $1 million in support payments. The little bee told me that Congressman FRANK would try to stop this supersweet deal by placing a limit of $250,000 on the amount of payments to the big bees in the honeycomb business. There is no limit today. My amendment goes Mr. FRANK one better and does away with the entire program. This little bee had all the facts. He told me that the nonrecourse loan rate for honey is at over 60 cents while the price we pay for imported honey is at 40 cents, so we are importing more and more honey.

The GAO has looked at this program and they say we are getting stung. We are spending nearly $100 million to store 100 million pounds of honey each year in order to benefit only 2,500 commercial producers. At the same time we are importing 100 million pounds put on grocery shelves. You'd have to have bees in your bonnet not to see how far out of line this situation is.

I think everyone gets stung once or twice in their life, but this country is getting stung over and over again. Now the bees are getting in the act. Why just last week in Hollywood, FL, when the bees found out about how the Americans are being robbed by this program they got out of their keeper's truck and refused to pay the toll on the Florida turnpike. I tell you these little fellers are in revolt over the way we raise the price on their diligently created product. Help me restore some dignity to the little bee and let's swat this program once and for all.

Since 1980 our imports have grown from 50 million pounds to 130 million pounds—that's a 250-percent increase. In that same time the CCC acquisition costs have risen from $9 million a year to over $90 million—that is a 1,000-percent increase.

You would think that the Commodity Credit Corporation was being run by a family of black bears based on the millions of pounds it is buying from our U.S. honey producers.

Keeping this program flies in the face of logic. We will have spent over $250 million in the last 4 years in Government payments while putting more and more imported honey on the shelves of our grocery stores. You can hardly find any domestic honey for personal consumption. Encouraged by the stinging facts from my little bee friend, I decided to come right back over here to fight this battle again. Just as the Africanized bee is swarming its way up into our country so is the honey oozing up from our Southern neighbors. Mr. Chairman: That poor little bee could not come back over here with me today because he knew he would be in mortal danger in the company of the honey-snatchers in this body who support this program.

But as he flew away, he once again entreated me to save his little pollen-covered pride by allowing the honey that he and his fellow bees produce in good old American hives to once again find its way to our grocery stores. With all that is riding on the flight of this little bee, the least we can do is support my amendment and put an end to this blot on the dignity of U.S. bees.

Mr. FRANK. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, there are some elements of levity that crept into my colleague's performance, and I often feel when I have helped my colleague from Massachusetts get the floor that I should be entitled to an agent's fee.

There is a very serious core here. We are talking about a proliferation of subsidies that get bigger and the inconsistency at some point has to be clear to people to increase the amount we spend subsidizing bees. Now, I know I have been told by several of my colleagues that there is a national security aspect to agriculture. We were told that the Downey-Gradison amendment undermined national security, presumably because we would not have enough sugar to put in the Russians' gas tanks when they came over here.

I was told by my friend from Oklahoma that we would be endangering national security by reducing target prices. Maybe there is somewhere a division of killer bees that is being trained to do counterinsurgency work for us. I can tell you that is the only plausible rationale I would accept for this program, and I do not think it is empirically validated in this case.

We cannot continue to have Members vie with each other to declaim how much we have got to reduce the budget deficit and change Government structure to do that, and continue to proliferate this kind of program. We have been asked, the gentleman from Massachusetts and I, why we get involved in these issues. First, we both have agricultural areas in our parts of Massachusetts. We thought actually that we were more involved in the last one, because we misunderstood. Some of us thought the egg-breaker ban was an attempt to ban leg breakers, which would have had more of an employment impact in some parts of our district.

But in this particular case, we are talking about a proliferation of Federal subsidies for issue after issue in the agricultural area, and this is how you get budget deficits. Budget deficits do not exist in general; they exist in particular. The gentleman from Massachusetts has offered a very sensible way to begin to reduce by saving money in an area of unnecessary subsidy. I hope his amendment to my amendment is adopted.

□ 1810

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this is a very serious matter. We have an industry in the United States that we call the bee industry or the honey industry. Like many other areas of agriculture, it had a support program to assist it as a sort of a safety net, but in about 1980, the roof fell in and imports started coming in from many other countries in the world at a lower price, and as well-in-

tentioned as this program was to offer a safety net, this lower priced honey then undermines the price at which we had stabilized or supported the honey production.

It has been mentioned, and I would attest to the fact, that the bee is a very important factor in the pollination process. It provides 18 billion, 19 billion, or 20 billion dollars' worth of effort in the pollination in that it enhances fruit and vegetable production and in fact reduces the cost. But we have now from the People's Republic of China—Communist China—from Argentina, from Canada, and from many other areas of the world honey coming in at lower prices. But yet it has not affected the price to the consumer except when you just buy the honey. We have already heard how much honey is used in confectionery or in baked goods or in candy, and it has not lowered the price that the consumer pays for the items that have the honey. But yet they are buying it from other countries at a much lower price.

It all comes down to this, my colleagues: American jobs. Without a honey industry, the jobs that are lost, that are transferred to another country, that is what it is going to be. That is the name of the game, jobs, jobs, jobs. Do we want them here with some involvement of Government? I think it is legitimate. Maybe we need to restructure. Maybe we need to lower. Maybe we need to wait for a better day. But to strike out entirely, we are transferring jobs out of this country.

Yes, there is a national security interest and yes, there is a need to protect the taxpayer, because one without a job, everyone knows the unemployment, the food stamps, the aid to dependent children, we are just adding to it.

So this amendment to the amendment, and I say this respectfully, is shortsighted. It may have some degree of emotion.

Yes, I have read the GAO report. It is not as factual as it could be. It deals in a vacuum. I found arguments that I could challenge in some areas of the GAO report.

But the basic fact again is, do you want the honey produced in this country at a Government-subsidized level, or do you want to knock it out and bring it all from abroad? That is the bottom line. That is the bottom line—jobs in another country, items coming in or out of business. That is the bottom line.

I attest to you that all other arguments really would not address the issue. Yes, I will cede to the issue of cost to the Government. I do not challenge that. The figures are there and no one can deny that. But why we got there, why was the intent of the program thwarted? Because of the imports coming in.

I would hope that every time someone offers an amendment, every time someone offers an amendment that attempts to erase an industry or a segment of an industry, we should provide that that amendment also incorporates how we protect ourselves from what is going to come from the outside. It should be a two-tiered amendment: What is the protection we are going to afford to the few survivors?

Mr. MORRISON of Washington. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I want to stand in support of the chairman of our Agriculture Committee on behalf of the honey program.

Admittedly this program is in a state of transition. While I could support the Frank amendment as before us which basically provides a cap on the payments to any individual honey producer, I cannot support the amendment to strike entirely this honey program at this time.

The Chairman I think has spoken eloquently of the importance of pollinization with a total of $19 billion in crop value. I would just say at this difficult time for agriculture all across the country let us not pull this necessary support mechanism out for the fruit, nut, vegetable, forage, and oil seed crop industries.

I would remind this House that last year the Congress addressed the honey problem, and I believe we have to give that proper time to work. We passed the Honey Research Promotion and Consumer Information Act of 1984. This promises to lead to improved marketing and the effort by the industry in an industry-support program of promotion to expand U.S. per capita consumption.

We find this is a market that has been neglected through the years, and the beekeepers of America want to contribute to a fund. We are just beginning to see this get organized. I think we should allow it to work.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington, I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I just ask is my friend, the gentleman from Washington, a supporter of the deficit reduction, the balance the budget procedure that is being discussed in the other body right now?

Mr. MORRISON of Washington. Mr. Chairman, yes, I certainly am. But let us not take on this particular industry and undercut them at this time in this particular effort.

So let us give this program that we passed, and I am sure that the gentleman from Massachusetts voted for it last year, let us not undercut that at this particular point.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. MORRISON of Washington. I yield to my Chairman, the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for yielding.

I again repeat that our legislation meets the budget requirements. We have met what has been imposed by the budget. In what we submitted to the budget we did a balancing act. So this legislation is incorporated into what we recommended to the Budget Committee. It is not an add-on and we have been responsible and we have made our cuts.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, the chairman of the Agriculture Committee is correct. He is responsible. He is responsible with his colleagues for a great big part of the deficit. This is the problem I have when I ask the gentleman from Washington if the gentleman supported this budget reduction.

The gentleman from Texas says, "See, this is within the budget." But during 1-minutes today, all my friends on the Republican side were saying that budget is no good and we have to have drastic reductions down from it and, not only that, we have to have the new provision with impoundments and sequestrations, et cetera. We cannot have it both ways. We cannot reduce the budget deficit without voting against the program.

Mr. MORRISON of Washington. Mr. Chairman, if I may reclaim my time, I would say to the gentleman that if all agencies involved in this Government had been as responsible as the approach taken by the Agriculture Committee, we would not have the problems that we have to address in the deficit reduction program.

Mr. DORGAN of North Dakota. Mr. Chairman, will the gentleman yield to me?

Mr. MORRISON of Washington. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. Mr. Chairman, let me just briefly say it is a pleasure once again to see the gentleman from Massachusetts back down providing leadership on agricultural issues, this time with a friend.

Mr. FRANK. Mr. Chairman, if the gentleman will yield, somebody has to.

Mr. DORGAN of North Dakota. Mr. Chairman, let me just say that the amendment that is being offered, the base amendment was noticed in the RECORD by myself, and under this rule it can be offered by another Member and then amended which is the process we are in today.

I noticed the amendment because I would like to see a change in the Honey Support Program. I do not support, however, the amendment to the amendment that I put in the RECORD. I do not think that with the little thought that has been given here that we ought to abolish that program.

The reason I did not offer it, incidentally, after I noticed it in the RECORD is that I decided that probably a better approach to limiting the loans, which I intended to do in the amendment, to $250,000 was probably to evaluate the structure of the Honey Program in the Agriculture Committee rather than have the Agriculture Secretary down at USDA do that. So I decided not to offer the amendment to this section hoping and expecting that the Agriculture Committee will do that in the coming couple of years.

But I want to make it clear that I do not support this amendment that has been offered today. I also want to be clear that I do not think the kind of loans that are going out at the levels they are going out ought to continue either. I would like to see something done about that.

Mr. COELHO. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington. I thank the gentleman from North Dakota for his comments, and I will yield to the gentleman from California.

□ 1820

Mr. COELHO. Mr. Chairman, I appreciate the gentleman yielding.

I just wanted to comment on the statement of the gentleman from North Dakota, that as chairman of the subcommittee that has jurisdiction on this, what we have noticed is that over the last 3 years the tremendous number of imports that have come in, at the same time that the imports have increased dramatically, and let me give some figures here.

The CHAIRMAN pro tempore (Mr. COLEMAN of Texas). The time of the gentleman from Washington [Mr. MORRISON] has expired.

(At the request of Mr. COELHO, and by unanimous consent, Mr. MORRISON of Washington was allowed to proceed for 3 additional minutes.)

Mr. MORRISON of Washington. Mr. Chairman, I yield to the gentleman from California.

Mr. COELHO. Mr. Chairman, I appreciate the gentleman yielding.

In 1980, we were importing in 49 million pounds of honey. Today we are importing in 109 million pounds of honey and it has caused the increase in the cost of the program.

We talk about exporting jobs and we talk about trade being a major issue. This is a program where you can point right to it and say that trade is killing us on this one.

I think what we need to do, we need to look at the program and I am committed to the gentleman from North Dakota that we will get into the Honey Program. We will hold some hearings. We will get in and find out what is actually going on. We will make the necessary modifications that need to be made; but let us not punish the people here in the United States for what the people in other nations are doing to this program.

Second, let us also be understanding of the fact that—I know the gentleman from Massachusetts knows about the birds and the bees, and if the gentleman really understands the process of the birds and the bees, we do not really want to eliminate the bees in this country from doing the job that they need to do to keep our industries alive that are dependent upon bees. I know the gentleman from Massachusetts would not support eliminating all the bees in this country.

Mr. Chairman, I appreciate very much the gentleman yielding.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington. I yield to my chairman.

Mr. DE LA GARZA. Mr. Chairman, I just appreciate the gentleman yielding.

I am standing here, and I must say that I do not know that we can grasp what this amendment can do to the fruit and vegetable industry throughout the United States. It is not only the honey producers, but the fruit and vegetable industry.

There is timber, as my colleague behind me, the gentleman from Michigan, says.

It is something very serious. It is not anything that we should pass lightly. We are dealing with jobs, American jobs, with the fruit and vegetable industry, with the timber industry, with an industry that has a stake itself in this up until a few years ago and I think that in the national interest we owe it to ourselves to turn this amendment down.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I thank the gentleman.

The gentleman from North Dakota is a little unhappy that people not in agricultural districts primarily get involved in these programs. One of the reasons we do is this. This is what the gentleman gives us. My friend, the gentleman from Texas, is now describing a program that is of relatively recent duration as the only thing standing between us and a renewal of the Great Depression. We start off subsidizing bees and what do we get into but fruits, vegetables, and timber.

I am grateful that national security was not invoked, but everything else has been.

My other friend, the gentleman from California, wanted to talk about the birds and the bees and, of course, last week we had the gentleman from California over here giving us very graphic descriptions about AIDS. What it is that is motivating our California comrades to get on this sex kick, I am not sure, but it does not have a great deal to do with the program before us.

The CHAIRMAN. The time of the gentleman from Washington [Mr. MORRISON] has again expired.

(At the request of Mr. DORGAN of North Dakota, and by unanimous consent, Mr. MORRISON of Washington was allowed to proceed for 1 additional minute.)

Mr. DORGAN of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Washington. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. Mr. Chairman, I thank the gentleman.

I just want to point out that the gentleman does a service by coming to the floor to discuss agriculture. I did not mean to suggest the gentleman should not be here. It is the gentleman's extensive background in agriculture that I was commenting on.

I think that we need to discuss where we go with this honey program. For example, we have a $1 million loan payment in my State. That should not happen; but that ought not to be an excuse for us to say today, this minute, let us dump the whole program. I do not think that is making public policy the right way and that is the only thing I was trying to say.

Mr. MORRISON of Washington. Mr. Chairman, I will reclaim my time only to say that we have in action taken last year helped direct this industry to move I think as this Congress would ask, to be self-supporting, promote increased per capita consumption of your products, and if not, obviously we will make decisions in the future to modify this program.

Mr. DASCHLE. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I am only going to take a couple moments to say once again, to reiterate the fact that the problem that we have in honey today is not the program itself, but the very trouble that we have not only with honey, but with so many other subsidized agricultural products. There is a flood of imported products coming into the United States that alone is displacing what otherwise would clearly be a sufficient supply necessary to meet the needs of our domestic economy; so I think that is really the issue.

How do we deal with this flood of subsidized imports? How do we deal effectively with coming about with a program that will insure fair competition among honey producers? That is why I think once we deal with that issue, we can deal more effectively with the honey program and why this amendment would be premature at this time.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Massachusetts [Mr. CONTE] is recognized for 5 minutes.

There was no objection.

Mr. CONTE. Mr. Chairman, I hear from the gentleman and I hear from my good friend, the gentleman from Texas, and all the others and my good friend, the gentleman from California, that imports are devastating the honey producers, here in the United States.

Now there is a trade bill coming out of the Ways and Means Committee, is that not the place to handle the import problem, or do we go off and pay a guy up in North Dakota $1 million for support prices for honey? Is that conscionable, I ask you, is $257 million for support prices for honey in 4 years conscionable?

As my good friend, the gentleman from Massachusetts knows, we are having trouble with the imports of shoes. Why do we not amend this bill and set up some warehouses and store billions and billions of pairs of shoes? What does the gentleman think about that? Will the gentleman join me in that?

Mr. FRANK. Mr. Chairman, will the gentleman yield to me?

Mr. CONTE. Yes; I yield.

Mr. FRANK. Well, Mr. Chairman, it would have a certain advantage over some of these other commodities in that the spoilage rate would presumably be less and I think it would have certain advantage.

I appreciate the gentleman's argument, because there is no equivalence here. We do not for other commodities do this.

I do have to comment to my friend, the gentleman from North Dakota. He said that he agrees this program has worked and we ought to deal with it, but not when the House is voting on it and probably not what the committee did. The gentleman is all in favor of contemplating it, we ought to say, but he is not in favor of taking any action with regard to it, because he apparently finds the floor of the House or the committee inappropriate.

The gentleman from South Dakota says, "Yes, we have to work on this when you have reported out the bill." We are now on the floor of the House and we are going to get a lot of conversation and a lot more hundreds of millions of dollars.

I thank the gentleman from Massachusetts.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. CONTE. Yes; I am glad to yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, we are getting into a very sticky situation here.

Mr. CONTE. We sure are.

Mr. DASCHLE. There just is not a relationship between shoes and honey and I think the gentleman has to make sure that the House understands the difference.

Mr. CONTE. I am quite sure they do, because before this program they had another bee program, which I finally killed. It took me about 10 years to kill it. That program was paying beekeepers for dead bees. They never had one autopsy on any of those bees to see whether they died of a heart attack or arthritis.

Everybody knew that they were paying these same beekeepers millions of dollars because of dead bees. I finally killed the program and now we have this program to contend with, which is worse than the other program, because now they pay them for live bees.

This is ridiculous. Let us bring a little sanity into the honey industry.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. CONTE. Yes; I yield to my friend, the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I thank the gentleman for yielding.

I think we ought to get a vote on this so Members can vote to continue to subsidize beekeepers and then show us how much they are for a balanced budget.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. CONTE] to the amendment offered by the gentleman from Massachusetts [Mr. FRANK].

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. FRANK].

The question was taken; and on a division (demanded by Mr. CONTE) there were—ayes 20; noes 21.

RECORDED VOTE

Mr. CONTE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 340, noes 65, not voting 29, as follows:

[Roll No. 340]

□ 1840

Mr. LELAND and Mr. CRAIG changed their votes from "aye" to "no."

Messrs. NICHOLS, JONES of Oklahoma, HEFNER, CRAIG, STRANG, SABO, BUSTAMANTE, ORTIZ, RICHARDSON, HERTEL of Michigan, BREAUX, TRAXLER, and SCHEUER changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. TRAXLER. Mr. Chairman, on October 3, the House voted in an amendment to H.R. 2100, the Food Security Act, offered by Mr. GLICKMAN and Mr. WOLPE. The amendment (rollcall No. 337), struck the exemption to the "sodbuster" provisions, and requires farmers who plowed highly erodible land between 1981 and 1985 to have until 1995 to apply conservation plans to continue to be eligible for farm programs. I voted against this amendment in error, and I would like the RECORD to reflect that I had intended to support this amendment.

Mr. FAUNTROY. Mr. Chairman, I rise in support of title XV of the Food Security Act of 1985, which would amend both the Food Stamp Act of 1977 and the provisions of the Agriculture and Consumer Protection Act of 1973 relating to the Commodity Supplemental Food Program. These amendments are deserving of our support. Title XV reauthorizes a very important program, one that touches on our responsibility to see that all Amercians have access to a well-balanced diet. The Food Stamp Program is vital in that it ensures that the entire Nation has access to food security.

Moreover, I am particularly pleased that under title XV of this act provisions would be made for those individuals in our society who are homeless to have access to the benefits of this program.

More specifically, my support comes from the benefits that the residents of the District of Columbia have received from this program. As of February of this year, 73,561 persons have benefitted from the Food Stamp Program in Washington, DC. This figure represents 29,773 families. Of these persons, 36,976 were children. These figures represent 12,888 families that have other forms of public assistance aid, and 16,885 families who receive no other form of public assistance. The average benefit per person per month in the District is $105.62. This assistance brings the incomes of thousands of individuals to the poverty level.

Mr. Chairman, I would urge my colleagues to support title XV and refrain from any amendments that would reduce this vital program.

Mr. DE LA GARZA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker, having resumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 2100), to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, had come to no resolution thereon.

□ 1850

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on today's consideration of H.R. 2100.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Reserving the right to object, I do so in order to ask the chairman of the committee whether or not, since we are rising this evening, whether or not it is the plan to go late enough to finish this bill tomorrow. I know a number of Members who come from agricultural areas who think it is time to get this bill done.

My question to the chairman is whether or not we are planning to go until we finish this bill tomorrow evening.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman.

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Speaker, I would hope so, but as the gentleman knows, I do not have control of the time as such. But I would expect that we could finish tomorrow.

Mr. WALKER. And it would be the gentleman's hope we could go as late as it takes tomorrow evening to finish the bill?

The SPEAKER. The Chair will state that with the agreement of some of the Republican Members and some Democratic Members the Chair expects the Committee to rise by 6 o'clock tomorrow night if they have not completed their bill.

Mr. WALKER. So the potential is that we would not finish the farm bill tomorrow, too; is that correct?

The SPEAKER. I could not answer that.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MADIGAN. Reserving the right to object, Mr. Speaker, I do so only for the purpose of asking the gentleman from Texas if it is his understanding that we still have the suspension to vote on tonight.

Mr. DE LA GARZA. If the gentleman would yield, the gentleman is correct.

Mr. MADIGAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MILITARY MEDICAL MALPRACTICE

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the pending business is the question of suspending the rules and passing the bill, H.R. 3174, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Kansas [Mr. GLICKMAN] that the House suspend the rules and pass the bill, H.R. 3174, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 317, nays 90, not voting 27, as follows:

[Roll No. 341]

□ 1900

Mrs. LLOYD changed her vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1910

PERSONAL EXPLANATION

Mr. TRAXLER. Mr. Speaker, the House voted on an amendment to H.R. 2100, the Food Security Act, offered by Mr. GLICKMAN and Mr. WOLPE. The amendment (rollcall No. 337), struck the exemption to the "sodbuster" provisions, and requires farmers who plowed highly erodible land between 1981 and 1985 to have until 1995 to apply conservation plans to continue to be eligible for farm programs. I voted against this amendment in error, and I would like the RECORD to reflect that I had intended to support this amendment.

Mr. Speaker, I ask unaminous consent that this statement appear in the permanent RECORD immediately after the vote on rollcall No. 337.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

COMMUNICATION FROM THE HONORABLE FRED J. ECKERT, MEMBER OF CONGRESS

The SPEAKER pro tempore [Mr. GRAY of Illinois] laid before the House the following communication from the Honorable FRED J. ECKERT, Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, October 7, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker,
House of Representatives, The Capitol, Washington, DC.

DEAR MR. SPEAKER: I am writing to notify you, pursuant to Rule L(50) of the Rules of the House, that I have been served with a subpoena issued by the Superior Court of the District of Columbia, and two members of my district office staff have been served with subpoenas issued by the Rochester City Court, State of New York, County of Monroe. After consultation with the General Counsel to the Clerk of the House, I will reach the determinations required by Rule L(50) and will promptly notify you with regard to same.

Sincerely,

FRED J. ECKERT,
Member of Congress.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 313

Mr. GINGRICH. Mr. Speaker, I ask unanimous consent to remove the name of the gentleman from Virginia, [Mr. WHITEHURST] from the list of cosponsors of House Joint Resolution 313.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

STRANGE VIEW OF A LAWYER'S JOB

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the U.S. policy with respect to the questionable legality of the Reagan administration's mining of the harbors of Nicaragua and the resultant case in the World Court has taken another sad turn. Today's New York Times says that a measure that would withdraw the United States from World Court jurisdiction in political cases has been approved by the National Security Council and is expected to be signed

by the President today. It says the details were quietly drawn up in recent weeks by Attorney General Edwin Meese and Secretary of State George Shultz.

The Reagan administration's strange, cavalier treatment of both American and international law in this case, is not something that is just an isolated instance. Ms. Jeane Kirkpatrick, American Ambassador to the United Nations, recently wrote an article in which she denounced American lawyers for having the audacity to appear before the World Court representing Nicaragua to argue its case against the United States.

An interesting article appeared in the Akron Beacon-Journal for Friday, October 4, by Edwin M. Yoder, Jr. He pointed out that lawyers have a duty to uphold the law. Yet the other day Attorney General Meese was interviewed on McNeil and Lehrer, and he said his chief duty was to carry out the policies of the President. One would have thought his first duty was to see that the law is enforced.

As Mr. Yoder says, those who deny the possibility of a valid distinction between national policy and issues of law whose feet are on a slippery slope.

The full text of the Yoder article follows these remarks.

STRANGE VIEW OF A LAWYER'S JOB

(By Edwin M. Yoder, Jr.)

WASHINGTON.—If Jeane J. Kirkpatrick seeks the Maryland Senate seat Charles McC. Mathias will shortly vacate, her platform should surely include the crabbed view of the duties of international lawyers she recently expounded in the Washington Post.

It would make for some excitement, as lawyers abound in Maryland (as where do they not?). They, but not they alone, must find her views stimulating.

Mrs. Kirkpatrick, until recently the U.S. ambassador to the United Nations, is annoyed that distinguished U.S. lawyers will be arguing Nicaragua's case against this country in the World Court. Nicaragua, whose Marxist regime is on our official blacklist, has charged the United States with various infractions of international law—including the secret mining of her harbors by the CIA.

To that end, Nicaragua has engaged Prof. Abram Chayes of Harvard, a former State Department counselor, as chief counsel. Chayes will be joined by other U.S. citizens.

This, Mrs. Kirkpatrick writes with barely contained indignation, is the first time that "lawyers and witnesses have opposed their own country."

Not all would put it so. Others, mindful that lawyers are ethically entitled to see that even rogues have their day in court, would say that Chayes is entitled. Mrs. Kirkpatrick insists, however, that the World Court is essentially a political forum whose views "broadly reflect the politics of the (United Nations) General Assembly," which elects the judges.

And if Nicaragua's suit against this country is therefore a mere political shoving match, she finds no difficulty in concluding that the appearance of American lawyers in Nicaragua's behalf is "curious," if not (she avoids the word, but the insinuation is there) unpatriotic. Chayes and company are helping a foreign government "undermine the legitimacy of existing U.S. government policy."

A victory for Nicaragua would not be without its impact on U.S. policy. But the implications of the Kirkpatrick thesis are nonetheless disturbing, and not merely to international lawyers. Essentially, Mrs. Kirkpatrick proposes for the bar the "my country, right or wrong" standard once memorably applied to the press by Secretary of State Dean Rusk. The reporting on Vietnam, he once said, "raises the question of which side you're on," never mind the merits.

Under the Kirkpatrick rules, apparently, any regime opposed by the United States would be off-limits as a legitimate client for an American lawyer—no matter what the issue and however reputable the tribunal.

Such a standard would soon make self-fulfilling prophecy of her view that the World Court is a political, not a legal, forum. Whatever the legal merits, lines invariably would be drawn in terms of national self-interest rather than of international law. Stripped of all objective functions and rules, the court would soon be of no value at all.

It happens, however, that Jeane Kirkpatrick's characterization of Nicaragua's case against the United States as no more than political is questionable. At issue is not U.S. policy, but the legality of certain disputed steps (such as the furtive mining of Nicaraguan harbors) taken to implement that policy.

The distinction is less easily blurred than Mrs. Kirkpatrick would have us think. Even she would presumably agree that at the 1946 Nuremberg Tribunal, what was in question was not war per se but the crimes against civilian populations for which the Nazi leaders were responsible—crimes that transgressed treaties.

If the World Court vindicates the ambassador's insulting estimate of its intentions and renders a blatantly political judgment, it will merely undercut its own authority. If, however, it rules impartially, according to recognized doctrines of international law, it may give the Reagan administration's practitioners of illicit secret warfare something to think about.

In neither case should the slightest odium attach to lawyers and witnesses who argue the case.

"We have," Mrs. Kirkpatrick writes, "put our foot firmly down on a slippery slope where distinctions between one's country and its adversaries . . . fade and disappear." No, it is those who deny the possibility of valid distinctions between national policy and issues of law whose feet are on the slippery slope.

THERE HE GOES AGAIN!

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, there he goes again. Over the weekend, President Reagan was talking up a balanced budget and pushing for a plan that is called the balanced baloney act of 1985.

How many times have we been through this with him?

Mr. Reagan has had 5 years to submit a balanced budget. Instead, as the New York Times pointed out recently, he has used those 5 years to earn "his Ph.D. in the art of borrow-and-spend."

I talked with the President a while back and asked him why he hadn't yet submitted a balanced budget. He responded that that was the most cynical question he had ever heard.

If we are going to address seriously the issue of how to reduce the deficit, we can't continue playing these senseless games to avoid the hard truth.

The President, regretfully, continues to play a game of words with the American people on an issue that's a threat not only to our economy but to the world economy. He's no longer the ultimate innocent; he's the manager of the monstrous $2 trillion deficit he rails against.

The numbers clearly show that the President earned his title of Dr. Deficit and that he has no intention of presenting Congress with a balanced budget.

I insert the following:

[From the New York Times, Oct. 4, 1985]

THE BALANCED BALONEY ACT OF 1985

Frustrated by the failure to reduce the breathtaking Federal deficit, Congress and the President are ready to fasten onto a fantasy. Dreamed up by Senators Rudman of New Hampshire and Gramm of Texas, both Republicans, it promises to balance the budget by 1991. The idea is appealing but this approach is perilously unbalanced.

Congress's frustration is easy to understand. This year, again, it has struggled to cut one program after another only to wind up with yet another huge deficit. The plan responds handsomely to the prevailing mood of desperation.

Here is how it's supposed to work: The deficit for fiscal 1986 is assumed to be $180 billion. Deficits in following years would be reduced to zero in equal yearly steps. If the President and Congress failed to agree on how to achieve the goals, the bill would require across-the-board spending cuts—with important exceptions.

The first flaw is the starting point. The official estimate for this year's deficit is low, maybe $20 billion too low. Second, aiming at zero is arbitrary, perhaps dangerously so. Big cuts in the deficit are essential. But perfect balance isn't necessary by a given date. Forcing its achievement could, depending on economic conditions, start a recession or stifle a healthy recovery.

Third, the approach is unbalanced and unfair. The trigger mechanism would affect only spending, and not all of that. It would not cut interest on the debt or Social Security and would leave vague leeway for increases in other "uncontrollable" costs. No tax increases are involved and no controls would apply to rising "tax expenditures"—revenues lost to deductions and exemptions that add to deficits just as spending does.

The final flaw concerns credibility. Congress may solemnly demonstrate its firm resolve with legislation—but everyone knows Congress can act even faster in the opposite direction. The 95th Congress passed a law requiring a balanced budget by 1981. The 96th repealed it.

Senators Rudman and Gramm, now joined by Senator Hollings, give their scheme the title "Balanced Budget and Emergency Deficit Control Act of 1985." Beware. The only way to balance the budget and control the deficit is to cut spending equitably, which neither the President nor Congress seems able to do; or raise taxes, which the President refuses to do; or both. No wonder everyone's rushing to embrace this choice bit of balanced baloney.

[From the Center on Budget and Policy Priorities, Washington, DC, Robert Greenstein, Director]

REVISED ANALYSIS OF GRAMM-RUDMAN

This is an updated and revised analysis, prepared at 3 p.m., October 4. It supersedes the Center's earlier analyses on this matter. Among the revisions covered here are:

The finding that 38 percent of the defense function (not 30 percent) would be exempted. OMB estimates show that 38 percent of the defense function is now classified as "relatively uncontrollable."

A brief discussion of why Gramm-Rudman could give the President more leverage to resist deficit reduction packages that include tax increases.

A new section on new powers ceded to the President under Gramm-Rudman, including the power to decide unilaterally whether to institute automatic spending reductions immediately in a recession (or to postpone such reductions for 30 days to allow time for an alternative plan to be prepared) and the power to decide unilaterally whether to institute automatic spending reductions if the projected deficit exceeds the deficit target for the year by up to (but not more than 5 percent).

[From the Center on Budget and Policy Priorities, Washington, DC]

THE GRAMM-RUDMAN PROPOSAL—(REVISED OCTOBER 4, 1985)

Senators Phil Gramm (R-Texas) and Warren Rudman (R-N.H.) plan to offer a major amendment to the debt ceiling bill that would require a balanced budget by FY 1991 and would trigger automatic spending reductions each year if projected deficits for the year exceed specified levels. While mechanisms to enforce greater deficit reduction may be useful, Gramm-Rudman would cause serious problems.

It is highly unbalanced, exempting taxes, tax expenditures (which disproportionately benefit upper income individuals and large corporations and are now growing at a $30-$40 billion a year clip), Social Security, and approximately 38 percent of the defense function of the budget from the automatic spending reductions.

At the same time, other domestic programs—including programs for the poor—would be hit in a highly disproportionate manner. Because revenues plus so many other areas of the budget would be exempt from the automatic spending reductions, programs for the poor would have to bear a share of the automatic spending reductions equal to approximately twice their share of the overall budget.

Social Security cost-of-living adjustments would be protected for middle and upper income beneficiaries but would effectively be canceled out for the elderly and disabled poor.

It could become more difficult than ever to persuade the White House to accept revenue increases as part of a larger plan to reduce the deficit. The President would be able to veto any budget reconciliation bill containing revenue increases, knowing that such action would not affect the deficit because the automatic spending reductions would take effect, instead. Moreover, Congress would be forced—if it wished to avoid the automatic spending reductions—to present the President a reconciliation bill he would agree to sign, which could mean a bill with no revenue increases. Gramm-Rudman may thus shift some leverage to the White House.

Gramm-Rudman is poor economics, requiring large deficit reductions even if the economy is stagnant or growing so slowly that unemployment is rising—an action that could force us into a full-scale recession in such circumstances. Moreover, even during a recession, the President would be free to trigger large-scale automatic spending reduction by executive fiat.

It transfers major new powers from the legislative branch to the executive branch.

It is easily subject to manipulation in a number of ways by OMB.

I. LACK OF BALANCE

A. Taxes

Despite analysis by persons and organizations ranging from CBO to Martin Feldstein showing that the large tax cuts of recent years have been one of the principal reasons that deficits have tripled since 1980, revenues would be entirely exempt from the automatic spending reductions under Gramm-Rudman. Particularly egregious is the exclusion and protection of tax expenditures.

According to official Treasury-Joint Tax Committee estimates published earlier this year by the Senate Budget Committee, tax expenditures will increase $192 billion between fiscal year 1984 and fiscal year 1989. Under Gramm-Rudman, tax expenditures and tax shelters for the wealthy would be allowed to boom at a pace far outstripping the inflation rate, while basic benefit and services programs for the poorest Americans would be subject to steep reductions if automatic spending reductions are triggered.

TREASURY/JOINT TAX COMMITTEE ESTIMATES OF TAX EXPENDITURES

[In billions of dollars]

	Amount	Year-to-year increase
Fiscal year:		
1984	322.0	
1985	365.1	+43.1
1986	404.2	+39.0
1987	435.7	+31.5
1988	471.6	+35.9
1989	513.8	+42.3
5-year increase		+191.8

While tax expenditures would be exempt, there is one form of tax benefit that could be affected by automatic spending reductions—the earned income tax credit for the working poor (EITC). The EITC could be affected because part of the EITC is scored as a budget outlay. The result is that taxes could be raised—but only for the poor.

B. Social Security

Social Security would also be exempt from the automatic spending reductions. This puts far greater pressure on remaining domestic programs.

Moreover, even the treatment of Social Security beneficiaries is inequitable—and depends on their income. Under Gramm-Rudman, while middle and upper income beneficiaries would get the full Social Security COLA, poor beneficiaries would lose their Social Security COLA if automatic spending reductions are triggered.

This is because many poor beneficiaries receive Supplemental Security Income (SSI) as well as Social Security. There is a federal SSI benefit standard (which is below the poverty line) and SSI recipients receive an SSI payment equal to the difference between their Social Security benefit and the SSI benefit standard. If automatic spending reductions of any magnitude are triggered, the SSI benefit standard (which is now indexed each year) would be frozen. As a result, there would be a dollar-for-dollar reduction in SSI benefits equal to the exact amount of the Social Security COLA increase. The result is that the Social Security COLA would be canceled out for all SSI beneficiaries—leaving the COLA in place for more affluent elderly persons while taking it away from the poor.

C. Defense

Some Members of Congress have been attracted to the plan by the fact that the automatic spending reductions would hit defense spending. While this is true, defense spending would still be partially protected and would not be subject to the same degree of reduction as most domestic programs.

Under Gramm-Rudman, only the part of the defense function of the budget that OMB classifies as "relatively controllable" would be affected if automatic spending reductions are triggered. OMB classifies 38 percent of the defense function as uncontrollable [1]—and this part of the defense budget would be protected. Essentially, defense contracts for most weapons—which make up a large share of the "uncontrollable" part of the defense budget—would be exempt.

In addition, the automatic spending reductions for any fiscal year would be computed as reductions from the spending levels for that year that Congress has approved. If Congress follows the budget resolution passed in August, defense would get 3 percent real growth (or 7 percent-8 percent nominal growth) in future years, while many domestic discretionary programs would be frozen or get an adjustment that was less than the inflation rate. This means that the base for defense, from which the automatic reductions would be made, would likely include a healthy increase, while the base for most domestic discretionary programs would have little or no increase.

Suppose, for example, an across-the-board spending reduction of 12 percent were triggered. Since about 38 percent of the defense budget would not be affected, the actual reduction would equal only about 7 percent of total defense spending. If defense started from a base of 3 percent real growth, this would simply reduce defense to about a freeze level, a reduction the Pentagon could easily absorb for a year or so because of the tremendous backlog of unobligated, unexpended defense budget authority from prior years now sitting in the Pentagon's accounts. At the same time, many domestic

[1] Table 18 on page 9-44 of the "Budget of the United States Government, Fiscal Year 1986" shows that only 64% of defense outlays in FY 1985 and 62% of outlays for FY 1986 are in the "relatively controllable" category. Military pensions are not included in these computations by OMB, because military pensions are included with other Federal pensions in the income security function of the budget—and are not part of the defense function.

discretionary programs—including basic programs for the poor—would be cut 12 percent below a freeze level.

Low Income Programs

There would be no protection or exemption for low income programs. And because at least half the budget would be exempted (Social Security, approximately 38 percent of defense, interest on the debt, and certain other forms of unindexed, uncontrollable spending, such as farm price supports and other prior year contract obligations), low income programs would have to bear a share of the automatic spending reductions equal to approximately twice their share of the overall budget. Thus, while tax expenditures for the wealthy and large corporations would have immunity, poor families would be hit doubly hard. These reductions would be on top of the disproportionate reductions in low income programs made in the first Reagan term.

Two low income programs that would be hit especially hard are food stamps and low income housing. Because OMB classifies food stamps as a relatively controllable program (rather than a pure entitlement), food stamp benefits could be reduced far below prior year levels. Automatic cuts in food stamps could go well beyond cancellation of the COLA.

Low income housing could be affected still more severely. If automatic spending reductions are triggered, the reductions in budget authority must be sufficiently large to reduce outlays in each account by the same percentage. In low income housing, most new budget authority for any given year results in outlays in subsequent years. In order to reduce outlays by any significant percentage, nearly all budget authority for low income housing would have to be wiped out. Thus, if there are automatic spending reductions of any magnitude, appropriations for low income housing would practically have to be "zeroed out."

Conclusion.—By exempting revenues and about half of all outlays, Gramm-Rudman establishes severely inequitable budget cuts if automatic spending reductions are triggered—cuts that largely protect the generous tax expenditure benefits of the affluent while cutting deeply into programs for the poor and discretionary spending.

II. BAD ECONOMICS

Gramm-Rudman is poorly designed from an economics standpoint.

First, it requires deep deficit reductions as long as real GNP growth is zero or greater. To make deep deficit reductions if economic growth is, for example, in the 0-1 percent range—which would generally mean that growth was too slow to keep unemployment from rising—would run a strong risk of sending the economy into a full-scale recession.

Second, Gramm-Rudman could force deep cuts even if the economy is already in a recession. While some appear to believe that the deficit targets and the automatic spending reductions under Gramm-Rudman would not be put into place if there were a recession, this is not accurate.

Gramm-Rudman does still require automatic spending reductions during a recession—it simply allows the President, at his discretion, to postpone the implementation of these reductions for 30 days. If the President decides to go ahead with the spending reductions, or if the President provides for a 30-day postponement but the Congress and the President do not agree on, and enact, an alternative budget package during this 30-day period, then the automatic spending reductions still take effect. Moreover, during the 30-day period, normal Congressional committee procedures are altered or suspended to give heavy preference to whatever alternative budget package is submitted by the White House.

Finally, there is serious question as to whether a fully balanced budget is necessary (or even desirable). Many economists favor reducing the deficit substantially to 1 percent or 2 percent of GNP, but not necessarily to zero. There is some question as to whether a balanced budget would provide sufficient fiscal stimulus.

III. POTENTIAL FOR MANIPULATION BY OMB

While Gramm and Rudman may claim that their plan gives little discretion to OMB and the White House, close examination of the plan shows this is not really the case.

The determination of whether automatic spending reductions are required, and if so, how large they must be, is to be based on an average of CBO and OMB forecasts. In recent years, OMB has frequently tailored its economic and deficit forecasts to suit the Administration's political interests (recall the OMB forecasts of summer 1984 showing that we would grow our way out of the deficit). Under the Gramm-Rudman system, it would be easy for OMB to "game the system" by producing forecasts that, when averaged with CBO's, produced the result OMB desired.

In addition, the so-called across-the-board spending reductions might not hit all affected programs equally. It is unclear, under the statutory language of Gramm-Rudman, whether each account, each line in an account, or each program would be reduced the same percentage. Depending on the interpretation given to this language, OMB might have the discretion to allocate the reductions within accounts—which might allow OMB to make substantially deeper cuts in some programs the Administration doesn't like and has unsuccessfully tried to get Congress to cut heavily for years.

IV. MAJOR NEW AREAS OR AUTHORITY ACCORDED TO THE EXECUTIVE BRANCH

There are a number of areas where major new powers would be ceded to the Executive Branch. A few examples are:

If the economy is in a recession and the deficit targets for the year will not be met, it would be left up to the President to decide whether to trigger the automatic spending reductions immediately or to postpone the reductions for 30 days and submit a plan to Congress calling for an alternative plan of action.

If the projected deficit for a given year will exceed the deficit target for that year by up to 5 percent (up to 7 percent for fiscal year 1986), it is left entirely up to the President whether to institute the automatic spending reductions.

V. GRAMM-RUDMAN AND THE 1986 ELECTIONS

The latest revisions to Gramm-Rudman have a curious effect—they effectively postpone the implementation of major deficit reductions until after the 1986 elections. Whereas the original version of Gramm-Rudman required reductions for fiscal year 1986 if the projected deficit exceeded $180.5 billion ($171.9 billion plus a margin of 5 percent), the final version requires deficit reductions in fiscal year 1986 only if the deficit exceeds $192.6 billion ($180 billion plus a 7 percent margin that would be applicable only for fiscal year 1986). This change, reportedly requested by the White House, virtually ensures no action under Gramm-Rudman until fiscal year 1987. Any automatic spending reduction for fiscal year 1987 under Gramm-Rudman would not be announced until mid-October and could not actually be implemented or felt at state or local levels until after the elections.

VI. QUESTIONS

There are numerous areas of critical importance where Gramm-Rudman is fuzzy and unclear. A few examples here are:

The automatic spending reductions are supposed to be triggered in October 1 of each year. What happens if appropriations and mandatory spending bills are not enacted by that date? How is the deficit then forecast and what is used as the base for figuring automatic spending reductions?

What happens to entitlement programs that do not have federal COLA's, such as AFDC and Medicaid? Are they subject to automatic spending reductions? If so, how are such reductions made?

THE GRAMM-MACK PROPOSAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, we are going to talk this evening about the opportunity to tackle deficit spending, the possibility of passing the Gramm-Mack proposal which is now in the other body and which we hope will be here soon, and which offers us a real chance to have one decisive vote on whether or not to control Federal spending.

It is fascinating, the country is watching the city of Washington wrestle with deficits and an approaching $2 trillion debt limit. Yet, this week, we have a real opportunity to do something about Federal spending and the rising deficit tide that the Federal Government is building up as it borrows more and more money.

It occurred to me that there must be a great deal of frustration in the Nation at large as they watch the Federal Government unable to balance its books, to control its spending, to bring under control its appetite for our tax dollars and for borrowing more and more funds.

The voters who in 1968, 1972, 1976, 1980, and 1984 voted for the more conservative candidate for President must truly be frustrated and bewildered. Remember that in 1968 it was Nixon and Wallace between them who had an overwhelming majority both arguing for fiscal conservatism. In 1972, Nixon carried virtually every State against McGovern arguing for fiscal conservatism.

In 1976, both candidates for President were fiscal conservatives. Jimmy Carter was a southerner who was going to balance the budget. Gerald Ford had a career in Washington as a conservative Republican Congressman committed to balancing the budget.

□ 1920

In 1980 Ronald Reagan ran as a man who would balance the budget, and in 1984 the argument was not over whether or not we should balance the budget, but between Walter Mondale's determination to balance it with tax increases versus Ronald Reagan's determination to balance it with spending cuts.

So voters who have been involved in politics now for some 17 years have seen virtually every Presidential candidate speak out in favor of a balanced budget. Voters who read "Conscience of a Conservative" and admired Goldwater's 1964 campaign must be frustrated after 21 years of support for the conservative movement. Voters who admired Ronald Reagan's 1964 speech on behalf of Goldwater and who admired Reagan's campaigns for Governor of California and his three campaigns now for the Presidency must also be frustrated. Yet despite a growing conservative tide in America, despite the fact that in recent polls 62 percent of the American people said they would rather cut spending than raise taxes, despite the fact that President after President has talked about the need for a balanced budget, the fact is that we have huge deficits, that the debt limit is about to approach $2 trillion, and that we need to take active steps, and I would suggest, Mr. Speaker, that it is this House which is morally responsible.

When President Reagan spoke today and said he was against the 50-year tide of the liberal welfare state which had built up this momentum, he was serious. He has been systematically the most conservative politician at the national level in our lifetime. He has also been the toughest on domestic spending.

But we have had some recent votes in this House of Representatives which may give the average American an opportunity to examine the two parties and decide why it is so hard to cut spending. Just today, for example, I offered an amendment which would increase the speed with which we would move from a welfare state program of food stamps, without effort, to an opportunity society program that required workfare—a very simple idea. It says that if you are going to get money from the Federal Government and you are able bodied and under the age of retirement, you ought to have to work for the money. It is an idea that virtually every American supports. The polling data on who supports workfare is massive, and yet today we saw a clear split between the two parties. Republicans voted for workfare by 5 to 1; Democrats voted against workfare by 7 to 1. One was the party of workfare, the Republicans; the other was the party of welfare, the Democrats—a clear choice.

Ah, but, you might say, this, after all, was a vote in which there was pressure from back home. Well, in the first place, most of the pressure from back home was from working Americans who are tired of their tax dollars going to pay for people who are able-bodied adults who are not working, and in the second place, the pressures were despite public opinion. It was a liberal Democratic effort to avoid the public concern, and I think if average citizens will check to see how their Congressman or Congresswoman voted, they will be surprised at the number of people who talk good rhetoric at Rotary Club meetings but voted against a workfare program today.

But in order to have a real sense of how deep the commitment to spending is in this House, it is useful to look at one day recently when the House voted on its own budget. I choose this particular set of votes because, frankly, there is no great public pressure for the House to spend more money. There is no interest group knocking down our doors begging us to spend more in the House. There are no letter-writing campaigns back home asking us to spend more in the Congress. Yet on one particular day, when we had four specific amendments to slow down the spending by the Congress, when we had four specific efforts to stop the Congress from spending more and more money, on each occasion a majority of the Democrats voted to spend more money.

Let me walk through the list for a moment. First, there was a vote to freeze congressional spending at last year's level. Second, there was a vote to limit the number of mass mailings to our constituents from six a year down to four a year. Third—and I want this to be very carefully stated so everyone can understand it—there was an amendment to hire additional automatic elevator operators, and I will come back to that. Finally, there was an amendment to stop the Congress from paying to put Playboy into braille at a cost of something like $1,200 an issue.

Let me walk back through these because in each case a majority of the Democratic caucus voted to spend more money. First of all, it was suggested by the gentleman from North Carolina [Mr. COBEY] that it would be useful for the Congress to freeze its own spending, that in fact we should set an example for the rest of the Nation and not spend more. That lost. Apparently even the Congress, as large as we now are, with as much staff as we have, and with as much money as we have to spend, had to find more money.

Second, there was a motion to say that four mailings a year, one every 3 months, is enough. Many citizens received constituent mailings from their Congressmen. I think they are a useful and legitimate way to inform the citizens, but we thought that four a year was enough. Although it costs $10 million to send those two extra mailings a year, we were defeated. We could not even shrink the number of mailings from six to four.

Third, there was a proposal in the appropriation bill to hire more people to run automatic elevators. Let me make this clear. These are not complicated elevators. These are elevators that most citizens run on their own. They have little buttons that have numbers, and the numbers correspond to the floors of the building. You walk in, and you push "4" if you want to get off at the fourth floor. It is not a complicated system.

Let me be very candid. There is a legitimate reason for some elevators to have a manual operator to override the system when we are having votes so Members can get here to the floor. I would not vote to abolish all of the elevator operators because there are some places where we need them, specifically when we have votes.

These were extra ones. These were a few more patronage jobs, a few more opportunities to help politicians' friends. And as I said, they are automatic elevator operators—almost a contradication in terms, like "jumbo shrimp." Again we lost the vote. More automatic elevator operators were to be hired, and a majority of the Democratic Caucus voted for it.

Finally, a citizen in Ohio wrote Congressman CHALMERS WYLIE and said in his letter:

> I am a blind person, and I am very grateful that the U.S. Government prints many things in braille, but I want to bring to your attention the fact that the Government is printing Playboy in braille.

He said:

> First of all, they don't put the pictures in braille, they don't put the cartoons in braille, and, frankly, the articles aren't that interesting. If it really costs you $1,200 a copy to make Playboy in braille, I would suggest you find a different program. There are other things I would rather see.

Congressman WYLIE decided that this was a legitimate request, that after all if in fact all you are going to get is Playboy's articles without the pictures and the cartoons, why was the U.S. Government paying $1,200 a copy to turn Playboy into braille? So he offered to cut out the particular expenditure, and again a majority of the Democratic caucus voted to spend the money.

Mr. Speaker, I would suggest that if you walked in and you did not want to freeze spending—maybe you had a good reason, even though we have a big deficit, even though we in Congress should in fact set an example—if you walked in and you did not want to cut the mailings from six to four and you really believed in the mailings even though it costs $10 million, if you

wanted to spend the $10 million because you really believed in them, I might understand that particular vote.

There are at least four or five people who will probably get a patronage appointment to the elevator operators' jobs, so I understand why a few Members voted to hire additional automatic elevator operators.

There may be some Members who are very liberal who believe as a matter of automatic bias that, by George, the Federal Government just ought to put Playboy in braille because we owe it to the people to print Playboy if we are going to print anything else. I can understand that bias.

But for a Member of this Congress, in the middle of this deficit, to walk in and vote every single time for more spending certainly qualifies him, it would seem to me, for the title of "spendaholic." It is almost as though there was an automatic sense of—does this spend more cash? Let me spend it.

When people want to know why Ronald Reagan is having a hard time bringing the budget under control, when they want to know why every Presidential candidate who has won, starting in 1968, has talked about the need for a balanced budget, though we still have not gotten there, the first place they should look is the U.S. House of Representatives, and they should look at the fact that the Democratic caucus has a majority who voted on every single occasion that day to spend more money on the Congress itself, no matter what the amendment was.

Now, I cite this because I want to make it very clear for people like myself. I was 11 years old when the Democrats took control of Congress, and I am now 42. They have had every year since I was 11 control of the calendar, of the committees, of the staffing system, of what bills come up, and of what hearings are to be held, and the result is that we have now had 31 years of the same people in charge of the Congress. And if a majority of their caucus is in fact made up of spendaholics, of people determined to spend money, then I think that says a great deal about why we are having a difficult time getting the Gramm-Mack proposal up for a vote.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am delighted to yield to my friend, the gentleman from Pennsylvania.

□ 1930

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding. I think it needs then to be further pointed out that the problem with deficits, as the gentleman pointed out at the beginning of his remarks, the American people are sick of and they want something done about, that the problem with deficits is a spending problem. It is not, as many of the spenders in this body would like us to believe, a conglomerate of problems, too little taxes, too much defense and all this. It is a spending problem, pure and simple, because what we know at the present time is that in the last 5 to 6 years we have seen the Federal spending as a percentage of the gross national product go from 20 percent up to 25 percent.

Now, those who say we need additional taxes coming into the Government in order to do something about deficits ignore the fact that revenues to the Federal Government as a percentage of the GNP have remained constant. We are still getting 19 percent of the GNP into the Federal Government as revenue; therefore, it is spending expansion from 20 percent up to 25 percent that has indeed caused the massive deficit problem that we now face.

So in pointing out the fact that we have got a group in the House of Representatives who are spending oriented, I think the gentleman then helps us to understand why this is a serious problem when we get to the deficit, because those are the people who are causing that spending increase to go from 20 to 25 precent of the GNP.

As a result of that, we find ourselves with $200 billion deficits and the Gramm-Mack proposal, as the gentleman has pointed out, is the first real attempt that we have had around here in a number of years, the first attempt at discipline, the first attempt with teeth to control that deficit problem and say that we are not going to continue to expand it, that we are going to begin a process of contraction, that we are going to start with the deficit level that we have determined for this year and we are going to steadily ratchet downward deficits until we get to zero in 1991.

And already, what do we hear from the Democrats and the liberals in this body? They came to the floor today, came to the well during the 1-minute speeches today, just screaming bloody murder that they had not had enough time to consider this, that this was not the proper vehicle, that there are just all kinds of excuses why they do not want to take up this proposal.

The fact is that they have not been willing to take up any proposal that imposes discipline on the budget process and thereby they have gotten themselves into the position where they can constantly spend more and more money.

So when the American people focus on deficits and say they are disgusted, when the American people say that they want balanced budgets, that is ignored here, because the tendency here is to only spend. It is a spending machine out of control that this particular resolution seeks to bring some discipline to.

I think I would join with the gentleman in saying that it is our hope that the American people at least are allowed to see a vote on that issue in this body.

Mr. GINGRICH. Well, if I can build on the gentleman's own point, the fact is that if you were to have kept actual spending by the Federal Government at the same level as that in 1980, we would today have a balanced budget.

The fact is that the constant increases in spending are a major factor why we do not have a balanced budget.

When people say, "Well, we have to keep increasing spending," the point I would make is that we are now at close to $1 trillion a year in spending. Now, $1 trillion is real money.

This Congress should be able by being careful and by pinching an occasional penny or even by pinching an occasional dollar to save money; but as the example I was using and I chose deliberately, you have a Congress which cannot quit printing Playboy in braille, it cannot quit hiring automatic elevator operators, it cannot keep down the number of mailings it sends from six to four, it cannot freeze its own spending, it should not surpise us that that same House, with a Democratic majority which is committed to those kinds of programs is incapable of controlling spending.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am glad to yield.

Mr. WALKER. Just to build on the point as well, we have heard much weeping and wailing on this floor that took place today during consideration of the farm bill about the fact that we have had so many programmatic cuts.

Well, the fact is that Federal spending is going up every year at a rate of about three to four times the inflation rate, so that we are not just spending to compensate for inflation now. We are spending way over the inflation rate.

As a matter of fact, many American people would be surprised to learn if they have listened to the liberals too long that the amount of revenue coming into the Federal Government is increasing dramatically. It is increasing by about 10 to 11 percent a year.

In other words, when we collected $700 billion of revenue the previous year, it means that we are getting $770 billion of revenue the next year, a fairly substantial sum, a hefty increase of the amount of revenue coming in as a result of economic growth.

But what are we doing? We are spending away all that revenue, plus some, because the spending of the Federal Government has been going up at a rate of 11 to 12 percent a year; so despite the fact that we are bring-

ing in additional revenues, we keep spending it away. The appropriation process, the authorization process, the budget process around here is oriented toward spending the money away, not only all the new revenues that are being accumulated, but revenues that we have not got as well.

Mr. GINGRICH. Well, if I could build on that for a second, to turn it into maybe more human terms, we are in the position of a young person who gets a job and gets a credit card. We have learned now that although we are getting a 10 percent a year pay increase, we are getting a 14 percent a year or 13 percent a year spending increase; so every year no matter how much our pay goes up, our debt goes up higher.

I think that as a country there is an intuitive sense in the Nation at large, a real feeling that we are at the end of that road, that we are now at a point where we have to bring spending under control. We have to in fact start taking steps which will allow us to get the deficit under control and to get us into a situation where we can get to a balanced budget.

But let me say to the gentleman two things. First, I think the deficit, as the gentleman pointed out earlier, is not the problem. The deficit is the symptom. Deficits bear the same relation to spending that hangovers bear to getting drunk. It is in fact the drinking that causes the hangover. It is the spending that causes the deficit and in a sense our friends on the left who are spendaholics would like us to look at the deficits just like a bartender might like the local drunk to look at the hangover. "Don't connect it to what you did the night before at the bar." They do not want to connect the deficits to the spending. They would like to be able to continue spending.

Now, for about 40 years the dominant wing of the Democratic Party followed a policy of tax and spend, tax and spend. One of the things which has happened with the rise of a working middle class that is much tougher on taxes than we used to be is that it is harder to raise taxes. Walter Mondale discovered that last year when he only carried one State after proposing that he would raise taxes.

I think what has happened then is the liberals have not learned, oh, people do not want to pay for it, let us not spend for it. What they have learned is a new habit of borrow and spend, borrow and spend; so they have replaced tax and spend with borrow and spend, which simply is a way of putting all these large deficits as mortgages on to our children and our grandchildren. They are going to have to pay the interest. They are going to have to pay the debt. They are going to have to bear the burden, which means they are going to have to work longer hours to pay more tax money without getting any services for them, because they are just paying taxes in order to get the debt paid down.

Mr. WALKER. Mr. Speaker, will the gentleman yield on that point?

Mr. GINGRICH. Certainly.

Mr. WALKER. There is one figure that I found fascinating that I worked out the other day and that is that for every American family of four in this country, the debt that we have now accumulated doing the things the gentleman referred to, amounts to $37,000 for every family. Now, if you take the present rate of interest, what we are paying for T-bills, that comes to about $2,700 to $2,800 per family that we are paying each year in interest payments on that $37,000 worth of debt that we have accumulated in that family's name. That average family, the average wage-paying family in this country, pays only—I say only, but it is a substantial amount for that family—they pay $2,750 in income taxes each year to the Federal Government.

In other words, for the average family out there, every dime that they spend in their tax money at the present time in income tax dollars is being eaten up in interest payments on their portion of the debt which we assigned to them as a result of all the spending we have done.

There is no hope of them getting ahead and when you consider that we are going to pile up additional debt and pile that on future generations, they will be in a position where all their taxes will not only go to pay the debt, but they will have to find other sources of revenue to pay the debt and that makes no sense. That is just totally nuts. it makes no sense economically. It makes no sense morally. It makes no sense socially. There is no acceptable reason, which is the reason my guess is that the gentleman would find in his district, like I find in mine, there is nobody in this country that is in favor of continuing to accumulate these kind of deficits.

I find none of my constituents, I mean, we may have differing versions as to what we should do, but none of my constituents are prodeficit at the present time, nor are they going to be in the future, in my opinion.

Mr. GINGRICH. It would seem to me that there is a clear Establishment power structure in this building which favors the deficits, that in fact what we have is a situation in which there are many people, particularly liberal Democrats, who love the idea of talking about Reagan's deficits. Now, the fact is that the President can never spend any money by himself. Under the U.S. Constitution, the House and the Senate have to approve every spending dollar and the House and the Senate have to agree to every taxing dollar.

□ 1940

So by definition, there can be no Reagan deficits. There could be a Reagan-House-Senate deficit, but there could not be a Reagan deficit.

But it is even more frustrating, frankly, to watch President Reagan, who is trying very seriously to bring all of this under control, who has worked now from 1964 when he first spoke for BARRY GOLDWATER, all the way up to the present, for 21 years, whose campaign for President, who has been Governor of California, who has now been President for 5 years, to watch President Reagan trying to gradually bring spending under control and to see the very people who do the most to stop him then ridicule the deficits they voted for as though they were Reagan's deficits.

I think what we now have with the Gramm-Mack proposal is sort of put up or shut up time. Now we have in the Gramm-Mack proposal a very specific, very clear program which, when signed into law, would require the President and the Congress to bring the deficit down for 5 straight years by contolling spending, so that at the end of those 5 years we would have a balanced budget.

That proposal is the most decisive and the most courageous and the most dramatic effort to control spending and bring the budget into balance what we have seen, I think, in the last 30 years. That proposal is tied directly to the debt limit, to the fact that we are about to approve a $2 trillion—not billion; billion was a big number when I was young; now we are into trillions—a $2 trillion national debt. What Mr. GRAMM in the other body and Mr. MACK in this body have said is, if conservatives are going to vote for a $2 trillion debt limit, then let us vote to cut off the credit card, let us vote to bring spending under control.

It is a little bit like going to your banker and being told, "You are overextended, and if I am going to renew your loan then we are going to have to put you on a budget and we are going to have to get you to pay back more than you borrowed."

So what is happening is that the Gramm-Mack proposal is very real. This is not a resolution. This could become a law, and if this were to pass the House and the Senate, there will be an automatic process by which the President and the Congress would be required under law to bring spending down every single year for 5 years, until we got the budget into balance. It is a very tough measure. It is a measure that will work, and it brings real discipline to the body.

The result is, as the gentleman from Pennsylvania is pointing out, that on the Democratic side of the aisle we promptly today saw liberal after liberal get up who have been laughing at

Reagan's deficits, who had enjoyed poking fun at President Reagan, suddenly faced with a real proposal that would really control spending, they suddenly found all sorts of excuses.

The great challenge to the American public is going to be, can we even get the House of Representatives to bring this proposal up for a straight vote? Can we even get the liberal Democratic leadership to agree to put this bill on the floor so that everybody in America can look at this body say, "Well, when you really got down to it, did you have the guts to vote to control spending or did you vote for the special interests groups to continue the liberal welfare state and to continue to go into debt?"

I think the challenge you and I are going to face is going to be how we convince the public to write, to call, to visit with their Congressman to bring so much pressure to bear that the liberal Democratic Congressmen go to their leadership and say, "There has to be a fair, straightforward, straight up-or-down vote," because my fear, now having been here for 7 years and having watched this place, is that the liberal Democrats know that they will lose if the American people get a chance to see this vote.

Mr. WALKER. If the gentleman will yield, we have a rather long history of precisely that kind of subterfuge and sleazy political and parliamentary tactics taking place throughout the period when we have had balanced budgets considered.

For example, we have wanted for some time to vote on the balanced budget amendment to the Constitution, which is another way of imposing some discipline on the spending system. What has happened to that? Well, every year it has been introduced. Every year literally hundreds of Members have sponsored it. It has been more than a hundred Members on balanced budget amendments every year. In fact, in most instances it has been more than 200 Members who have sponsored some kind of a balanced budget amendment. Yet every year they end up being buried in the Committee on the Judiciary, never to be seen on the House floor, never to be heard from, so that there can be no straight up-or-down vote to find out whether some of these people who talk about sponsoring the bill would actually vote for it once it gets out here. So they have undermined that process.

A couple of years ago we had a process that we went through. It was a great political exercise just before one of the presidential years, before the 1980 campaign, when we passed a measure around here requiring a balanced budget of the Federal Government by fiscal year 1981. So some of us after 1981 decided we ought to impose that discipline. After all, it was the law of the land, and it is still the law of the land. So on a couple of occasions I have carried, and some other Members have carried, amendments to the floor saying that here we have a bill that is spending a lot of money and we should spend none of this money in violation of that public law of the land that requires a balanced budget.

What happens? Well, the liberals line up and they just waive the whole thing. They just say, "Well, forget that," and so on. That was back then when we passed that. We did not know that anybody would actually impose it so, therefore, we should not do anything about really enforcing it.

I would say to the gentleman I remember one time very fondly when the measure on the floor was to build a memorial here in this town, one of the great priorities of the town, I thought, particularly in light of $200 billion deficits. I thought, well, at least maybe instead of building a memorial and spending the money on that, we ought to enforce this public law of the land that requires a balanced budget. Well, it was not going to happen. Overwhelmingly, the House voted to spend the money for the memorial rather than to enforce the Balanced Budget Act. So that has gone by the wayside.

Then we have the Budget Act itself. We come out here and we hear all of this great political talk every time the budget comes up, and we spend months with the headline writers writing about what the Budget Committee is doing and we take great pride around here in this budget process where we impose discipline on ourselves. Sure enough, we passed a budget out here in August and the headlines across the country said we were going to save $55 billion of taxpayers' money out of this year's deficits. I do not think anybody believed it. It got written up as a phony. It was a phony. People around here knew it was a phony. Many people voted for it, like I did, because it was at least one little element of discipline, but recognizing that this body was not going to live up to it.

What have we done since we came back in September after our August break? We have brought rule after rule after rule to this House floor that say what? Waive the Budget Act. The Budget Act is meaningless. Forget it. That was last month. We passed that last month. We got our headlines already. We have already written our newsletters. We have already sent out our press releases telling people that we imposed that discipline on ourselves. Now we can forget. It is now time to spend the money. We have lots of things to spend money on. The bill we are considering now on the House floor right now, the farm bill, was brought out here under a rule that waived the Budget Act.

So we consistently bring out bills that simply say, "Forget the Budget Act. We do not need that." So that is no discipline on ourselves.

The nice thing about the Gramm-Mack proposal is that it gets to discipline, and it is discipline that the House cannot waive because if we do, the funds get automatically impounded, the funds get sequestered. The President has the obligation at that point to enforce the law which is aimed at getting us to a balanced budget by 1991. The Congress cannot get around it very well, or at least if they do, they would have to get around it with a super-majority.

That being the case, all of sudden these people get worried because now it is no longer a case of sending out the dandy press releases, making all the great speeches before the Rotary Club about a balanced budget and that resolution that you are a sponsor on. Now you might actually have to live with it, and now they come screaming. They are screaming in the other body. They are screaming here that, "No, you cannot do this kind of thing. We cannot have a real law."

I think that the American people really do, as the gentleman says, have to get into this particular fight and they have to make Congress at least face up to its responsibilities to vote on that measure so that by next year, when the people go to the polls again, they will know how every Member of Congress voted on the key deficit issue of this Congress, whether or not to impose the kind of discipline on ourselves that is going to get us to a balanced budget in 5 years.

Mr. GINGRICH. Let me say that I think the fascinating thing is that a number of us support a constitutional amendment to require a balanced budget. We know that over 70 percent of the American people favor a constitutional amendment to require a balanced budget.

On several occasions when I have been making speeches or talking about the need for a constitutional amendment to require a balanced budget, I have had liberal Democrats say to me half jokingly, "That would take years to pass. We would have to pass it in the Congress, then the States would have to ratify it," and they say, "I want to do something now." Now the problem they are faced with is that the Gramm-Mack proposal lets them do something now. They can really vote to bring spending under control. They can really vote to shrink the deficit. They can really vote to bring a balanced budget here by 1991, and they could help make it a law. The President has said he would sign it. This is not a game. The is not politics as usual.

Ronald Reagan has said, "I will sign that bill if you bring it up here." If the

other body will pass it, and I think there is a good chance they will, then the question becomes, does the liberal Democratic leadership of this House really have the concern for the opinion of the American people that would lead it to bring to the floor a straight, clean vote on the Gramm-Mack proposal?

□ 1950

I do not care how many other proposals they want to bring to the floor the same day. I do not care if they have 87 ways to try to balance the budget. But I think they owe it to the minority party, they owe it to the American people, they owe it to President Reagan to at least give us one straight up or down vote on the Gramm-Mack proposal as it passes the other body.

Mr. WALKER. If the gentleman will yield again, the other point we have always heard the liberals make whenever we raise the point of a balanced-budget amendment is they always said well, that is nonsense, do not even take that up because you cannot get there. If Ronald Reagan was really in favor of a balanced budget, he would have submitted a balanced budget.

Once again, this particular bill is taking away their opportunity to make that argument, because this is really saying OK, here is a process by which we get to balance, at which point we can impose the constitutional mandate, and so that element of their argument, that has been done somewhat with tongue in cheek in this House on many occasions, is being taken away from them, too.

I would say that everyone who votes against the Gramm-Mack proposal, should we get that vote, and I agree with the gentleman, I certainly hope we do, anyone who votes against that proposal is really saying I am not for trying, for even trying to get to a balanced budget, because all of the excuses are gone on this one. There is no longer any smoke, there is no cover. If you do not vote for this proposal, you are not even for trying to get there, because the fact is there is nothing in the House rules, in our Budget Act, there is nothing we have right now that is imposing a discipline. This is the chance, and the American people need to evaluate it that way.

Mr. GINGRICH. Let me carry it a step further. This is, in fact, a serious 5-year plan for a balanced budget. It tells you every year how much you have to cut spending. It tells you every year how to get a little closer to the balance.

Now, it is not easy, it is not obvious. It took a great deal of work by the gentleman from Texas [Mr. GRAMM] and the gentleman from Florida [Mr. MACK] to put it together. But it is a real plan.

Mr. RAY. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I will be glad to yield to my good friend and colleague from Georgia.

Mr. RAY. Mr. Speaker, I just want to rise to express my support for the Gramm-Mack amendment. It is my impression that across this country we are getting messages in this body that are giving us all kinds of signals and vibrations that the people of America are ready for us to practice some fiscal responsibility.

I recently mailed out 204,000 postcard questionnaires in my district, the Third District of Georgia. I have now received back several thousand that indicate that 74 percent of the people that have returned these questionnaires are interested in reducing the deficit and the national debt.

I would just like to ask the gentleman, are you feeling that maybe this body is not going to be in favor of the Gramm-Mack amendment? I had not felt that at this particular time. I certainly hope that we as a House, as a body, would support it and pass it.

Mr. GINGRICH. Let me say to my good friend, and I hope I do not get him in trouble by saying this, that he represents, I think, the commonsense, moderate, and conservative wing of his party, and that I am absolutely confident that if the liberal wing of your party will allow the amendment to come to the floor for a straight vote, that we will carry it. I am absolutely convinced that if we get a clean, up or down vote on the Gramm-Mack proposal, that we are going to carry it.

My fear is, and the gentleman has seen this happen all too often, that when you have a Democratic caucus in which a majority of the participants, and I know full well that my friend from Georgia is not one of them, but the majority of the participants voted for every single spending increase the day the House took up congressional spending, when you know that the pressures are immense on the liberal wing of the Democratic Party to avoid this opportunity to balance the budget by controlling spending, then I think you can appreciate why those of us on the Republican side will be very concerned that the Speaker would be under so much pressure that he would have to find a figleaf of procedural distortion to hide behind to avoid allowing the American people to have a straight vote.

Mr. RAY. If the gentleman might yield for 1 or 2 further minutes, I would like to, in order to put a little nonpartisan spirit into this very fine talk the gentleman is giving, along with the gentleman from Pennsylvania, Mr. [WALKER], I would like to ask the gentleman if he is aware of the White House budget and staff which is beginning to kind of amaze me just a little bit? We do have a few Republicans spending money, too, you know.

Mr. GINGRICH. I could not agree more, and I think White House in particular seem to have a tendency over time to always add a few more people year by year.

I would say quite candidly that there are some Republicans who have as great an addiction for spending as many liberal Democrats, and certainly in other body there have on occasion been Republicans of particular renown in that way.

But I would say, as a matter of fairness, that the underlying pressures for spending in this city are ideological. That is, I think there has been a liberal welfare state in a broad sense in that there is a tendency for liberals in particular to find new opportunities for spending.

I would also concede, as I think the gentleman from Georgia, who is on the Armed Services Committee would agree, clearly there are times and places where there have been increases in spending that are necessary.

Mr. RAY. If the gentleman will continue to yield, I thank him for those remarks, and one final word. I consider myself a fiscal conservative. I work in a nonpartisan way. I have been accused of voting too much with the President, but I would say that the President has been with me about 66 percent of the time, and I have not been with the President all of that time.

But I will say this: Just this week I attended the retirement services for General Vessey at Andrews Air Force Base. I was amazed at the extra support that the President received on a military installation. The President came to the ceremony in a helicopter. The Vice President came in a helicopter. The Secret Service came in a helicopter. There were several dozen chauffeurs and Secret Service people who came to escort and to drive them about 200 yards in more than a dozen chauffeured limousines, and all of this took place on kind of a heavily armed military reservation.

So I just want to point out while I certainly agree that we have got to put a cap on Federal spending, we have got to work, I think, as a body more strongly in a nonpartisan way. I certainly myself am going to do so, and I do thank you for giving me a minute or two to enter into this dialog.

Mr. GINGRICH. Let me make clear I think there is a tendency in this city, that one of the most frustrating things for anyone who is a supporter of Ronald Reagan has to be to watch the way in which the bureaucracy gradually overwhelms the political appointees. You can come into this city as the most conservative, tightfisted, fiscally tough person in the world, and by the time you have been introduced

to all of the different parts of the permanent Civil Service that reports to you, for example, the Secret Service, there is a tendency for all police forces, given an opportunity to have maximum security, to somehow magnify that until it becomes virtually a circus. We have the same tendency, as the gentleman knows, right here in the Congress where we have not necessarily made the Congress a lot safer from terrorists, but we have certainly made it a lot harder for tourists.

I think there is a tendency when you say to police forces why do you not do what you think is necessary to then suddenly find three additional station wagons full of guys who are traveling in the caravan, with 26 more motorcycle escorts, and three more helicopters.

Similarly, I have the same feeling in the armed services area where the gentleman from Georgia [Mr. RAY] is a true expert in the sense that we still have the McNamara Pentagon, that despite the fact that we have had 5 years of the Reagan administration, we have not yet reformed that large centralized base of redtape which presides over our defense. Nor have we had a serious effort to close bases that are not necessary, nor have we had the kind of tough effort I think to go to multiyear procurement and that kind of rational spending.

But I would say on a bipartisan basis that the Congress deserves a great deal of the blame for the absence of military reform, that it is the Congress, and its subcommittees and its staff procedures which likes redtape in many ways. It is the Congress which would scream in outrage if the President were to send up here a list of 30 bases to close. It is the Congress which does not like long-term, multiyear contracting because that takes power away from the House and Senate and makes us make real decisions over a 5-year cycle, and that would weaken the power of some senior Members of the House and Senate to go out and have their impact on the Pentagon.

What I am suggesting, I think, and I hope the gentleman would agree with me, is that for 50 years we have seen the gradual development of the liberal welfare state. It was a good idea under Franklin Roosevelt, and many parts of it are a good idea today. But we have excesses of it, and that is why I offered the work fair amendment today, because frankly, while we want to make sure that everybody gets fed, we do not necessarily want to make sure that adults who are able-bodied or under retirement age do not have to work to get it.

Mr. RAY. I happen to be prodefense on the Armed Services Committee and have worked very hard to see that we have an affordable defense. I think the gentleman makes a good defense.

I do believe that you have some problems there in that mass of bureaucracy, but I do think that a lot of those reforms are underway, and I would not hope, and I hope we do not react in the wrong way.

But I would say also I think the way to address many of these wrongs is to put a cap on the budget, to freeze that spending at a level where we have to freeze out some of the unnecessary programs, much of the waste, and then it will be this body's responsibility to be sure that the meaningful programs are not the ones that are thrown aside and the useless programs that are kept in there.

□ 2000

You make a very good point there. I am an advocate of that very same idea.

Mr. GINGRICH. Let me in closing pick up on the point made by my friend from Georgia on which he has focused. We have in the next few days a chance in the Congress to pass the Gramm-Mack proposal to bring spending under control, to set a 5-year legal path, not a resolution, not a hoax, not a wish, but a legal path which would require us to move step by step each of the next 5 years to a balanced budget. I think it is the most serious, the most optimistic, the most hopeful opportunity we have had to move toward a balanced budget in the 7 years I have been here.

I think it is vitally important that this House be given a straight up-or-down vote, and I think and hope that the American people will see in this struggle over the next 3, 4, 5 days real opportunity to have a direct impact on their Congressman or Congresswoman to make a real difference in reaching out and saying, "Now is the time to get spending under control. Now is the time to move toward a balanced budget."

I thank the Speaker.

ARMS CONTROL NEGOTIATIONS "HOPEFUL"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. RAY] is recognized for 10 minutes.

Mr. RAY. Mr. Speaker, during the recent recess I accompanied the arms control and disarmament panel on a 4-day trip to the sites of ongoing arms control negotiations. Our visit was enlightening and informative, and I would like to report to my colleagues on my observations on the current state of our arms control talks.

In Geneva, our panel met with Ambassador Max Kampelman, who heads the U.S. delegation on nuclear and space arms negotiations; Ambassador John G. Tower, chief negotiator on strategic nuclear arms reduction; and Ambassador Maynard Glitman, chief negotiator on intermediate-range nuclear forces reduction.

In Vienna, we met with Ambassador Kenneth Blackwill, the U.S. negotiator for the mutual and balanced force reduction talks [MBFR].

After meeting with our negotiators and their staffs, Mr. Speaker, I am confident that we have capable and knowledgable people representing the United States at the negotiating table.

The talks in Geneva began in January 1985, and entered their third round on September 19. Ambassadors for both the strategic arms reduction talks [START] and the intermediate-range forces talks [INF] expressed hope that the talks would eventually lead to progress in making substantial nuclear arms reductions in both of these important areas.

But, there are serious differences still between our position and the Soviets.

I am convinced that we are pursuing the correct approach with the Soviets at this point. Our commitment is to reducing or eliminating the tremendous stockpiles of offensive weapons, and moving our countries toward defensive deterrent forces. We have not been able to move the Soviets toward a position of compromise on this issue in the past.

However, the new proposals for reduction that General Secretary Gorbachev has announced that he will put on the table will be welcomed, I am sure, by our negotiators. One of their concerns has been that, too often, the Soviets publicly speak of reduction offers or proposals, but never actually put those proposals on the table in Geneva so they can be discussed. There is a possibility that other differences could be worked out if the Soviets put these new proposals forward in Geneva for serious negotiations.

Another point of serious contention between the United States and the Soviet Union is the strategic defense initiative. I firmly believe that this program is the reason the Soviets have returned to the negotiating table.

They are concerned that our country's advanced technology will enable us to create a defensive system which they have been trying unsuccessfully to produce. The key point of contention we now have with the Soviets on SDI is how far we can go and still be in a research phase as defined by the 1972 Antiballistic Missile [ABM] Treaty with the Soviet Union.

The Soviets want to define research as only designing and drawing up plans in a laboratory. Research to me goes a lot farther, because you have to do some designing and some levels of testing to advance your research.

But, since most research is done in a laboratory and is therefore not verifiable, we should look at reaching agreements on those areas that can be veri-

fied. There's no point in making agreements if verification isn't possible.

Somewhere between drawing plans and actual production is the line where research ends and final testing and production begins. That's a central point that we have to iron out with the Soviets on this issue.

I think we should continue with research on SDI, although I don't support extravagant funding levels for this project.

The MBFR talks in Vienna have been going on for 12 years, in an attempt to reduce the levels of conventional forces—troops, aircraft, artillery—of the Eastern and Western alliances in central Europe.

There are a number of issues that continue to separate the two sides, even after all these years. Primarily these issues are verification, redeployment distances, and disagreement over troop and weapons counts.

First, our country and NATO cannot agree to any reduction proposal unless each side can verify that the other is adhering to the agreement. This means onsite inspections, something the Soviets have so far refused to agree to.

Second, redeployment becomes a U.S. concern because if we withdraw our forces from Europe, that means back to the United States, 3,000 miles away. The Soviets, however, would only have to pull theirs back beyond the Eastern bloc countries—300 miles. Redeployment for them would be only a matter of hours, where it would be days for us.

Third, there is considerable disagreement over the number of troops and weapons each side has. Specifically, we disagree over whether the forces in East Germany, West Germany, Poland, Czechoslovakia, Belgium, the Netherlands, and Luxemburg should be included. All of these differences, and others are in contention in Vienna.

Many people wonder, Mr. Speaker, why we keep negotiating when, after 12 years, we've made very little progress. The answer is that is it vital that our two countries maintain a dialog. Not only is there the chance of progress, but the talks provide us with an ongoing forum where both countries can turn when a serious arms reduction proposal is made. If Mr. Gorbachev and President Reagan do make progress toward arms control in their November meeting, we already have the machinery in place to continue hammering out an agreement.

Considering that we are talking about ways to reduce the most destructive arsenals ever created in the world's history, I would say that anything we can do to keep the lines of communication open is a positive move.

THE ART OF (AND THE LACK OF) COMMUNICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. SWINDALL] is recognized for 60 minutes.

Mr. SWINDALL. I thank the Speaker.

Mr. Speaker, I am reminded, as I complete my ninth consecutive month in Congress, of one of the last cases that I had before I took a leave of absence from my law practice to come to this body.

There was a lady that came to my office who wanted a divorce, but before I talked with her about the divorce I decided that it might be helpful if I found out if she had grounds for divorce.

So I asked her if in fact she had grounds, and she looked at me and said, "Yes, as a matter of fact about an acre and a half."

I looked at her, and I said, "Perhaps I am not communicating well. Let me try again."

I then asked her if she had a grudge, and she looked, and she said, no, she did not have a grudge, but she did have a double carport.

I said, "Let me try this one more time a little bit more to the point. I said, "Does your husband beat you up in the morning?" She said, "No. Generally I get up earlier than he does."

At that point I began to recognize I was going to have to try a different tack entirely, and I said, "Ma'am, let me ask you, are you sure you really want a divorce?" She said, "No. Actually I don't want a divorce at all. It's my husband who wants a divorce. He contends that we have difficulty communicating."

□ 2010

I believe this House of Representatives, because of its actions over the course of the last 9 months, has given the American people reason to believe that we have difficulty hearing them and they have difficulty communicating with us, because in November of 1984 there was a resounding statement made by the American people, and that was they were fed up with deficit spending and they wanted some type of responsible course of action taken by this House of Representatives.

I came into this body optimistic that, finally, my colleagues were determined to do something about it. In the last 9 months we have talked more about South Africa than we have our own budget. One of my colleagues heard me make that statement earlier today and was distraught over it and came to me and said, "I am distraught that you would attack South Africa that way when in fact the deficit and South Africa have nothing to do with one another." I said, "You misunderstand my point. I am not in any way demeaning the issue of South Africa. I am simply saying that it tells you something about the misplacement of priorities when we cannot at least spend as much time discussing how we are going to address the deficit as we have South Africa. South Africa is an issue that, at best, we can marginally affect. The deficit is something we most certainly affect completely."

Even if you ignore the fact that we spend, in my judgment, far too little time addressing the budget itself, I think it is important to look at the fact that we have no intention in this body of following our own budget. If we had any intention of following our own budget, there would be no necessity for all of the arguments that I heard during the 1-minute speeches today about the impact of the Gramm-Mack bill that I am here to talk about tonight. I heard one of my colleagues from Colorado come up with a fancy chart that showed that the deficit under the Reagan administration was enormously larger than the deficit under any other administration. She attributed it to defense. I would like, before I talk about the Gramm-Mack bill, for just one moment to destroy that myth once and for all.

I will grant you that we spend money on defense that is being wasted. But I will further state that we are taking, I think, enormous and extraordinary measures to make certain that we correct those mistakes.

But let us not blame the deficit that we now have on either our President or on the defense budget. In fact, before coming here tonight, I picked up a copy of the historical tables, budget of the U.S. Government, prepared by the Executive Office of the President, Office of Management and Budget. I picked it up because there are some figures that I think are very, very relevant to our discussion.

In 1961, our country appropriated 9.7 percent of our total GNP to defense expenditures. That was 50.8 percent, almost 51 percent of the total budget. It spent at that time 8.8 percent on nondefense or 47.8 percent of the total budget.

In 1968 we spent 9.9 percent of our gross national product on defense, 46 percent of the budget. We spent 11.6 percent on nondefense, in terms of percentage of GNP, and 54 percent of the total budget on nondefense.

In 1982 we spent 6.1 percent of GNP on defense or 24.9 percent of the total budget. That same year we spent 18.4 percent of the GNP on nondefense or 75 percent of the total budget.

In 1984, last year, we spent 5.9 percent of gross national product on defense, 26 percent of the budget.

I mention that because this body is a master at comparing apples and oranges. It is all done with mirrors and tricks, and I think the American people are fed up with it.

We all know that the only way you can make any type of fair comparison between different budgets is to look at percentages of our total income. For example, when I first graduated from the University of Georgia, my first apartment that I shared with three other individuals cost less than $300 a month. Today that same apartment would undoubtedly cost closer to $700 a month in the same market. Does that mean that my apartment expenditures and housing expenditres went up? Of course it does. But the more relevant question is: In terms of percentage of income, did it go up? And chances are, you will find, as I found in my own illustration, that it was roughly the same. The percentage of my income which was in 1975 $15,000 was about the same as it is today, in terms of the percentage that Congressmen make, and I think we make $75,000 a year, and my housing here in Washington costs about $1,500 a month. So it is probably roughly the same.

Let us use those same types of illustrations, though, to look at our defense budget, and you will find that the only way you can do it is to look at the percentage of our entire income.

In 1961 we were spending 9.7 percent. That was under the Kennedy administration. In 1968, under the Johnson administration, we spent almost 10 percent of GNP on defense. It was 9.9 percent, 50 percent of the total budget.

Now, let us look at President Reagan's administration, in terms of defense. In 1982, the first year that he had any ability to affect that budget, 6.1 percent or 24 percent of the total budget.

The next year it was 5.9 percent.

So in fact it is almost half, in terms of what our total income was. And I say that because it is obvious that if we have a deficit that is now approaching $200 billion—in fact, it is over $200 billion—a year, it cannot be attributed to defense. If you look at the other side of the ledger, though, you can find very rapidly where it is being accumulated.

Nondefense, under the Kennedy administration, was 47.8 percent, almost 48 percent of the total budget.

Under the Johnson administration, nondefense was 54 percent of the total budget.

Under the Reagan administration, it is 74 percent of the total budget.

Is it not interesting that the same individuals that chastise our President for this humongous defense buildup, that we now find out in terms of relative comparison is substantially less than it was under the Kennedy and Johnson administrations, are now criticizing our President for trying to make cuts in the nondefense area, the entitlement programs.

You cannot have it both ways.

Let us look a little further. Another individual came up today, in fact, several people did, and I do not fault them for it because I think it is probably a fair analysis, and they said that under the Gramm-Mack amendment that would force us to live by our budget resolution, veterans would inevitably take it on the chin. I think they are right. I think they will take it on the chin along with every other group that expects to get a cost-of-living adjustment under the budget that we set forth.

You see, our budget basically said that we would "live by the following guidelines." Included in those guidelines were expenditures for veterans, expenditures for Federal employees and cost of living adjustments.

My question to my colleagues that are concerned about those individuals is: If we expect to live by the budget that we passed in August, we really need not be concerned about ever adversely impacting the veterans or the Federal employees or anyone else who expects the cost of living adjustment that was voted on by this body in our budget.

The reason they are upset is, though, they know good and well that this body has no intention to live by the budget. The tragedy of that is, we use the budget process to manipulate people into believing that we spend their money responsibly. The bottom line is, there has never been any intention by my colleagues or the majority of my colleagues to live by those budget figures. In fact, what they do year after year after year is come back, after understating the budget, and then ask for supplemental appropriations.

We will never get a handle on the deficit until we recognize that it is not the budget that causes the deficit. Rather, it is the appropriations process. When we spend the money, that is when we create the deficit. All in the world that the Gramm-Mack bill says is, we stated to the American people in August, when we passed our budget, that we would achieve a deficit of $179.9 billion, substantially less than the baseline, about $56 billion less than the baseline. It was the first step in a multistep process to ultimately balance the budget.

All the Gramm-Mack bill says is: Live by it. All it says is: Do not continue to defraud the American people by parading these budget figures by them one year and then coming in very deceptively and supplementing that budget.

□ 2020

We just spent a good deal of time and are continuing to spend time on the farm bill. If my memory serves me correctly, our budget said that we will spend $18.9 billion this year on the farm bill. I will guarantee you there is no intention to live within those guidelines. What they will do next year is exactly what they did this year: They will come back and supplement that budget so that we, in essence, create an even larger deficit.

I came here tonight to talk about this subject because I can think of no better time and no better place to address the deficit than at the moment that the Senate is going to vote to raise the debt ceiling to $2 trillion-plus. Many of you are probably thinking that it was not that long ago that you remember a $1 trillion debt ceiling. Well you are exactly correct. Five years ago this body and the Senate voted to raise the debt ceiling to $1 trillion. We are now doubling that because we have reached that point where literally it begins to double almost geometrically, if for no other reason because of the interest load. The interest load next year is estimated to be over 15 percent of the total budget.

If you go back to the Johnson and Kennedy years, you will find it was closer to 6 percent. It will continue to mushroom if we do not get a handle on what is basically the debt to increase. As my colleagues earlier pointed out, what is causing the debt to increase are the deficits which are caused by spending.

There was an interesting article recently in the Wall Street Journal that I think put its finger right on the problem. They pointed out the fact that the last time that we balanced the budget, in 1969, we were spending about 19.5 percent of what we all earned. That is, 19.5 percent of GNP. Today, we spend about 25 percent. If you want to address the deficit situation, you must first understand what causes it. What has caused it has not been the tax cut. What has caused it has been the continued increases in spending, and certainly not the defense spending.

The beauty of the Gramm-Mack bill is that it does not get into specifics with respect to how we must achieve our deficit reduction targets. What it does say is though if we cannot present a plan, there will be a plan that is already built into the Emergency Deficit Control Act that will simply say this is the way it must be done. It will force this body to finally do something.

Incidentally, by way of an aside, I think it is right interesting that this all had to start on the Senate side. Many of you are probably wondering why has not the House this year voted to raise the debt ceiling? If the Senate has it incumbent upon it to raise the debt ceiling, must not the House also act on it?

Well, the reason we do not have to vote for it is another one of these sleight-of-hands that has been built

into the appropriations and budget process. What happens is the day that we vote for the continuing resolution on the budget, we automatically raise the debt ceiling. It does not take long to figure out why we do it that way. We do not want to face the American people and vote up or down on raising the debt ceiling. It is much easier to do it in a clandestine fashion. To do it by voting on your budget, and then automatically letting the budget conform.

The Senate, on the other hand, at least has the guts to come forth and debate this issue. It is my hope and my sincere desire that the Senate will in fact adopt the Emergency Deficit Control Act, or what I have been calling the Gramm-Mack bill, because it will finally, as my colleagues earlier stated, bring to this body the opportunity to decide if the budget process means anything, and whether in fact they have any intention whatsoever, any intention whatsoever, to even move in the direction of a balanced budget.

As I mentioned earlier, my colleagues came forth today ready to heap the blame on President Reagan; ready to heap the blame on anyone but themselves. In reality, there is only one body under our Constitution that can even begin to address this problem, and that is Congress. The President can propose budgets but the President cannot spend money. As I mentioned earlier, there is a spending process that causes the problem.

My colleague from Georgia [Mr. GINGRICH] earlier pointed out, in I thought a very graphic fashion, why we have been unsuccessful thus far in terms of the specifics of even moving toward the direction of balancing the budget. He used the example of our own House budget. I would like to take one of those illustrations, and that was the illustration of the automatic elevator, to give you new insights into why we have deficits.

As we were debating, in fact it was in this exact position that we were debating that vote, I had made the argument that the very minimum the American people should expect from Congress is that if we are going to continue to waste hours and hours and hours talking about deficit reduction, the very least we could do is set a personal example. What better place than in our own House budget? Certainly what better place than on the vote to add 5 automatic elevator operators; nonessential employees.

At that point, a lady from Ohio stood and asked me if she could counter me on that point, and I said I would be happy if she did. She went into a diatribe about defense waste and waste and fraud in the defense budget. I looked at her and I said, "It seems to me that we are comparing apples and oranges." What does waste in defense have to do with whether or not we hire automatic elevator operators?

I think that right there is the essence of the problem. This group of individuals are so accustomed to diverting attention from the real problem that sometimes I think, in all sincerity, they cannot see the problem. But I do have a whole new understanding of why we have this unprecedented deficit. That is this: Apparently at least a majority of the Members of this body believe that it is encumbent on them, as encumbent Members of this House, every time they find waste and abuse and fraud in any aspects of the budget, to duplicate it elsewhere. Once you understand that mentality, you will begin to understand why we have had absolutely no success whatsoever in addressing the probem of deficit reduction.

The Gramm-Mack bill would essentially not only address 1986, but it would also address 1987, 1988, 1989, 1990 and 1991. I would suggest to you that unless we gradually move in the direction of balancing the budget, we will never have a balanced budget. I for one have cosponsored a number of bills that would constitutionally mandate a balanced budget. In addition to that, I have offered my own bill that would cause a constitutional requirement to balance the budget. In fact, the bill that I have sponsored is very similar to the Gramm-Mack bill in that it requires it to be done over a 5-year period of time.

The reason that I am supporting the Gramm-Mack bill at this point is that it is fairly obvious that irrespective of how many individuals in this country want a balanced budget amendment, they are not likely to see one in time to address the real problem. I do not think we can afford to wait 4 or 5 more years. I just mentioned that we just had the national debt double in the last 5 years, I suspect that it will double once again in the next 5 years, and then again and again, and again. We cannot afford the interest load on that. We will soon have the interest load in our budget literally exceeding any other aspect of the budget. Now it is 15 percent of the budget, the defense is slightly over 25 percent of the budget.

□ 2030

At the rate we are going, it will soon cost us more to pay interest than it does to defend this country, one of the first and foremost purposes of government.

The Gramm bill would simply say that in 1986 you must meet the deficit reduction target that you have already said you want to meet. Why in the world would anybody be upset about that? Why do we not simply vote for it?

By the same token, it says that for the next 3 or 4 years you must reduce by $36 billion per year until you level out in 1991 with a balanced budget.

I suspect that the real reason we are seeing all of this concern and consternation about balancing the budget is this. I suspect my colleagues recognize that the real power of the House of Representatives is not in the various votes that we make that you see totaled up here on the board, but rather it is in the power of the Appropriations Committee and the Rules Committee, because the way this House operates is that each bill goes into the appropriation process; that is, for spending money, and then the Appropriations Committee will pair off various spending measures. They will put in a dash of something that I could support and then a dash of something that I cannot support in the hope that by the time the whole package comes together individuals like myself will be confronted with a dilemma that quite simply they must vote for something say like Social Security, but they do not want necessarily to vote for something else that we think is wasteful spending.

Well, you might say to yourself, if that is the case, why not simply amend the bill so that you do not have to vote for what you disagree with.

For example, there was a recent supplemental bill that had the Legal Services Corporation, with which I totally disagree; it is the biggest boondoggle that probably ever has been perpetrated upon the American people, and it was mixed in with Contra funding, which I happen to agree with completely. I ultimately had to vote against the bill because I just simply could not bring myself to vote for the Legal Services Corporation and, regrettably, because of the rule that was passed in the Rules Committee and then passed here in the House we were not even allowed to amend it in any way.

They understand that under a balanced-budget procedure we would then begin to have to be fiscally responsible and eventually the Appropriations Committee and the Rules Committee would lose their power or at least a part of it.

I suspect they are also a little bit concerned because they recognize the fact that the American people are beginning to bring a great deal of pressure on deficit reduction. They are tired of people talking about it and then not voting consistently with it; so obviously, if they can ever avoid having to have the vote even come on the floor of the House, they can avoid that ultimate embarrassment, and we ought to be used to that by now, because if you will recall, a lot of people have talked about a line item veto. They say that a line-item veto would allow the President, who is being blamed for this deficit anyway, to at

least be able to go through and line item out those segments of any appropriation bill with which he differs.

Their smokescreen argument is that that is unconstitutional, that it would be an imbalance of power.

I would like to ask a question. How in the world can it be unconstitutional to give a President the power to do something with a sledge hammer that he cannot do with a scalpel?

You understand, the President may at any time veto an entire appropriation bill. He simply may not go in and take one line item with which he differs. If it is constitutional, which clearly it is, because it expressly so states in our Constitution, for the President to veto an entire package, it must necessarily and logically follow that it is equally constitutional for him to be able to veto any line item.

What is even more interesting under the bill proposed by my friend and colleague, Senator MACK MATTINGLY of Georgia, it would only be on a 2-year trial basis. Every 2 years the two bodies, the House and the Senate, must once again approve it and the President must sign it. It is the same basic argument.

My colleagues do not want the American people to know what kind of waste and fraud and what-have-you we are basically perpetrating through this appropriation process, that it literally takes five accountants to go through to figure out what we spent money on.

Can you imagine what would happen if suddenly the President came in and was able to line item off some of the extraordinary measures, the pork barrel that we see all the time, and then we had to once again come into this body and vote and then every one's name on this big board would show whether they are for or against that pork barrel? I suspect we would begin to see the total elimination of pork barrel, which would ultimately lend or lead to the total elimination of deficits.

In conclusion, I think that it is fairly obvious that this week may well be a very historic week. It will be a week where we have an opportunity to basically look squarely into the eyes of our constituents and say that when we ran in November of 1984 for election to this body, promising that we would do something about the deficit, that we were not misleading those people, that we would come into this body and vote consistently with those promises.

I have yet to meet a single individual that has told me that they were elected promising deficit spending, so this is their opportunity.

Even more important, though, will be the issue of whether we even vote on that issue. One of the great tragedies of the way the House does business is that many of the most relevant and burning issues of our time are never even debated on the floor of the House. They are never debated because they understand that the American people in fact want something that is vastly different than what this House is doing.

It is very apparent that we are having a great deal of difficulty, the American people are, in communicating with the Members of this House.

I hope and I pray that this week, not for our sakes so much as for our children and their children's sake, this Congress will at least for once show the intestinal fortitude to vote for the Emergency Deficit Control Act, so that by 1991 we will see once and for all a balanced budget.

QUITTING THE WORLD COURT DRIVES A STAKE INTO THE HEART OF THE RULE OF LAW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa [Mr. LEACH] is recognized for 60 minutes.

Mr. LEACH of Iowa. Mr. Speaker, the announcement today by the administration of its decision to terminate U.S. acceptance of the compulsory jurisdiction of the International Court of Justice must be considered troubling for a society committed to the rule of law.

The most fundamental issues of world politics today are, in the first instance, how we contain and constrain weapons of mass destruction, and in the second, how we can best advance the rule of law. To refuse any longer to submit political disputes to the World Court and abide by arbitration decisions of that body is to drive a stake into the heart of the rule of law. It symbolizes a retreat from post-World War II U.S. commitments to international law and international organizations.

The administration appears, by choice, to have abandoned the high ground and decided to advance foreign policy objectives on a lower playing field. By quitting the Court, the administration has joined the mob that political philosophers since Hobbes and Locke have defined as a state of nature. Civilized society requires law and third party arbitration. Rules without judges are meaningless. They stimulate uncivilized behavior and in the nuclear age jeopardize civilization itself.

Adherence to the rule of law should be the touchstone that distinguishes democracies from politically repressive systems of the left and right. We should never, by our disdain for international law, give totalitarian and authoritarian societies excuses for rationalizing acts of terrorism or other illegal conduct.

Few governments have armies that can stand up to the awesome military capabilities of the nuclear powers. But in the area of terrorism small autocratic states can compete on equal, and in some cases stronger, footing because acts of a terrorist nature are usually less acceptable in democratic societies. Accordingly, democratic governments like our own have a vested interest in conforming their foreign policies as pristinely as possible to international law.

The administration's decision today lowers the United States to the level of international scofflaw. If the United States cannot fight by the rule of law, our Government must protect our national interest by relying more exclusively on the premise that might makes right, that military power rather than adherence to law advances best America's values.

Today's decision cannot be viewed in a vacuum. It must be appraised against the backdrop of other decisions by the administration to withdraw from the jurisdiction of the World Court in cases involving Central America, to torpedo the Law of the Sea Treaty, to abandon UNESCO, and to stand increasingly alone, voting "no" without support from friend or foe on any number of issues before the United Nations and its affiliated agencies.

The ideological wagons appear to be drawing in a tighter and tighter circle around the White House. Neither the views of Congress nor a decent respect for the opinions of mankind seem to matter.

Unfortunately legal isolationism is not an abstract concern. It could not more ill-suit the times nor ill-suit history. The reality is that the United States will never again claim as great a percentage of the world's economic and military might as it did at the end of World War II. Security in the 20th century cannot be unilaterally achieved. It cannot be realized by building walls around our country, by turning away from international organs of cooperation, and relying on arms to press our will on others.

Security in the 20th century demands a credible defensive capability, but in the final measure it also demands a decent respect for the rule of law. An ethnocentric foreign policy that narrows international law is out of sync with reality. It is expensive, spiraling the arms race. A foreign policy that advances the rule of law is not only saner; it is cheaper than "Fortress America" isolationism.

Accordingly, with the gentleman from Ohio [Mr. SEIBERLING] and the gentleman from New York [Mr. MCHUGH] I have today introduced a resolution deploring the administration's cavalier decision to uproot four decades of American foreign policy. Senator HATFIELD has introduced similar legislation in the other body. I urge my colleagues to give it their most serious consideration.

Mr. Speaker, I yield back the balance of my time.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RINALDO (at the request of Mr. MICHEL), for today, on account of official business.

Mr. MCCANDLESS (at the request of Mr. MICHEL), for today and Tuesday, on account of attendance at the International Monetary Fund Conference in Seoul, Korea.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. STRANG) to revise and extend their remarks and include extraneous material):

Mr. WALKER, for 60 minutes, today

Mr. LEACH of Iowa, for 60 minutes, today

Mr. SWINDALL, for 60 minutes, today

Mr. MACK, for 60 minutes, on October 8.

Mr. PURSELL, for 60 minutes, on October 8.

Mr. PASHAYAN, for 60 minutes, on October 8.

Mr. IRELAND, for 5 minutes, on October 9.

Mr. ECKERT of New York, for 5 minutes, on October 9.

Mr. SUNDQUIST, for 60 minutes, on October 10.

(The following Members (at the request of Mr. RAY) to revise and extend their remarks and include extraneous materials:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PEASE, for 5 minutes, today.

Mr. GRAY of Pennsylvania, for 5 minutes, today.

Mr. RAY, for 10 minutes, today.

Mr. WEISS, for 30 minutes, on October 8.

Mr. PEASE, for 5 minutes, on October 8.

Mr. PEASE, for 5 minutes, on October 9.

Mr. PEASE, for 5 minutes, on October 10.

Mr. OBEY, for 60 minutes, on October 7.

Mr. OBEY, for 60 minutes, on October 8.

Mr. OBEY, for 60 minutes, on October 9.

Mr. OBEY, for 60 minutes, on October 10.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FUSTER, prior to the vote on the Emerson amendment to H.R. 2100, in the Committee of the Whole, today.

Mr. BEREUTER, preceding the vote on the Tauke amendment to H.R. 2100, in the Committee of the Whole, today.

Mr. TRAXLER, following the rollcall vote on the beekeeper indemnity amendment offered by Mr. FRANK to H.R. 2100 in the Committee of the Whole, today.

Mr. BEREUTER, preceding the vote on the Badham amendment to H.R. 2100, in the Committee of the Whole, today.

(The following Members (at the request of Mr. STRANG) and to include extraneous matter:)

Mr. NIELSON of Utah.

Mr. CONTE in two instances.

Mr. OXLEY.

Mr. GEKAS.

Mr. BARTON of Texas in four instances.

Mr. GALLO in four instances.

Mr. WHITEHURST.

Mr. CRANE.

Mr. DORNAN of California.

Mr. LAGOMARSINO in two instances.

Mr. COURTER.

Mr. HYDE.

Mr. KOLBE.

(The following Members (at the request of Mr. RAY) and to include extraneous matter:)

Mr. SOLARZ in two instances.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. HAMILTON.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. YATRON.

Mr. GARCIA in three instances.

Mr. NATCHER.

Mr. MARKEY.

Mr. FASCELL in two instances.

Mr. FAUNTROY.

Mr. COLEMAN of Texas.

Mr. WIRTH in two instances.

Mr. MARTINEZ.

Mr. LELAND.

Mr. BOLAND.

Mr. TORRES.

Mr. MILLER of California.

Mr. DOWNEY of New York.

Mr. BONIOR of Michigan.

Mr. WILLIAMS.

Mrs. BOGGS.

Mr. MATSUI in two instances.

Mr. DYMALLY in two instances.

Mr. COYNE.

Mr. RODINO.

Mr. ACKERMAN in two instances.

Mrs. BOXER.

Mr. HUBBARD.

Mr. LEHMAN of California.

Mr. TORRICELLI in two instances.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED

Bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 274. An act to provide for the national security by allowing access to certain Federal criminal history records; the committee on Interior and Insular Affairs.

S.J. Res. 97. Joint resolution designating the Study Center for Trauma and Emergency Medical Systems at the Maryland Institute for Emergency Medical Services Systems at the University of Maryland as the National Study Center for Trauma and Emergency Medical Systems; to the Committee on Energy and Commerce.

S.J. Res. 150. Joint resolution to designate the month of March 1986 as "National Hemophilia Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 174. Joint resolution to designate November 18, 1985, as "Eugene Ormandy Appreciation Day"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that the committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 393. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following day present to the President, for his approval, a bill of the House of the following title:

On October 3, 1985:

H.R. 2475. An act to amend the Internal Revenue Code of 1954 to simplify the imputed interest rules of sections 1274 and 483, and for other purposes.

ADJOURNMENT

Mr. LEACH of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 43 minutes p.m.) the House adjourned until Tuesday, October 8, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2097. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Army's proposed Letter Offer to Turkey for defense articles, pursuant to 10 U.S.C. 133b (96 Stat. 1288); to the Committee on Armed Services.

2098. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting a listing of contract award dates for the period November 1, 1985 to December 31, 1985, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

2099. A letter from the Deputy Assistant Secretary of Defense, transmitting notice that the Department of the Air Force intends to exclude the clause concerning examination of records by the Comptroller General from a proposed contract with the Ministry of Defense of the United Kingdom for the acquisition of the Rapier Missile System for a cooperative air base point defense program for selected bases in Turkey, pursuant to 10 U.S.C. 2313(c); to the Committee on Armed Services.

2100. A letter from the Chairman, Federal Home Loan Bank Board, transmitting the annual report of operations for 1984, pursuant to the act of July 22, 1932, chapter 522, section 17(b) (69 Stat. 640); to the Committee on Banking, Finance and Urban Affairs.

2101. A letter from the Interagency Committee on Cigarette and Little Cigar Fire Safety, transmitting a report on the technical and commercial feasibility and economic impact of developing cigarettes and little cigars with a minimum propensity to ignite furniture and mattresses, pursuant to 15 U.S.C. 2054 nt; to the Committee on Energy and Commerce.

2102. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification that El Salvador has been added as a potential participant in proposed antiterrorism assistance to a foreign country, pursuant to FAA, section 574(a)(1) (97 Stat. 972); to the Committee on Foreign Affairs.

2103. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Army's proposed Letter of Offer to Turkey for defense articles, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2104. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2105. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report on the political contributions by Joseph Ghougassian, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the State of Qatar, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2106. A letter from the Commissioner of Examinations, Immigration and Naturalization Service, transmitting a copy of the order granting defector status in the case of an alien who has been found admissible to the United States, pursuant to INA, section 212(a)(28)(1)(ii)(b) (66 Stat. 182); to the Committee on the Judiciary.

2107. A letter from the Jewish War Veterans, U.S.A., National Memorial, Inc., transmitting the report and financial audit for fiscal year ended March 31, 1985, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

2108. A letter from the Under Secretary for International Affairs and Commodity Programs, Department of Agriculture; transmitting a global assessment of food production and needs, and planned programming of food assistance for fiscal year 1986, pursuant to the act of July 10, 1954, chapter 469, section 408(b) (91 Stat. 552; 94 Stat. 2246; E. O. 11963); jointly, to the Committees on Agriculture and Foreign Affairs.

2109. A letter from the Comptroller General, General Accounting Office, transmitting a report entitled: "Reviews of the Audits of the Financial Statements of the National Credit Union Administration's Operating and Share Insurance Funds for the Year Ended September 30, 1983", pursuant to 31 U.S.C. 9106(a); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

2110. A letter from the Comptroller General of the United States, transmitting a report on the Strategic Petroleum Reserve: "An Overview of its Development and Use in the Event of an Oil Supply Disruption" (GAO/RCED-85-134; September 30, 1985); jointly, to the Committees on Government Operations and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS. Committee on Government Operations. Federal Enforcement of Textile and Apparel Import Quotas (Report 99-305). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONYERS (for himself, Mr. GEKAS, Mr. EDWARDS of California, Mr. BERMAN, Mr. BOUCHER, Mr. BRYANT, Mr. RODINO, Mr. FISH, and Mr. MCCOLLUM):

H.R. 3511. A bill to amend title 18, United States Code, with respect to certain bribery and related offenses; to the Committee on Judiciary.

By Mr. BIAGGI:

H.R. 3512. A bill to amend title XVIII of the Social Security Act to authorize the President to enter into reciprocal agreements for health care services furnished to medicare beneficiaries outside the United States; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. CONTE (for himself and Mr. BARNES):

H.R. 3513. A bill authorizing the President of the United States to present a gold medal to Sargent Shriver, and authorizing the Secretary of the Treasury to sell bronze duplicates of that medal; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DYMALLY (for himself and Mr. BROWN of California):

H.R. 3514. A bill to establish a U.S. Design Council within the Department of Commerce; jointly, to the Committees on Science and Technology, and Energy and Commerce.

By Mr. WYLIE (for himself, Mr. ST GERMAIN, Mr. BARNARD, Mr. BARTLETT, Mr. BEREUTER, Mr. CARPER, Mr. CHANDLER, Mr. COOPER, Mr. DREIER of California, Mr. ERDREICH, Mr. FRANK, Mr. GONZALEZ, Mr. GORDON, Mr. GROTBERG, Mr. KLECZKA, Mr. KOLBE, Mr. LAFALCE, Mr. LEACH of Iowa, Mr. LEHMAN of California, Mr. LEVIN of Michigan, Mr. MCCOLLUM, Mr. MCKINNEY, Mr. MCMILLAN, Mr. NELSON of Florida, Ms. OAKAR, Mr. PARRIS, Mrs. ROUKEMA, Mr. VENTO, Mr. WORTLEY, Mr. WRIGHT, Mr. MICHEL, Mr. LOTT, Mr. LAGOMARSINO, Mr. CHENEY, Mr. LEWIS of California, Mr. VANDER JAGT, Mr. BROOMFIELD, Mr. CHAPPELL, Mr. CONTE, Mr. CRAIG, Mr. DEWINE, Mr. FRENZEL, Mr. GINGRICH, Mr. GRADISON, Mr. HYDE, Mr. IRELAND, Mr. KASICH, Mr. MCCAIN, Mr. MCEWEN, and Mr. SAXTON):

H.R. 3515. A bill to eliminate foreign predatory export credit practices, establish a tied aid credit facility, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FAUNTROY:

H.R. 3516. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to facilitate the issuance of bonds and notes by the District of Columbia, and to authorize a formula-based annual Federal payment to the District; to the Committee on the District of Columbia.

By Mr. FRANK:

H.R. 3517. A bill to amend title 3 of the United States Code to authorize the Secretary of State to provide protection for foreign diplomats in the United States in extraordinary circumstance; to the Committee on Public Works and Transportation.

By Mr. JACOBS:

H.R. 3518. A bill to amend title 18 of the United States Code to allow the transportation and mailing of material concerning lotteries authorized by State law, and for other purposes; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

By Mr. KASICH:

H.R. 3519. A bill to provide access to criminal history record information for national security purposes for the Department of Defense, the Office of Personnel Management, or the Central Intelligence Agency; jointly, to the Committees on Armed Services, Post Office and Civil Service, the Judiciary, and the Permanent Select Committees on Intelligence.

By Mr. MACK (for himself, Mr. BARTON of Texas, Mr. ARMEY, Mr. BARTLETT, Mrs. BENTLEY, Mr. BEREUTER, Mr. BLILEY, Mr. BOEHLERT, Mr. BOULTER, Mr. BROWN of Colorado, Mr. BROYHILL, Mr. BURTON of Indiana, Mr. CAMPBELL, Mr. CHANDLER, Mr. CHENEY, Mr. CLINGER, Mr. COBEY, Mr. COBLE, Mr. COLEMAN of Missouri, Mr. COMBEST, Mr. COUGHLIN, Mr. COURTER, Mr. CRAIG, Mr. DAUB, Mr. DELAY, Mr. DEWINE, Mr. DIOGUARDI, Mr. DORNAN of California, Mr. EDWARDS of Oklahoma, Mr. FAWELL, Ms. FIEDLER, Mr. FIELDS, Mr. FISH, Mr. FRANKLIN, Mr. FRENZEL, Mr. GALLO, Mr. GINGRICH, Mr. GOODLING, Mr. GRADISON, Mr. GREGG, Mr. GROTBERG, Mr. GUNDERSON, Mr. HAMMERSCHMIDT, Mr. HENRY, Mr. HOPKINS, Mr. HUNTER, Mr. HYDE,

Mrs. JOHNSON, Mr. KASICH, Mr. KEMP, Mr. KINDNESS, Mr. KOLBE, Mr. LAGOMARSINO, Mr. LATTA, Mr. LEWIS of California, Mr. LIGHTFOOT, Mr. LIVINGSTON, Mr. LOEFFLER, Mr. LOTT, Mr. LUJAN, Mr. MCCAIN, Mr. MCCANDLESS, Mr. MCCOLLUM, Mr. MCEWEN, Mr. MCKERNAN, Mr. MCKINNEY, Mr. MCMILLAN, Mrs. MARTIN of Illinois, Mr. MICHEL, Mr. MILLER of Ohio, Mr. MILLER of Washington, Mr. MONSON, Mr. MOORHEAD, Mr. NIELSON of Utah, Mr. OXLEY, Mr. PARRIS, Mr. PURSELL, Mr. QUILLEN, Mr. RIDGE, Mr. RITTER, Mr. ROEMER, Mr. ROGERS, Mr. ROTH, Mrs. ROUKEMA Mr. ROWLAND of Connecticut, Mr. RUDD, Mr. SAXTON, Mr. SCHAEFER, Mrs. SCHNEIDER, Mr. SCHUETTE, Mr. SENSENBRENNER, Mr. SHAW, Mr. SILJANDER, Mr. DENNY SMITH, Mr. SMITH of New Hampshire, Ms. SNOWE, Mr. STANGELAND, Mr. STRANG, Mr. SUNDQUIST, Mr. SWINDALL, Mr. TAUKE, Mr. TAUZIN, Mr. VANDER JAGT, Mrs. VUCANOVICH, Mr. WALKER, Mr. WEBER, Mr. WORTLEY, Mr. WYLIE, Mr. ZSCHAU, Mr. LUNGREN, Mr. TAYLOR, and Mr. LOWERY of California):

H.R. 3520. A bill to require a graduated reduction of the Federal budget deficit, to balance the budget, to establish emergency procedures to avoid deficit overages, and for other purposes; jointly, to the Committees on Government Operations, and Rules.

By Mr. LATTA:

H.J. Res. 415. Joint resolution proposing an amendment to the Constitution of the United States to provide that appropriations made by the United States shall not exceed its revenues, except in time of war or a national emergency declared by the Congress; and to provide for the systematic repayment of the national debt; to the Committee on Judiciary.

By Mr. LOWERY of California:

H.J. Res. 416. Joint resolution disapproving the deferral of certain budget authority for the Urban Mass Transportation Administration; to the Committee on Appropriations.

By Mr. FORD of Michigan (for himself, Mr. SUNIA, Mr. FEIGHAN, Mr. PERKINS, Mr. DASCHLE, Mr. DWYER of New Jersey, Mr. HAYES, Mr. HORTON, Mr. LANTOS, Mr. FOWLER, Mr. FOLEY, Mr. DINGELL, Mr. HENRY, Mr. WAXMAN, Mrs. COLLINS, Mr. OWENS, Mr. HOWARD, Mr. MATSUI, Mr. ANDERSON, Mr. DAUB, Mr. MCKERNAN, Mr. DE LA GARZA, Mr. FRANK, Mr. ROE, Mr. DYMALLY, Mr. MORRISON of Connecticut, Mr. SMITH of Florida, Mr. CROCKETT, Mr. BOUCHER, Mr. CHANDLER, Mr. KILDEE, Mr. FUSTER, Mr. YOUNG of Missouri, Mr. MURPHY, Mr. RAHALL, Mr. BERMAN, Mr. COLEMAN of Missouri, Mr. GILMAN, Mr. GAYDOS, Mr. ATKINS, Mr. SOLARZ, Mr. FUQUA, Mr. LAFALCE, Mr. CLAY, Mrs. BENTLEY, Mr. MOORHEAD, Ms. KAPTUR, Mr. ROSE, Mr. FAZIO, Mr. SABO, Mr. WEAVER, Mr. CONYERS, Mr. JONES of Oklahoma, Mr. WEISS, Mr. LEVIN of Michigan, Mr. MOLLOHAN, Mr. PANETTA, Mr. WILLIAMS, Mrs. BURTON of California, Mr. RODINO, Mr. DE LUGO, Mr. SAVAGE, Mr. MARTINEZ, Mr. HOYER, and Mr. BIAGGI):

H. Con. Res. 207. Concurrent resolution to recognize the 20th anniversary of the Higher Education Act of 1965 and reaffirm its purpose; to the Committee on Education and Labor.

By Mr. LEACH of Iowa (for himself, Mr. SEIBERLING, and Mr. MCHUGH):

H. Con. Res. 208. Concurrent resolution deploring the intention of the United States to withdraw from the compulsory jurisdiciton of the World Court; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H. Res. 76: Mrs. MARTIN of Illinois, Mr. BARNES, Mr. DEWINE, Mr. TORRICELLI, Mr. SCHEUER, and Mr. WEBER.

H. Res. 154: Mr. TAUKE.

H. Res. 180: Mr. DELAY, Mr. LIGHTFOOT, Mr. DREIER of California, Mr. MOORHEAD, Mrs. BENTLEY, and Mr. BOULTER.

H. Res. 194: Mr. MANTON, Mr. MOORE, Mr. PEPPER, and Mr. LEVINE of California.

H. Res. 260: Mr. KINDNESS, Mr. GINGRICH, Mr. WEBER, and Mr. HUGHES.

H. Res. 277: Mr. DELAY, Mr. HUNTER, Mr. RUDD, Mr. BURTON of Indiana, and Mr. GINGRICH.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.J. Res. 313: Mr. WHITEHURST.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the clerk's desk and referred as follows:

227. By the SPEAKER: Petition of the Dawson County Commissioners Court, Lamesa, TX, relative to the Fair Labor

Standards Act; to the Committee on Education and Labor.

228. Also, petition of Milan Horacek, Bonn, Federal Republic of Germany, relative to nuclear testing; to the Committee on Foreign Affairs.

229. Also, petition of Peter J. Cojanis, Washington, DC, relative to the right to petition the Congress; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3008

By Mr. LUNGREN:

—Page 13, after line 17, add the following:

(5) Any differential (or portion of a differential) identified under subsection (b)(1) which cannot be accounted for by the application of job-content and economic analyses shall be presumed to be the result of labor market supply and demand factors.

EXTENSIONS OF REMARKS

TRIBUTE TO GARY P. HAYES—A TRUE FRIEND OF LAW ENFORCEMENT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. BIAGGI. Mr. Speaker, I want to pay a very special tribute today to Gary P. Hayes, the founding executive director of the Police Executive Research Forum. Gary died on September 8 at the very young age of 40. He had much left to give this Nation, especially our law enforcement community. Without question, his loss will be sorely felt. However, I do not intend to dwell on that loss today. Instead, I want to discuss Gary's exceptional commitment to law enforcement, his shining example, and his many triumphs.

I am especially proud to pay tribute to Gary because of the two common bonds that we share—a law enforcement background and the fact that we are both New York City natives. Over the last few years, I am pleased to say that we also shared many goals, including the enactment of legislation to outlaw armor-piercing "cop killer" bullets, and the establishment of a National Law Enforcement Heroes Memorial. Both of these goals will soon be achieved, and Gary, as well as the very competent individuals he guided at PERF, deserve much of the credit for these soon-to-be completed success stories.

Gary's interest and activities in law enforcement date back to 1969 when he served as a patrolman for the Westchester County, NY, Parkway Police. Later, Gary went on to become a lawyer, a consultant to the Police Foundation, an assistant to the mayor of Boston for police affairs, and an assistant police commissioner of Boston from 1973 to 1976.

In honor of his expertise and considerable abilities, Gary was appointed by President Carter to serve on the Justice Department's Bureau of Justice Statistics Advisory Board. This would have been a full career for most ordinary people, but Gary was extraordinary and he had much to do in the short time he was given. He went on the serve as chairman of the National Forum on Criminal Justice. He was a member of the steering committee of the National Crime Prevention Coalition. He was a founder of the Commission on Law Enforcement Accreditation, and he served on the National Coalition of Jail Reform.

The list goes on, but certainly for the final 10 years of his life, the bulk of Gary's vast professional energies were devoted to the Police Executive Research Forum, a professional organization representing some 80 police chiefs of major cities. Under Gary's strong and effective leadership, PERF has provided important management services and training; selected police chiefs; conducted research; and fostered innovation in police operations. Gary was handpicked to be the founding executive director of this well-respected group by Patrick Murphy, former New York City Police Commissioner and the founder of the Police Foundation. In what turned out to be an appropriate twist of fate, PERF awarded their second annual leadership award earlier this year to Patrick Murphy. I was most honored to present the award that night in May, but more importantly, the occasion provided a fitting opportunity for two longtime friends and associates to express their deep mutual respect for one another. In fact, as moving as any words that were spoken that night was Gary's presence, since he was in a very weakened state due to his illness. It was obvious to anyone in attendance that Gary Hayes was an admired man—by those who knew him well and by those who only knew of him. He had done so much in so little time and, mainly, it was because he cared so much about what he was doing.

The police community has made great strides in recent years and to a large measure that progress is due to Gary's work, especially at PERF, which provided the law enforcement community with a unique opportunity to exchange ideas and information important to American policing.

Gary gave us a great deal and through his work and his example he will continue to give. He was a truly special person and his death is a major blow to us all. Yet, we are comforted by all he was able to accomplish and we offer our condolences and continued strength to his wife, Susan, and his two sons, JG and Alexander.

HOLDING PRETORIA ACCOUNTABLE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GARCIA. Mr. Speaker, today's New York Times had an article by columnist Anthony Lewis on the need for the Reagan administration to speak with clarity in its condemnation of the South African Government.

As Mr. Lewis so aptly points out, we must hold Pretoria accountable for its actions, "by speaking with one voice, acting on stated principles, marshaling its economic and political resources against the racist system it condemned." He's right. I submit his article for the RECORD:

[From the New York Times, Oct. 7, 1985]

WHY NOT DO AS WE SAY?

(By Anthony Lewis)

BOSTON.—"They should deal with the African National Congress." That was Secretary of State Shultz's urgent advice last week to the South African Government. He said Pretoria should release Nelson Mandela from prison and start talking with him and his banned nationalist organization.

Sound advice, most specialists on South Africa would say, because the A.N.C. has widespread support among the black majority. But there is a puzzling question about it: Why don't Secretary Shultz and his colleagues take the advice themselves?

Reagan Administration officials will not meet leaders of the A.N.C. There have been casual encounters with American diplomats at receptions here and there, but U.S. policy excludes regular appointments and discussions.

South African business leaders went to Zambia last month to talk with officials of the A.N.C. But those officials are not invited to the U.S. Embassy in Lusaka. Oliver Tambo, the A.N.C. president, came to this country last spring and met business people and others. He was not invited to the State Department.

Urging South Africa to talk with the A.N.C. while we do not do so ourselves is so curious that to make sure the policy remained in effect, I asked the State Department last week. A spokesman checked with an official of the African Bureau and then reported: "You're right, we have never met the A.N.C."

That anaomaly is indicative of the more general trouble with the Reagan policy toward South Africa. While Mr. Shultz says that the apartheid system must go—and means it—the message does not get through to South Africans with clarity or force.

The recent history of American policy is one reason for its muffled impact in South Africa. For four years the Reagan Administration acted on the assumptions that P.W. Botha's Government was ready for accommodation on its borders and meaningful reform at home. The assumptions were fallacious. And acting on them, cozying up to the white regime, made the United States look like its supporter.

Events forced a change in the Reagan policy. Mr. Botha's brutal repression at home and military aggression across the borders made it impossible to keep saying with a straight face that change was at hand. Congressional opposition was about to overwhelm the policy when President Reagan made his timely switch to modest sanctions against apartheid.

But American responses to the alarming reality of the South African crisis remain faint and timid. Mr. Botha insults the United States, and the whisper comes back. His police shoot children, and you have to strain to hear any comment from the President of the United States.

There could hardly be a more deliberate insult, between supposed diplomatic friends, than what the South African Government has done lately on its borders. Its planes

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.
Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

and troops have struck deep into Angola, and it has admitted supporting terrorist forces in Mozambique—both in violation of the most serious undertakings to the United States.

To that President Botha has recently added personal insults. Speaking to a party congress, he said: "President Reagan, who has much to say in his mispronouncing way about apartheid, is shoving Indians into reservations . . ."

Or think about the behavior of the police as they occupy black townships in South Africa. A study by Cape Town University found that 83 percent of detainees it questioned reported being tortured by such methods as electric shock, strangulation and beating.

Imagine how the Reagan Administration would react if Nicaragua invaded one neighboring country and admitted supplying terrorists in another, if its police shot into crowds of people day after day, if it detained 3,000 of its own citizens without charges, including hundreds of children. The outrage would not be muffled.

A State Department spokesman, Sondra McCarty, said last month: "With the state of emergency in effect, and violence and repression affecting the lives of so many South Africans, we believe the South African Government must be held publicly accountable for its actions."

Exactly. But the United States Government is not holding Pretoria accountable in the only way that will be understood: by speaking in one voice, acting on its stated principles, marshaling its economic and political resources against the racist system it condemns.

Other American institutions, then, must make the message loud and clear. As through this whole year of South African crisis, the American public will have to lead its Government to a proportionate response.

A TRIBUTE TO ALFONSE W. SCERBO

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GALLO. Mr. Speaker, I rise today to share with my fellow Members of Congress the accomplishments of a truly dedicated and committed public servant, Alfonse W. Scerbo.

In public life, we all have the occasion to meet fellow public servants. Each and every one has recognized his or her personal obligation to our system of government and to improving our collective quality of life. For this, all public officials deserve recognition.

Some public servants, however, deserve a special recognition. Among the thousands of elected and appointed public servants there are a few who singularly distinguish themselves through their actions, their accomplishments and their abilities. Al Scerbo is one of these special people.

Al has a long history in local and county government. In the 1960's, Al, like many of us, began his political career as an alderman in his hometown of Boonton, NJ. After serving in that post, Al was selected as the mayor.

In 1971, Al's horizons broadened and he pursued a position on the Morris County Board of Chosen Freeholders. After campaigning tirelessly across the county, Al was, in fact, elected to the board. Within 2 years, he had so effectively won the praise and admiration of his colleagues that he was selected as the deputy director of the board, under my watchful eye as the director of the board.

Not being content to serve as an elected official, Al decided to seek a spot on the Freeholder Board by an unorthodox path and did not choose to seek reelection in 1975. Instead, he was returned to the board in January 1976, by appointment to fill my unexpired term.

After serving numerous terms as the deputy director of the board, Al was selected as director of the board in 1979.

Over his many years of service, Al was known for his many leadership qualities. His cool head and clear thought process; his evenhanded approach to problem-solving; and, his willingness to consider new and novel approaches to resolve difficult situations earned him the admiration of all with whom he shared public life.

More important and more profound than the admiration of his colleagues, is the personal acclaim and applause that the people of Morris County hold for Al Scerbo. Al Scerbo is a nice guy who tries his hardest and goes the extra mile to help anyone who needs him, and everybody knows it.

Republicans, Democrats, and independents all know that Al can be counted on, that he will do whatever is needed to solve a problem, and that he can deliver.

Al Scerbo can't find a corner of Morris County where he isn't welcomed with cheers, handshakes, and, of course, kisses. The chidren know him, their parents know him, and their grandparents know him. They all like him, and they all have a reason to thank him.

Mr. Speaker, that is precisely why I have taken this body's time today: To thank Al Scerbo.

I want to add my voice to the chorus from my county. I want to add my voice to those of the Knights of Columbus, the VFW, the American Legion, the Elks Club, the National Sokols and the members of UNICO International, who all just want to say "Thanks, Al."

I would like to request that the rest of my colleagues take note of the retirement of Al Scerbo and that we, as a body, offer our thanks, praise, and applause as he walks from the county courthouse to the golf course.

TRIBUTE TO DR. ALFRED J. SHERMAN

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GEKAS. Mr. Speaker, at a tribute dinner on October 13, 1985, the Harrisburg Committee State of Israel Bonds will present the Maimonides Award to Alfred J. Sherman, M.D., for best personifying the "Maimonides" tradition, "both as a caring physican and as a concerned citizen dedicated to the welfare of his community and the State of Israel."

I would like to bring to the attention of my colleagues in the U.S. Congress some of the contributions Dr. Sherman has made over the years which have made him an excellent choice for this very prestigious award. Presently, Dr. Sherman is chief of service, obstetrics and gynecology, at the Harrisburg Hospital and is an obstetrician and gynecologist at Holy Spirit Hospital. He is a clinical assistant professor of obstetrics and gynecology at the Milton S. Hershey Medical Center.

In addition to Dr. Sherman's medical contributions, he has served the Harrisburg community in a number of capacities. He was cochairman of the United Jewish Community Appeal for 2 years and has recently completed his term as president of the United Jewish Federation of Greater Harrisburg. He is also a past president of Ohev Sholom Temple and of the Dauphin Unit of the American Cancer Society. He has been a board member of the Tri-County Planned Parenthood Association and the Harrisburg Community Theatre.

Mr. Speaker, I can think of no better way to pay tribute to Dr. Sherman than by naming him recipient of Israel's 1985 Maimonides Award. Dr. Sherman is an outstanding example of dedication and excellence. I ask that my colleagues join me in saluting this fine man.

TWENTY-FIVE YEARS OF INDEPENDENCE FOR THE REPUBLIC OF CYPRUS

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 1, 1985

Mr. COYNE. Mr. Speaker, in 1960, after years of deliberation and negotiations, an island in the Eastern Mediterranean Sea was granted independence from the colonial rule of the British Government. The Zurich-London Agreement, introduced to the world a new, democratic nation: the Republic of Cyprus.

The Republic of Cyprus, soon thereafter recognized by the U.S. Government, began to grow economically. The country's economy continues to operate at nearly 100 percent employment. Emphasis has been placed on education, and because of that, the Cypriot nation today has a literacy rate of almost 99 percent. Cyprus has become an important trading partner for the United States, and the United States is one of the major suppliers of goods and services to the Republic.

The Republic is a neutral nation often involved in many negotiations in the Middle East. The Cypriot citizens have exhibited their willingness to help people by assisting many Jews, after World War II, who wished to live in Israel.

Cyprus has accomplished much in its 25 years of independence. But we cannot overlook the fact that a conflict between Greek and Turkish Cypriots has divided this beautiful island. This conflict began in 1974 has cast a dark shadow over this nation's efforts to insure freedom and peace for its citizens. Many other countries have expressed their hope for a solution to this problem, but for 11 years little progress has been made. Just recently, however, talks have begun and there is hope that a peaceful and amicable solution can be reached to resolve the conflict in this Republic.

AMERICANS SAVE FOR RETIREMENT WITH 401(k)'S

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. SOLARZ. Mr. Speaker, nothing succeeds like success. So it stands to reason that 401(k) plans are in trouble. Congress created these innovative savings programs, known as cash or deferred arrangements, or CODA, under section 401(k) of the Internal Revenue Code in the Revenue Act of 1978. Although CODA's became effective in 1980, preliminary regulations weren't until 1982. Final regulations are still awaited.

But since 1982, 401(k)'s have really taken off. CODA's are flexible and easy to establish retirement savings programs, so much so that workers in all income groups and in companies large and small have put them into place at an astounding rate in the last few years. An estimated 19 million Americans are eligible to participate in 401(k)'s and an estimated 10 million are already doing so.

Employees of companies with fewer than 100 employees remain the largest group of workers not covered by pension plans. These are the very companies who have adopted a 401(k) feature in the workplace for their employees in great numbers since 1982. Thus, more and more lower- and middle-income working Americans will have the opportunity to participate in a retirement plan than would have otherwise. Nearly three times as many workers are participating in these plans who earn less than $20,000 than they do in IRA's. Why?

The 401(k)'s chief virtue is its flexibility. This is important for younger workers, lower-income workers, and small employers. Many 401(k) plans permit hardship withdrawals and loans which means that a family knows they can get at their money in an emergency. This means they will be more likely to contribute to their plan. And because in 80 percent of these plans the employer makes a matching contribution, and in all cases sets up and administers the plan so the worker doesn't have to worry about the details, workers have great incentive to participate.

Making it easy for Americans to save is a laudable goal and should be a guiding principle of tax policy in this country, but sadly it is not.

Unfortunately both the administration's and the Joint Taxation Committee's tax reform proposals are anti-savings and biased against employer-sponsored programs. This is a time when we must actively encourage Americans to save; the United States lags behind all other industrialized countries in personal savings rate.

Tax policy should not only create good social policy—such as saving for retirement— but good economic policy. We can reduce retirees' future dependence on government by creating and enhancing incentives to save for retirement.

Nearly one-third of the 56 million Americans covered by an employer-sponsored retirement plan have little or no savings beyond the assets in those plans.

Good public policy dictates expanded U.S. personal savings, Government incentives for retirement income, and reduced dependency on Government by future retirees. Let's protect the success of 401(k) plans and help America save for its future.

THE UNITED STATES, NICARAGUA, AND THE RULE OF LAW

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GARCIA. Mr. Speaker, Prof. Abram Chayes of Harvard University wrote an illuminating article for the October 4 edition of the Washington Post on Nicaragua's case before the World Court against the United States. No matter how one feels about the merits of the case, Professor Chayes' article is a useful explanation of the relationship between the International Court of Justice and the United States.

I submit his article for my colleages' perusal.

[From the Washington Post, Oct. 4, 1985]

WHAT KIRKPATRICK IGNORES

(By Abram Chayes)

Jeane Kirkpatrick's article in The Washington Post Sept. 30 ["Nicaragua's U.S. Lawyers," op-ed] betrays an unfortunate ignorance of both the World Court and the rule of law.

As to the first, the International Court of Justice and its predecessor have been deciding disputes between states for 65 years now. Presidents Hoover, Roosevelt, Truman, Eisenhower, Kennedy and Carter all sought in one way or another to increase the use of the court by the United States and to broaden our acceptance of its jurisdiction.

During the last 40 years, the United States has called upon the court many times, most recently in the Iranian hostages case and in the dispute with Canada about the boundary between our two countries in the Gulf of Maine. Not until the Nicaragua case, when it appeared the United States might lose, has this country ever questioned the court's professional judicial character.

The 15 judges of the court are either distinguished international law scholars or former foreign office legal advisers. They have spent their lives in international law and are professional international lawyers.

The present bench includes six nationals of advanced industrial states, a much higher proportion than is found in the General Assembly. Six judges are from developing countries and two are from communist states, China and Poland. (There is ordinarily a judge from the U.S.S.R. on the court, but Judge Morozov resigned recently and no Soviet judge will sit on the Nicaragua case.) Despite this diversity, in the Iranian hostages case the court voted unanimously with the United States. Similarly, in the Nicaragua case, on major issues decided so far, the court has voted by overwhelming majorities for the position of Nicaragua. The State Department and Jeane Kirkpatrick insist, for example, that the case is "inappropriate" for judicial consideration. But the court, after full oral and written argument in which the United States did participate, voted unanimously against the U.S. position. Only then did President Reagan decide to pick up his marbles and go home.

As to the rule of law, you will look in vain for any mention of it in Jeane Kirkpatrick's article. The role of the court, she seems to think, is confined to resolving disputes over "legal technicalities." In her view, apparently, the fundamental norms of international law governing relations among states are not applicable to the formulation of American foreign policy. That consists of whatever the president says it is. The rest of us are bound to "accept the resulting decision"—and shut up.

But the bedrock proposition of our policy is that we are a government under law. This means that the actions of its elected officials, even when they are elected by landslides, are subject to and accountable before the law.

Since the days of Chief Justice John Marshall, international law has been a part of our law, and thus a part of the law that the president swears he will faithfully execute. The claims of Nicaragua are based on the U.N. Charter and the OAS Charter, which, under Article VI of the Constitution, are "the supreme Law of the Land."

This fundamental principle of government under law may put the United States under constraints in the field of foreign affairs that do not operate on others who profess different ideas. Some, perhaps Jeane Kirkpatrick among them, think this puts us at an unfair disadvantage. I cannot believe that accountability before the law is a handicap in the conduct of our foreign policy. Even if it is, that is a consequence of the kind of country and society we have chosen to be, and I, for one, would not have it any other way.

Jeane Kirkpatrick impugned the loyalty of myself and the other Americans who are participating in the presentation of Nicaragua's case before the World Court. It would be easier to take lessons in patriotism from someone who had a better understanding of the fundamental ideas on which our country is founded.

A TRIBUTE TO WORKMEN'S CIRCLE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. BIAGGI. Mr. Speaker, it is with great pleasure I rise today to pay tribute to one of this country's most remarkable labor and social movements—the Workmen's

Circle. This Sunday, October 13, they will commemorate the 85th anniversary of their founding. As New York's senior member of the Education and Labor Committee, I am especially proud to have this opportunity to honor such a vital force in Labor.

The Workmen's Circle was founded on September 5, 1900 as a community of Jewish workers seeking to integrate Jewish culture and life with social justice and the new trade unions. One of their most laudable attributes at that time was their labor lyceum, a gathering place for members of the community with a variety of purposes. These lyceums served as medical centers, soup kitchens, classrooms, auditoriums for concerts and theatrical performances, collection centers for clothing and books for needy children, and havens for striking workers and their families. It was through the service of these labor lyceums that the Workmen's Circle became known as the "Red Cross of Labor Unions."

The Workmen's Circle was one of the first unified and strong labor unions. The members raised funds in support of fellow unions—New England's textile workers, Pennsylvania's steel workers, Harlan County's coal miners, and others. This spirit of camaraderie led Joseph Weinberg, then president of the Workmen's Circle to state in 1933:

The entire labor movement, especially the unions, is in a critical situation. There is only one organization, the Workmen's Circle, which remains as strong as iron. . . . Every section of the labor movement turns to us for assistance. It must be said in praise of our branches that they respond to every appeal from another labor organization with warmth and brotherliness.

In the 1940's, the Workmen's Circle was a forerunner in the fight against Nazism, with members organizing boycotts against Nazi goods. Because of their relations with East European labor organizations, the Workmen's Circle learned of the gas chambers and other Nazi persecutions. The Workmen's Circle was the source of public protest against Hitler and a source of aid for those who escaped him.

Today's Workmen's Circle leads the fight against Soviet persecution of the Jewish community. Workmen's Circle continues to sponsor choral and orchestral groups, youth clubs, sports and recreational activities; although the labor lyceum is now the community house, like the one I have visited on Hillman Avenue in the Bronx. Workmen's Circle has sustained Yiddish theater and many other cultural activities. Through their 85-year history, the Workmen's Circle has been a leader in social justice, union organization, and cultural preservation.

For the benefit of my colleagues, I would now like to insert the full text of a letter written to Dr. Barnett Zumoff of the Workmen's Circle from the Honorable Lane Kirkland, president of the AFL-CIO, which honors the Workmen's Circle on their anniversary:

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,

Washington, DC, August 2, 1985.

Dr. BARNETT ZUMOFF,
The Workman's Circle,
New York, NY.

DEAR DR. ZUMOFF: On behalf of the AFL-CIO, I am delighted to extend warmest congratulations and good wishes to you and your fellow officers and all members of the Workman's Circle on its 85th anniversary.

I can think of no institutional alliance that is closer, more durable or more highly prized than the one that has bound the Circle in common cause with the American labor movement throughout this century.

Amid the sweeping changes of the scientific, technological and economic revolution that surrounds us, the goals we share do not change. As we continue the struggle to create a society of equal rights, equal justice and equal opportunity for all, we are proud to have the Workmen's Circle at our side.

Happy anniversary to you all.

Sincerely,

LANE KIRKLAND,
President.

SIX FORMER DEFENSE SECRETARIES CALL FOR REAFFIRMATION OF THE ABM TREATY

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. FASCELL. Mr. Speaker, last Thursday was the 13th anniversary of the entering into force of the 1972 treaty between the United States and the Soviet Union on the limitation of antiballistic missile systems.

The ABM Treaty has been one of the most successful arms control agreements to date and has been effective in limiting superpower competition in defensive systems. There is concern among many in the Congress as well as in the arms control community, that the activities of both superpowers in the area of ballistic missile defense hold the potential for resulting in a dual arms race. As such, I welcome the President's recent statements reaffirming U.S. commitment to the treaty and his intention not to violate the principles of the treaty as he proceeds with his research program to investigate SDI technologies and systems.

Marking this important anniversary of the entering into force of the ABM Treaty, six former defense secretaries issued a statement calling on the United States and the Soviet Union to "avoid actions that would undermine" the ABM Treaty.

Former secretaries Harold Brown, Clark Clifford, Melvin Laird, Robert McNamara, Elliot Richardson, and James Schlesinger, reaffirmed their view that "this international agreement of unlimited duration makes an important contribution to American security and to reducing the risk of nuclear war."

In view of the upcoming summit between President Reagan and Soviet Leader Gorbachev and the third round of the Geneva arms control talks, the anniversary of the ABM Treaty affords both superpowers an important opportunity to renew their commitment to that treaty and its contribution to reducing the likelihood of nuclear war.

1985—NATIONAL 4-H WEEK

HON. WILLIAM H. NATCHER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. NATCHER. Mr. Speaker, it is a pleasure to join with the members of 4-H as they celebrate National 4-H Week, October 6-12.

4-H is administered by the Cooperative Extension Service of the Department of Agriculture and assists young people in acquiring knowledge, developing skills, and forming attitudes that will enable them to become self-directing, productive members of society.

Last year, 4.4 million young people, ages 9 to 19, participated in this informal education program. They were guided by 630,000 volunteer leaders.

In 1984, 227,330 youth in Kentucky were enrolled in extension education programs of the University of Kentucky and 33,991 of these young people were in the Second Congressional District, which I have the privilege to represent. I am proud of the fact that Kentucky has the second largest number of 4-H participants in the United States. The food and nutrition home economics program has the largest national participation, with over 1 million youth enrolled. Kentucky has over 100,000 youth enrolled in nutrition projects. In other youth enrollment, Kentucky leads in youth learning about fruits and vegetables, in career exploration, and the study of local government, community, and citizenship.

Program highlights for 4-H in Kentucky included the culmination of a 2-year pilot for development of new computer project materials. This is now in the hands of the National 4-H Council for printing and distribution across the United States. A new television program, "The Energy Challenge," is now seen on Kentucky Educational Television. Significant strides were made throughout the State in involving handicapped youth in 4-H activities. The American Heritage Conference saw 62 members tour the State Capitol and 173 attend the national meeting in Washington, DC. The extended citizenship program took one 4-H'er to the Netherlands and another to Sweden. 70 international students came to the United States through this program. The first State 4-H rabbit show and the second State 4-H dairy goat show contributed to an increase in participation in animal science projects. 100 Kentucky counties had youth involved in agronomical projects and all 120 counties had youth participate in the resident camping program. On May 6, 1985, more than 100 persons attended the ground-breaking ceremonies for the 4-H Leadership Training Center located at the Lake Cumberland 4-H Camp in Jabez, KY.

The Kentucky Association of Extension Homemakers honored the Kentucky

project champions with a State championship plaque. Recognition for project accomplishments is an important part of the 4-H program. Each year top records are selected on the area level and are then submitted for State competition. Each State champion is eligible to compete for a trip to the National 4-H Congress.

I am pleased to announce that the following champions are from the Second Congressional District: Lisa Diehl, bread and food nutrition; Jason Heath, conservation; Donna Quinn, dog care and training; Linda Rogers, food preservation; Jeff Jones, petroleum, power, and saftey; Darren Patton, pets and small animals; and Joey Thompson, swine.

Two leaders from the Second Congressional District were recognized at the annual 4-H Week banquet. Mary Diehl of Breckinridge County and May Jiffiers of Spencer County were presented the Feltner Leadership Award for outstanding leadership.

I am also pleased to announce that one of the Kentucky State 4-H officers for 1985-86 is from the Second District. Kay Lanham of Marion County has been elected treasurer for the coming year.

The Kentucky Extension 4-H staff, volunteers, and members continued their efforts during the past year to maintain a strong, dynamic 4-H program throughout the Commonwealth of Kentucky. They are to be commended for a job well done and I want to take this opportunity to wish them continued success in their future endeavors.

A TRIBUTE TO BERNARD M. SHANLEY

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GALLO. Mr. Speaker, I rise today to alert my fellow Members of Congress of one more accomplishment in the life of Mr. Bernard M. Shanley.

Bern Shanley is familiar to many Members of this House. During the Eisenhower years, Mr. Shanley served as the deputy chief of the White House staff, acting counsel to the President, and as secretary to the President. In 1964, he was the Republican candidate for the U.S. Senate.

Mr. Shanley has been a dedicated leader in New Jersey politics for as long as I can remember. Bern has always been one of the special few who could always be counted on. He has never taken the easy route or the path chosen by many. Rather, he has been in the forefront, leading the party and the community, making the hard choices and fighting the good fight.

His achievements have been recognized by Presidents, Senators, Governors, and Members of this House who have far more seniority than I. He was also recognized by Pope John Paul II, who bestowed the honor of Knight of St. Gregory the Great upon Mr. Shanley in 1979.

On September 28, 1985, Fordham Law School awarded the Dean's Medal of Recognition to Bern Shanley for his devoted service to his country, his community, and his profession.

Mr. Speaker, once again high praise has been offered to Bern Shanley. Praise of this sort is not earned easily, nor is it bestowed lightly. It is right and fitting that this medal be conferred upon Bern Shanley, and it is proper that we all take note of yet one more honor being added to an already extensive list of accomplishments and honors.

REMARKS FOR THE THREE CHAMPIONSHIP TEAMS IN WESTFIELD, MA

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. CONTE. Mr. Speaker, it isn't often that a city can boast of three title winning teams, but Westfield, MA, has been graced with the North All-Star Little League squad, and the Babe Ruth All-Star 13-year-old division and 14- and 15-year-old division.

I am proud to day that the North All-Star Little League team finished one game shy of the Little League World Series in Williamport, PA. With the State and New England titles under their belts, these boys of summer are honored to be one of the top 16 teams in the world.

Westfield's own Babe Ruth All-Star 13-year-old division skillfully took the State title before accepting defeat in the New England tournament. That is a testament to their strength and character as true champions.

I join the city in applauding the achievements of the Babe Ruth All-Star 14- and 15-year-old division who hold the State title for their league. These talented young men illustrate what hard work and determination can lead to—State championship title.

Obviously, all of these young men are dedicated and talented individuals who are led by many generous men—men who forfeited their private time to instill sportsmanship and comradery in the future Presidents, Congressman, and statesmen of our fine country.

I pay homage to these three teams today just as the city of Westfield on September 8 payed homage to these fine young men at the "Westfield Champions" parade.

Congratulations, fellows. And good luck for future successes on the baseball diamond.

A TRIBUTE TO CHRISTOPHER COLUMBUS

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. YATRON. Mr. Speaker, each year for the last 29 years, the Italian Columbus Day Celebration Committee of Berks County has organized events in commemoration of the discovery of America. This October 13th, the committee will celebrate the 493d anniversary of Columbus' achievement and its own 30th year. In offering a tribute to Christopher Columbus and his discovery today, I would also like to honor the committee for the many special events and community services it has planned and organized for Berks County in the last three decades.

The story of Christopher Columbus and the celebration of his discovery have been repeated in our country since 1792 when the first American observance of October 12th occurred in New York City. In 1892, a larger and more nationwide celebration was planned, and during the first decade of the 20th century, the push for making the day a legal holiday began. Finally, in 1968 after many years of national celebrations, President Johnson declared October 12th a Federal holiday to be observed on the second Monday in October. For the Italian Columbus Day Celebration Committee of Berks County, Christopher Columbus' discovery has been recognized and appreciated since 1955.

In honoring Christopher Columbus each year, we, as a nation, pay tribute to the explorer whose bravery and courage changed the course of world history. The significance of the October 12, 1492, landing on the island of San Salvador in the Bahamas has given the Genoa-born seaman a unique place in the records of world events. With financial backing and the designation "Admiral of the Ocean Sea" from King Ferdinand and Queen Isabella of Spain, Columbus set sail on August 3, 1492, for what he thought was Asia. Having accepted two of Ptolemy's calculations about the Earth's circumference and the eastward extension of China, Columbus expected to find the East Indies. Reaching the Bahamas 2 months later and exploring some of the surrounding islands, Columbus returned to Spain in March of the next year. In three subsequent voyages, the explorer found other lands including, Guadeloupe, the Lesser Antilles, Puerto Rico, Trinidad, and Venezuela, making him the discoverer of the continent of South America.

Americans are grateful to Columbus and to his native Italy and to his supporter Spain for the discovery nearly 500 years ago that was the beginning of European exploration and colonization of the New World. Were it not for his daring adventure and conviction, the first American colonists may not have had a place to resettle.

The Columbus Day Celebration Committee of Berks County helps our community

remember this special achievement each year. This year, in paying homage to Columbus, I would also like to thank the committee for its work over the years and congratulate its members on its 30th anniversay. I wish the committee many more years of Columbus Day celebrations.

DETRIMENTAL EFFECTS OF H.R. 1616

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. OXLEY. Mr. Speaker, I would like to submit for the RECORD a speech delivered by E.J. Nagele, vice president, human resources, the Tappan Co., Mansfield, OH, on the detrimental effects of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985, on American Businesses. I encourage my colleagues to read this informative speech before casting a vote on this legislation.

TALK GIVEN AT NAM BY E.J. NAGELE

I am Pete Nagele, vice president, human resources of the Tappan Co. in Mansfield, OH.

Tappan has 4,000 people in 10 plants with sales of about $450 million. We manufacture major kitchen appliances and have six cabinet plants. Our plants have varied in size from 50 to as high as 1,000-plus people.

John Tysse has summarized the legal aspects of the bill. I will discuss some of the effects.

H.R. 1616 can be punitive in nature and, more importantly, may lead to more job losses than gains. There will be extensive restrictive regulation to flesh out the act and the act is an open invitation to individuals or labor organizations to try to delay what may be an absolutely required shutdown or layoff.

I will focus my comments in two areas: (1) The possible effects of the bill on a small troubled single plant company, followed by some comments on Tappan's own experience in a plant closing; (2) the seriously flawed layoff requirements.

Let's take a look at the small company first.

The company is struggling to stay alive. It's creditors, customers, and suppliers have been working with it because their experience in the past has been that the company has been able to "make it"—but the company may be close to or in technical bankruptcy and they are watching closely to protect their own interests.

In the meantime, the company is trying in every way possible to cut costs, including having gradually laid off perhaps half of its work force in two or three layoffs.

The hard facts say that if this bill is passed, the company should either provide a 90-day notice of closure or of mass layoff.

Obviously, if notification is required, then all the creditors, customers, and suppliers will also be immediately aware. I believe that the serious risk here may be the immediate loss of customers, and the high probability that the creditors and suppliers will immediately demand as much money as they can get with the potential of effective bankruptcy for the company, and the immediate loss of jobs for the people. If there is no money for the payroll, they can't pay the employees. The act won't change that.

What is in the best interest of the employees in a case like this?

Is it for the company to provide such notification, follow the procedures and possibly go immediately under?

I think not.

I noted that I would comment on our own specific experience in one 1980 plant closing. I stress "specific" because every plant closing situation is different. I know of no one time for notification that would be right for all.

We all tend to look at the big multiplant corporations that may be transferring the products to another plant. That does take time and longer notification is usually feasible; but, most plant closings are different.

With Tappan in 1980, the cost picture appeared to require a decision to close one plant and send its product lines to two other plants hundreds of miles away.

I wanted to comment on this because statements have been made that companies like ours make plans for closings as much as 12 to 18 months in advance and, therefore, there should be no problem in a 90-day notification requirement.

John Irving covered this question very ably in response to some committee questions. I want to support his comments.

Every company such as ours makes a number of tentative plans for startup of a product, removal of a product, plant expansion, plant closure, etc. My personal experience is that these tentative plans may be made, perhaps, 1 or 2 years ahead of time, but, further, that they almost inevitably change as new facts come to light.

When a possible closure is announced, the company will usually receive many suggestions and offers from the union, if there is one in place, or from the community and State.

We felt then, and do now, that in a possible closing situation, all such suggestions and offers should be thoroughly evaluated—not only from a business standpoint—but also, from a moral and, perhaps, legal standpoint—and only after such consideration is the final and irrevocable decision made and announced.

In our case, there were some unusual factors, including the necessity of long lead times to accomplish the transfer and a labor contract that was terminating near the possible closure point. We did not want the union and the people to feel that the possible closure announcement was made in response to their demands.

In any case, we announced the possible closure in early April 1980, the final irrevocable decision in late April, negotiated a severance contract in May, terminated assembly operations in October, and finally closed the plant in late November. Remember, this was an interplant transfer of product which required time.

The negotiations resulted in severance, continuation of medical, improvements in pension, and sincere assistance in trying to help find jobs.

Incidentally, I should note that the people in that plant did an outstanding job during the entire shutdown period.

Now let's touch on my second concern about the flawed layoff requirements. I've seen very little understanding of their serious impact on operations in this country.

All employers try hard to plan but we don't have a perfect crystal ball and we frequently have to adjust our work force. We can't maintain employment and build huge inventory without danger to the operation. Some of our plants may increase or decrease employment three or four times a year, or more—with usually only the youngest service employees being affected. We know the trends but we keep our work force as long as we can and then inevitably come to the point where next week or the week after that, there is simply not enough production for us to schedule.

The layoffs are usually indefinite but, hopefully, temporary. I suppose we could try to rationalize that every layoff of ours is temporary and not provide notification—but, then if the layoff continued, or if the aggregate number went over 50 during the 90-day period, we would be opening ourselves to claims that we really knew, or should have known, that the layoff was going to be indefinite and that it would exceed 6 months. We would be into a legal quagmire.

With the best of intent, I simply do not know how most of us can provide this required notification information and consultation on layoffs without seriously hurting our operations and possibly causing more job losses later.

Let me touch on a local news item. On September 4, our Mansfield News Journal had an article with the headline stating, "Work Force Halved at Roth Firm." The article noted that the company had laid off 45 of it's 85 employees; but, that the president was expressing optimism that some would be called back by the end of the year.

Because I was to comment on this bill, I called Klaus Bauer, the president of Roth. I don't know him or the company.

I described the layoff provisions of the act and asked him if he could honestly have predicted the layoff 90 days ago.

He said there was no way that he could have done so since 90 days ago, the plant was scheduled for 24 hours a day, 7 days a week.

I then asked him if he could honestly predict how long the layoff would last. He said that too would be impossible, but that he hoped he would have a partial recall by the end of the year.

My opinion is that this bill, or any similar punitive notification bill, could have put this company in real danger—and we need these companies. (Read article noting that the company had started in 1982 from zero employees and then reached 100 employees.)

These are the kind of companies we need. We should not put them in danger.

One further comment in this area. While my focus was on the smaller plants, some of our plants have been in the 500 to 1,000 employee range and other companies are obviously much higher.

In a larger company, a 50-person layoff is traumatic to the individual, but the significance of the number 50, against a total work force of perhaps 5,000 or 10,000 is not high, either for the operation or the community. An aggregate of 50 persons over a 90-day period would be continuously triggering the act for a number of companies.

Essentially what this layoff clause and the bill itself will tend to do is to try to force us to freeze the work force. You know or should know the ultimate result of that kind of approach. It is possible job loss.

In past years, the horror stories, such as the steel closings in Youngstown, and the Monongahela Valley, the Wisconsin Steel story, Atari, and others have been widely publicized. They make good press. Those situations were and are terrible.

What is not publicized are the many positive, voluntary, and effective actions that have been taken by many companies and communities.

Please don't feel that the right way to say jobs or assist people in getting other jobs is to develop a punitive bill that, in fact, may cause job loss.

I believe that the right answers include continuing to stimulate job formation as this country has so successfully done, and to find the ways and the funds to provide incentives for employers to provide as much notification and other assistance as is possible in their specific situation.

Finally, you have heard more detail today about the task force which Secretary Brock is setting up at the request of some House members. It is to evaluate the problem and return with recommendations. Since H.R. 1616 or any other similar punitive bill will, in my opinion, not save jobs, I would hope that you review the report before any recommended passage of any bill.

Thank you very much.

THE PRIDE OF DOROTHY S. BULLITT

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. SWIFT. Mr. Speaker, it is with considerable pleasure that I would like to call to the attention of my colleagues a feature in Channels magazine "celebrating those who set the highest standards of excellence in the electronic media." This salute to excellence recognizes the contributions made to American society from such diverse corners as the American Playhouse and the Grand Ole Opry; and from network executives to local broadcasters.

It comes as no surprise to me, nor I suspect will it surprise others from the Pacific Northwest, that Channels has focused its praise on Dorothy Bullitt, founder of KING Broadcasting.

I have, over the years, met many fine broadcasters. But there is no question that this praise is especially well deserved. I would ask that this salute to a fine organization and its quality people be reprinted in the RECORD.

[From Channels, September-October 1985]

THE PRIDE OF DOROTHY S. BULLITT

King-TV has occupied a special place in its city's communal consciousness since 1949 when it began broadcasting to Seattle and the Puget Sound region. It's damnably difficult to say just why, even for Seattleites who've been watching Channel 5, sometimes with affection, sometimes exasperation, for well-nigh 30 years.

What seems to set KING apart from its local competitors, and from stations in many other cities, is that it doesn't rely on contrived on-air personalities to win audiences. It relies on people just as they are.

Since 1949 the most important of those people has been a lady named Dorothy S. Bullitt. In that year, Mrs. Bullitt, daughter of a lumber baron, was already in middle age and long widowed when she acquired the license of Seattle's first television station, then designated KRSC. The station is now called KING, and the company she and her daughters control, King Broadcasting, also owns three other television stations, seven radio stations, and several small cable systems in four Western states. Mrs. Bullitt is now 92, and has not taken an official role in station management for a decade and a half, but it is a rare day when she is not seen in KING's corporate offices. Her character defines KING as thoroughly now as it did 36 years ago.

Mrs. Bullitt never acted the role of public figure, nor that of tough businesswoman, though she was clearly capable of playing corporate hardball when the need arose: Station hagiography records that she "stole" network affiliation with NBC from the network's longtime radio affiliate KOMO by the simple expedient of cornering General David Sarnoff in his private railway compartment after a broadcast convention and making her case to him one-on-one.

But business seems never to have been Mrs. Bullitt's primary interest. She must have articulated her basic attitude to her staff many times over the years, because several present employees recall it in very much the same words: "There is no way I can lose money in this business with a network affiliation in a growing city, so this station is going to be something I can be proud of."

Pride, for Mrs. Bullitt, is based on public service, and KING over the years has devoted more than its share of staff, budget, and airtime to traditional kinds of television public service: documentaries, election coverage, public service announcements, and news.

"In my opinion they adhere more than any other station to the real reason a station has a license," says a New York advertising man who has dealt with KING for decades (but doesn't want to be quoted by name). "And they put their public-service programs on in prime time, not at 2 a.m."

KING's newcasts come in first in Seattle ratings at 11 p.m., a close second at 5 p.m., but at 6:30 the station consciously risks coming in third. Rather than airing standard 6:30 newscasts like the competition's, KING devotes the half hour to in-depth coverage of a maximum of three topics.

As Mrs. Bullitt saw it, it was important for the news operation to be well funded, strongly staffed, and, above all, independent. "Independent," at KING, meant several different things, among them independence from the opinions of ownership. It also meant independence from the prevailing winds of public opinion. In 1965, Mrs. Bullitt's son, Stimson, then station manager, took to the airwaves in person to state opposition to United States involvement in Vietnam. The effect—not just on the public or in local broadcast circles—was enormous. Bullitt's lonely editorial was probably largely responsible for the notion that still lingers in some circles that KING is "a left-wing operation."

From a detached point of view, KING looks about as left wing as the American Bar Association, but to some minds unpredictability of any kind is a sign of unsound opinions; and KING, for better or worse, has rarely been predictable. In large part, that's due to the kind of people KING has hired over the years.

In its early days, KING, like all other television stations, had to draw its news staff from the other media; but it continued to do so long after communications degrees had become the common first step to a broadcasting career. In the stormy 1970s, during the managership of Stimson Bullitt, the net was cast even wider. "The theory was: Television was something that could be *learned;* so look for people with good educations and interesting ideas and throw them into the pot," says David Brewster, who was a junior English professor at the University of Washington when tapped to be an assignment editor for KING News. "If they sank, too bad; you gave someone else a chance."

Brewster himself was one of the sinkers—though, after a stint on another KING venture, *Seattle* magazine, he bounced back nicely to become editor-publisher of Seattle's city paper, *The Weekly.* But others stayed afloat, and their idiosyncrasies, as much as their broadcasting skills or intelligence, colored the station's image ineradicably. Even back in black-and-white days, news anchor Charles Herring would unpredictably depart from his sage, no-nonsense Cronkite-style newsreading to interject flickers of angry-Jehovah judgment or Russell Baker irony. Editorialist Herb Altshull might as easily devote one of his five-minute commentaries to a night at the opera as to goings-on at city hall. Investigative reporter Charles Royer (now running for his third term as Seattle's mayor) brought a trenchant (and sometimes near-libelous) personal edge to his exposés of questionable economic and political practices.

Giving individuals fairly free rein hasn't always been good for the station as a whole. Over the last nine years, there have been (including interim appointments) eight news directors. Some seem to have suffered burnout from trying to ride herd on a staff of argumentative individualists. The instability has shown up on the air, and in the ratings: In recent years, KING's *Evening News* has swung from the top to a poor third and back again, and a visible lack of clear news focus has contributed to the swings. (At the moment, under news director Don Varyu, the trend seems to be upward, and the overall look and pace of the *Evening News* is cleaner and tighter than it's been in a decade—with, so far, no loss in depth.) Individualism goes further at KING than allowing talking heads sometimes to talk like people. So far as outsiders can judge, KING management seems designed to allow room for varying opinions to be heard and for fresh ideas to surface. Instead of filling every time slot with reliable syndicated audience draws, KING gives time to the young program wizard Bob Jones and his production department, which usually has some experimental project on the air or in the works. This season it was *Almost Live,* a Lettermanesque chat-variety show with tinges of Merv Griffin and Monty Python.

Greg Palmer is one of KING's people who embodies what's special and valuable about the station. Physically ponderous, defiantly balding, more dangerous-looking with a smile on his face than most people would be armed with a club, Palmer is uncategorizable. For a number of years, he served as the news department's all-'round culture vulture and humorist, without ever stooping to undignified clowning or Shalit-like fulsomeness.

During the same period, Palmer wrote, directed, and produced (entirely within the news department and on a shoestring budget) the very odd and charming satiric program *The Year (So Far) in Review.* But he is also capable of feature reporting as good as any done today. Standing out among the many reports that accompanied the celebration of the 40th anniversary of

D-Day are Palmer's daily reports from Normandy—in particular a few utterly tactful but heart-wrenching minutes spent with a veteran encountered on the beaches looking for the place where his own lifeline crossed the path of world history.

There are other people who've given KING its distinctive on-air character over the years—news anchors such as cool and capable Jean Enersen and Mike James, motherly morning-show host Bea Donovan, sardonic reporter-editorialist Don McGaffin, all the way back to kiddie-show host of the 1950s and '60s Stan Boreson and his imperturbable dog No-Mo. But it's Palmer who exhibits that character at its most concentrated: the sense of breathing, thinking, individual humanity glimpsed through the peephole of the small screen and extending well beyond it.

REVERSING OUR DETERIORATING TRADE POSITION

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. SOLARZ. Mr. Speaker, the trade policy of the United States is a subject that is currently attracting considerable attention around the country. Members will soon be asked to consider one or more bills designed to deal with our deteriorating trade position.

A thoughtful article on this subject by Richard N. Gardner, professor of law and international organizations at Columbia University, appeared in the New York Times recently. I would like to insert it in the RECORD for my colleagues' review.

[From the New York Times, Sept. 15, 1985]

SOUND ECONOMICS, SOUND TRADE POLICY

(By Richard N. Gardner)

The tidal wave of restrictive trade legislation pending in Congress has concentrated President Reagan's mind wonderfully. In his second term, he is beginning to give to trade policy the attention so sadly lacking in his first.

But so far he has dealt only with the politics of the problem, not with the economic fundamentals. He has not yet recognized that his free-trade objectives are being undermined, not only by the unfair trading practices of other nations but also by some of his own domestic and international policies.

On protectionism, the President has the right instincts. Import surcharges and other trade restrictions would again ignite inflation, making us less competitive, worsening our long-term trade imbalance and triggering foreign restrictions against our exports. They could also bring the foreign debt crisis to a potentially ruinous climax. Unable to export, debtor nations could not service their debts, and this would damage our banking system and even our national security.

Enforcing our laws against foreign unfair trade practices is essential to protect American interests and to restore confidence in Presidential leadership. But unfair trade practices abroad account for less than 10 percent of the $150 billion annual trade imbalance that is devastating basic industry in this country. A 10 percent solution is not enough. To deal with the other 90 percent, the President will need to consider fundamental policy changes in five key areas.

First, the budget deficit. As long as we go on spending more than we are saving, we will continue to borrow abroad to make up the difference. The high real interest rates necessary to attract foreign capital are a major cause of the overvalued dollar that drives up our trade deficit.

We will not escape this vicious circle until the President meets Congress halfway on deficit reduction—supporting some tax increases as well as limits on cost-of-living adjustments in Social Security and pension programs for middle- and high-income citizens. Without raising individual tax rates, we could raise at least $60 billion of additional revenue a year by a 30 cent gasoline tax, by a minimum tax on wealthy individuals and corporations, and by eliminating the deductibility of interest payments except for mortgage interest on principal residences.

Second, exchange rates. American leadership and support of liberal trade cannot coexist with an overvalued dollar. While we cannot return to fixed exchange rates, we can strengthen multilateral surveillance over domestic policies here and in other countries that determine the relationship among currencies. In return for accepting some international discussion of our domestic economic management, we could mobilize international pressure on Japan, West Germany and other countries to help our trade position by stimulating their economies. We can also limit extreme fluctuations in exchange rates by coordinated intervention in exchange markets with other key countries.

Third, a national program to enhance our competitiveness, even if we get the dollar down. A liberal trade policy cannot survive in the United States if our Government fails to show the same concern for promoting comparative trade advantages for our industries that our toughest competitors do for theirs. This does not mean half-baked "industrial policies." What it does mean, among other things is more Government assistance to worker training and to education (especially mathematics, science and engineering); maintenance rather than repeal (as the Administration proposes) of the tax credit and accelerated depreciation for investment in modern plant and equipment; and more Export-Import Bank credit facilities for our exporters.

Fourth, adjustment to imports. Since the whole nation gains from open trade policies, it must be willing to help individuals who lose. We need new programs to assist workers, industries and communities hurt by imports, emphasizing worker training rather than simple income maintenance. If import restraints are required in exceptional cases to avoid personal hardship, they should be selective, limited in time and conditioned wherever feasible on action by management and labor to restore competitiveness.

Fifth, capital flows. One main cause of the United States' trade imbalance is the collapse of historic markets in Latin America and elsewhere because of the debt crisis. The major debtor countries will need at least $10 billion more a year in public and private capital flows, as well as open markets for their exports, if they are to service their debts, make the necessary domestic adjustments and resume their role as healthy trading partners.

The World Bank could assure most of this additional money through direct loans and co-financing with private lenders, but only if the Reagan Administration abandons its opposition to a substantial increase in the bank's capital.

These five changes in President Reagan's policies would encounter political and ideological resistance from members of his Administration. Yet without movement in at least some of these areas, he will not merely see the end of his freetrade policies. President Reagan will be partly responsible for the collapse of what is left of the open-trading system—one of the United States' great postwar contributions to its own and the general welfare.

HELPING SALVADORAN REFUGEES

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. GARCIA. Mr. Speaker, last week, the Senate Judiciary Subcommittee on Immigration and Refugee Policy sent to the full committee a bill that would allow refugees from El Salvador to remain in the United States for 2 years without facing the threat of deportation.

The so-called Moakley-DeConcini bill has not yet been acted on in the House. Our colleague Representative JOE MOAKLEY wrote an article in the Los Angeles Times on August 18, explaining the bill and why we should support it. I submit his article for my colleagues' perusal, and ask that they support his bill.

[From the Los Angeles Times, Aug. 18, 1985]

SALVADORAN REFUGEES DESERVE A TEMPORARY HAVEN HERE

(By Joe Moakley)

It is wrong to deport Salvadorans now in the United States back to the civil unrest and violence in their homeland. A far better policy for the United States—a country that regards itself as a great protector of human rights—is to suspend deportations until El Salvador has had a chance to cool down. And, contrary to what the Reagan Administration has said—things have not cooled down yet.

Tutela Legal, the human-rights monitoring office of the Archdiocese of San Salvador, has documented that death squad killings in 1985 are higher than in 1984. From Jan. 1 to June 20 of this year, more than 77 persons were murdered by the death squads. From April 1 to June 20, 15 civilians were assassinated by members of the Army, security forces or civil defense forces, and there were 10 killings by guerrilla forces.

The number of displaced persons inside of El Salvador continues to grow; the U.S. Embassy in San Salvador estimates that there are now 525,000. People continue to stream out of areas where heavy bombing and fighting have made it impossible for them to live. Also contributing to the displacement is the Salvadoran military, which has begun forcibly relocating civilians away from conflict areas.

In addition, based on testimony of persons who were displaced when areas they lived in came under attack, Tutela Legal reports that from April 1 to June 20 of this year there were 341 persons killed in military operations—the majority of whom are believed

to be civilians. These people were not singled out for death; rather, they were victims of the indiscriminate war now raging in El Salvador.

Granting Salvadorans a temporary stay of deportation should not be interpreted as a blow to President Jose Napoleon Duarte or as a statement on U.S. foreign policy in the region. That is an entirely different debate. Instead, by offering Salvadorans temporary safe haven, we are merely recognizing that a general condition of violence and civil unrest currently exists in El Salvador making it unsafe for them to return to their homeland.

The Administration, with the stroke of a pen, could remedy this situation by granting Salvadorans extended voluntary departure status. This executive action temporarily halts deportations of persons from a country experiencing extreme civil strife or serious human-rights violations. Extended voluntary departure applies to the nationals as a group and covers a specified period, subject to review and extension. It has been granted 15 times in the past 25 years and currently applies to Poles, Afghans, Ethiopians and Ugandans. It has been granted to nationals regardless of their original motive for entering the United States.

Many Administration officials, ignoring the fact that motives for migration are irrelevant, say that Salvadorans should not be granted extended voluntary departure status because, they claim, almost all Salvadorans are economic migrants. According to the U.S. Census Bureau, however, there were only 94,000 Salvadorans in the United States legally and illegally in 1980, very early in the civil conflict. Today, it is estimated that as many as 500,000 Salvadorans may be here. This would certainly suggest a strong correlation between the war and increased Salvadoran migration to the United States.

It is often stated that those Salvadorans who truly have reason to fear death or persecution if returned home need only apply for political asylum. Last year, 328 Salvadorans were granted asylum, while more than 13,000 applications were denied. Obviously, asylum is not a viable option for many Salvadorans in the United States, who may not be able to prove an "individualized fear of persecution" but, nonetheless, are fearful of return to their homeland at this time. This is why extended voluntary departure status is appropriate for Salvadorans—just as it is for Poles, Ethiopians, Afghans and Ugandans.

Opponents of conferring this status have complained that there is no evidence that deported Salvadorans have been persecuted or killed. Yet there are studies on this particular subject that present evidence to the contrary. The whole issue of the fate of returnees, however, is not central. In the past, the question of whether someone would be killed upon return was not a criterion used in granting extended voluntary departure status—rather, grants focused on civil strife and general conditions of human rights in the home country.

Along with Sen. Dennis DeConcini (D-Ariz.), I have introduced legislation to offer Salvadorans a temporary stay of deportation, which would be similar to extended voluntary departure status. It enjoys broad bipartisan support in both houses of Congress. For many Salvadorans, this may be the only hope.

ON THE 50TH ANNIVERSARY OF THE EASTER SEALS SOCIETY IN ALLEGHENY COUNTY

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. COYNE. Mr. Speaker, I would like to draw the attention of my colleagues to a significant community institution located within my congressional district in Pittsburgh, PA. I am speaking of the Easter Seal Society of Allegheny County. This institution is celebrating 50 years of service to the handicapped in the Allegheny community.

When the society was first established, half a century ago, the program was run by a handful of Kiwanians who voluntarily transported children to area hospitals for treatment and braces. Now celebrating its 50th year, it has a staff of 150 professionals and highly trained personnel complemented by a dedicated force of volunteers. The present society maintains an infant program, preschool services and, special education schools. The society also supplies gainful employment for handicapped individuals in its print shop, news clipping service and work activities center.

The society is committed to the changing needs of the handicapped in our world today. The goal of each person on staff is to enable the disabled to attain the greatest independence and productivity possible.

Mr. Speaker, it is my privilege to commend the Easter Seal Society on the valuable services it provides to the citizens of Allegheny County in Pittsburgh. I know that my colleagues will want to join with me in expressing our collective appreciation to the officers, board members, and volunteers of the Easter Seals Society, for a half century of selfless service to the handicapped.

CHARLES LOTT KAUFMAN

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. WHITEHURST. Mr. Speaker, last week Norfolk, VA, lost an illustrious adopted son. Charles L. Kaufman came to the city as a young man to make his career, but his success over three generations cannot be measured simply in personal terms. The honor that came to him in 1930 of being recognized as Norfolk's "First Citizen" remained essentially his all of his life.

The transition of Norfolk from a slum-ridden undistinguished seaport to a dynamic, progressive commercial metropolis was Charles Kaufman's fulfilled dream. Over a 50-year period he worked tirelessly in the company of other dedicated citizens to achieve that goal. His leadership and his personal generosity brought about the creation of educational and health care facilities that have benefited many thousands of our people and will continue to do so far into the future. His efforts to erase the blight of inner-city slums made possible affordable, healthful, and comfortable housing for Norfolk's disadvantaged citizens.

His monument, Mr. Speaker, is one that Mr. Kaufman was privileged to live to see: A community of beauty and promise, one where those who would follow him would be able to build upon a foundation he laid, being guided by his inspiring example.

Those of us who had the privilege of knowing him have lost a very dear friend, but our community is the richer for his having been an integral part of its growth and development. I am pleased to include at this point in the RECORD an editorial from the October 3, 1985, Virginian-Pilot and an article by a popular columnist, Guy Friddell, from the October 4 paper, both of which give eloquent testimony to the achievements of our late First Citizen.

[From the Virginian-Pilot, Oct. 3, 1985]

CHARLES LOTT KAUFMAN

Charles Lott Kaufman was the prime mover in the transformation of downtown Norfolk from a decaying crime- and disease-plagued inner-city area into a thriving, still-developing regional financial, medical and education center. From his downtown law office, where he died this week at age 89, Mr. Kaufman could survey a scene ever changing for the better and take justifiable pride in his sizable contribution to that phenomenon.

Public-spirited, energetic and bold, he was among the nation's first proponents of slum demolition and urban renewal to restore luster to aging cities. Norfolk, to which he had come in 1919 to practice law, was the specific beneficiary of his concern—a concern born of dismay at the squalid condition of the city, which he and a handful of other civic leaders compellingly documented in 1935.

For 28 years chairman of the Norfolk Redevelopment and Housing Authority board, Mr. Kaufman presided over the bulldozing of the old downtown and participated officially in arrangements that led to handsome new construction on the cleared acreage. Both as member and president of the Norfolk General Hospital board, he fostered expansion of the hospital and establishment of Eastern Virginia Medical School. As a member of the advisory board of the Norfolk Division of the College of William and Mary, he was among the small group of Norfolk leaders who persuaded Gov. Albertis S. Harrison Jr. to endorse severance of the Norfolk Division from its parent institution and establishment of the four-year state college that is now Old Dominion University.

A prodigious raiser of funds for worthy causes-notably, Norfolk General, Eastern Virginia Medical School and ODU—Mr. Kaufman himself donated generously to community institutions. His enthusiasm for economic development and civic improvement—of all things once unashamedly considered "progress"—was informed by a fine intelligence, an advanced social consciousness and an absence of illusions about the ways of the world.

A companionable man at ease every where, he was respected and cherished by his contemporaries. His was a long life, and an uncommonly useful one. His example

will continue to evoke admiration, and to inspire.

[From the Virginian-Pilot, Oct. 4, 1985]

NORFOLK IS A MONUMENT TO KAUFMAN

(By Guy Friddell)

The funeral Thursday for Charles Lott Kaufman drew a host of friends with whom he had worked for nearly four decades in shaping modern-day Norfolk. They filled Ohef Sholom Temple, which faces Norfolk's Stockley Gardens.

The earliest of many honors that came Kaufman's way during a long, productive life, and one that he seemed to cherish especially, was that of First Citizen of Norfolk, awarded to him in 1930, when he was 34. "I've been working ever since to try to earn it," he told a reporter in 1969.

In the throng spilling out of the massive old temple after the service was Roy B. Martin Jr., Norfolk's mayor from 1962 though 1974. "If ever there was an all-time No. 1 citizen of Norfolk, it was Chuck Kaufman," Martin said. "He was the spark plug of so much that took place in redevelopment and housing, which, to me, was the rebirth of Norfolk."

Kaufman, who was 89, died Tuesday while, typically, at work in his downtown Norfolk law office.

Thomas F. Maxwell, Norfolk's city manager from 1956 to 1970, observed that Kaufman, as chairman of the board of the Norfolk Redevelopment and Housing Authority, "always made its presentations to City Council in such a way that they could not be refused. The council never turned down one of his projects."

Kaufman, a slight figure, did not have a commanding physical presence, but eyes turned his way when he entered a room. His prevailing expression was one of good humor, as if he were enjoying an exquisite joke. There was an intentness about him, too, a twinkle, mainly around the eyes behind the large glasses. The overall impression was of a sharply focused intellect, a positiveness of manner in approaching a problem.

"Mr. Kaufman did more in improving the city through the housing authority than could ever have been done in any other fashion," Maxwell said.

He was a delight to work with, remarked the former city manager, "eloquent in his choice of words, always well versed in what was needed for a project and what it would take to meet the need, and he always had time to listen to the other fellow's viewpoint. I've never worked with anyone that was easier to get along with."

Pretlow Darden, a member of the City Council that won the first urban renewal grant awarded in the United States, observed that Kaufman and Larry Cox, the housing authority's executive director, "knew the rules better than the people in Washington knew them. We got our full share of redevelopment programs, and we took advantage of every one we could." At first many real estate officials opposed the program, "and if we had to defend anything we were doing, he was our spokesman. That mind of his never slowed up."

Kaufman was most unselfish, Darden said. "I never heard a word to indicate he had a selfish bone in him. We ought to just be thankful we had him as long as we did."

Three qualities among many—fairness, compassion, intelligence—brought people to him quickly, Cox said. "In a very mild and unobtrusive way, he was a teacher the entire time you were with him. Every time you learned from him. He was always accessible, never out of reach. He was at his desk by 7:30 in the morning and was rarely out of the office before 8 at night.

"I had the impression he worked with law clients early in the morning and late in the afternoon and the time in between he devoted to civic affairs and the concerns and needs of others. On Saturday, during the winter, we had lunch and then we would drive around the city and see what was going on."

Dr. Mason Andrews, who worked with Kaufman in the founding of the Eastern Virginia Medical School, prized most Kaufman's "ability to listen sensitively and yet to examine analytically in making a judgment, and, once it was made, to support it with the same skill. He radiated gentleness and respect for others, which helped bring out the best in the rest of us."

In his sermon, Rabbi Lawrence A. Forman observed that Kaufman, through his commitment, honesty and a disciplined and compelling personality, was able to see his dreams for Norfolk "turn into the sunburst of reality." His personality's impact, his vigor, dynamism and vitality "brought about the expansion of many of our most important civic, social, educational and cultural institutions."

Forman applied to Kaufman's work in Norfolk the inscription on the tomb of British architect Christopher Wren: "If a monument is required, then look around!"

THE TESTS GO ON

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. MARKEY. Mr. Speaker, today is the 22d anniversary of the signing of the Limited Test Ban Treaty by President John F. Kennedy. To mark this anniversary, a number of high-ranking officials from the Kennedy administration have called upon the Reagan administration to join the nuclear weapons testing moratorium announced by Soviet General Secretary Gorbachev in July.

The officials include Ambassador W. Averall Harriman, who negotiated the Limited Test Ban Treaty, former Atomic Energy Commission Chairman Glenn Seaborg, former Under Secretary of State George Ball, and former Presidential Advisor Glenn Seaborg. In their statement, these officials noted that "Twenty-two years later, the promise of a total halt to nuclear testing, below ground as well as above, remains unfulfilled." The officials recommend that "The United States * * * meet the Soviets' challenge, join the moratorium, and work to complete a total test ban treaty."

Twenty-two years ago, President Kennedy formally signed the documents for ratification of the Limited Test Ban Treaty. In remarks delivered in the Treaty Room of the White House, he looked to the future, declaring that, "This small step toward safety can be followed by others longer and less limited, if also harder in the taking. With our courage and understanding enlarged by this achievement, let us press onward in quest of man's essential desire for peace."

I firmly believe that if President Kennedy were alive today, he would urge us to press forward in our quest for peace by joining the Soviet testing moratorium. In June 1963, Kennedy announced that the United States "does not propose to conduct nuclear tests in the atmosphere so long as other states do not do so." He explained that "such a declaration is no substitute for a formal binding treaty, but I hope it will help us achieve one. Nor would such a treaty be a substitute for disarmament, but I hope it will help us achieve it." Five months later, Kennedy signed the Limited Test Ban Treaty.

Today, President Reagan has an opportunity to enter into a moratorium on underground nuclear testing, a moratorium that could pave the way to fulfillment of Kennedy's goal of a comprehensive test ban. Sadly, the administration refused to join this moratorium, invoking vertification concerns and a need to conduct reliability testing. Both arguments have been disputed by a powerful body of scientific opinion.

In an editorial in this morning's New York Times, Tom Wicker argues that "The real reason the administration opposes even negotiating for a C.T.B. is its desire to continue nuclear testing—for Mr. Reagan's general military buildup, for the development of new weapons like the warhead for the submarine-launched Trident D-5 missile, and for what the President calls his 'nonnuclear' strategic defense initiative—which in fact requires nuclear explosions to produce x ray laser beams."

I would like to bring this editorial to the atttention of my colleagues.

[From the New York Times, Oct. 7, 1985]

THE TESTS GO ON

(By Tom Wicker)

On Oct. 7, 1963, little more than a month before his death, President Kennedy signed the Limited Test Ban (L.T.B.) Treaty ending nuclear tests in the atmosphere. Observing the anniversary, a number of officials of the Kennedy Administration have issued a call for President Reagan to join the Soviet Union in its moratorium on underground nuclear testing during the last months of 1985.

They might as well be shouting down a rain barrel. Mr. Reagan does not intend to halt U.S. nuclear testing, either by temporary moratorium or by negotiating a comprehensive test ban (C.T.B.) treaty. Senior Administration officials told Leslie Gelb and Michael Gordon of The New York Times that at the summit in November Mr. Reagan would inform Mikhail Gorbachev of that longstanding position.

The statement of the former Kennedy Administration officials serves, nevertheless, as a timely—if futile—reminder that Mr. Reagan's stance directly contravenes lawful obligations the United States has undertaken in two formal treaties ratified by the Senate.

The preamble to the L.T.B. clearly states that the parties are "seeking to achieve the discontinuance of all test explosions of nuclear weapons for all time" and are "determined to continue negotiations to this end."

In the preamble to the Nuclear Non-Proliferation Treaty of 1968, subsequently submitted to the Senate by President Nixon, the L.T.B. commitment to negotiations for an end to nuclear testing was specifically recalled and the parties restated their determination "to continue negotiations to this end."

Notwithstanding those specific national commitments, honored by Presidents Johnson, Nixon, Ford and Carter, the Reagan Administration announced on July 19, 1982, that it would not resume negotiations with the Soviet Union toward a C.T.B. treaty. In December 1982, Mr. Reagan ordered a United States vote against a United Nations resolution that all nuclear testing should be outlawed; the resolution carried, 111 to 1, with 35 abstentions.

Thus did Reagan Administration policy override lawful national commitments, and those senior officials made it clear to Mr. Gelb and Mr. Gordon, that it still does. It's true, of course, that Mr. Reagan is charged with the national security and has to make the ultimate judgement whether some specific test-ban treaty is in the U.S. interest and that nothing in either of the previous treaties could force him to accept a test ban he considered disadvanatageous.

But to take the position that the U.S. will not even engage in goodfaith negotiations to try to work out an acceptable test-ban treaty is, in effect, to argue that the national commitments accepted in the L.T.B. and non-proliferation treaties have no force that the Reagan Administration need recognize. That's exactly the Administration position.

The reason usually given for opposition to a C.T.B. is that it couldn't be adequately verified. The weight of scientific opinon is heavily on the other side; but even if verification were the primary problem, that's a subject for negotiation—for sismic stations on Soviet territory, for instance, since Moscow agreed in principle to such stations during talks with the Carter Administration.

Also cited against a C.T.B. is the need to maintain the reliablity of existing nuclear weapons. Again, powerful scientific opinion—outside, but to some extent within, the national nuclear laboratories—holds that testing is not needed to maintain reliability; but even if it were, deterioration would affect Soviet as well as U.S. stockpiles. And if uncertainty about weapons reliability resulted from a test ban, that might work against either side's risking a first strike.

The real reason the Administration opposes even negotiating for a C.T.B. is its desire to continue nuclear testing—for Mr. Reagan's general military buildup, for the development of new weapons like the warhead for the submarine-launched Trident D-5 missile, and for what the President calls his "nonnuclear" Strategic Defense Initiative—which in fact requires nuclear explosions to produce X-ray laser beams.

So never mind those national commitments, much less the Soviet moratorium. Testing will go no, because Mr. Reagan wants it to.

HOUSTON VISION SHIFTS FROM OIL TO ARTS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. LELAND. Mr. Speaker, I'd like to call attention to the article "Houston Vision Shifts from Oil to Arts" which appeared in th New York Times today.

The article describes the construction of the Wortham Theater Center in Houston, TX. Beyond the economic benefits the center will certainly bring to Houston's growing reputation as one of our Nation's great cultural centers.

I urge my colleagues to read the following article.

[From the New York Times, Oct. 7, 1985]

HOUSTON'S VISION SHIFTS FROM OIL TOWARD ARTS

(By Robert Reinhold)

HOUSTON, Oct. 6.—Construction workers topped off a new building on the edge of downtown Houston the other day. That building, more than anything else, represents Houston's new vision of itself, a statement that gives the lie to its image elsewhere as a burly, uncultured oil town.

The building is the Wortham Theater Center, a sprawling palace of the performing arts that approaches Lincoln Center in New York and the Kennedy Center in Washington in size and, Houstonians hope, will put their city on the cultural map for good.

For all its roughneck image, Houston has emerged in recent years as a major cultural locus. In particular, the luster of its grand opera and ballet, the main tenants of the new center, has been noticed well beyond the borders of Texas.

Never have the arts loomed so important for Houston, as its leaders strive to bring recovery to an economy still lagging from troubles in the dominant oil and gas industry.

PROVIDING ATTRACTIVE AMENITIES

Houston's new theme is diversification. That means attracting new industries and people from all over the world. That, in turn, means providing amenities, among which the arts are looming nearly as large as good schools, churches and transportation.

"Improving the quality of life is important to this city," said Robert Cizik, co-chairman of the Houston Lyric Theater Foundation, which is raising funds for the $70 million center. "Our population is a melting pot of the United States, and this center will help us attract and keep them."

Mr. Cizik, president and chairman of the board of Cooper Industries in Houston is a transplanted Yankee who came from Connecticut in 1967.

"If this is going to be a great, world-class city we've got to have facilities for artistic and educated people," said Terrylin G. Neale, the center's chief fund raiser.

Houston is the fourth-largest city in the country in population, but it ranks 25th, just behind Newark, in the number of theater seats.

A CONSIDERABLE THEATER ROW

When it is opened in 1987 the Wortham Center's two halls will form the anchor of a considerable theater row on Texas Avenue downtown. Across the street is the Alley Theater, a repertory company, and on the next block is Jones Hall, the concert hall.

The new center was needed because Jones Hall, opened in 1966 and home for the Houston Symphony, Grand Opera and Ballet, is so overlooked that the ballet and opera must spend most of their seasons on the road. Although it is considered a fine concert hall, the 3,000-seat Jones Hall is ill-suited to opera and ballet.

Already the theater district is bringing a dose of fizzy night life to downtown Houston, which is architecturally spectacular but by 5:15 P.M. is as deserted as Wall Street on New Year's Day. Restaurants have opened and the theater organizations, trying to persuade Houstonians that there is life after 5, are offering meals and performances as packages.

The hope is that all this will spill over into the nearby historic, but still seedy, Market Square area.

HALLS WILL BE FANCY

The Wortham Center is named after the late Gus S. Wortham, a Houston insurance magnate and philanthropist. Its brick facade, with a huge, catehdral-like arched entrance, is not fancy, but the insides will be.

There are to be two halls, the 2,183-seat Alice and George Brown Theater and the 1,058-seat Roy and Lillie Cullen Theater. The large hall will have full rear and side stages, from which stage sets can be moved to the main stage in minutes. There are also to be five rehearsal halls and the most advanced technical gear. The architect is Morris-Aubry of Houston.

All of this will be like getting out of jail for the ballet and opera.

The Houston Ballet, which opens a 13-performance season at New York's City Center Wednesday, plans to double the number of its Houston performances to 100. It also expects to expand the 40-member troupe to 50, and its artistic director, Ben Stevenson, is considering mounting "Eugene Onegin" and other productions too large for the Jones Hall stage.

Similarly, the acclaimed Houston Grand Opera expects to expand its performances to six of each of its six yearly productions. It plans to use the smaller hall for experimental works and, with the larger house's expansive facilities, could consider mounting such major productions as Wagner's four-opera "Ring" cycle.

SMALLER ARTS GROUPS

The Houston Symphony Orchestra is to remain in the old hall but will no longer have to rehearse half the time in the acoustically abysmal rehearsal hall, according to Gideon Toeplitz, its executive director.

The center is expected to help such smaller arts groups as the Texas Chamber Orchestra and the Southwest Jazz Ballet Company. The Society for Performing Arts, which brings out-of-town groups to Houston but has been limited by Jones Hall, plans to expand its offerings. While his company will not use the new hall, Tom Spray, managing director of the Alley Theater, hopes it will create an "energetic zone" downtown.

The Wortham Center is billed as the largest built with private funds in the country, although the city donated the two-block parcel of land, worth perhaps $20 million, and is to subsidize the center's operation. To date pledges for $62 million of the $70 million needed have been obtained from such sources as the Wortham, Brown and Cullen

Foundations, and Exxon, Conoco, Arco and other corporations.

Given the parlous state of the energy and construction industries here, however, raising funds has been slow, and the center resorted to some creative financing. It persuaded the City of Houston Industrial Development Corporation to issue $56.5 million in tax-exempt bonds, backed by a letter of credit from the Texas Commerce Bank. The center invested this money, for which it paid about 4 percent interest, at much higher rates, and earned $4 million.

Another $4 million remains to be raised. Some of it is to come from a gala Tuesday at the Saks Fifth Avenue store at Houston's Galleria shopping mall. Saks has pledged $35,000, and Macy's, new to Houston, $75,000.

Whatever the economic impact of the center, many hope it will create a semblance of urban street life. Like most newer cities in the Southwest, Houston was designed for automobiles, not people; many parts of town don't even have sidewalks.

It is, moreover, a city where getting to work early and working hard to get ahead has been the prevailing ethic, not staying up late at the ballet.

Some say they believe Houston, in its maturity, might relax a bit, have a little fun. "I wish we had a lively downtown, where people hung out after performances," said Elizabeth McMahon, marketing director for the opera. "Maybe Houston will stay up after 10 P.M."

A ROCKY MOUNTAIN COMPANION

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. WIRTH. Mr. Speaker, for years, Colorado has been captivated by Pete Smythe, a Rocky Mountain companion to us all. The following profile of a Colorado legend should be shared with all of our colleagues.

[From the Denver Post]

PETE SMYTHE STILL SPINNING YARNS OF A SIMPLER, MORE RUSTIC TIME

(By Clark Secrest)

Pete Smythe is known to today's broadcast audiences as the homey pitchman for a savings and loan firm—the fatherly gent with the string necktie and the too-small hat.

Through the 1950s and '60s, however, Smythe was a star on Denver radio, holding forth over KOA for two decades as the mayor (and school board president) of the make-believe hamlet of East Tincup, Colo.—"the slowest-growin' town in the nation, and we aim to keep it thataway"—long before Garrison Keillor created a similar mythical town on National Public Radio's popular "Prairie Home Companion."

Legions of Coloradans still fondly remember Smythe, and today he is the hottest thing on the local luncheon and fund-raising circuit. Smythe frequent'y does his humor routine at five luncheons a week, plus banquets and fund-raisers.

On Thursday, for instance, he will bring his country-store shtick to a $125-per-person benefit dinner at the Fairmont Hotel for the Medical Care and Research Foundation, which aids senior citizens. The emcee will be another old-time broadcaster, Ed "Sheriff Scotty" Scott. Also appearing will be the eight-member Roundup Rider Blister-Bottom Symphony Orchestra, which features Smythe as pianist. (Tickets are available at 831-0267.)

Smythe, 74, was reared in Glenrock, Wyo., where his parents owned a genuine old-time country store. He became adept at the saxophone and clarinet and eventually found his way to the University of Colorado, but he never got a diploma. "I was there for seven years," he recalls with a chuckle, "and then they asked me to leave"—even though he had the best dance band on campus.

The next stop was Denver's now demolished Cosmopolitan Hotel, where he performed with his 12-piece dance band. But radio was the thing in those days, and in 1941 Pete became a disc jockey on the old KMYR with a show titled "Meet the Boys in the Band." The city had only four radio stations then, and Pete soon found himself at the biggest, KOA, with "Smythe's General Store"—named after his father's old establishment in Glenrock.

The KOA show was heard "along the barbed-wire network" from 1951 to 1969, six days weekly from 6:30 to 10:30 a.m. Smythe dispensed countrified homilies, played the piano, spun records and presented a colorful procession of East Tincup residents—all of whom sounded very much like Pete Smythe.

Actually, East Tincup began as just Tincup, but Pete had overlooked the real Tincup, Colo.—a near-ghost town near Taylor Park Reservior east of Crested Butte. "We had to change the name of our town," Smythe chuckles, "because all those Texans and Oklahomans with vacation houses in Tincup started complaining that people were comin' there and lookin' for our store, and ruining their fishin.' "

"Smythe's General Store" became so popular that it jumped to television in 1954, where it lasted for a decade. On the radio, one had to envision Pete's store, but on television the cracker barrel and the player piano and the potbelly stove and Pete Smythe, prop., suddenly became visual.

Ultimately, radio became all-music and network programming took over television, so Mayor Smythe took off in other directions. He dabbled in politics and wrote pamphlets with such countryish titles as "Springs for the Wagon and Grease for the Wheels," "Something for the Daily Battle of Life" and "Sweepin's from Smythe's General Store."

They were full of homespun observations: "It was so windy in Wyomin,' it took three of us to hold a saddle blanket over the keyhole" . . . "We was so poor that we used to bait the mousetrap with IOUs" . . . "He was so ugly, when he was born we put him out on the porch to see if'n he'd bawl or bark."

But show business travels in cycles. Some radio stations, including Smythe's old employer KOA, have dumped music and returned to talk, of the sort Smythe helped pioneer. Pete has no thoughts of resuming "Smythe's General Store" or becoming a talk-show host, though he proved pretty adept at it when he appeared last week on Woodrow Paige, Jr.'s KNUS talk program.

Smythe, however, takes pride and comfort in noting that "Prairie Home Companion" "does exactly what we used to do—creating a little ol' town."

"People call me up and say, 'Hey, they're doing the very same thing you did 20 years ago!' "

BLIND FAITH IN FREE TRADE DOESN'T PAY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, October 7, 1985

Mr. MARKEY. Mr. Speaker, in the coming week, the House will vote on H.R. 1562, the Textile and Apparel Trade Enforcement Act. On the one hand, this bill is criticized as protectionist, leading to decreased efficiency, trade wars, and eventually depression. At the same time, this bill is praised as the savior of the American textile industry. Wherein lies the truth? The truth is far more complicated and complex. An article, "Blind Faith in Free Trade Doesn't Pay," found in the October issue of Business Week, highlights the fallacy of this "protectionism versus free-trade" dichotomy.

The article points out that in reality the world textile markets are not "creatures of free trade." The author notes that textile trade is already subject to, first, the Multifibers agreement, which regulates textile imports to Western Europe and the United States, second, the subsidization and protectionism found among Asian textile exporters, and finally third, the sharp limitations established by the Japanese and European communities on textile imports. In reality, "the United States is the only player with anything close to an open market in textile imports."
